# Appendix A

## Combined Specialty Training Programs

This section contains programs which offer combined specialty training. These programs have been approved by each respective specialty board and the combined training is accepted for board certification.

Neither the Accreditation Council for Graduate Medical Education (ACGME) nor the Residency Review Committees have reviewed these combined programs. These lists have been provided by the staffs of the specialty boards and are printed here as a service to the reader. Requests for information about the guidelines for these programs should be directed to the specialty boards.

Applicants to combined training programs are encouraged to review all of the requirements for admission to the certification process of each Board, which appear in other sections of this *Directory*.

### Internal Medicine/Emergency Medicine

The American Board of Internal Medicine and the American Board of Emergency Medicine offer dual certification for candidates who have completed at least 2 and a half years of suitable accredited training in *each* specialty. A combined residency consists of 5 years of balanced training in the two disciplines. It is strongly recommended that the participating residencies be in the same academic health center.

To meet eligibility for dual certification the resident must satisfactorily complete 60 months of combined training and be verified by the directors of both programs. The certifying examinations cannot be taken until all 5 years of training in both specialties are completed.

### Internal Medicine/Neurology

The American Board of Internal Medicine and the American Board of Psychiatry and Neurology offer dual certification for candidates who have completed 5 years of combined training suitable to both Boards. A combined residency in internal medicine and neurology must include at least 5 years of coherent training integral to residencies in the two disciplines. It is strongly recommended that combined training be in the same institution.

To meet eligibility for dual certification the resident must satisfactorily complete 60 months of combined training and this must be verified by the directors of both programs. The written certifying examinations may not be taken until all required years of training in both specialties are satisfactorily complete.

### Internal Medicine/Pediatrics

The American Board of Internal Medicine and the American Board of Pediatrics offer dual certification in internal medicine and pediatrics. A combined residency must include at least 4 years, 2 years in each specialty, of coherent training integral to residencies in the two disciplines. The participating residencies should be in the same academic health center. Continuity clinics in each specialty should be provided throughout the 4 years.

To meet eligibility requirements for dual certification, the resident must satisfactorily complete 48 months of combined training and clinical competence in both specialties must be verified by the directors of both programs. The certifying examinations cannot be taken until all training is completed.

### Internal Medicine/Physical Medicine and Rehabilitation

The American Board of Internal Medicine and the American Board of Physical Medicine and Rehabilitation offer dual certification for candidates who have completed at least 2 and a half years of suitable accredited training in *each* specialty. A combined residency must include at least 5 years of coherent training integral to residencies in

the two disciplines. It is strongly recommended that combined training be in the same institution.

To meet eligibility for dual certification the resident must satisfactorily complete 60 months of combined training and this must be verified by the directors of both programs. The written certifying examinations may not be taken until required training in a specialty has been satisfactorily completed. The certifying examination in internal medicine cannot be taken prior to the fall of the PGY5 year.

### Internal Medicine/Psychiatry

The American Board of Internal Medicine and the American Board of Psychiatry and Neurology offer dual certification in internal medicine and psychiatry. A combined residency must include at least 5 years of coherent training integral to residencies in the two disciplines. It is required that combined training be in the same institution.

To meet eligibility for dual certification the resident must satisfactorily complete 60 months of combined training and this must be verified by the directors of both programs. The written certifying examinations may not be taken until all required years of training in both specialties are satisfactorily completed.

### Neurology/Physical Medicine and Rehabilitation

The American Board of Neurology and the American Board of Physical Medicine and Rehabilitation offer dual certification in neurology and physical medicine and rehabilitation. A combined residency must include 5 years of combined training. This training must follow a PGY1 year that meets the requirements for neurology. The combined training should be completed in the same institution. All training must be satisfactorily completed prior to admission to the certifying examinations of each Board.

### Pediatrics/Emergency Medicine

A special agreement exists between the American Board of Pediatrics and the American Board of Emergency Medicine whereby an applicant may fulfill the training requirements of both Boards by completing joint training in 5 years. All 5 years should be completed in the same combined training program. Exceptions must be approved by both Boards.

Applicants may not appear for the certifying examinations until all training has been completed.

### Pediatrics/Physical Medicine and Rehabilitation

A special agreement exists between the American Board of Pediatrics and the American Board of Physical Medicine and Rehabilitation whereby an applicant interested in pediatric rehabilitation can qualify for admission to the certifying examinations of both Boards. The residency training can be completed in 5 years. It is recommended that all training be completed at one academic institution; any deviation will require prospective approval by both Boards.

Applicants may not appear for the certifying examinations until all training has been completed.

### Pediatrics/Psychiatry/Child Psychiatry

The American Board of Pediatrics, the American Board of Psychiatry and Neurology, and its Committee on Certification in Child and Adolescent Psychiatry have developed a pilot project to determine the feasibility of training child psychiatrists via a different format. This is a 5-year curriculum with 24 months of general comprehensive pediatrics, 18 months of adult psychiatry, and 18 months of child and adolescent psychiatry, which will satisfy the training requirements for certification in all three areas.

Applicants pursuing training in these programs may not appear for the certifying examinations until all training has been completed. Credit for training via this route may be obtained *only* by training in one of these programs.

# Appendix B

## Certification Requirements

### American Specialty Boards

The Council on Medical Education of the American Medical Association and the American Board of Medical Specialties (formerly the Advisory Board for Medical Specialties) have now approved 23 examining and certifying boards on the basis of minimal standards listed in the "Essentials for Approval of Examining Boards in Medical Specialties."

The primary purposes of the boards are (1) to conduct investigations and examinations to determine the competence of voluntary candidates, (2) to grant and issue certificates of qualification to candidates successful in demonstrating their proficiency, (3) to stimulate the development of adequate training facilities, (4) to cooperate with the Accreditation Council for Graduate Medical Education in evaluating residency training programs, and (5) to advise physicians desiring certification as to the course of study and training to be pursued.

The boards are in no sense educational institutions, and the certificate of a board is not to be considered a degree. It does not confer on any person legal qualifications, privileges, nor a license to practice medicine or a specialty. The boards do not in any way interfere with or limit the professional activities of a licensed physician, nor do they desire to interfere in the regular or legitimate duties of any practitioners of medicine.

Table 1 is intended to be an aid primarily to graduates of foreign medical schools. The details of requirements for certification will be

found on the following pages. Each board has provided the information which is published here for the convenience of physicians interested in certification. Most of the American specialty boards publish booklets containing statements on the requirements for certification. *Specific inquiries concerning certification by a specialty board should be addressed to the appropriate official whose name and address is listed in Table 2.*

The *ABMS Compendium of Certified Medical Specialists*, published for the American Board of Medical Specialties, contains biographical and educational information on each living specialist who had been certified by the ABMS Boards. Executive Vice President of the American Board of Medical Specialties is J. Lee Dockery, MD, 1007 Church Street, Suite 404, Evanston, IL 60201.

The American Board of Medical Specialties is actively concerned with the establishment, maintenance, and elevation of standards for the education and qualification of physicians recognized as specialists through the certification procedures of its member specialty boards. As a corollary, the American Board of Medical Specialties cooperates actively with all other groups concerned in establishing standards, policies, and procedures for assuring the maintenance of continued competence of such physicians.

The American Board and the Council on Medical Education of the American Medical Association, through the Liaison Committee for Specialty Boards, jointly issue the "Essentials for Approval of Examining Boards in Medical Specialties," which document is approved by the House of Delegates of the American Medical Association. Copies of the "Essentials" may be obtained from the Executive Vice President of the American Board of Medical Specialties or from the Council on Medical Education, American Medical Association, 515 North State Street, Chicago, IL 60610.

**Table 1. Summary of American Specialty Board Requirements**

American Board of:	Graduates of US, Canadian or Puerto Rican Schools							Foreign Medical Graduates Special or Additional Requirements			All Graduates			
	License to Practice	Approved Internship or Other Prerequisite	Years of Residency or Other Formal Training	Years of Practice or Other Special Activities	Periods of Credit in Related Fields	Credit for Military Service	Alternate Plans for Training	Osteopaths Eligible for Certification	Accepted Under Certain Conditions	Board Accepts Screening by Nat. Bd. Med. Exam., ECFMG, or Other Method	Special Certificate or Statement Granted	Standard Certificate Granted	Initial Applications or Registration Fee	Total Fees

Urology	X	X	3-4	1.5	X	X	..	X	X	X	..	X	550	1,600

<sup>1</sup> Also certifies in special qualification in diagnostic laboratory immunology with the American Board of Internal Medicine and the American Board of Pediatrics.

<sup>2</sup> Also grants certificate of special qualifications in critical care medicine.

<sup>3</sup> Also certifies in adolescent medicine, clinical cardiac electrophysiology, cardiovascular disease, endocrinology, diabetes, metabolism, gastroenterology, hematology, infectious disease, nephrology, medical oncology, pulmonary disease, rheumatology, diagnostic laboratory immunology, critical care medicine, geriatric medicine, and sports medicine.

<sup>4</sup> Also grants a certificate of added qualifications in surgery of the hand.

<sup>5</sup> Also grants a certificate of added qualifications in pediatric otolaryngology and one in otology/neurotology.

<sup>6</sup> Fee for anatomic pathology only or clinical pathology only is \$900. Fee for combined anatomic and clinical pathology is \$1,000.

<sup>7</sup> Also certifies in subspecialties of adolescent medicine, pediatric cardiology, pediatric critical care medicine, pediatric emergency medicine, pediatric endocrinology, pediatric gastroenterology, pediatric hematology-oncology, pediatric infectious diseases, neonatal-perinatal medicine, pediatric nephrology, pediatric pulmonology, pediatric rheumatology, diagnostic laboratory immunology, and sports medicine.

<sup>8</sup> Also grants a certificate of added qualifications in surgery of the hand.

<sup>9</sup> Also grants a certificate of added qualifications in undersea medicine.

<sup>10</sup> Also certifies in neurology with special qualification in child neurology, subspecialty of child and adolescent psychiatry, and added qualifications certificates in geriatric psychiatry, clinical neurophysiology, addiction psychiatry, and forensic psychiatry.

<sup>11</sup> Certifies in diagnostic radiology, diagnostic radiology with special competence in nuclear radiology, radiation oncology, and radiological physics and one or more of its subfields.

<sup>12</sup> Also certifies in general vascular surgery, pediatric surgery, surgery of the hand, and surgical critical care.

<sup>13</sup> Certification of American Board of Surgery prerequisite. "Credit for Military Service" refers to clinical practice credit.

Note: In this table, those items are marked "x" on which the Board makes specific statement. In most instances, there are additional qualifying statements not indicated in this table. In all instances, refer for details to the board requirements which follow. While all boards may accept the foreign medical graduate under certain circumstances, they do not all specify that ECFMG certification is required. All foreign graduates who contemplate specialty board certification should correspond with the appropriate board at the earliest possible moment.

**Table 2. Approved Examining Boards in Medical Specialties**

<b>Name of Board</b>	<b>Officer</b>	<b>Address</b>	<b>Telephone No.</b>

# American Board of Allergy and Immunology

(A Conjoint Board of the American Board of Internal Medicine and the American Board of Pediatrics)

Stephen I. Wasserman, Chair, San Diego, California  
 William T. Shearer, MD, PhD, Co-Chair, Houston, Texas  
 Emil J. Bardana, Jr., MD, Secretary, Portland, Oregon  
 Laurie J. Smith, MD, Treasurer, Washington, DC  
 John A. Anderson, MD, Detroit, Michigan  
 Mark Ballow, MD, Buffalo, New York  
 William W. Busse, MD, Madison, Wisconsin  
 Thomas A. Fleisher, MD, Bethesda, Maryland  
 John Andrew Grant, MD, Galveston, Texas  
 Philip Lieberman, MD, Memphis, Tennessee  
 Richard F. Lockey, MD, Tampa, Florida  
 Dean D. Metcalfe, MD, Bethesda, Maryland  
 Dennis R. Ownby, MD, Detroit, Michigan  
 Stephen H. Polmar, MD, New Haven, Connecticut  
 Robert R. Rich, MD, Houston, Texas  
 Lanny J. Rosenwasser, MD, Denver, Colorado  
 Robert C. Strunk, MD, St. Louis, Missouri  
 Stanley J. Szeffler, MD, Denver, Colorado  
 Herbert C. Mansmann, Jr., MD, Executive Secretary  
 John W. Yunginger, MD, Executive Secretary Designate  
 American Board of Allergy and Immunology  
 3624 Market Street  
 Philadelphia, PA 19104-2675

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Allergy and Immunology to ascertain whether the information below is current.)*

## Organization

The American Board of Allergy and Immunology, a conjoint Board of the American Board of Internal Medicine and the American Board of Pediatrics (ABAI), was established in 1971 and is sponsored jointly by the American Board of Internal Medicine (ABIM), the American Board of Pediatrics (ABP), the American Academy of Allergy and Immunology (AAAI), the American Academy of Pediatrics—Section on Allergy and Immunology (AAP), the American College of Allergy and Immunology (ACAI), the American Medical Association—Section on Allergy and Immunology (AMA), and the Clinical Immunology Society (CIS).

## Significance of Certification

A certified specialist in allergy and immunology is a physician who has fulfilled the requirements of and has received certification as a diplomate of the American Board of Internal Medicine (ABIM) or the American Board of Pediatrics (ABP) followed by additional certification by the American Board of Allergy and Immunology, a conjoint board of the American Board of Internal Medicine and the American Board of Pediatrics (ABAI). (Note: For the period 1971 through July 1, 1978, physicians could qualify for admission to examination for certification by the ABAI without prior certification by ABIM or ABP under a 10-year practice credential.) Diplomates of the ABAI have detailed knowledge of the underlying pathophysiology and the method of diagnosis, treatment and prevention of allergic diseases such as allergic rhinitis, allergic asthma, urticaria, anaphylaxis, hypersensitivity pneumonitis, atopic and contact dermatitis, and allergic gastrointestinal disorders as well as comparable clinical problems without an apparent allergic etiology or component such as vasomotor rhinitis, non-allergic asthma and idiopathic and/or hereditary forms of urticaria and/or angioedema. Expertise in the management of pulmonary complications of these diseases is a further prerequisite.

In addition, diplomates of the ABAI possess breadth and depth in the understanding of immunochemistry, immunobiology, and applied pharmacology and experience in the application of this knowledge to the diagnosis, management, and prevention of immunologic diseases, such as inborn or acquired defects of host resistance, autoimmune diseases, bone marrow and solid organ transplantation, adverse drug reactions, and other conditions associated with an abnormality of the immune system. Because allergy and clinical immunology is an evolving and expanding area of medicine, Diplomates may vary in their detailed knowledge of some of the aspects of allergy and immunology as defined above. Diplomates have demonstrated to the satisfaction of their peers that they possess the general qualifications specified.

## Certification Process

The ABAI is interested in candidates who have embarked voluntarily on a graduate program of study, with the express purpose of excelling in the practice of the specialty of allergy and immunology. In outlining its requirements, the ABAI hopes to help the candidate select superior educational programs that will develop his/her competency in allergy and immunology. The ABAI believes that all allergists/immunologists should have a fundamental knowledge of the biological science basic to this discipline. Such knowledge is essential to the continued professional progress of any qualified allergist/immunologist. The ABAI anticipates that adequate knowledge in basic science, as applied to this discipline, will be acquired by the candidates during a postmedical school training program. The ABAI wishes to emphasize that time and training are but a means to the end of acquiring a broad knowledge of allergy and immunology.

The candidate must demonstrate competency to the ABAI in order to justify certification in this discipline. The responsibility of acquiring the knowledge rests with the candidate. The ABAI is responsible for the establishment and maintenance of the standards of knowledge required for certification. Each candidate for certification must satisfy the general and professional qualifications listed below.

The examination reflects the current *Special Requirements for Residency Training in Allergy and Immunology* and the content outline determined by the board of directors, which is distributed with the application, and the following:

Candidates for certification must be familiar with the fundamental elements of the immune system, such as the types of immune cells contained in the immune system, the collections of immune cells that form anatomical organs of immunity, the circulation patterns of immune cells that comprise the physiologic functions of the immune system, and the abnormal conditions of the immune system that constitute immunopathology. Moreover, the candidate will be expected to be proficient in understanding the molecular basis of allergic and immune reactions, including cell membrane signal transduction pathways, gene activation events, cytokine release and receptor targeting, and cellular-differentiation. Proficiency must be demonstrated in the diagnosis and treatments of allergic and immunologic diseases. Since the ABAI is a conjoint board representing pediatric and adult medicine, the candidate must master the spectrum of allergic and immunologic diseases as it presents in children and adults. In addition to a familiarity with allergic diseases, such as allergic rhinitis, asthma, atopic dermatitis, and urticaria, the candidate must be proficient in knowledge of autoimmune conditions such as rheumatologic disease, inflammatory bowel disease, immune-based endocrinopathies, and neuroimmunological disorders. Equally important as competence in diseases of immune system dysfunction is the knowledge of human pathology that results from an absence of immunity, either whole or partial, congenital, or acquired. Thus, an understanding of the immunodeficiency states is required, including congenital absence of lymphocyte populations, such as severe combined immunodeficiency; lack of specific antibody production, such as x-linked agammaglobulinemia; absence of complement components, such as C2 deficiency; lack of specific neutrophil function, such as chronic granulomatous disease; absence of adhesive cellular glycoproteins, such as leukocyte adhesion deficiency; and dysfunction

tional states of the immune system produced by external agents, such as the acquired immunodeficiency syndrome produced by the human immunodeficiency virus.

It is important for the candidate to demonstrate proficiency in the selection of appropriate clinical and laboratory tests which aid the formulation of a clinical diagnosis based upon obtaining a detailed medical history and performing a complete physical examination. The candidate must understand the scientific basis of the following list (non-inclusive) of tests: serum immunoglobulin determination, functional antibody measurement, complement component and functional assays, lymphocyte subset analysis using monoclonal antibodies and flow cytometry, lymphocyte proliferation assays with mitogen and antigens, and neutrophil and monocyte chemotaxis, phagocytosis, and killing assessment. In addition, competence must be demonstrated with the use of molecular diagnostic techniques involving the binding of ligands to nucleic acid or polypeptide sequences, such as assays involving restriction fragment length polymorphisms, DNA binding proteins, messenger RNA, and Western blots. The importance of DNA replication technology must be understood, such as that demonstrated in the polymerase chain reaction. The molecular basis for allergy skin testing must be understood in the context of the detailed molecular events occurring in the tissue mast cell and blood basophil, particularly the release of preformed mediators, such as histamine, and newly formed mediators, such as leukotrienes and prostaglandins. Similarly, skin testing for T-cell competence with recall antigens must be understood in relation to antigen presentation, cytokine secretion and interaction, and lymphocyte subset activation and participation. Candidates must also have familiarity with the misuse of standard tests and controversial tests in allergy and immunology. The candidate must understand the principles and the rigors of experimental clinical trials in determining safety, toxicity, and efficacy of treatments and drugs for allergic and immunologic diseases. Aspects of data analysis, biostatistics, and epidemiology will be important for the candidate to appreciate.

A corollary of the competence of the candidate in the pathophysiology, clinical presentation, and immunologic testing of allergic and immunologic disease is the knowledge of appropriate treatments of patients. For example, the common aspect of all types of asthma is the presence of pulmonary inflammation. Definitive treatment of asthma demands that therapies be utilized that include interruption of the inflammatory response. Thus, use of drugs that decrease pulmonary inflammation in asthma, such as cromolyn sodium and glucocorticoids, must be understood by candidates for certification. Based upon the molecular knowledge of the allergic response, the candidate must appreciate the importance of allergen avoidance and antihistamine treatment for allergic rhinitis before initiation of the more intense treatment of immunotherapy. In the latter therapy, candidates must demonstrate competence in allergen selection and dose adjustment in successful treatment regimens. The use of immune and gene replacement therapy for immunologic diseases must be understood, such as: intravenous gammaglobulin for antibody deficiencies or certain inflammatory conditions, interferon for chronic granulomatous disease or vasculitides, HLA-identical and HLA-haploidentical (T-cell depleted) bone marrow transplants, for cellular immunodeficiencies, and gene replacement therapies for the immunodeficiency associated with adenosine deaminase deficiency and pulmonary diseases, such as cystic fibrosis, and alpha 1 anti-trypsin deficiency.

The candidate qualifies for examination by *having passed* the certification examination of the ABIM or ABP, which requires 3 years of postdoctoral training in programs accredited by the Accreditation Council for Graduate Medical Education (ACGME), and by presentation of evidence, acceptable to the board of directors, of at least 2 years of full-time residency/fellowship in allergy and immunology programs accredited by the ACGME or other acceptable training in allergy and immunology programs. These programs are listed in the *Directory of Graduate Medical Education Programs*, published by the American Medical Association.

And documentation from the program director evaluating and substantiating clinical competence and 2 full-time years of training in allergy and immunology. Areas to be reviewed include clinical judgment, medical knowledge, clinical skills of history taking, physical examination, and procedural skills, humanistic qualities, attitudes and professional behavior, medical care (utilizing laboratory tests and diagnostic procedures), commitment to scholarship, and work habits. The training program director must also provide written evidence of the candidate's clinical experience and readiness to sit for the examination. In compliance with the ACGME *Special Requirements for Residency Training in Allergy and Immunology*, a semi-annual record must be maintained with copies to the ABAI for tracking purposes. The evaluation form together with the explanation of ratings scale may be obtained from the ABAI.

ABAI limits the number of years from completion of training and acceptance to the certification process. Candidates admitted prior to January 1, 1992 will have "active" status through 1997 to complete the process. After January 1, 1992, new candidates will have 6 years or three examination cycles to complete the process after their training. If new candidates do not gain certification within this interval, they will have "inactive" status and will be readmitted into the process upon documentation of a valid and unrestricted license, 100 hours CME Category I credit in the previous 2 years, and successful performance on an ABAI qualifying examination.

And upon written release of the candidate, documentation from the chief of medicine or pediatrics, ABAI diplomates in the geographical area, chiefs of community hospitals, or officers of state or regional societies to verify the medical, ethical, and moral standing together with the clinical competence of the candidate as a specialist in allergy and immunology. Candidates beyond 2 years of their training will be required to include an appointment in good standing on a hospital staff.

And evidence of a valid, unrestricted license to practice medicine in a state, territory, possession, or province of the United States or Canada or in the United States armed forces or a written explanation of extenuating circumstances. Candidates with a restricted, suspended, or revoked license at the time of application or examination will not be admitted to the examination or certified.

*Conjoint Committees*—The nature of a conjoint board requires involvement of the sponsoring primary boards through understanding, evaluation, trust and input into critical areas of decision making. With these concepts in mind, the ABAI has formed two advisory committees with representation by the ABAI, the ABIM, and the ABP. The conjoint credentials committee will review and recommend the credentials of candidates for the certification examination to the Board for its determination. The conjoint standards committee will review and recommend the passing grade for the certification examination to the Board for its determination.

## Recertification Process

Beginning with 1989, new ABAI diplomates have been issued certificates valid for 10 years. Diplomates certified prior to 1989 are not affected by this policy. However, all diplomates, especially those involved in training programs, are strongly encouraged to recertify as often as possible, but at a minimum of every 10 years. Maintaining a current certificate is an expression of professional accountability. Since 1977, the ABAI has offered its diplomates a clinically-relevant voluntary recertification process every other year to its diplomates so that the effectiveness of each diplomate's own efforts in continuing education would be evaluated. It appears that recertification may become important to all specialists due to issues related to hospital credentialing and third party reimbursement of services.

ABAI's recertification is a dual process. It includes a qualifying home examination in open-book format for feedback and scoring. Satisfactory performance on the qualifying examination will admit diplomates to a final proctored examination. As an alternative pathway, ABAI offers all diplomates the opportunity of sitting for the certification examination in lieu of the two part recertification process.

ABAI anticipates that most if not all diplomates who conscientiously complete a self-directed program of continuing medical education as well as the open-book recertification examination will gain recertification. However, standards will be established to justify public confidence in the process. Diplomates should review the content outline distributed with the application.

The diplomate qualifies for examination by holding a *valid ABAI certificate of diplomacy*. Recertification in internal medicine or pediatrics is encouraged of ABAI diplomates, whose credentials remain valid and conform with the recertification standards of the primary board and wish to recertify in allergy and immunology.

And documentation that the ABAI diplomate currently practices the specialty of allergy and immunology.

And evidence of a valid, unrestricted license to practice medicine in a state, territory, possession, or province of the United States or Canada or in the United States armed forces or a written explanation of extenuating circumstances. Diplomates with a restricted, suspended, or revoked license at the time of application or examination will not be admitted to the examination or recertified.

### Added Qualification in Diagnostic Laboratory Immunology

In 1983 the ABMS approved certification of special qualification in diagnostic laboratory immunology (DLI) for diplomates of the ABAI, ABIM, and ABP periodically. Such recognition will be made to those specialists involved in the teaching, research, or practice setting in which the diagnostic immunology laboratory is of central importance.

Within the last 20 years in the combined clinical practice of allergy and immunology, the most rapid expansion of knowledge has occurred within the area of clinical immunology. This explosion of information has impacted both clinical practice and diagnostic laboratory testing. Previous certification in diagnostic laboratory immunology has been interpreted as demonstration of skills in laboratory measurements in immunology rather than the broad span of both clinical and laboratory skills. With the goal of certifying candidates in the broader sense of clinical skills and laboratory expertise in clinical immunology, the ABAI recommends that candidates be prepared to demonstrate competency by examination in the theory and practice of the following (non-inclusive) clinical areas: 1) allergic diseases; 2) primary and secondary immunodeficiency diseases; 3) autoimmune diseases; 4) immunologic aspects of bone marrow and organ transplantation; 5) immunologic aspects of organ-specific inflammatory conditions; and 6) immune aspects of malignancy and cancer. Although these clinical areas of competence are expected of the traditional trainee in allergy and immunology, the candidate for DLI will be expected to master these concepts to a far greater degree. Moreover, since upon certification the DLI trainee will be expected to supervise an immunology laboratory, competence will be demanded in the following (non-inclusive) areas: 1) quantitation of immunoglobulins; 2) measurement of specific antibodies; 3) functional and quantitative complement tests; 4) cellular assays of lymphocyte, monocyte, neutrophil, and basophil function and quantitation; 5) autoantibody assessment; 6) rapid tests for infectious diseases; 7) DNA amplification and binding tests; 8) genetic testing; 9) histocompatibility testing; 10) quality control testing; 11) data management and statistical analysis; and 12) regulatory agency interactions.

Through 1990, the examination was administered to those ABAI, ABIM, or ABP diplomates, who have had significant experience (at least 4 years) in comprehensive DLI or at least 1 year's training in DLI, have made significant contributions to DLI in practice, teaching and/or research, and are recognized by their peers as competent in DLI.

Starting with 1994, the examination for certification of added qualification in DLI will be administered to those ABAI diplomates with 1 year of DLI training in programs accredited by the ACGME or other acceptable training in diagnostic laboratory immunology programs.

### Dual Certification

Formal special pathways exist for individuals wishing to qualify for dual certification in either allergy and immunology and pediatric pulmonology or adult rheumatology. Additional information regarding special pathways is available upon request.

### Examination Methodology

#### A. Announcements

The proctored examination is administered simultaneously in at least two US locations in alternate years. The times and places are determined by the Board and announced in the appropriate specialty journals.

#### B. Applications

The act of filing an application is the candidate's responsibility. Applications forms are available from the ABAI. They must be accompanied by two recent signed photographs and the necessary fees. Completed applications must be received on or before the close of registration (postmark applicable).

#### C. Fees

The fees are set forth in the instruction sheet, which accompanies the application. Candidates whose applications are rejected will receive a refund of the examination fee, however, the ABAI will retain the registration fee to cover the processing and evaluation costs. A non-refundable late fee will apply to those applications received after the close of registration and prior to the cancellation deadline.

#### D. Cancellations

Candidates who are accepted for examination, but fail to appear or who withdraw after the deadline for cancellation will have their examination fee placed into an escrow account for the next examination; the registration is non-refundable to cover processing costs incurred. For each subsequent examination, candidates will be required to pay the current fees.

#### E. Description

The written examinations vary in length from certification being two 4-hour sessions, recertification being one 4-hour session, and (clinical and) diagnostic laboratory immunology being one 4-hour and one 3-hour session. The multiple-choice questions are objective and designed to test the candidate's/diplomate's knowledge through recall, interpretation, and problem-solving. Each written examination may contain previously used questions, new questions, or questions undergoing field testing. The performance of candidates or diplomates on field test questions will not be counted in determining the pass/fail score.

The ABAI does not sponsor or maintain any records on any courses which claim to be review courses in preparation for its examinations nor does it offer or endorse any specific publications or courses to prepare for its examinations.

#### F. Handicapped Candidates

Candidates/diplomates who need special examination assistance or a test modification due to a disability must provide written details at the time of application for review.

#### G. Irregular Behavior

All Board examinations are supervised by proctors, who are required to report any irregular behavior by a candidate. Irregular behavior includes, but is not limited to, giving or obtaining unauthorized information or aid before, during, or after the examination as evidenced by observation or subsequent statistical analysis of answer sheets. Offering financial or other benefit to a proctor, employee, or agent of the ABAI is forbidden.

**H. Results**

Candidates/diplomates will be informed of the results of the examinations within 3 months of its administration. The validity of the performance of candidates/diplomates is secured by every means available.

**I. Rescores**

On written request and payment of a fee, candidates may obtain rescore of any examination within 3 months of receiving results. Answer sheets will be destroyed 12 months after administration of the examination.

**J. Certificates**

A candidate/diplomate who passes the certification or recertification examination will be certified or recertified in the specialty of allergy and immunology as of the date of the examination and receive an appropriate certificate valid for 10 years, subject to revocation by the Board for cause. This information becomes public information and will be listed in the official *ABMS Directory of Board Certified Medical Specialists*. It is Board policy that each diplomate receive only one certificate; duplicates will not be available.

**K. Reexamination**

ABAI does not limit the number of reexaminations candidates may take, however, upon reregistration, a valid and unrestricted license, an appointment in good standing on a hospital staff, and formal recommendation letters from two other ABAI diplomates must attest to the medical, ethical, and moral standing and clinical competence as a specialist in allergy and immunology in order to gain entry into the process. For each subsequent examination, candidates will be required to pay the current fees.

**Special Policies****A. Verification of Board Status**

The ABAI does not issue statements of or implying "board eligibility" for any reason. This policy has been recommended by the American Board of Medical Specialties (ABMS). Medical specialty certification is a process of advancement through several individual steps including examination. Having completed one step, such as the minimal educational requirements, should not imply that a candidate is now possessed of some special qualification which is more or less equivalent to certification. Upon written request the ABAI will verify whether a physician is an active or inactive candidate, is or is not certified as an ABAI diplomate, is recertified, and/or holds a certificate of special/added qualification in diagnostic laboratory immunology.

**B. Revocation of Certificate**

Certificates issued by the ABAI shall be subject to revocation under specific circumstances, including but not limited to licensure revocation, restriction or suspension and/or establishment of guilt of felony, professional incompetence, professional misconduct, unethical conduct or harmful, deceptive, or fraudulent advertising.

Absences during residency in excess of 2 months over the 2-year full-training program in allergy and immunology, whether for vacation, sick leave, maternity leave, etc., should be made up. If the program director believes that an absence of more than two months is justified, a letter of explanation should be sent by the training program director for review by the credentials committee.

The Board reserves the right to make changes in its policies and procedures and fees at any time, and cannot assume responsibility for giving advance notice thereof. The provisions of this publication are not to be construed as a contract between any candidate and the ABAI. All directories should be directed in writing to the address listed heretofore.

**American Board of Anesthesiology**

Carl C. Hug, Jr., MD, PhD, President, Atlanta, Georgia  
Lawrence J. Saidman, MD, Vice President, San Diego, California  
William D. Owens, MD, Secretary-Treasurer, St. Louis, Missouri  
D. David Glass, MD, Assistant Secretary-Treasurer, Hanover, New Hampshire  
John R. Ammon, MD, Phoenix, Arizona  
Bruce F. Cullen, MD, Seattle, Washington  
Francis M. James III, MD, Winston-Salem, North Carolina  
David E. Longnecker, MD, Philadelphia, Pennsylvania  
M. Jane Matjasko, MD, Baltimore, Maryland  
Myer H. Rosenthal, MD, Stanford, California  
Stephen Slogoff, MD, Houston, Texas  
Stephen J. Thomas, MD, New York, New York  
Francis P. Hughes, PhD, Executive Secretary  
100 Constitution Plaza  
Hartford, CT 06103-1796

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Anesthesiology to ascertain whether the information below is current.)*

**Primary Certification in Anesthesiology Certification Requirements**

To be certified as a diplomate of the American Board of Anesthesiology, each applicant must:

- A. Hold a permanent, unrestricted, and currently unexpired license to practice medicine or osteopathy in one state of the United States or in Canada.
- B. Fulfill all the requirements of the continuum of education in anesthesiology.
- C. Have on file with the American Board of Anesthesiology a satisfactory certificate of clinical competence covering the final 6-month period of clinical anesthesia training in each anesthesiology residency program.
- D. Satisfy all examination requirements of the Board.

Persons certified by this Board are designated as diplomates in publications of the American Board of Medical Specialties and the American Society of Anesthesiologists.

**The Continuum of Education in Anesthesiology**

The continuum of education in anesthesiology consists of 4 years of training subsequent to the date that the medical or osteopathic degree has been conferred. It includes 12 months of nonanesthesia clinical training (clinical base year) and 36 months of graded and increasingly complex clinical training in anesthesia (CA-1, CA-2, and CA-3 years).

- A. The clinical base year must be devoted to clinical training other than clinical anesthesia. Acceptable training for the 12 months of clinical base shall include training in a transitional year, internal or emergency medicine, pediatrics, surgery or any of the surgical specialties, obstetrics and gynecology, neurology, family practice, or any combination of these as approved for the individual resident by the director of his/her training program in anesthesiology. Residents who begin the continuum after December 31, 1991, must complete the clinical base requirement before beginning clinical rotations in fulfillment of the CA-3 year requirement.

The clinical base year must be spent in programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) or, in Canada, in an institution approved by the Royal College of Physicians and Surgeons. It also may be spent in programs accredited by the American Osteopathic Association.

B. The 3-year clinical anesthesia curriculum (CA 1-3) consists of experience in basic anesthesia training, subspecialty anesthesia training, and advanced anesthesia training. It is a graded curriculum of increasing difficulty and learning that is progressively more challenging of the resident's intellect and technical skills.

1. Experience in basic anesthesia training is intended to emphasize basic and fundamental aspects of the management of anesthesia. It is recommended that at least 12 months of the CA-1 and CA-2 years be spent in basic anesthesia training with a majority of this time occurring during the CA-1 year.
2. Subspecialty anesthesia training experiences are required in order to emphasize the theoretical background, subject material, and practice of subspecialties of anesthesiology. These subspecialties include obstetric anesthesia, pediatric anesthesia, cardiothoracic anesthesia, neuroanesthesia, anesthesia for outpatient surgery, recovery room care, regional anesthesia, and pain management. It is recommended that these experiences be in the form of subspecialty rotations, and that they occupy 7-12 months of the CA-1 and CA-2 years. The sequencing of these rotations in the CA-1 and CA-2 years is left to the discretion of the program director.

In addition to the above requirements for subspecialty experiences, 2 months of training in the subspecialty of critical care medicine are required at some time during the clinical anesthesia years. An acceptable critical care rotation should include active participation in patient care by anesthesia residents, active involvement by anesthesia faculty experienced in the practice and teaching of critical care, and an appropriate population of critically ill patients which includes a substantial number with multi-system disease whose care requires invasive monitoring and mechanical ventilation. Experience in routine, short-term or overnight post-anesthesia units or intermediate step-down units or emergency rooms does not fulfill this requirement.

3. Experience in advanced anesthesia training constitutes the CA-3 year. *Clinical rotations in fulfillment of the CA-3 year requirement must follow completion of the clinical base and CA 1-2 years.* The resident and program director in collaboration will select one of the three tracks designated as the advanced clinical track, subspecialty clinical track or clinical scientist track. Regardless of the track selected, resident assignments in the CA-3 year should include the more difficult or complex anesthetic procedures and care of the most seriously ill patients.

Residents in the advanced clinical track are required to complete a minimum of 6 months of experience in advanced and complex clinical anesthesia assignments. The remaining 6 months may be spent in one to three selected subspecialty rotations or, alternatively, additional complex clinical anesthesia assignments may be selected.

Residents in the subspecialty clinical track may complete 9-12 months experience in one subspecialty rotation along with up to 3 months of advanced experience in complex clinical anesthesia assignments. Alternatively, 6 months' experience in each of two subspecialty rotations may be selected. Such rotations may include some time assigned to medical or surgical activities directly related to the anesthetic subspecialty.

The clinical scientist track consists of clinical training and research experience during the anesthesia residency. There are two options for fulfilling the requirements of this track. *Regardless of the option chosen, residents who elect this track must have a satisfactory clinical competence committee report for the 6-month period immediately preceding the beginning of the research experience.*

Option A of the clinical scientist track may be fulfilled by completing 6 months of advanced or subspecialty clinical training and 6 months of clinical or laboratory investigative experience in the CA-3 year. Exceptions to this sequencing

requirement must be requested prospectively by the resident's anesthesiology program director.

Option B of the clinical scientist track is intended for residents who plan a career as an academic investigator. After completing the clinical base year and 12 months of clinical anesthesia, the residents must complete 18 months of clinical anesthesia training and 18 months of research experience. The anesthesiology program director may request up to 6 months of credit toward the research component of the academic investigator option for residents with a PhD degree in a discipline of relevance to the science or practice of anesthesiology. *Residents who elect the academic investigator option must fulfill all of its requirements to satisfy the training required for entrance into the ABA examination system.*

4. *The practice of granting credit toward the requirements of the advanced clinical and subspecialty clinical tracks of the CA-3 year for nonanesthesia training is being discontinued.* Only residents who begin the second year of the continuum of education in anesthesiology on or before September 1, 1992, and not thereafter, are eligible to qualify for CA-3 year credit on the basis of certification in a specialty recognized by the American Board of Medical Specialties or a PhD degree in a discipline of relevance to the science or practice of anesthesiology. At the discretion of the anesthesiology program director, up to 6 months of CA-3 year credit may be requested for nonanesthesia training which has culminated in the awarding of Board certification or a PhD degree. The program director may recommend only partial credit, thus preserving the alternative of requiring more than 6 months of clinical training involving complex anesthesia assignments in the CA-3 year.

Requests for approval of credit for nonanesthesia training will be considered on an individual basis by the credentials committee of the ABA only for eligible residents whose overall clinical competence is graded satisfactory during each period of the first 18 months or more of clinical anesthesia training. Each request must include the anesthesiology program director's recommendation that a specific number of months of credit be granted, acceptable documentation of the resident's PhD degree and its discipline or unexpired Board certification, and for requests based on a PhD degree, a current copy of the resident's curriculum vitae.

Approval of requests for CA-3 year credit for nonanesthesia training is at the discretion of the credentials committee of the ABA. Credit which has been approved will be granted upon completion of the remaining requirements of the continuum of education in anesthesiology only for the resident whose overall clinical competence is graded satisfactory for every period of clinical anesthesia training.

The maximum amount of credit granted toward the CA-3 year for nonanesthesia training is 6 months. Thus, every resident must complete at least 30 months of clinical training involving increasingly complex anesthesia assignments.

- C. Credit toward the CA 1-3 year requirements is granted by the ABA for clinical anesthesia training which satisfies all of the following conditions:

1. The training is spent in or under the sponsorship of at most two ACGME-accredited anesthesia residency programs.
2. The period of clinical anesthesia training in or under the sponsorship of any single program is at least 6 months. When the continuum of education in anesthesiology specifies that the duration of a specific component exceeds 6 months, at least this length of time is spent on that component in one program.
3. The final period of training in each program ends with receipt of a satisfactory certificate of clinical competence. The final certificate of clinical competence must cover a 6-month period of clinical anesthesia training if the penultimate period of training in the program ended with an unsatisfactory certificate.

*When the final period of training in any program ends with receipt of an unsatisfactory certificate, credit is granted for clinical anesthesia training in that program only to the date of the most recent satisfactory certificate received by the resident from that program.*

4. No more than 6 months during the first 2 clinical anesthesia years, and a maximum of 12 months during the 3 years of clinical anesthesia training, are spent training outside the parent programs in affiliated or non-affiliated institutions.
- D. Requests for prospective approval of planned anesthesia training which will not meet one or more of the conditions specified above, or will be spent in non-affiliated institutions whether or not they are accredited by ACGME, will be considered by the credentials committee on an individual basis.

Each request must include a chronological description of the planned training rotations and a letter of support from the director of the parent program. The resident must remain on the roster of the parent program during those months spent training in affiliated or non-affiliated institutions.

Credit toward the training requirements for experiences other than those described above may be recommended prospectively by the credentials committee to the ABA when it has determined that exceptional educational or other experience warrants such judgment.

## Principal Objectives

The anesthesiology examination system of the American Board of Anesthesiology is designed to identify those candidates who possess the knowledge, judgment, communicative skills, and decision-making abilities that are considered essential for the diplomate to function as a consultant in anesthesiology and as the leader of the anesthesia care team. The critical care medicine examination system is designed to identify those diplomates who have obtained special qualifications in critical care medicine through additional training and experience.

The written examination analyzes primarily the cognitive and deductive skills of the candidates. It is necessary for candidates to pass the written examination to qualify for the oral examination.

The oral examination is designed to measure those components of the candidate's competence that cannot be evaluated by written examinations or other instruments. Specifically, it is designed to measure not only how and what candidates do to reach their conclusions concerning diagnosis and therapy, but why the formulations are made in the particular way or sequence. Further, it analyzes whether candidates can recognize and treat the complications of anesthesia practice. The principal thrust is to determine that candidates can synthesize their knowledge, judgment and analytical skills so as to reach rational diagnoses, prevention and treatment protocols; and to establish that candidates can communicate this information effectively to others.

## Irregular Behavior

The Board acts to maintain the integrity of its examination and certification process and to ensure the equitable and objective administration of its examinations to all candidates. Information about behavior which the Board considers a violation of the integrity of its examination and certification process is sent to all candidates scheduled for examination. Statistical analyses may be conducted to verify observations and reports of suspected irregularities in the conduct of an examination. The examination of a candidate whose conduct, in the Board's judgment, violates or attempts to violate the integrity of its examination and certification process will be invalidated and no results will be reported. Furthermore, the candidate will be subject to punitive action as determined by the Board. In that event the candidate would be informed of the reasons for the Board's actions and could request an opportunity to present information deemed relevant to the issue and to petition the Board to reconsider its decision.

## Nonstandard Examination Administration

The ABA has established a process to consider requests from applicants that an ABA examination be administered to them under nonstandard conditions because of a handicap. However, the ABA will not modify substantially, or excuse a candidate from, any of its examination processes.

The ABA must receive notification that a handicap exists when an application is made for admission to its examination system. Notification must include documentation of the handicap that is acceptable to the ABA. Such documentation is a statement from a physician or other qualified professional describing the applicant's handicap and the degree of disability it causes; nonetheless, the ABA reserves the right to have the applicant examined at her/his expense by a qualified professional of its choosing. Additionally, the ABA requires written statements from the applicant's residency program director and two other members of the program's teaching staff that the applicant's handicap does not interfere with her/his care of patients; in particular, the statements must address the applicant's ability to provide appropriate care in the emergency setting.

The examinations committee of the ABA will consider each request for a nonstandard examination administration on its own merits when the aforementioned documentation is received. The committee shall recommend to the ABA the conditions under which an ABA examination will be administered to the applicant who requested a nonstandard examination administration.

## Application Form

Application for admission to the examination system of the American Board of Anesthesiology must be made to the Secretary upon a form prescribed by the Board. Photocopies or facsimiles of the application form are not acceptable.

Proper forms for making application and other information may be obtained by writing to the Secretary, American Board of Anesthesiology, 100 Constitution Plaza, Hartford, CT 06103-1796. An applicant must request an application form by writing to the Board. Telephone requests are not acceptable.

## Applicant Declaration and Consent

The application form includes the following statement which the applicant shall be required to sign.

"I hereby make application to the American Board of Anesthesiology, Inc. for the issuance to me of a certificate, and for examination relative thereto, all in accordance with and subject to its rules and regulations, and the fee requested. I agree to disqualification from examination or from the issuance of a certificate or to forfeiture and redelivery of such certification in the event that any of the statements heretofore made by me are false or in the event that any of the rules governing such examinations are violated by me or in the event that I did not comply with or shall violate any of the provisions of the Certificate of Incorporation or By-laws of the American Board of Anesthesiology, Inc., or both, as then constituted. I understand that the American Board of Anesthesiology, Inc. may report my status in the examination system, including the result of any written or oral examination, to the director of the program in which I completed my training in clinical anesthesiology either routinely or upon the request of such program director, use any score in psychometric analyses to confirm observations and reports of suspected irregularities in the conduct of an examination, and respond to any inquiry about my status in its examination system in accordance with its policy as then constituted. I authorize any and all repositories to grant access to or to produce copies for the American Board of Anesthesiology, Inc. of all documents and records containing information and data pertaining to my practice of the medical specialty of anesthesiology and its sub-disciplines. I understand that such information and data will be used exclusively to study and assess the certification processes of the American Board of Anesthesiology, Inc. More particularly, such information as it pertains to me shall be held in confidence and shall be

reported or released only as a part of the aggregate of such information gathered and studied without specific reference to myself or any other individuals. Such information and data will not bear in any way whatsoever upon the decision of the American Board of Anesthesiology, Inc. whether or not to grant me a certificate. I agree to hold the American Board of Anesthesiology, Inc., its members, examiners, officers, and agents free from any damage or complaint by reason of any action they, or any of them, take in connection with this application, such examinations, the grade or grades given with respect to any examination, the failure of said Board or corporation to issue to me such certification, the gathering and collecting of information and data about my practice of anesthesiology, or the use of such information or data in studies of the certification processes of the American Board of Anesthesiology, Inc. as described above."

The application form also includes the following consent which the applicant shall be required to sign.

"I, the undersigned, in connection with my application for certification by the American Board of Anesthesiology, Inc., hereby authorize the American Board of Anesthesiology, Inc., to request, procure and review any information regarding my medical practice, professional standing and character, including any information related to any disciplinary action related to the practice of medicine by any state licensing agency or any institution in which I have practiced medicine and any information related to any history of substance abuse or chemical dependency and any treatment or rehabilitation related thereto."

"I hereby authorize the American Board of Anesthesiology, Inc. to request and procure such information from any individual or institution, each of which shall be absolutely immune from civil liability arising from any act, communication, report, recommendation or disclosure of any such information even where the information involved would otherwise be deemed privileged so long as any such act, communication, report, recommendation or disclosure is performed or made in good faith and without malice."

"I hereby authorize the American Board of Anesthesiology, Inc. to supply a copy of this consent, which has been executed by me, to any individual or institution from which it requests information relating to me."

## Entrance Requirements

To enter the examination system of the American Board of Anesthesiology, the applicant shall:

- A. Have graduated from a medical school approved by the Liaison Committee for Medical Education, or have met medical educational requirements otherwise acceptable to the American Board of Anesthesiology.
- B. Provide evidence satisfactory to the Board of having been awarded a medical or osteopathic degree acceptable to the Board.
- C. Provide evidence acceptable to the Board of having a permanent, unrestricted and currently unexpired license to practice medicine or osteopathy in one state of the United States or in Canada.

Residents in training may submit evidence with their application of having qualified on examinations that provide eligibility for medical licensure (e.g., NBME Part III or FLEX I and II). Residents who do so must have evidence of permanent and unrestricted medical licensure on file in the ABA office by November 30 of the year in which the written examination for which they applied is administered.

- D. Have on file in the Board office evidence of having satisfactorily fulfilled all requirements of the continuum of education in anesthesiology before the date of examination and after receiving a medical or osteopathic degree. Such evidence must include a satisfactory certificate of clinical competence covering the final 6 months of clinical anesthesia training in each residency program (see paragraph C in the "Continuum of Education in Anesthesiology" and "Certificate of Clinical Competence" sections). A grace period will be permitted so that applicants completing this requirement by

August 31 may apply for the immediately preceding July written examination.

- E. Have on file with the Board evaluations of various aspects of his or her current practice of anesthesiology as solicited by the Board in determining the applicant's qualifications for admission to the examination system. Such evaluations may be requested from the residency program director and others familiar with the applicant's current practice of anesthesiology. The clinical competence committee report from the department and the evaluation of the program director and others will be used as the basis for assessing admission qualifications. The response of the program director will be given considerable weight in these deliberations.
- F. Submit proof with the application of having reestablished his or her qualifications for admission to the examination system only if residency training was completed more than 12 years before the date of application or a second or subsequent application has been declared void. Acceptable proof is documentation of having qualified on an entry examination designated by the Board or of having completed a 12-month term of additional clinical training in anesthesia in an ACGME accredited program with receipt of a satisfactory certificate of clinical competence covering the final 6 months.

The Board has designated the examination administered annually by the Joint Council on In-Training Examinations as the entry examination. Information about the entry examination and a registration form may be obtained by writing the Joint Council c/o the American Society of Anesthesiologists.

The Board shall determine that entry into the examination system is merited when a judgment of adequate levels of scholarship and clinical competence can be made from the information submitted.

## Certificate of Clinical Competence

The Board requires every residency training program to file, on forms provided by the Board, an evaluation of clinical competence in January and July on behalf of each resident who has spent any portion of the prior 6 months in clinical anesthesia training in or under the sponsorship of the residency program and its affiliates.

Entry into the examination system is contingent upon the applicant having a certificate of clinical competence on file with the Board attesting to satisfactory clinical competence during the final period of clinical anesthesia training in or under the sponsorship of each program (see "Continuum of Education in Anesthesiology" C(3) for details). The Board, therefore, will deny entry into the examination system until this requirement is fulfilled.

## Absence from Training

The total of any and all absences during clinical anesthesia training may not exceed the equivalent of 20 working days per year. Attendance at scientific meetings, not to exceed 5 working days per year, shall be considered a part of the training program. Duration of absence during the clinical base year may conform to the policy of the institution and department in which that portion of the training is served. Absences in excess of those specified will require lengthening of the total training time to the extent of the additional absence.

A lengthy interruption in training may have a deleterious effect upon the resident's knowledge or clinical competence. Therefore, when there is an absence for a period in excess of 6 months, the credentials committee of the ABA shall determine the number of months of training the resident will have to complete subsequent to resumption of the residency program to satisfy the training required for admission to the ABA examination system.

## Entrance into the System

The ABA will notify an applicant who is admissible to its examination system after approval of all credentials. The Board, acting as a committee of the whole, reserves the right to reject an applicant for any reason deemed appropriate. The Board reserves the right to correct clerical errors affecting its decisions.

The Board office is not responsible for breaks in communication with candidates that are due to circumstances beyond its control. Candidates must send the Board written notice of an address change immediately so that the Board's examination notices will not go astray, and they must call the Board office if they do not receive an examination notice they are expecting within the time frame described above. The candidate's social security number is used by the Board for identification purposes and should be included on all correspondence with the Board.

### Examination Notices

The ABA sends notification of an examination and a reply form to every candidate eligible to appear for the examination at least 4 months prior to the examination date. The notification is sent to candidates at their address of record on file in the Board office.

Candidates are *required* to respond to every written and oral examination notice by the response date established by the ABA, whether or not they accept the examination opportunity. Every reply to an examination notice will be acknowledged within 2 weeks of its receipt in the Board office.

Candidates scheduled to appear for examination are notified of the exact date, time and location of their examination and the rules for its conduct approximately 2 months before the date of examination.

Under certain circumstances the ABA, entirely at its discretion, may grant a candidate's request for an excused absence from any scheduled examination without forfeiture of the opportunity. Such a request must be filed in writing, include the candidate's reason, and arrive in the ABA office by the response deadline specified in the examination notice or, for scheduled candidates, by the examination date. A candidate may be excused from examination if it is determined the reason warrants such a decision and there is sufficient time remaining in the application period to provide the number of examination opportunities the candidate is permitted. Candidates excused from an examination are required to appear at the next examination for which they are eligible.

### The Written Examination in Anesthesiology

Written examinations are held annually in locations throughout the United States and Canada on a Saturday in July. Written examinations cover the basic and applied aspects of physiological, physical and clinical sciences. A passing grade, as determined by the Board, is required.

### The Oral Examination

Candidates who complete the written examination successfully must wait at least 6 months before being declared eligible for oral examination. Oral examinations are conducted in the spring and fall of each year at a single location in the United States. Examiners consist of Directors of the Board and others who assist as associate examiners. Oral examinations evaluate all phases of anesthesiology, but emphasize clinical practice. A passing grade, as determined by the Board, is required.

It is an ABA regulation that candidates will not be scheduled to appear at consecutive oral examinations. Therefore, candidates who do not pass an oral examination for which they are scheduled, for whatever reason, are not eligible to appear at the next regularly scheduled oral examination.

The Board reserves the right to limit the number of candidates to be admitted to any examination. Places in the oral examination schedule are limited and assigned in the sequence acceptances are received. Candidates who are not given an examination appointment, whether or not they accepted the examination opportunity, are required to appear at the next examination for which they are eligible.

### Fees

The application fee for primary certification in anesthesiology is \$1,100. It must accompany the application. For completed applications received between January 11 and November 20 of the previous year, the application fee is \$1,000—a reduction of \$100 for early filing.

The reexamination fee is \$200 for the anesthesiology written examination, \$700 for the oral examination and \$750 for the critical care medicine examination. The reexamination fee will be charged candidates whether they have failed a previous examination, canceled a scheduled appointment for examination or failed to appear for any examination for which they were properly scheduled.

A charge of \$50 will be made whenever a check in payment of a fee is returned for nonpayment.

A non-refundable fee for administrative services is included in the application fee. It is \$200 for applications for primary certification that arrive after November 20 and \$100 for those received before that date. The fee is \$250 for the critical care medicine application. In the event an application is not accepted, or the application is accepted and subsequently withdrawn by the candidate, the fee for administrative services will be retained and the balance of the application fee will be refunded. No fee will be remitted if the candidate's notice of withdrawal from the examination system is received in the Board office after the deadline by which candidates must notify the Board of their choice of test center for the first written examination for which they are eligible.

The American Board of Anesthesiology is a nonprofit organization. The fees for application and examination are computed on a basis of cost of maintaining the functions of the Board. The Board reserves the right to change the fees when necessary.

### Reapplication

The application of a candidate who has failed to satisfy the examination requirements in the prescribed number of opportunities or time for whatever reason shall be declared void. The physician may reapply by submitting a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication. The applicant who is adjudged to meet existing requirements will be readmitted into the examination system.

*The reapplicant for primary certification who has had a second or subsequent application declared void for any cause, or has completed anesthesia residency training more than 12 years before the date of reapplication, must reestablish his/her qualifications for admission to the examination system before filing another application.* The manner in which this may be done is described in paragraph F of the "Entrance Requirements" section. In all instances, the candidate must pass both the written and oral examinations under the new application.

### Status of Individuals

The ABA reserves to itself exclusively the right to define and confer Board eligible status whenever such status refers to an individual's relationship to the ABA examination and certification system. The ABA shall confer Board eligible status only on physicians who are candidates in its examination system. Thus, physicians are Board eligible only when they are eligible to appear for an ABA examination. Board eligible status is not conferred indefinitely.

Inquiries about the current status of individuals should be addressed to the ABA office which will respond with one of the following statements:

- A. The physician is certified by the American Board of Anesthesiology.
- B. The physician is Board eligible in anesthesiology.
- C. The physician is neither certified by the American Board of Anesthesiology nor Board eligible.

## Equivalence of Royal College Certification

The fellowship certificate awarded by the Royal College of Physicians and Surgeons of Canada, the College of Anaesthetists of England and the Faculty of Anaesthetists of the Royal Australasian College of Surgeons, the Royal College of Surgeons in Ireland and the College of Medicine of South Africa is considered by this Board to be comparable to certification by the American Board of Anesthesiology. Nevertheless, there are fellowship certificate holders who continue to seek entrance into the ABA examination and certification system. For those physicians who have such interest, the requirement of a clinical base year and of 2 of the 3 years of clinical anesthesia training in a program accredited by ACGME is waived. Holders of the fellowship certificate who wish to enter the American Board of Anesthesiology examination system may fulfill the training requirement by satisfactorily completing 1 year of clinical training in anesthesia in an ACGME accredited program. *The content of this year must be approved prospectively by the Credentials Committee of the ABA.*

## Chemical Dependency

Qualified applicants for primary or subspecialty certification who have had a history of chemical dependency as reported to the Board who submit documentation acceptable to the Board that their disease currently is known to be under control will be admitted into the examination system and to examination.

Candidates already in the examination system who have had a history of chemical dependency as reported to the Board who submit documentation acceptable to the Board that their disease currently is known to be under control will be admitted to examination.

Candidates who have a current problem of chemical dependency or who are still in active treatment for a problem of chemical dependency as reported to the Board will not be admitted to examination. Denial of admission to examination may result in the loss of opportunities to take an examination and, ultimately, in the Board's decision to declare the candidate's application void for failure to successfully complete the requirements for certification within the time allotted to every candidate.

Candidates who have had a history of chemical dependency as reported to the Board will not be issued a certificate upon completion of all requirements for certification unless they submit documentation acceptable to the Board that their disease is known to be under control for 5 years from the date of the most recent occurrence of their disease.

## Revocation of Certificate

A certificate is issued by the Board with the understanding that it remains the property of the Board during the life of the diplomate. Any certificate issued by the Board shall be subject to revocation in the event that:

- A. The issuance of such certificate or its receipt by the person so certified shall have been contrary to, or in violation of, any provision of the certificate of incorporation of this Board or its by-laws; or
- B. The person certified shall not have been eligible to receive such certificate whether or not the facts making him/her ineligible were known to, or could have been ascertained by, the Board or any of the directors at the time of issuance of such certificate; or
- C. The person certified shall have made any misstatement of fact in his or her application for such certificate or in any other statement or representation to the Board or its representatives; or
- D. The person certified shall fail to maintain a moral, ethical professional standing satisfactory to the Board.

The Board shall be the sole judge of whether or not the evidence or information before it is sufficient to require or permit revocation of any certificate issued by the Board, the decision of the Board shall be final.

## Recertification

Insufficient confidence in currently available methods of assessing continuing competence of the practicing anesthesiologist makes it inappropriate to implement a recertification process at this time. The American Board of Anesthesiology will continue to study all options for a meaningful recertification program but intends to expend its major effort resources toward improvement of the process leading to primary certification and the voluntary program for continued demonstration of qualifications.

## Records Retention

The ABA retains documents pertaining to an individual's residency training, application for certification, examination opportunities, and examination results for the sole purpose of determining that its requirements for admission to examination for certification are fulfilled.

In the absence of an application for certification, documents pertaining to the ABA entrance requirements are retained for 7 years from the date of the most recent correspondence to or from the ABA regarding the requirements. Documents pertaining to an unsuccessful application are retained until the individual submits another application to the ABA or the aforementioned 7-year period expires, whichever occurs first. Documentation corroborating the results of a candidate's examination is retained until one year after the date of the most recent correspondence to or from the ABA regarding the results. Documentation corroborating the candidate's fulfillment of the ABA certification requirements is retained until 1 year after the date of the most recent correspondence to or from the ABA regarding the candidate's certification by the ABA. The ABA sees to the secure destruction of the documents in its file for an individual when the period specified for retention of the documents has expired.

The ABA retains indefinitely an electronic record for residents who trained in an ACGME accredited anesthesiology program. This record includes entries that identify the training program, the dates of training and the overall evaluation of the resident.

The ABA retains indefinitely microfiche and electronic records for candidates issued its certification. These records include documents and entries attesting that each certification requirement was met.

## Certification of Added Qualifications in Pain Management

### A. Definition of Pain Management

Pain management is the medical discipline concerned with the diagnosis and treatment of the entire range of painful disorders. Because of the vast scope of the field, pain management is often considered a multidisciplinary subspecialty. The expertise of several disciplines is brought together in an effort to provide the maximum benefit to each patient. Although the care of patients is heavily influenced by the primary specialty of physicians who subspecialize in pain management, each member of the pain treatment team understands the anatomical and physiological basis of pain perception, the psychological factors that modify the pain experience, and the basic principles of pain management.

### B. Certification Requirements

To be awarded a certificate of added qualifications in pain management by the American Board of Anesthesiology, each applicant must:

1. Be a diplomate of the American Board of Anesthesiology.
2. Hold a permanent, unrestricted, and currently unexpired license to practice medicine or osteopathy in one state of the United States or Canadian province.
3. Fulfill the requirement of the continuum of education in pain management as defined by the American Board of Anesthesiology.
4. Satisfy the pain management examination requirement of the American Board of Anesthesiology.

The ABA certificate of added qualifications in pain management will be valid for a period of 10 years from its date of issuance. It is left to the holder of the subspecialty certificate when to reapply to the ABA for examination and renewal of the pain management certification.

### C. The Continuum of Education in Pain Management

The continuum of education in pain management consists of 12 months of formal training in acute, chronic, and oncology pain management. The 12 months of pain management training must follow the successful completion of the continuum of education in anesthesiology. Until such time as the Residency Review Committee for Anesthesiology establishes a process for accreditation of pain management programs, pain management training must be obtained in a program acceptable to the ABA.

The credentials committee of the ABA must *approve prospectively* training that is to be credited toward the pain management continuum if such training will not be in or under the sponsorship of an ACGME accredited anesthesiology pain management program.

Written requests for approval of unusual sequences of training must be submitted to the credentials committee of the ABA who will judge each case on its individual merits.

Training in pain management should *not* be interrupted by frequent or prolonged periods of absence. Absences during the year of formal training in excess of that permitted by the institution or department will require lengthening of the total training time to the extent of the additional absence.

### D. Entrance Requirements

To enter the pain management examination system of the American Board of Anesthesiology, the applicant shall:

1. Submit evidence that he/she is certified by the American Board of Anesthesiology. Fellowship certificates considered comparable to certification by the American Board of Anesthesiology do *not* satisfy this requirement.
2. Submit proof of having a permanent, unrestricted, and currently unexpired license to practice medicine or osteopathy in one state of the United States or Canadian province.
3. Have on file in the Board office documentation of having fulfilled the requirements of the continuum of education in pain management (see "The Continuum of Education in Pain Management") or the temporary criteria (see "Temporary Criteria").

Evaluation of various aspects of the applicant's credentials and performance will be solicited by the ABA in assessing his/her qualifications for admission to its pain management examination system. The Board shall determine that entry into its pain management examination system is merited when judgment of adequate levels of scholarship and clinical competence can be made from the information submitted.

Certification by other entities will *not* be considered as meeting any of the requirements for entrance into the ABA pain management examination system.

### E. Temporary Criteria

Initially, the ABA recognizes that many applicants will not have received formal pain management training. Therefore, it has established temporary criteria which pain management practitioners can fulfill to satisfy the requirement of the continuum of education in pain management. Applicants who qualify under the temporary criteria must satisfy the entrance requirements listed under "Entrance Requirements" 1 and 2.

1. Applicants are *eligible to qualify under the temporary criteria* only if they complete the continuum of education in anesthesiology before September 1, 1993.

Candidates whose first application is declared void following three opportunities to satisfy the examination requirement may

*not* qualify for readmission to the examination system under the temporary criteria.

2. The temporary criteria can be fulfilled in one of the following ways:
  - a. The satisfactory completion of 12 months of formal training in acute, chronic, and oncology pain management, whose content is acceptable to the ABA.
  - b. The completion of the equivalent of 24 months of full-time practice in pain management during the 4 years immediately preceding the deadline for receipt of applications.

The equivalent of 24 months of full-time practice in pain management may be defined as 2 years in the practice of pain management at 100% time or 4 years in the practice of pain management at 50% time. Verification of involvement in the practice of pain management 50% or more of the time during the 2-4 years immediately preceding the deadline for receipt of applications, and of clinical competence in anesthesiology pain management, must be documented for the applicant by the chief of anesthesiology or the pain management director or, if they are one and the same, by another diplomate of the American Board of Anesthesiology.

Exceptions to the above temporary criteria which could be considered equivalent combinations of training and practice will be considered by the credentials committee of the ABA on an individual basis.

### F. Application Procedure

1. The proper application form and other information may be obtained by writing to the Secretary, American Board of Anesthesiology, 100 Constitution Plaza, Hartford, CT 06103-1796. An applicant must request an application form by writing to the Board. Telephone requests are not acceptable.

Application for admission to the examination system of the American Board of Anesthesiology must be made to the Secretary upon a form prescribed by the Board. Photocopies or facsimiles of the application form are not acceptable.

2. The application form includes the identical statements of declaration and consent included in the application for primary certification. The applicant for examination in pain management shall be required to sign each statement.

### G. Filing Deadline

The filing deadline for receipt of applications for admission to the pain management examination shall be 6 months prior to the examination date. Applications for the 1993 pain management examination must be received in the ABA office no later than March 1, 1993.

Completed application, including supporting documents and the appropriate fee, must be received by the ABA on or before the appropriate filing deadline. Applications received after the deadline will not be accepted.

### H. Fees

The application fee for admission to the pain management examination system is \$1,000. The fee must accompany the application.

A nonrefundable fee for administration services of \$250 is included in the application fee. The reexamination fee for the pain management examination is \$750. The ABA policies regarding the administrative service fee and the reexamination fee are stated on the preceding pages.

A charge of \$50 will be made whenever a check in payment of a fee is returned for nonpayment.

### I. The Examination System

The ABA will notify an applicant who is accepted as a candidate for its pain management examination after approval of all credentials. The Board, acting as a committee of the whole, reserves the right to reject an applicant for any reason deemed appropriate. The Board reserves the right to correct clerical errors affecting its decisions.

The written examination in pain management is designed to test for the presence of basic knowledge that is considered essential for the ABA diplomate to function as a practitioner of pain management. The examination analyzes the cognitive and deductive skills as well as the clinical judgment of the candidates.

Current plans are to administer the pain management examination at one or more locations in the United States in 1993 and 1994, and thereafter no more frequently than once every 2 years. The ABA will mail notice to all eligible candidates announcing the location(s) and date of the pain management examination approximately 4 months prior to the date of its scheduled administration.

Every candidate is given three opportunities to satisfy the pain management examination requirement. Failure to satisfy the examination requirement within the three opportunities or the prescribed time, whichever comes first, will result in the candidate's application being declared void.

The prescribed period of time for the successful completion of the examination for certification of added qualifications in pain management is the time between the date of the first examination for which the candidate is declared eligible and the next three consecutive administrations of the pain management examination. Thus, the ABA, at its discretion, may excuse a candidate from at most one pain management examination without forfeiture of an opportunity.

The ABA policies regarding examination notices, candidate responses, address changes, and excused absences are stated on the preceding pages. Its policies regarding nonstandard examination administration and irregular examination behavior may be found on the preceding pages.

#### J. Status of Individuals

Inquiries about the current status of physicians relative to the ABA pain management certification system should be addressed to the ABA office. The ABA will affirm the status of physicians who are certified in pain management by the American Board of Anesthesiology. For others, the response to the inquiry will be in keeping with ABA policy.

#### K. Reapplication

The application of a candidate who have failed to satisfy the examination requirement in the prescribed number of opportunities or time for whatever reason shall be declared void. The physician may reapply by submitting a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication. The applicant who is adjudged to meet existing requirements will be readmitted into the examination system.

*Every applicant who qualified previously by temporary criteria is required to have completed satisfactorily the 1-year continuum of education in pain management.*

### Test Dates and Deadlines

#### Written Examinations

January 10, 1993—Application deadline.

May 1, 1993—Deadline for reply to examination notice.

July 10, 1993—Examination date.

November 20, 1993—Early filing deadline for 1994 application with reduced fee.

July 9, 1994—Examination date.

#### Oral Examinations

April 19-23, 1993—Examination dates.

October 25-29, 1993—Examination dates.

April 8-15, 1994—Examination dates.

September 23-30, 1994—Examination dates.

#### Critical Care Medicine Examination

March 1, 1993—Application deadline.

August 1, 1993—Deadline for reply to examination notice.

September 11, 1993—Examination date.

#### Pain Management Examination

March 1, 1993—Application deadline.

August 1, 1993—Deadline for reply to examination notice.

September 11, 1993—Examination date.

## American Board of Colon and Rectal Surgery

Lee E. Smith, MD, President, Washington, DC

John M. MacKeigan, MD, Vice President, Grand Rapids, Michigan

Victor W. Fazio, MD, Past President, Cleveland, Ohio

H. Randolph Bailey, MD, Houston, Texas

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Colon and Rectal Surgery to ascertain whether the information below is current.)*

### General Qualifications and Requirements

All candidates shall comply with the following regulations:

1. A candidate shall appear personally before the Board and shall submit to the required examinations.
2. A candidate shall limit the majority of his/her practice to colon and rectal surgery.
3. A candidate may be required to deliver to the Board sufficient case reports to demonstrate proficiency in colon and rectal surgery.
4. A bibliography of papers and books published by the candidate shall be submitted to the Board upon its request.
5. The moral and ethical fitness of a candidate must be satisfactory to the Board and in conformity with the *Statements on Principles* of the American College of Surgeons, and the *Principles of Medical Ethics* of the American Medical Association. Practices not conforming therewith may result in rejection of an application or in deferral of examination until such matters have been resolved satisfactorily.

### Professional Qualifications

1. A candidate must have completed an accredited residency program in colon and rectal surgery.
2. A candidate must have an unrestricted license to practice medicine in the country of his/her residence.
3. A candidate must successfully complete the qualifying examination of the American Board of Surgery before being admitted to the American Board of Colon and Rectal Surgery written examination (Part I).
4. A candidate must achieve certification by the American Board of Surgery before being admitted to the American Board of Colon and Rectal Surgery oral examination (Part II).

### Application for Examination

Each candidate for examination must complete and submit an application for examination which may be obtained from the Secretary of the Board. Applications must be submitted before July 15 of each year.

Within 2 weeks after conclusion of the training program, the applicant must submit to the secretary of the Board a prescribed form, listing all operative procedures performed during the training period. This form is available from the secretary of the Board and must be countersigned by the program director when it is submitted.

The application must also be accompanied by two unmounted, recent photographs of the applicant, and the required application fee.

The acceptability of a candidate for examination depends not only upon completion of the requirements listed under "Qualifications of Candidates," but also upon information available to the Board regarding the candidate's professional maturity, surgical judgment, and technical competence.

## Examinations

To achieve certification by the American Board of Colon and Rectal Surgery, a candidate must pass a written examination (Part I) and an oral examination (Part II). The written examination is offered in the spring of the year and a candidate is required to pass this examination before being permitted to take the oral examination. The oral examination is given in the fall of the year.

Examinations are conducted at times and places determined by the Board and this information may be obtained from the Board office. It is also published in *Diseases of the Colon and Rectum* and in the *Journal of the American Medical Association*. Examinations will be held in one designated city in the United States.

### Part I—Written Examination

The written examination is an assessment of a candidate's knowledge of the theory and practice of colon and rectal surgery with separate examinations in pathology and radiology. The written portion of the examination is a 4-hour test of multiple choice questions covering the spectrum of colon and rectal surgery and the body of basic science pertinent to it. The pathology and radiology portions of the examination each are 1 hour in length and consist of questions and slide presentations.

### Part II—Oral Examination

The oral examination is conducted by members of the Board or its designated examiners. Its objective is to evaluate the candidate's clinical experience, problem-solving ability and surgical judgment, and to ascertain the candidate's knowledge of current literature on colon and rectal diseases and surgery. Each candidate will undergo at least three 30-minute oral examinations by three two-member examining teams.

### Examination Results

The Board makes every effort to be as prompt as possible in notifying candidates of their examination results and letters of notification may be expected from 4 to 6 weeks following the examination.

### Reexaminations

A candidate who has failed either the written or oral part of the examination may be reexamined after 1 year has elapsed.

A candidate who fails to pass either the written or oral portion of the examination may repeat that part of the examination twice, thus offering the candidate three opportunities to pass each part of the examination.

A candidate who fails to pass either the written or oral portion of the examination three times may not repeat the examination without satisfactory completion of an approved colon and rectal surgery residency program and submission of a new application for examination.

### Status of Applicant

The Board does not use or sanction the terms "Board eligible" or "Board qualified." The status of an applicant with the Board is determined by and varies with the current status of his/her credentials.

A candidate must apply to the Board's certification process within 5 years after completion of approved colon and rectal surgery training.

The entire certification process with the Board must be successfully completed within 7 years following approval of the formal application. In addition, a candidate whose application for examination has been approved but who does not take the examination within 3 years must submit a new application.

In exceptional or unusual circumstances, the Board may, at its discretion, waive one or more of the limitations specified under "Status of Applicant."

## Fees

**Application fees:** A non-refundable fee of \$250 shall accompany the application.

**Written examination fee (Part I):** A fee of \$400 is due and payable when the candidate is notified of approval to take the written examination.

**Oral Examination fee (Part II):** A fee of \$400 is due and payable when the candidate is notified of approval to take the oral examination.

**Reexamination fee:** Fees for reexamination are the same as shown above for each examination.

**Withdrawal from examination:** A candidate who withdraws must notify the Board office at least 10 business days before a scheduled examination. A candidate who fails to appear for examination or who withdraws without giving at least 10 days notice as defined above, will forfeit \$100 of the designated examination fee and will have to resubmit the forfeited amount before being admitted to the next scheduled examination.

Fees are subject to change as directed by the Board.

## Appeals

Any candidate who is not acceptable to the Board for examination or who has failed an examination, totally or in part, may appeal such a decision by the Board and may, by registered letter to the secretary of the Board, request a hearing, specifying the reasons therefor. An ad hoc hearing committee shall be appointed within 30 days to conduct the hearing.

If the decision of the hearing committee is not satisfactory, the candidate, by registered letter to the secretary of the Board within 21 days after receipt of the notice of an adverse decision, may request an appellate review by the Board.

## Certification

A candidate who has met all the requirements and successfully completed the examinations of the American Board of Colon and Rectal Surgery will be issued a certificate attesting to his/her qualifications in colon and rectal surgery. The certificate shall be signed by the president or vice president and the secretary, and shall bear the corporate seal of the Board.

The certificate granted by the Board does not confer privilege or license to practice colon and rectal surgery but is evidence that a physician's qualifications for specialty practice are recognized by his/her peers. It is not intended to define the requirements for membership on hospital staffs, to gain special recognition or privileges for its diplomates, to define the scope of specialty practice, or to state who may or may not engage in the practice of the specialty.

Unless the candidate specifies otherwise, the Board forwards the names of candidates who have achieved certification to the American Board of Medical Specialties for listing in the *ABMS Compendium of Medical Specialists* and the *Directory of Medical Specialists* published by Marquis Who's Who.

## Time-Limited Certification

Beginning with those candidates who passed the certifying examination in 1990 and thereafter, the American Board of Colon and Rectal Surgery will issue time-limited certificates. Certificates will be valid

for 8 years from the date of certification, after which the certificates will no longer be valid.

### Recertification

The American Board of Colon and Rectal Surgery offers recertification in the specialty. Certificates can be renewed prior to expiration by fulfilling the requirements for recertification specified by the Board. The recertification examination is offered annually, on a voluntary basis, to all certified colon and rectal surgeons who apply and meet the Board's requirements. A recertification information booklet, which outlines the requirements and procedures, is available by writing the Board office.

### Revocation of Certificates

The filing of an application for examination, participating in examination, and accepting a certificate are voluntary acts. Therefore, the Board assumes no responsibility for any effect which certification or failure to obtain certification may have on the private or professional activities of candidates.

When an application is submitted, candidates are required to sign an agreement, a portion of which reads as follows: "I agree to disqualification from examination or from the issuance of a certificate, and I agree to the forfeiture and redelivery of such certificate in the event that any of the statements herein made by me at this time or at any time in the past or future in regard to my application for a certificate is false, or in the event that any of the rules and regulations of the Board governing such examinations and certificate is violated by me."

Certificates which have been issued are subject to the provisions of the Articles of Incorporation, the Constitution and Bylaws of the American Board of Colon and Rectal Surgery, Inc., and may be revoked for violation of any of these provisions.

### Examination of Candidates With Disabilities

The American Board of Colon and Rectal Surgery supports the intent of the Americans with Disabilities Act (ADA). The Board will make a reasonable effort to provide qualified Board candidates who have documented disabilities the necessary auxiliary aids and services that do not fundamentally alter the measurement of the skills or knowledge the Board's examination is intended to test or result in an undue burden.

## American Board of Dermatology

Irwin M. Freedberg, MD, President, New York, New York

Edward A. Krull, MD, Vice President, Detroit, Michigan

Detroit, MI 48202

Harry J. Hurley, MD, Associate Executive Director, Upper Darby, Pennsylvania

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Dermatology to ascertain whether the information below is current.)*

## Requirements for Eligibility to Take the Examination

Each applicant must satisfy the following requirements before he/she is eligible to take the certifying examination of the Board.

### A. General Qualifications

1. The candidate must have graduated from a medical school in the United States accredited by the Liaison Committee on Medical Education (LCME), an accredited medical school in Canada, an accredited osteopathic school in the United States, or if a graduate of a foreign medical school, the candidate must possess the standard certificate of the Educational Commission for Foreign Medical Graduates (ECFMG).
2. The candidate must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in either the United States or Canada.

### B. Residency Training Requirements

1. Candidates for certification by the American Board of Dermatology are required to have a total of 4 years of postgraduate training as described below.
  - a. The first year must consist of clinical training in one of the following types of broad based programs in the United States accredited by the Accreditation Council for Graduate Medical Education (ACGME) or a similar program in Canada accredited by the Royal College of Physicians and Surgeons of Canada, transitional year (formerly called flexible first postgraduate year), or a first year residency in internal medicine, general surgery, family practice, obstetrics and gynecology, or pediatrics.
  - b. Three years of full-time training as a resident in a dermatology residency training program in the United States accredited by the ACGME or 3 years of full-time training as a resident in a dermatology residency training program in Canada accredited by the Royal College of Physicians and Surgeons of Canada. Accreditation of dermatology training programs in the United States is the responsibility of the Residency Review Committee for Dermatology acting with authority delegated to it by the ACGME (accredited dermatology residency training programs and clinical programs for first postgraduate year credit are listed in this Directory).

At least 75% of the resident's time throughout each year of dermatology residency training must be related to the direct care of dermatologic outpatients and inpatients; this includes clinical conferences, directly related to patient care, consultations, and inpatient rounds.

Dermatopathology, microbiology, and other basic science lectures, seminars, and conferences are essential components of the resident's training (see the "Special Requirements for Residency Training in Dermatology").

The Board also emphasizes the importance of basic and clinical investigation in the educational experience of trainees. Accordingly, all residents should participate in basic and/or clinical research during their training.

During or following the first year of dermatology training (PGY-2), which must conform to the requirements above (75% of time related to the direct care of patients), the training director may request *prospective* approval from the American Board of Dermatology for an academic career track during the second or third year of training for those trainees whose career plans involve a primary commitment to investigative dermatology or an academic career in dermatology. For candidates entering this track, additional time may be devoted to research training during these years. The training director must provide assurance that clinical competence at a level consonant with the standards of the American Board of Dermatology will be attained by the completion of the training period. For each resident, the request for consideration of an academic career track

must include details of the scheduled program and the time commitments during this training must be submitted by the training director at least 4 months prior to the beginning of the special training.

2. A preliminary registration form must be filed by the candidate and signed by his/her training director as soon as the resident begins residency training in dermatology.
3. It is mandatory that the training director submit a yearly report form for each resident to the Board office by August 1 after completion of the first and second year of training and by May 15 for residents who will complete their third year of training on June 30. In order for a candidate to take the certifying examination, the training director must certify that each year of training was completed in a satisfactory manner.
4. Training must be completed within 5 years after the beginning of dermatology residency, except when military service or other compelling circumstances intervene.

### Registration for the Examination of the Board

Candidates who have completed the training requirements as outlined above are eligible to apply for examination by the Board. Candidates should request an application for certification form from the office of the executive director of the Board. The completed application must be filed with the Board office before May 1 of the year in which the candidate plans to take the examination. Physicians who complete their residency training in dermatology by July 1 of a given year are eligible to apply to take the examination in the fall of that year. It is emphasized that it is the candidate's responsibility to send a completed application form to the Board if he/she plans to take the certifying examination of the Board.

A candidate is not considered an "active" candidate until his/her application has been received and approved by the Board. This approval includes a review of the application, letters of reference, and annual evaluation reports from the candidate's training director. After the application is approved, the candidate is required to take the examination within 3 years. Candidates who do not exercise the examination privilege within 3 years of the date they are declared eligible will be required to file a new application and have their eligibility for examination reviewed by the requirements committee. If the reapplication is approved by the Board, the candidate is again eligible to take the examination for another 3-year period.

The Board does not use the term "Board-eligible" in corresponding with directors of hospitals or others who send inquiries to the Board office. On written request by a candidate, the Board will send to the candidate a letter stating his/her status with the Board at any given time; this letter may be used in applying for hospital privileges or for other purposes.

### Board Examination

The certifying examination in dermatology, which is administered over a period of 2 days, includes multiple-choice questions with one correct answer.

1. **Comprehensive Multiple-Choice Examination in Dermatology:** This is a 3-hour comprehensive examination which was formerly referred to as the written or Part I examination. It is an objective form of examination which tests the candidate's knowledge of the basic science and clinical aspects of dermatology, including all the related disciplines. Among the topics included in this part of the examination are clinical dermatology, pediatric dermatology, preventive dermatology, entomology, epidemiology, dermatopathology, cutaneous allergy and immunology, dermatologic surgery, cutaneous oncology, sexually transmitted diseases, internal medicine as it pertains to dermatology, photobiology, and cutaneous microbiology, as well as, anatomy, physiology, biochemistry, radiation physics, radiation therapy, physical therapy, pharmacology, genetics, and electron microscopy as related to dermatology. Considerable emphasis is placed on comprehensive knowledge of the literature.

2. **Examination in Clinical and Laboratory Dermatology:** Visual aids, i.e., projected 2x2 slides, are utilized in this part of the examination. Candidates must answer multiple-choice type questions about the projected pictorial material, which is drawn from all areas of clinical and laboratory dermatology. Examples of the types of slides used include photographs of patients, diagrams and illustrative drawings and pictures of dermatologic surgical procedures, histopathologic sections, fungal cultures, culture mounts, bacterial cultures, Tzanck preparations, skin scrapings and smears, roentgenograms, histochemical and fluorescent photomicrographs, electron micrographs, darkfield micrographs and drawings or photographs of organisms, including viruses, rickettsiae, bacteria and parasites that affect the skin.

3. **Examination in Dermatopathology:** In this section, candidates are questioned on histopathologic slides that they examine microscopically, utilizing personal or rented microscopes. This section of the examination encompasses the entire spectrum of dermatopathology.

For the purposes of scoring, the examination in clinical and laboratory dermatology is combined with the examination in dermatopathology, and candidates must pass this combined examination (formerly designated the Part II examination) as well as the comprehensive multiple-choice examination in dermatology (formerly designated the Part I examination) in order to be certified. If a candidate fails either the combined examination in clinical and laboratory dermatology and the examination in dermatopathology or the comprehensive multiple choice examination in dermatology and not the other, only the failed component must be repeated.

The examination is given annually in the fall over a 2-day period involving a total of approximately 10 hours. In 1993, it will be held on November 7 and 8 at the Holiday Inn O'Hare Airport in Rosemont, Illinois, which is in the O'Hare Airport area of Chicago.

### Reexamination

Candidates who fail either the comprehensive multiple-choice examination in dermatology (Part I), the combined examination in clinical and laboratory dermatology/examination in dermatopathology (Part II), or both parts of the certifying examination are eligible to repeat the examination the following year. A candidate whose application is approved, has 3 years of eligibility to take the certifying examination. If the candidate has not passed the examination during this 3-year period, he/she is eligible to reapply. It is the responsibility of the candidate to notify the Board of his/her intent to take the reexamination. The request for reexamination and the appropriate fee (see "Fees for Examination and Reexamination") must be mailed to the office of the Board no later than May 1 of the year in which the candidate wishes reexamination.

### Handicapped or Disabled Candidates

The Board's policy relating to administration of the certifying examination to individuals with physical handicaps or learning disabilities is as follows: every consideration is given to such individuals to permit them to comply with the testing and certification process. Candidates with such handicaps or disabilities must however, request this accommodation by the Board at the time that they apply to take the examination. Documentation of supporting medical verification is required.

### Chemical Dependency or Substance Abuse

A candidate with chemical dependency or substance abuse will not be permitted to take the examination unless he/she can submit evidence, which must be verifiable, that the disorder is being treated and under control. Individuals with such problems or a history thereof, must provide the necessary documentation at the time of application to take the examination. A confirmatory letter from a licensed physician within 1 month of the examination that the disorder no longer exists or is currently controlled is also necessary.

## Certification

After meeting the above requirements and passing the examination the candidate will be awarded a certificate which acknowledges that he/she has completed the required course of graduate study and clinical training, has met other specific standards and qualifications, and has passed the examination conducted by the Board. The candidate is then referred to as a diplomate of the American Board of Dermatology, Inc. The names of diplomates of the Board appear in the *ABMS Directory of Certified Dermatologists* and the *ABMS Compendium of Certified Medical Specialists*, published by the American Board of Medical Specialists. The names are also submitted to the *Directory of Medical Specialists*, published by Marquis Who's Who.

Each certificate is subject to revocation in the event that (a) the physician so certified shall not have been eligible to receive such certificate, whether or not the facts concerning his/her ineligibility were known or could have been ascertained by the directors of the Board at the time of the issuance of the certificate; (b) the physician so certified shall have made any material misrepresentation or omission in the application for such certificate or in any other statement to the Board or its representatives; and (c) the physician so certified shall have been convicted by a court of competent jurisdiction of a crime relating to or arising out of the practice of medicine.

## Appeals Procedure

The American Board of Dermatology recognizes a candidate's right of appeal following an adverse action at any stage of the certification process. Within the residency program, trainees must be accorded due process in compliance with provisions established by the parent institution and as stipulated in the *Essentials of Accredited Residencies in Graduate Medical Education* (July 1, 1982) of the Accreditation Council for Graduate Medical Education.

Candidates whom the Board has declared ineligible to sit for the certifying examination on the basis of qualifications may appeal such decisions by written request within 90 days of the date of notification of the Board's ruling.

A candidate failing a certifying examination may request in writing that his/her examination be rescored by hand to verify the accuracy of the results as reported. Such requests must be received in the Board office within 90 days of the date of mailing of the examination results to the candidates. A check in the amount of \$35 payable to the American Board of Dermatology must accompany this written request. There shall be no further appeal from failure of an examination.

## Time-Limited Certificates

Beginning with those candidates who pass the certifying examination in 1991 and thereafter, the American Board of Dermatology has and will continue to issue time-limited certificates. These certificates will remain valid for 10 years. The process by which they may be renewed will be announced at a later date.

## Fees for Examination and Reexamination

The directors of the Board serve without compensation. Fees are based on the actual expenses incurred in office administration and in conducting the examination.

The examination fee for the certifying examination is \$1000 payable when the application is submitted. The fee for reexamination is \$900. All checks are to be made payable to the American Board of Dermatology, Inc.

When a candidate's application for the certifying examination or a special qualification examination is disapproved or when the candidate withdraws, the Board retains an administrative fee of \$50.

## Publication

The American Board of Dermatology, Inc. publishes a booklet of information which may be obtained from the Board office.

All correspondence should be sent to:

Clarence S. Livingood, MD  
Executive Director  
The American Board of Dermatology, Inc.  
Henry Ford Hospital  
Detroit, MI 48202

## Certification for Special Qualification in Dermatopathology

Special qualification certification in dermatopathology is a joint and equal function of the American Board of Dermatology (ABD) and the American Board of Pathology (ABP). Such function will relate to qualifications of candidates, standards of examination, and the form of the certificate.

All candidates applying for examination must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in either the United States or Canada.

### A. Prerequisites

The American Boards of Dermatology and Pathology will admit candidates to examination for certificates of special qualification in dermatopathology who are otherwise qualified and who have met one of the following requirements:

1. Applicants already holding a primary certificate from the American Board of Dermatology or from the American Board of Pathology (anatomic pathology, or anatomic and clinical pathology) and the addition of 1 year of training in dermatopathology in a program accredited for such training by the ACGME. This additional training must be taken after the candidate has met the full training requirements for certification in dermatology or pathology. The dermatologist applicant must spend one-half of the required training time in pathology. The pathologist applicant must spend one-half of the required training time in clinical dermatology.
2. Applicants who are diplomates of both the American Board of Dermatology and the American Board of Pathology.

### B. Training

Accredited institutional training programs in dermatopathology are an equal and joint function of the departments of dermatology and pathology of that institution. Training programs in dermatopathology are reviewed and accredited by the Residency Review Subcommittee for Dermatopathology, which includes three members from the Residency Review Committee for Dermatology and three members from the Residency Review Committee for Pathology. Upon recommendation by this subcommittee, training programs in dermatopathology are accredited for conjoint action of the Residency Review Committees for Dermatology and Pathology acting with authority delegated by the Accreditation Council for Graduate Medical Education (ACGME). Information concerning accredited dermatopathology training programs may be found in this Directory.

### C. Deadline for Application and Date of Examination

The deadline for receipt of applications to take the examination for special qualification in dermatopathology is July 1 of the year in which the candidate plans to take the examination. Effective in 1992, the certifying examination for special qualification in dermatopathology will be given biennially. Thus, an examination will be given in 1993 and every other year thereafter.

### D. Fee

The fee for the examination for special qualification in dermatopathology is \$1000, payable when the application is submitted.

#### Committee for Dermatopathology:

Ronald J. Barr, MD (ABD)  
Merle W. Delmer, MD (ABP)  
Mark Allen Everett, MD (ABD)  
Thomas J. Gill III, MD (ABP)  
Loren E. Golitz, MD (ABD)

William H. Hartman, MD (ABP)  
 M. R. Abell, MD, (Staff, ABP)  
 Harry J. Hurley, MD (Staff, ABD)

**Certification for Special Qualification in Dermatological Immunology/Diagnostic and Laboratory Immunology**

**A. Prerequisite**

The requirements for special qualification certification in dermatological immunology/diagnostic and laboratory immunology (DI/DLI) are as follows:

1. An applicant must be a diplomate of the American Board of Dermatology.
2. An applicant must have satisfactorily completed an accredited 1 year fellowship or residency in dermatological immunology/diagnostic and laboratory immunology.

**B. Training**

A minimum of 1 year of full-time training in an accredited DI/DLI training program will be required of all candidates. Information concerning accredited training programs in DI/DLI is available from the office of the American Board of Dermatology.

**C. Deadline for Application and Date of Examination**

The deadline for receipt of applications to take the examination for special qualification in DI/DLI is April 1 of the year in which the candidate plans to take the examination. The next examination in DI/DLI will be given in Chicago, Illinois on November 5, 1993.

**D. Fee**

The fee for the DI/DLI special qualification examination is \$850, payable when the application is submitted.

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Emergency Medicine to ascertain whether the information below is current.)*

**Requirements for Certification in Emergency Medicine**

An applicant must satisfy all credential requirements at the time the application is submitted. Requirements fulfilled after the date of application will not be considered.

The applicant must have graduated from medical school.

1. Graduates of approved schools of osteopathic medicine in the United States are considered when they have satisfactorily met the credential requirements as outlined.
2. An applicant graduating from a medical school other than one in the United States, its territories, or Canada must provide the Board with a verified and translated diploma.

The applicant must hold a valid and unrestricted license to practice medicine in the United States, its territories, or Canada, throughout the certification process. All licenses held by the applicant must fulfill this requirement.

The applicant must have successfully completed a total of 36 months of post-medical school training, under the control of an accredited emergency medicine residency program. Emergency medicine programs must be accredited by the Accreditation Council for Graduate Medical Education (ACGME) or the Royal College of Physicians and Surgeons of Canada for Canadian programs.

If the emergency medicine residency training program is structured so that it exceeds the length of training specified above, the resident must successfully complete the requirements of his/her residency program to apply under the emergency medicine residency category of application.

Note: For residents who began their emergency medicine training prior to July 1, 1987, the candidate must have successfully completed a total of 36 months of post-medical school training, at least 24 months of which were under the control of an accredited emergency medicine residency program at the PGY II level and above.

The applicant must submit 50 hours of continuing medical education in emergency medicine annually, acceptable to the Board, starting 1 year from the date of graduation from the emergency medicine residency program and continuing until the date of application. If a resident applies to the Board within one year of graduation no continuing medical education is required.

**Special Application**

An applicant who does not meet the requirements for certification as printed but who believes he/she has equivalent experience and/or training may submit an application under the special category.

If the candidate suggests or requests credit for any experience which does not fit within the requirements for certification the candidate must apply under the special application category and provide a detailed description and rationale for the candidate's situation/experiences.

This category of application is not intended to bypass the credential requirements but rather, *equivalency must be demonstrated.*

It is the responsibility of the applicant to provide a sufficient rationale under the special application category. All material submitted in support of a special application must be typewritten.

A special application, by its nature, involves a more lengthy review and a decision may not be rendered prior to the written examination of the year in which the application was submitted.

Effective July 15, 1993, the special category of application will terminate. The final acceptance of special category applications will be during the 1993 application cycle. The 1993 application material will be distributed in April 1993, and applications will be accepted with postmark dates from May 1 through July 15, 1993.

### Combined Training Programs

A special agreement exists with the American Board of Pediatrics whereby an applicant may fulfill the training requirements of both boards by completing joint training in 5 years. Training programs must be approved *prospectively* by both boards. Guidelines for combined training have been approved by both boards and are available by writing either Board office. Applicants may not appear for the certifying examination until all training has been satisfactorily completed.

A special agreement exists with the American Board of Internal Medicine whereby an applicant may fulfill the training requirements of both boards by completing joint training in 5 years. Training programs must be approved *prospectively* by both boards. Guidelines for combined training have been approved by both boards and are available by writing either Board office.

Applicants may not appear for the certifying examination until all training has been satisfactorily completed.

### Applications

Applications are distributed in the spring of each year (mid-April) and are available from the Board office. Applications are accepted from May 1 through July 15 of each year. A mailing list is maintained throughout the year for requests received during times when applications are not available.

A non-refundable processing fee must accompany the application at the time it is submitted.

Applicants wishing to be considered for examination must submit a fully completed application form to the Board. The Board will not be responsible for any opinion expressed concerning the individual's credentials for the examination unless it is in writing and over the signature of the president or secretary of the Board.

### Examination Information

The certification examination in emergency medicine is composed of two parts. The first part is a 6.25-hour comprehensive written examination, administered one time each year. It includes multiple choice and pictorial multiple choice items.

The oral certification examination includes seven simulated patient encounters: five single patient encounters and two multiple patient encounters.

A candidate must successfully complete the written examination to be scheduled for the oral examination.

The written examination is offered in the fall of each year and oral examinations are scheduled the following year.

Examination fees are due upon assignment to an examination administration.

### Certification

All candidates who successfully complete the examination shall be known as diplomates of the American Board of Emergency Medicine and shall receive an appropriate certificate which shall remain the property of the American Board of Emergency Medicine. Certification is for a period of 10 years.

Any certificate issued by the Board shall be subject to revocation at any time should the Board determine, in its sole judgment, that a candidate who has received a certificate was in some respect not properly qualified to receive or retain it.

### Recertification

ABEM diplomates will have four options for achieving recertification: passing either the written or the oral certification examination or the

written or the oral recertification examination. The final administration of the oral recertification examination will be held in November 1993. Passing any one examination will earn the diplomate an additional 10-year certificate.

### ABFP Official Definition of Family Practice

"Family practice is the medical specialty which is concerned with the total health care of the individual and the family. It is the specialty in breadth which integrates the biological, clinical, and behavioral sciences. The scope of family practice is not limited by age, sex, organ system, or disease entity."

### The Certification Process

The American Board of Family Practice (ABFP) administers the certification and recertification examinations in various centers throughout the United States annually, on the second Friday in July.

The American Board of Family Practice certification and recertification examinations are written tests of cognitive knowledge and problem solving abilities relevant to family practice.

Appropriate subject areas of the following disciplines are included: internal medicine, pediatrics, surgery, obstetrics, gynecology, psychiatry, behavioral sciences, community medicine, and geriatrics.

Elements of the examination include but are not limited to diagnosis, management, and prevention of illness.

### Requirements for Certification

#### A. General

1. All candidates for the American Board of Family Practice certification examination must have satisfactorily completed 3 years of training (a full 36 calendar months with 12 months in each of the G-1, G-2, and G-3 years) in a family practice residency program accredited by the Accreditation Council for Graduate Medical Education (ACGME) subsequent to receipt of the MD or DO degree, and when applicable, a Fifth Pathway year, or receipt of a standard certificate from the Educational Commission for Foreign Medical Graduates, or compliance with other ACGME requirements for entry into graduate medical training in the United States.

The Board prefers all 3 years of training to be in the same ACGME-accredited family practice program, however, other train-

ing may be considered as equivalent (eg, flexible/transitional year, AOA osteopathic internship).

In these cases, and for physicians who have had foreign training, each individual's training will be evaluated by the Board.

Foreign trained physicians must meet all of the requirements of the residency qualifying examination and obtain a passing score to receive any credit toward certification for prior training. If a program admits a resident into training with the expectation of advanced placement credit toward certification but there has been no prior written communication between the program and the Board concerning transfer/advanced placement the resident will be required to complete 36 months of training in order to make application for certification.

The last 2 years of family practice residency training must be completed in the same accredited program unless written approval for transfer from one ACGME program to another is granted by the Board prior to the transfer. Transfers after the beginning of the G-2 year are approved only in extraordinary circumstances.

Verification of satisfactory completion of residency training must be stated in writing by the director of the program. All applicants for the certification examination are subject to the approval of the Board, and the final decision regarding any application rests solely with the ABFP.

2. All candidates' education and training experiences are subject to review and approval by the ABFP. Any variance from the above must have prior written approval of the Board. No credit may be given for any previous training as equivalent to family practice training without the prior written approval of the Board.
3. Candidates must complete all requirements of the Board no later than June 30 of the year of the examination. Complete documentation from the program director that the resident has or is expected to have satisfactorily completed the residency must be received by the Board by June 30. Applications, supplied to the residents directly through the program director, are made available only to residents expected to complete the required training by June 30 of the current year. Residents who complete their training at an interim date must write to the Board for an application.
4. All candidates must hold a currently valid, full and unrestricted license to practice medicine in the United States or Canada. Furthermore, every license to practice medicine held by the candidate in any state or territory of the United States or province of Canada must be currently valid, full, and unrestricted, whether or not the candidate in effect practices in such state, territory or province. Candidates shall be required to maintain a full and unrestricted medical license in the United States or Canada even if they are out of the country for extended periods of time. Involuntary loss of a license will result in the simultaneous loss of diplomate status and/or the ability to make application for certification, recertification, or other examinations offered by the Board. Any candidate whose license to practice medicine has been revoked, suspended, or restricted in any state or territory of the United States or province of Canada, shall be ineligible for certification until such time as the encumbered license is reinstated in full. Should a license be revoked, suspended, or restricted following the submission of an application for certification but prior to the notification of examination results, the application and certification will be simultaneously invalidated. It is the responsibility of the candidate to inform the Board immediately upon a change in licensure status. If the candidate fails to notify the Board of any suspension, revocation, restriction or probation within 60 days after the effective date, the physician shall be ineligible to seek certification for up to 1 year following the reinstatement of full and unrestricted licensure.
5. No candidate will be allowed to take the examination until all fees are paid, and all of the above requirements have been satisfactorily met.

### B. Osteopathic Physicians

Osteopathic physicians who have graduated from an American Osteopathic Association (AOA) approved school of osteopathic medicine in the United States may qualify for certification if they meet all the same requirements as specified for allopathic medical school graduates. They may apply to ACGME-accredited family practice programs for entry into the first year (G-1). Osteopathic physicians who have documented satisfactory completion of an AOA approved internship (G-1) year may receive credit for that portion of the G-1 year which meets the American Board of Family Practice guidelines for advanced level entry or interprogram transfers.

All candidates (MD or DO) must satisfactorily complete at least 36 calendar months of accredited graduate medical education. Only the G-1 year may be fulfilled by an AOA-approved internship year. The training beyond the G-1 year must be in continuity in an ACGME-accredited family practice residency program.

### C. Canadian Applicants

Canadian applicants may qualify for examination via either of the following routes:

1. Physicians who have satisfactorily met the requirements of the College of Family Physicians of Canada (CFPC) by completion of 2 years of training in a program accredited by the College of Family Physicians of Canada must have a third year of accredited family practice residency. This third year of training must be satisfactorily completed in an ACGME accredited family practice program or, if taken in Canada, must be approved by the College of Family Physicians of Canada and must have the prior approval of the American Board of Family Practice. Only those programs that bring the third-year experience into compliance with the ACGME "Special Requirements for Residency Training in Family Practice" will be considered as being equivalent to a third year in a ACGME-accredited family practice training program. The request must be accompanied by documentation of satisfactory performance of the first 2 years of training (including a description of the curriculum) signed by the program director.
2. Physicians who have been certified by examination by the College of Family Physicians of Canada (certificants), and who:
  - a. have established legal residence in the United States for not less than the immediate past 2 years at the time of application; and
  - b. since residing in the US have accumulated a minimum of 50 hours per year of continuing medical education approved by the American Board of Family Practice; and
  - c. are actively engaged professionally full-time and exclusively in family practice (practice and/or teaching, administration); may be permitted to apply for examination for certification by the American Board of Family Practice.

### The Recertification Process

The American Board of Family Practice confers diplomate status for the specified period of time noted on the certificate. The certificate is dated for a 7-year period. In order to maintain diplomate status, the diplomate must be recertified before the certificate expires. Although the certificate is dated for seven years, the Board routinely administers the recertification process on a 6-year cycle. This allows a "reserve" year for those diplomates who for some reason are unable to participate in the sixth year, or in cases where the diplomate fails to receive a satisfactory score in the sixth year.

Should a diplomate not be recertified by the end of the seventh year, the certificate will expire and the physician will lose diplomate status. However, the physician may reapply for the recertification process, but must meet all criteria in effect at that time.

For diplomates who participate in the recertification process during the sixth year and pass, the new certificate of seven years duration is dated from the time of that examination.

Diplomates will be given advance notice of any changes in the recertification requirements.

## Requirements for Recertification

- A. Submission of a formal application.
- B. Documentation of 300 hours of approvable continuing medical education.
- C. Submission of statement of acknowledgment and compliance with Board policy regarding medical licensure.
- D. Satisfactory completion of the office record review portion of the recertification process.
- E. Satisfactory performance on the written test of cognitive knowledge.

## Reexamination

Candidates who fail the examination may apply for admission to the next annual examination. There is no limit to the number of times a qualified candidate may take the examination when it is offered, provided the qualifications are met with each reapplication. In addition to valid and unrestricted licensure status, 50 hours per year of continuing medical education since the last application are required for reexamination. Full fees are charged for each examination.

## Certificate of Added Qualifications in Geriatric Medicine

The American Board of Family Practice and the American Board of Internal Medicine have agreed to award certification on the basis of performance on a single jointly developed examination in geriatric medicine. The requirements are similar and the standard for certification by the two Boards is identical. This "added certificate" is designed to recognize the excellence among those diplomates who provide care to the elderly.

### A. Requirements

1. ABFP diplomates must be in good standing with the Board at the time of the examination and must hold a valid and unrestricted license to practice medicine in the United States and Canada. Diplomates must apply through one of the two plans described below:
  - Plan I (Fellowship Pathway)—for diplomates who have successfully completed 2 years of acceptable formal training in Geriatric Medicine.
  - Plan II (Practice Pathway—applicable *only* through the 1994 examination):
    - a. for diplomates who can document at least 4 years of substantial practice involving elderly patients.
    - b. for diplomates who have had one year of acceptable formal training in geriatrics and can document 2 years of substantial practice experience involving elderly patients.
2. Achievement of satisfactory score on a 1-day examination.

### B. Recognition of Successful Candidates

Successful candidates will be awarded an ABFP certificate of added qualifications in geriatric medicine. The certificate will be valid for 10 years. Reassessment will be required for renewal of certification.

Loss or expiration of primary certification in family practice will automatically result in simultaneous loss of the certificate of added qualifications in geriatric medicine.

## Revocation

### A. General

Each certificate issued by the Board of Directors of the American Board of Family Practice shall be subject to revocation in any of the following circumstances:

The issuance of such certificate or its receipt by the person so certified shall have been contrary to, or in violation of, any provision of the Articles of Incorporation of the American Board of Family Practice, Inc. or of the Bylaws of the American Board of Family Practice.

The person so certified shall not have been eligible to receive such certificate, irrespective of whether or not the facts constituting such ineligibility were known to, or could have been ascertained by, the directors of the corporation or its representatives.

The person so certified shall have made a misstatement of fact in the application for such certificate or in any other statement or representation to the corporation or its representatives.

The person so certified shall at any time have neglected to maintain the degree of competency in the field of family practice as established by the Board.

### B. Licensure Status

A diplomate of the American Board of Family Practice shall be required to hold a currently valid, full and unrestricted license to practice medicine in the United States or Canada. Furthermore, every license to practice medicine held by a diplomate in any state or territory of the United States or province of Canada must be currently valid, full, and unrestricted, whether or not the diplomate in effect practices in such state. Diplomates shall be required to retain a full and unrestricted medical license in the United States or Canada even if they are out of the country for extended periods of time. Failure to retain a license will result in loss of diplomate status and the ability to make application for certification, recertification, or other examinations offered by the Board.

In the event a diplomate's license to practice in any state or territory of the United States or province of Canada is revoked, restricted, or suspended, the diplomate's status with the American Board of Family Practice is to be simultaneously rescinded at the time of the licensure revocation, restriction, or suspension. The physician shall within 60 days so advise the American Board of Family Practice and shall cease immediately identifying himself/herself in any way directly or indirectly as a diplomate of the American Board of Family Medicine.

If the physician fails to notify the American Board of Family Practice of any revocation, restriction, or suspension within 60 days after the effective date, he/she shall be ineligible to seek reinstatement of diplomate status for up to 1 year following the reinstatement of full and unrestricted licensure.

If and when the physician's revoked or suspended license is reinstated in full (with no restrictions) and official documentation of reinstatement is provided to the ABFP, the physician may seek reinstatement of diplomate status. Reinstatement as a diplomate shall require the submission of an application for reinstatement and successful compliance with the requirements of certification or recertification, as determined by the Boards, in effect at that time, including, but not necessarily limited to, the written examination held annually.

### C. Authority

The Board of Directors of the American Board of Family Practice, Inc. shall have sole power and authority to determine whether or not the evidence or information before it is sufficient to constitute grounds for revocation of any certificate issued by this corporation. The Board of Directors may, however, at its discretion, require any person so certified to appear before the Board of Directors, upon not less than 30 days written notice by registered mail, and to show cause, at the time and place specified in such notice, why the certificate should not be revoked. The failure of any person so notified to appear as required in such notice shall, at the discretion of the Board of Directors, constitute cause for revocation of the certificate. The decision of the Board of Directors in all such matters shall be final.

## Board Eligibility

The American Board of Family Practice does not recognize or use the term "board eligible," and does not issue statements concerning "board eligibility." The Board informs an applicant of admissibility to an examination to be given on a specified date after a formal application has been reviewed and approved.

## Applying for the Certification Examination in Family Practice

An application must be submitted with a check or money order in the amount of \$500 (US dollars), payable to the American Board of Family Practice and postmarked no later than the published deadline.

The application must be accompanied by evidence of compliance with the Board's policy on licensure and all other requirements in effect at the time of application.

Examination fees are good only for the examination for which the application has been filed and are nonrefundable in whole or in part. The Board reserves the right to allow deferment of application fee without penalty under certain circumstances. These circumstances include but may not be strictly limited to serious injury or illness of the candidate.

Any candidate whose application is not approved for any reason will be refunded \$400. The application will be discarded and a new application will be required for future exams.

An approved application is valid for 3 years. Thus, if a candidate fails or is unable to take an examination subsequent processing materials will include: a test center selection form, new fee, current licensure information, continuing medical education (if applicable), and acknowledgment of requirements and conditions of examination. Should reexamination occur beyond the 3-year life of the application, a new application with prevailing fees will be required. Fifty hours of approved continuing medical education will be required for each year a candidate has been out of residency beyond 3 years.

All applications must be returned to the following address:

American Board of Family Practice  
2228 Young Drive  
Lexington, KY 40505

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Internal Medicine to ascertain whether the information below is current.)*

### Preface

The Board's decision about a candidate's eligibility for certification in internal medicine and the subspecialties and added qualifications of internal medicine is governed by the policies and procedures described in this document. This edition of policies and procedures supersedes all previous publications.

The Board reserves the right to make changes in its fees, policies, and procedures at any time without advance notice. The Board also reserves the right, under extraordinary circumstances, to waive certain of its requirements. This document is not to be construed as a contract between a candidate and the American Board of Internal Medicine.

### Introduction

The American Board of Internal Medicine (ABIM) was established in 1936 by joint action of the Section on Medical Practice of the American Medical Association and the Board of Regents of the American College of Physicians. The Board is a private, non-profit corporation which is not a part of or affiliated with any other organization. Its members serve rotating terms with new members annually elected by the Board. The Board receives no public funds and has no licensing function. The mission of the American Board of Internal Medicine is to enhance the quality of health care available to the American public by continuously improving the process of and by maintaining high standards for certifying individual internists who possess the knowledge, skills, and attitudes essential to the provision of excellent care. Certification by the ABIM recognizes excellence in the discipline of internal medicine and its subspecialties. Certification by the Board is not a requirement to practice internal medicine or a subspecialty, nor does the Board confer privilege to practice. The Board does not intend either to interfere with or to restrict the professional activities of a licensed physician because the physician is not certified.

The Board's goals for recertification are to improve the quality of patient care, to set standards of clinical competence for the practice of internal medicine its subspecialties and added qualifications; and to foster the continuing scholarship required for professional excellence over a lifetime of practice.

The Board administers the certification and recertification processes by: (1) establishing training requirements for Board candidates, (2) assessing the credentials of candidates, (3) obtaining substantiation by appropriate authorities of the clinical competence and professional standing of candidates, and (4) developing and conducting examinations for certification and recertification.

The duration of the validity of all certificates issued by the Board in 1990 (1987 for critical care medicine and 1988 for geriatric medicine) and thereafter is 10 years, and the dates of validity will be noted on the certificates. Certificates issued before 1990 will continue to be valid indefinitely. Diplomates with certificates that are valid indefinitely will be offered the same opportunity to recertify as those who hold time-limited certificates.

In 1995 the Board will offer its comprehensive recertification program for all Diplomates holding time-limited certificates. In the interim, recertification is available to all diplomates whether their certificate is valid indefinitely or time-limited. The recertification certificate awarded will be valid for 10 years.

The Board conducts research to improve its certification standards and to evaluate certification procedures.

## Training Requirements for Certification in Internal Medicine

### A. Predoctoral Medical Education

Candidates from medical schools in the United States or Canada must have attended a school accredited at the date of graduation by the Liaison Committee on Medical Education or the Committee for Accreditation of Canadian Medical Schools. Candidates from osteopathic medical schools must have graduated from a college of osteopathic medicine accredited by the American Osteopathic Association.

Graduates of foreign medical schools are required to submit one of the following:

1. A permanent (valid indefinitely) certificate of the Educational Commission for Foreign Medical Graduates, or
2. Comparable credentials from the Medical Council of Canada, or
3. Documentation of training for those candidates who entered post-doctoral medical training in the United States via the "Fifth Pathway," as proposed by the American Medical Association.

### B. Postdoctoral Training Requirements

To be admitted to an examination, physicians must have completed 3 years of accredited training before July 1 of the year of examination. No internship or residency training taken before the date of completion of requirements for the MD or DO degree will be credited toward the Board's training requirements.

The 3 years of required training must satisfy all of the three following conditions:

1. The director of the accredited internal medicine training program must have had responsibility for the educational process during all of the 36 months of training. The program director may assign up to 6 months to training in specialties other than internal medicine, as long as the director maintains contractual responsibility for the resident during this time.
2. The 36 months of training must have included a minimum of 24 months of meaningful patient responsibility; 4 months of meaningful patient responsibility may be taken outside internal medicine with the approval of the internal medicine program director.
3. The training must be completed in an internal medicine program accredited by the Accreditation Council for Graduate Medical Education (ACGME) or training completed in Canada and accredited either by the Royal College of Physicians and Surgeons of Canada or by the Professional Corporation of Physicians of Quebec.

The Board determines credit for the first postdoctoral year of training (PGY-1), depending on which of the following types of training was undertaken:

1. **Categorical First Year in Internal Medicine**—Twelve months of credit are given for categorical first years completed under the supervision of the director of an accredited internal medicine program.
2. **Preliminary First Year in Internal Medicine**—This type of training is undertaken in more than one department. Twelve months are credited if the training was under the supervision of the director of an accredited internal medicine program and included a minimum of 8 months of internal medicine, or 6 months of internal medicine and 2 months of pediatrics, dermatology, neurology, and/or emergency room care.
3. **Flexible First Year**—No credit is given for training undertaken between 1975 and 1982 in unaccredited flexible first year programs.
4. **Transitional Year**—In programs where one sponsoring residency is internal medicine, candidates will receive month-for-month credit for training in internal medicine. Twelve months are credited if training included a minimum of 8 months of internal medicine, or

6 months of internal medicine and 2 months of pediatrics, dermatology, neurology, and/or emergency room care.

## Alternate Training Pathways

### A. Clinical Investigator Pathway

The Board has established a pathway for investigators highly trained in both clinical sciences and clinical or biomedical research. This pathway leads to certification in internal medicine with four years of training. A clinical investigator can achieve certification in internal medicine and a subspecialty with 6 years of training (7 years for cardiovascular disease and for those seeking dual certification in hematology and medical oncology or pulmonary disease and critical care medicine). The clinical training and research may be taken in any sequence.

Candidates must complete 2 years of accredited residency training in internal medicine with at least 20 months of meaningful patient responsibility and an appropriately balanced curriculum. Candidates must demonstrate superior overall competence in both years of internal medicine training. Candidates seeking certification in a subspecialty must meet the clinical training requirements for that subspecialty examination. During research training, candidates are strongly encouraged to maintain a continuity clinic appropriate for their stage of clinical training (general internal medicine during residency training and subspecialty clinic during fellowship training).

Candidates must complete 2 years of full-time research (3 years if the candidate plans to pursue subspecialty certification) during which at least 80% of the candidate's professional time and effort is dedicated to investigative activities. The candidate's arrangements for research must be prospectively approved by the Board prior to the completion of internal medicine clinical training. Credit will be granted for research undertaken prior to the award of the MD degree or outside the US or Canada only in rare instances.

The certifying examination in internal medicine can be taken in the fall of the PGY-4, so long as 2 years of accredited residency training in internal medicine precede admission to the examination. Candidates who are not in an accredited fellowship must provide documentation that they are in research training during PGY-4.

A subspecialty examination may be taken in the fall of PGY-6 (PGY-7 for cardiovascular disease and for those seeking dual certification in hematology and medical oncology or pulmonary disease and critical care medicine). Candidates for a subspecialty examination must provide documentation in PGY-6 that they are in full-time research training, or in a full-time faculty position with substantial (ie, 50% professional time and effort) research involvement. Candidates who are no longer in a research program in the fall of PGY-6 will not be admitted routinely to a subspecialty examination. The credentials of such candidates must be reviewed by the Board to determine admissibility to the examination.

The proposal should be sent to the ABIM as early as possible and must be received no later than March 1st of the R-2 level year. It must include:

1. A letter of recommendation and description of training from the residency program director, including documentation of a superior rating of clinical competence.
2. A letter of support from the sponsor of the research training describing the proposed program and documenting that it will be of the required duration.
3. A letter of support from the subspecialty program director, if the research training is to occur during fellowship training.
4. Curriculum vitae.

### B. Training Taken In Accredited Programs Other Than Internal Medicine

For physicians transferring to the first or second year of internal medicine programs from other accredited residencies, the internal medicine program director may grant a maximum of 6 months credit

for months of training in internal medicine which were under the supervision of the director of an accredited program in internal medicine. These 6 months may not include rotations in other specialties in the first postgraduate year, emergency room, or neurology, even if such are routine rotations for R-1 internal medicine housestaff. See below under "Candidates for Special Consideration" for information about proposals of exceptions to these requirements.

### **C. Combined Training Leading to Certification by Two Boards**

Candidates who are otherwise eligible for certification by the ABIM and another specialty Board may be admitted to the examinations of both Boards after such candidates complete suitable accredited residency training in each specialty in a single academic medical center involving a coherent educational program, collaborative direction, graded responsibility, and continuity clinics. Guidelines for combined residency training have been developed with the American Board of Pediatrics, American Board of Emergency Medicine, American Board of Psychiatry and Neurology, and the American Board of Physical Medicine and Rehabilitation and are available from the Board.

### **Candidates for Special Consideration**

The Board recognizes that it should be flexible in its evaluation of the credentials of worthy candidates whose training or experience in internal medicine differs from the standard requirements. Therefore, guidelines have been established for proposing candidates for special consideration.

The principle which guides the Board in its assessment of such candidates is that (1) the Board must consider the candidate's training and experience to be at least equivalent in duration and quality to that required in accredited programs in the published, standard pathway to admission to an examination, and that (2) the level of overall clinical competence achieved by the candidate as an internist be at least equivalent to that achieved by candidates completing the required training.

The Board does not consider training in subspecialty fellowships to be equivalent to internal medicine training.

These guidelines do not define new pathways or reduce the requirements for admission to examinations. Receipt of a proposal in no way implies its approval.

Complete proposals for special consideration should be received in the Board office by January of the year in which the examination is to be taken. Review of the proposal may require several months.

### **A. Candidates with Substantial Training in Internal Medicine in Accredited Programs in the United States or Canada:**

The Board will review proposals for candidates with at least 2 years of training in internal medicine in accredited programs in the United States or Canada that has occurred: (1) after 3 or more years of verified foreign training in internal medicine or, (2) after 3 or more years of accredited training in another specialty in the United States or Canada.

Proposals requesting up to 2 months credit per year for time spent on non-internal medicine specialty training will also be considered on behalf of individuals with less than 3 years of training in another specialty.

The candidate must be proposed by the chairman of a department of medicine in an accredited medical school or the program director of an accredited residency in internal medicine. Before being proposed the candidate must have been observed by the proposer for at least 1 year.

The candidate must demonstrate satisfactory overall clinical competence. The judgment of clinical competence must be the result of several observers and concurred with by the local clinical competence committee. Documentation must include the results of observing the candidate's performance in a clinical evaluation exercise. The

candidate must have completed at least 20 months of meaningful patient responsibility time during the 2-year training period.

The proposal must:

1. Describe in detail the candidate's professional training and experience in internal medicine,
2. Document the reasons the proposer feels the candidate merits special consideration,
3. Substantiate the candidate's satisfactory clinical competence,
4. Include the candidate's curriculum vitae and bibliography. For foreign medical graduates, authenticated credentials such as a permanent (valid indefinitely) ECFMG certificate must be included.

### **B. Candidates With Less Than Two Years of Internal Medicine Training in the United States or Canada But With Equivalent Training or Experience:**

The Board will review proposals for exceptional candidates with less than the 2 years of accredited internal medicine training. These exceptional candidates must be professionally active in internal medicine and/or one of its subspecialties in the United States or Canada for at least 1 year at the time of the proposal and must possess a valid, unrestricted license to practice in a state, territory, commonwealth, province, or possession of the United States or Canada. Only a few rare proposees will be admitted through this pathway.

The candidate must be proposed by one of the following individuals who has personal knowledge, or direct access to knowledge, of the qualifications of the candidate, who is certified by the ABIM, and who has observed the candidate's clinical competence for at least 1 year:

1. The chairman of the department of medicine in an accredited medical school if the candidate is a member of the department; or
2. The program director of an accredited training program in internal medicine if the candidate holds a teaching appointment; or
3. The chief of medicine of the hospital in which the candidate currently holds his/her primary practice privileges; or
4. A past or present member of the Board of Directors of the American Board of Internal Medicine.

Such candidates must demonstrate superior overall clinical competence. The judgement of clinical competence must be the result of several observers and concurred with by the local clinical competence committee. The documentation must include the results of observing the candidate's performance in a clinical evaluation exercise.

The proposal must:

1. Describe in detail the candidate's professional training and experience in internal medicine;
2. Document the reasons the proposer feels the candidate merits consideration as an exceptional candidate such as his/her reputation as an outstanding clinician or consultant, unique contribution to medical education and/or research, leadership in the medical community, etc.;
3. Be accompanied by letters of endorsement by at least three diplomates of the ABIM attesting to the candidate's superior clinical competence, and
4. Include the candidate's curriculum vitae and bibliography. For foreign medical graduates, a permanent (valid indefinitely) ECFMG certificate must be included.

### **Substantiation of Clinical Competence**

#### **A. Components of Clinical Competence**

The Board has defined the following six essential components of clinical competence: clinical judgment, medical knowledge, clinical skills (medical interviewing, physical examination, procedural skills), humanistic qualities, professional attitudes and behavior, and provision of medical care.

The Board does not prescribe an absolute number of times a procedure must be done to assure a high level of competency. However, it

has developed guidelines for the minimum number of directly supervised, successfully performed procedures below which the confirmation of proficiency is not credible. The following diagnostic and therapeutic procedures are required for certification: Abdominal paracentesis (3), arterial puncture for blood gas analysis (5), arthrocentesis of the knee joint (3), central venous line placement (5), lumbar puncture (5), nasogastric intubation (3), thoracentesis (5), and critical life-saving procedures (this requirement can be met by documentation of successful training in advanced cardiac life support). The number in parenthesis refers to the minimum number the Board believes is required before competency can be considered.

### **B. Annual Evaluation of Residents**

The Board requires that a resident's overall clinical competence, humanistic qualities and moral and ethical behavior be evaluated during each of the 3 years of training.

Residents finishing their first and second years of training must be rated on an ABIM annual evaluation summary form. Residents rated as superior or satisfactory will receive credit for the year of training. Residents rated as unsatisfactory in their R-1 or R-2 year will receive no credit. Residents rated marginal in the R-1 year will receive credit for that year of training. However, residents receiving marginal ratings in both R-1 and R-2 years must take an additional year of training since the ABIM will not grant credit for the second marginal year. Residents who receive ratings of marginal or unsatisfactory on the ABIM annual evaluation summary form must sign the form before it is returned to the Board.

In the R-3 year, all residents must be judged to be satisfactory in each of the components of competence defined by the Board.

In general, the Board believes that additional training is required to correct deficiencies in clinical competence. It is the resident's responsibility to arrange for this training. If this additional training is taken in a different program, the Board requires that residents request that a written evaluation of past performance be transmitted from the previous training program to the new training program director. The Board will provide to the accepting program director performance ratings from the previous program and a summary of the number of months of credit toward the 36-month training requirement.

Individuals demonstrating deficiencies solely in the areas of humanistic qualities or moral and ethical behavior may, at the discretion of the Board, be denied credit until additional training and/or a specified period of close observation is completed.

As required by the Accreditation Council for Graduate Medical Education in its "Essentials for Accreditation," trainees must be provided due process at the educational institution. The Board will hear candidates' appeals only after all local remedies to resolve disputes over adverse judgements (eg, unsatisfactory clinical competence, humanistic qualities, professional attitudes and behavior, and moral and ethical behavior) have been exhausted.

### **C. Professional Standing of Practitioners**

Every 4 years following formal evaluation, the Board requires verification that candidates are currently recognized as internal medicine specialists in good standing. Verification is sought from the chief of medical service at the institution where the candidate's principal staff appointment is held. Any challenge to good standing must be resolved locally to the Board's satisfaction before admission to the examination. For example, substance abuse, convictions for felonies related to medical practice, or substantial disciplinary action by a hospital staff may lead to deferred admission or rejection from examination.

### **D. Licensure**

Candidates with a restricted, suspended, or revoked license in any jurisdiction at the time of application or examination will not be admitted to the examination or certified. Restrictions include but are not limited to conditions, contingencies, probation, and stipulated agree-

ments. A valid, unrestricted, and unchallenged license to practice medicine in a state, territory, commonwealth, possession, or province of the United States or Canada will be required of all candidates who will have been out of formal training 1 or more years as of July 1 of the year of examination.

## **The Certification and Recertification Examinations in Internal Medicine**

The Certification Examination is administered annually in many centers throughout the United States and in a few centers in Canada, Puerto Rico, and overseas. It is given in four parts on two consecutive days.

The interim recertification examination will be a 1-day examination which will be administered at the same time the Board administers its examinations for initial certification.

All candidates are admitted to examinations at the discretion of the Board. The Board reserves the right to delete questions or portions of the examination and to cancel and reschedule examinations under unusual circumstances.

The Board does not offer or endorse any specific publications or courses to prepare for its examinations.

More detailed information about the examination is available upon written request from the Board.

## **Areas of Certification and Recertification Offered in the Subspecialties and Added Qualifications of Internal Medicine**

The Board offers certification in the following:

### **Subspecialties:**

Cardiovascular disease  
Endocrinology, diabetes, and metabolism  
Gastroenterology  
Hematology  
Infectious disease  
Medical oncology  
Nephrology  
Pulmonary disease  
Rheumatology

### **Added qualifications:**

Adolescent medicine  
Clinical cardiac electrophysiology  
Critical care medicine  
Diagnostic laboratory immunology  
Geriatric medicine  
Sports medicine

## **Training Requirements for Certification in a Subspecialty or Added Qualification of Internal Medicine**

Physicians who are awarded a diplomate certificate in a subspecialty of internal medicine must be previously certified in internal medicine by the American Board of Internal Medicine. In addition, they must have completed the Board's training requirements, demonstrated clinical competence in the care of patients, and passed the certification examination in the subspecialty.

Subspecialty training initiated July 1, 1989 and thereafter must be accredited by the Accreditation Council for Graduate Medical Education, The Royal College of Physicians and Surgeons of Canada or the Professional Corporation of Physicians of Quebec. Subspecialty training completed prior to 1989 must have been completed in a program associated with an accredited residency in internal medicine in the United States or Canada.

Fellowship training taken before the date of completion of requirements for the MD or DO degree and training as a chief medical resident cannot be credited toward the requirements for subspecialty

certification. Practice experience and attendance at postgraduate courses cannot be credited.

Educational experience in a subspecialty during a full-time junior faculty appointment in an approved medical school in the United States or Canada may be applicable toward the requirements. Such clinical experience must be approved by the appropriate program director and must be reviewed prospectively by the Board.

To be admitted to an examination, candidates must have completed the required subspecialty training before July 1 of the year of examination.

In general, part-time training, even though continuous, is not acceptable. Interrupted full-time training, however, is acceptable, provided that no period of full-time training is shorter than 6 months. Individuals planning such training should seek the guidance of the Board before acting on their plans.

## Subspecialties

### A. Cardiovascular Disease

Three years of accredited training, of which an aggregate of 24 months is clinical training, in the diagnosis and management of a broad spectrum of medical diseases.

### B. Hematology or Medical Oncology

Two years of accredited training accompanied by a minimum of 24 months of experience in an ambulatory care setting. A minimum of one-half day per week must be spent in a continuity outpatient clinic in the longitudinal care of patients.

### C. Endocrinology, Diabetes, and Metabolism; Gastroenterology; Infectious Disease; Nephrology; Pulmonary Disease; and Rheumatology

Two years of accredited training, of which an aggregate of 12 months is clinical training, in the diagnosis and management of a broad spectrum of medical diseases.

## Combined Training Leading to Dual Certification

### A. Hematology and Medical Oncology

Dual certification in hematology and medical oncology requires 3 years of full-time combined fellowship training. The 3 years of combined training must include a minimum of 18 months of prospectively designed full-time clinical training with patient care responsibility. This full-time clinical training must include a minimum of 12 months of training in the diagnosis and management of a broad spectrum of neoplastic diseases including hematological malignancies and the equivalent of a minimum of 6 months of training in the diagnosis and management of a broad spectrum of non-neoplastic hematological disorders. These experiences need not be in sequential months of block time. During the entire 3 years the candidate must attend at least one outpatient clinic for a minimum of one-half day per week and have the responsibility for providing continuous care to a defined cohort of patients being managed for neoplastic disorders and others with specific hematological disorders.

The combined training must be taken in programs in the same institution, or in an acceptably coherent program, accredited both in hematology and medical oncology by the Accreditation Council for Graduate Medical Education or by the Royal College of Physicians and Surgeons of Canada or by the Professional Corporation of Physicians of Quebec. Examples of an acceptable combined program are: (1) a single program with one program director, (2) a joint program sponsored by the same institution with a coordinated effort by two different program directors regarding curricular design, or (3) a coherent program involving more than one institution in the same city where there is a coordinated effort with regard to the design of the curriculum.

Candidates desiring certification in both hematology and medical oncology with only 3 years of combined training are required to notify

the Board in writing of their intent before completion of their first year of combined training. This letter of intent must be cosigned by the training program director(s). Candidates must complete all 3 years of required combined training before being admitted to an examination in either subspecialty. However, they need no longer pass the first subspecialty examination to be admitted to the second.

Candidates who elect to undertake an examination in one subspecialty following only 2 years of fellowship training will be required to complete 4 years of accredited training for dual certification. They must meet the 2-year training requirement for the second subspecialty independent of the training that permitted admission to the initial subspecialty examination.

By full-time clinical training the Board means that at least 80% of the trainee's professional time and effort during a working week is dedicated to clinical (patient care or educational) activities. These may include providing primary care of subspecialty patients; supervision of subspecialty patients on the general medical service or on designated subspecialty inpatient units; subspecialty consultations and consultation rounds; subspecialty ambulatory care; general medicine ambulatory care; scheduled clinical conferences; performance of procedures on patients; review of imaging, pathological, and other diagnostic material; other direct patient care; attending national scientific meetings and reading clinical literature. Clinical activities may include research necessitating extended patient contact and care.

These policies became effective for trainees entering subspecialty training in hematology and/or medical oncology on or after June 1, 1990.

### B. Rheumatology and Allergy and Immunology

Dual certification in rheumatology and allergy and immunology requires a minimum of 3 years of full-time training. Of the total 3 years, at least 12 months must be full-time clinical rheumatology training supervised by the director of an accredited rheumatology training program.

Weekly attendance for 18 consecutive months in an ambulatory care program supervised by rheumatology faculty must be included in the 3-year combined program; this 18-month period must offer true continuity of experience in the broad spectrum of rheumatic diseases.

At least 18 months must be devoted to full-time allergy and immunology training supervised by the training program director of an accredited training program in allergy and immunology.

Plans for combined training should be approved in writing by both the rheumatology and the allergy and immunology training program directors and by the ABIM Subspecialty Board on Rheumatology and ABAI before training begins. Admission to either examination requires (1) certification in internal medicine, (2) satisfactory clinical competence, and (3) completion of the entire 3-year combined program.

### C. Pulmonary Disease and Critical Care Medicine

Candidates seeking dual certification in pulmonary disease and critical care medicine who initiated a 3-year combined accredited training program after June 1, 1991 must complete the entire 3-year fellowship, including 18 months of clinical training, before admission to the subspecialty examination in pulmonary disease. Certification in pulmonary disease must be achieved before being eligible to apply for admission to the critical care medicine examination.

The combined training must be taken in programs accredited both in pulmonary disease and critical care medicine by the Accreditation Council for Graduate Medical Education, the Royal College of Physicians and Surgeons of Canada, or the Professional Corporation of Physicians of Quebec.

Candidates who seek dual certification for other subspecialty combinations should write to the Board for information.

## Added Qualifications

The Board offers certification of added qualifications to diplomates with additional training and/or experience in adolescent medicine, clinical cardiac electrophysiology, critical care medicine, geriatric medicine, sports medicine, and diagnostic laboratory immunology. With the exception of diagnostic laboratory immunology, specific details regarding the training/experience requirements for each of the added qualifications examinations are available on written request from the Board office. For information and application forms for the diagnostic laboratory immunology examination please contact:

American Board of Allergy and Immunology  
3624 Market Street  
Philadelphia, PA 19104

## Clinical Investigator Pathway

See also information on clinical investigator pathway under "Alternate Training Pathways" above.

A clinical investigator can achieve certification in internal medicine and a subspecialty with 6 years of training (7 years for cardiovascular disease and for dual certification in hematology and medical oncology or pulmonary disease and critical care medicine). Candidates seeking certification in both internal medicine and a subspecialty through the clinical investigator pathway must meet the clinical training requirements for the subspecialty.

Candidates for a subspecialty examination must provide documentation in PGY-6 that they are in full-time research training, or in a full-time faculty position with substantial (ie, 50% professional time and effort) research involvement. The credentials of candidates who are no longer in a research program in the fall of PGY-6 must be reviewed by the Board to determine admissibility to the examination.

## Candidates for Special Consideration

The Board recognizes that it should be flexible in its evaluation of the credentials of worthy candidates whose training or experience differs from the standard requirements. Therefore, the following guidelines have been established for proposing candidates for special consideration.

The candidate must be certified in internal medicine by the American Board of Internal Medicine at the date of proposal.

The candidate must have been professionally active in the United States and/or Canada for at least 1 year at the time of the proposal, must demonstrate superior clinical competence as a consultant, be recognized as a consultant-subspecialist in the medical community, and possess a valid, unrestricted license to practice in a state, territory, commonwealth, province, or possession of the United States or Canada.

The candidate's training and/or experience must be interpreted by the Board to be at least equivalent to the standard training required for certification in the specified subspecialty.

The candidate must be proposed by one of the following individuals who has personal knowledge of the qualifications of the candidate, who is certified by ABIM in the subspecialty for which the candidate is being proposed, and who has observed the candidate's clinical competence during the past year:

1. The program director of an accredited subspecialty program, or
2. A current or past member of the appropriate ABIM Subspecialty Board.

The proposal must:

1. Describe the candidate's professional training and experience in the subspecialty area;
2. Document the reasons the candidate merits consideration as a special candidate, such as a reputation as an outstanding clinician or consultant, unique contribution to medical education and/or research, leadership in the medical community, etc.;

3. Substantiate the candidate's superior clinical competence as a subspecialty consultant;
4. Include the candidate's curriculum vitae and bibliography; and
5. Be accompanied by endorsements by at least three diplomates of the ABIM of the proposed candidate's superior clinical competence. The endorsements must include observations of the clinical competence of the candidate during the year preceding the date of the proposal. The endorsers must include: (1) the chief and/or chairman of the department of medicine at the institution where the candidate holds his/her current principal staff appointment, and (2) two diplomates of the ABIM in the subspecialty for which the candidate is being proposed.

These guidelines do not define new pathways or reduce the requirements for admission to examinations. Receipt of a proposal in no way implies its approval.

Complete proposals for special consideration should be received in the Board office by January of the year in which the examination is to be taken. Review of the proposal may require several months.

## Substantiation of Clinical Competence

### Components of Clinical Competence

The Board requires substantiation that the candidate possesses appropriate clinical judgment, medical knowledge, clinical skills (medical interviewing, physical examination, procedural skills), humanistic qualities, professional attitudes and behavior, skills in the provision of medical care, and continuing scholarship as a subspecialist-consultant. Verification will be sought by the Board from the directors of the subspecialty training program(s) and of the associated residency in internal medicine. Trainees must have a satisfactory rating of overall clinical competence in each of the required years of subspecialty training. An additional year of accredited training is required for each unsatisfactory year to be eligible to apply for admission to examination. Satisfactory humanistic qualities and moral and ethical behavior are required each year.

For those entering subspecialty training at the F-1 level after June 1, 1987, satisfactory ratings of all component skills will be required in the final year of training, including proficiency in performing essential procedures where specified by the Subspecialty Board. Any unsatisfactory rating will exclude the candidate from examination, regardless of a satisfactory rating of overall clinical competence. Required procedures for certification in the subspecialties and added qualifications are outlined in the chart below.

## Procedures Required for Certification in the Subspecialties and Added Qualifications

**Cardiovascular Disease**—Advanced cardiac life support (ACLS), including cardioversion; electrocardiography, including ambulatory monitoring and exercise testing; echocardiography; placement of arterial catheter; and right-heart catheterization, including insertion of temporary pacemakers.

**Clinical Cardiac Electrophysiology**—Electrophysiologic studies including mapping, both with a catheter and intraoperatively; surgical and other ablation procedures; and implantation of pacemakers, cardioverters and defibrillators.

**Critical Care Medicine**—Airway maintenance intubation, including fiberoptic bronchoscopy; ventilator management, including experience with various modes; insertion and management of chest tubes; advanced cardiac life support (ACLS); placement of arterial, central venous, and pulmonary artery balloon flotation catheters; and calibration and operation of hemodynamic recording systems.

**Gastroenterology**—Proctoscopy and/or flexible sigmoidoscopy; esophagogastroduodenoscopy; colonoscopy, including biopsy and polypectomy; esophageal dilation procedures; peroral small intestinal biopsy (capsule or endoscopic); and percutaneous aspiration liver biopsy.

**Hematology**—Bone marrow aspiration and biopsy, including preparation, staining, examination, and interpretation of blood films, bone marrow aspirates, and touch preparations and interpretations of bone marrow biopsies; measurements of complete blood count, including platelets and white cell differential, using automated or manual techniques with appropriate quality control; administration of chemotherapeutic agents and biological response modifiers through all therapeutic routes; management and maintenance of indwelling venous access catheters; therapeutic phlebotomy; therapeutic thoracentesis and paracentesis.

**Medical Oncology**—Serial measurement of palpable tumor masses; bone marrow aspiration and biopsy; administration of chemotherapeutic agents and biological response modifiers through all therapeutic routes; and management and maintenance of indwelling venous access catheters.

**Nephrology**—Temporary vascular access for hemodialysis and related procedures; hemodialysis; peritoneal dialysis; and percutaneous renal biopsy (native and transplanted kidneys).

**Pulmonary Disease**—Endotracheal intubation; fiberoptic bronchoscopy and accompanying procedures; ventilator management; thoracentesis and percutaneous pleural biopsy; arterial puncture; placement of arterial and pulmonary artery balloon flotation catheters; calibration and operation of hemodynamic recording systems; supervision of the technical aspects of pulmonary function testing; progressive exercise testing; and insertion and management of chest tubes.

**Rheumatology**—Diagnostic aspiration of and analysis by light and polarized light microscopy of synovial fluid from diarthrodial joints, bursae, and tenosynovial structures; therapeutic injection of diarthrodial joints, bursae, tenosynovial structures, and entheses.

### A. Annual Evaluation Of Trainees

Beginning in 1992 the Board will require each fellowship training program director and director of the associated residency in internal medicine to rate the clinical competence and performance of trainees finishing their first year of training as superior, satisfactory, or unsatisfactory on an ABIM annual evaluation summary form. Trainees rated as superior or satisfactory will receive credit for the designated year of training. Trainees rated as unsatisfactory will be informed that this year will not be credited toward the requirements for admission to a future subspecialty examination. The Board will require that trainees who receive ratings of unsatisfactory on the ABIM annual evaluation summary form must sign the form before it is returned to the Board.

In the final year of training, all trainees must be judged to be satisfactory in each of the components of clinical competence defined by the Board.

As required by the Accreditation Council for Graduate Medical Education in its "Essentials for Accreditation," trainees must be provided due process at the educational institution. The Board will hear candidates' appeals only after all local remedies to resolve disputes over adverse judgments (eg, unsatisfactory clinical competence, humanistic qualities, professional attitudes and behavior, and moral and ethical behavior) have been exhausted.

### B. Professional Standing Of Practitioners

Every 4 years following formal evaluation, the Board requires verification that candidates are currently recognized as subspecialists in good standing in the appropriate subspecialty. Verification is sought from the chief of medical service at the institution where the candidate's principal staff appointment is held. Any challenge to good standing must be resolved locally to the Board's satisfaction before admission to the examination. For example, substance abuse, convictions for felonies related to medical practice, or substantial disciplinary action by a hospital staff may lead to deferred admission or rejection from examination.

### C. Licensure

Candidates with a restricted, suspended, or revoked license in any jurisdiction at the time of application or examination will not be admitted to examination or certified. Restrictions include but are not limited to conditions, contingencies, probation, and stipulated agreements. A valid, unrestricted, and unchallenged license to practice medicine in a state, territory, commonwealth, possession, or province of the United States or Canada will be required of all candidates who will have been out of formal training 1 or more years as of July 1 of the year of examination.

### The Certification and Recertification Examinations in the Subspecialties and Added Qualifications of Internal Medicine

The subspecialty examinations are offered on an alternate-year schedule. The examinations are administered in centers in the United States, Puerto Rico, and Canada. All of the examinations with the exception of cardiovascular disease are 1-day in length; cardiovascular disease is 1 and one-half days.

The interim recertification examination will be a 1-day examination which will be administered at the same time the Board administers its examinations for initial certification. All candidates are admitted to examinations at the discretion of the Board. The Board may delete portions of the examination or cancel or reschedule examinations under unusual circumstances.

The Board does not offer or endorse any specific publications or courses to prepare for its examinations.

More detailed information about the examinations is available upon written request from the Board.

### Special Policies

#### Board Eligible Status

Consistent with establishment of time-limited certification, the Board restricts the duration of eligibility for certification. Board eligibility is defined as the status conferred by ABIM at the time a candidate receives notice of admission to an examination. It indicates that the candidate has completed the required training, has been rated as having satisfactory clinical competence by the faculty responsible for that training, and that other credentialing requirements have been met.

Candidates for certification in internal medicine will be considered Board eligible for four examinations, or a period of 6 years, whichever limit is reached first. Candidates who were admitted to an examination before 1989 are considered Board eligible for four more examinations or until 1995, whichever comes first.

Candidates for certification in a subspecialty or area of added qualifications will be considered Board eligible for three examinations or a period of 6 years, whichever limit is reached first. Candidates who were admitted to a subspecialty or added qualifications examination before 1989 are considered Board Eligible for three more examinations or until 1995 (for examinations administered in odd-numbered years) or 1996 (for examinations in even-numbered years), whichever comes first.

Board eligible candidates are required to apply for each examination, and admission to that examination will be determined under policies in force at that time. Should adverse information about a candidate come to the attention of the Board, the Board eligible status may be revoked.

In the event that certification is not achieved during the periods of Board eligibility, the following requirements must be met to reestablish their Board eligible status: (1) possession of a valid and unrestricted license, (2) verification of satisfactory clinical competence, (3) completion of 100 hours of acceptable Category I continuing medical education courses accredited by the Accreditation Council on Continuing Medical Education within the preceding 2 years, and (4) success on an ABIM qualifying examination.

### Confidentiality

The Board obtains information from a variety of sources about a candidate. This information is considered confidential and will be released by the Board only to those who have a legitimate need for it.

The Board releases individual pass-fail examination results to the director of each program in order to help in the evaluation of the program's educational effectiveness. The Board also releases group pass-fail results of internal medicine candidates to the Residency Review Committee for Internal Medicine. Individual scores will be released to program directors upon authorization by the candidate. The Board also may release examination results, examination scores and other pertinent information to qualified researchers.

### Disabled Candidates

The Board recognizes that some candidates may be unable to fulfill the requirement for proficiency in performing procedures because of physical disability. For such individuals, the procedural skills requirement may be waived. Program directors are urged to write to the Board for approval before such individuals enter training.

Candidates who need accommodation during the examination for a physical disability should provide written details to the Board at the time of application for examination.

### Substance Abuse

If a history of substance abuse exists, the candidate must provide documentation that he/she can safely and effectively perform the duties and responsibilities of a certified internist/subspecialist. To that end, evidence of successful completion of a treatment program and/or a documented period of abstinence is required.

### Leave of Absence

Up to 1 month of credit may be granted in any 1 year for vacation time, illnesses, or delayed starts. In addition, up to 6 weeks credit can be granted for pregnancy, adoption, and subsequent newborn care. Credit for longer absences must be justified by the program director, and must be judged as acceptable by the Board.

### Breach of Contract

Sometimes a trainee desires to transfer to a program more suitable to his/her goals. Reasons for leaving a program should be discussed with the program director in time to permit a suitable replacement, particularly if a written commitment exists. Program directors should exercise the utmost caution in recruiting or accepting trainees who are under a contractual commitment to another program and should personally contact the director of the previous program prior to accepting the transferring trainee.

The Board may regard irregular breach of contract as evidence of unethical professional behavior (ie, lack of honesty and integrity), and may consider the incident among its criteria for admission to examination.

Like any other unsatisfactory rating of clinical competence, an unsatisfactory rating based on breach of contract requires that local due process be afforded the trainee under the ACGME General Requirements of the "Essentials for Accredited Residencies." This is true whether or not the trainee is still at the training institution with which the breached contract existed.

### Revocation of Certificates

The Board may at its discretion revoke a certificate if (1) the diplomate was not qualified to receive the certificate at the time it was issued, even if the certificate was issued as a result of a mistake on the part of the Board; (2) the diplomate made any material misstatement of fact or omission of fact to the Board in connection with application or otherwise; or (3) the diplomate's license to practice medicine has been revoked in any jurisdiction.

### Late Applications

Awareness of and meeting registration deadlines are the candidate's responsibility. There is a non-refundable penalty fee of \$300 for any application postmarked between February 2, 1993 and April 1, 1993 for internal medicine; April 2, 1993 and July 1, 1993 for cardiovascular disease; critical care medicine; endocrinology, diabetes, and metabolism; gastroenterology; and medical oncology; January 16, 1993 and February 15, 1993 for sports medicine; or November 2, 1993 and December 1, 1993 for geriatric medicine.

### Examinations Schedule

*Certifying Examination in Internal Medicine*

Date: September 21-22, 1993

Registration Period: November 1, 1992 to February 1, 1993

Fee (US): \$690

Cancellation Deadline: August 1, 1993

Refund: \$565

*Sports Medicine*

Date: September 30, 1993

Registration Period: September 1, 1992 to January 15, 1993

Fee (US): \$880

Cancellation Deadline: August 1, 1993

Refund: \$755

*Cardiovascular Disease*

Date: November 3-4, 1993  
 Registration Period: January 1, 1993 to April 1, 1993  
 Fee (US): \$880  
 Cancellation Deadline: October 1, 1993  
 Refund: \$755

*Endocrinology, Diabetes, and Metabolism*

Date: November 3, 1993  
 Registration Period: January 1, 1993 to April 1, 1993  
 Fee (US): \$880  
 Cancellation Deadline: October 1, 1993  
 Refund: \$755

*Gastroenterology*

Date: November 3, 1993  
 Registration Period: January 1, 1993 to April 1, 1993  
 Fee (US): \$880  
 Cancellation Deadline: October 1, 1993  
 Refund: \$755

*Medical Oncology*

Date: November 3, 1993  
 Registration Period: January 1, 1993 to April 1, 1993  
 Fee (US): \$880  
 Cancellation Deadline: October 1, 1993  
 Refund: \$755

*Critical Care Medicine*

Date: November 3, 1993  
 Registration Period: January 1, 1993 to April 1, 1993  
 Fee (US): \$880  
 Cancellation Deadline: October 1, 1993  
 Refund: \$755

*Geriatric Medicine*

Date: April 12, 1994  
 Registration Period: July 1, 1993 to November 1, 1993  
 Fee (US): Not determined  
 Cancellation Deadline: February 18, 1994

*Clinical Cardiac Electrophysiology*

Date: November 10, 1994  
 Registration Period: January 1, 1994 to April 1, 1994  
 Fee (US): Not determined  
 Cancellation Deadline: October 1, 1994

*Hematology*

Date: November 10, 1994  
 Registration Period: January 1, 1994 to April 1, 1994  
 Fee (US): Not determined  
 Cancellation Deadline: October 1, 1994

*Infectious Disease*

Date: November 10, 1994  
 Registration Period: January 1, 1994 to April 1, 1994  
 Fee (US): Not determined  
 Cancellation Deadline: October 1, 1994

*Nephrology*

Date: November 10, 1994  
 Registration Period: January 1, 1994 to April 1, 1994  
 Fee (US): Not determined  
 Cancellation Deadline: October 1, 1994

*Pulmonary Disease*

Date: November 10, 1994  
 Registration Period: January 1, 1994 to April 1, 1994  
 Fee (US): Not determined  
 Cancellation Deadline: October 1, 1994

*Rheumatology*

Date: November 10, 1994  
 Registration Period: January 1, 1994 to April 1, 1994  
 Fee (US): Not determined  
 Cancellation Deadline: October 1, 1994

Please see previous pages for penalty fee for late applications and policy regarding cancellations.

## American Board of Neurological Surgery

George A. Ojemann, MD, Chairman, Seattle, Washington  
 Sidney Tolchin, MD, Vice Chairman, La Mesa, California  
 Edward L. Seljeskog, MD, Secretary-Treasurer, Minneapolis, Minnesota  
 Edward S. Connolly, MD, New Orleans, Louisiana  
 Howard M. Eisenberg, MD, Galveston, Texas  
 John A. Jane, MD, Charlottesville, Virginia  
 Edward R. Laws, Jr., MD, Washington, DC  
 Burton M. Orofrio, MD, Rochester, Minnesota  
 Robert A. Ratcheson, MD, Cleveland, Ohio  
 William Shucart, MD, Boston, Massachusetts  
 Bennett M. Stein, MD, New York, New York  
 John C. VanGilder, MD, Iowa City, Iowa  
 Robert H. Wilkins, MD, Durham, North Carolina  
 Fremont P. Wirth, MD, Savannah, Georgia  
 Mary Louise Sanderson, Administrator  
 6550 Fannin Street, Suite 2139  
 Houston, TX 77030-2701

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Neurological Surgery to ascertain whether the information below is current.)*

### Diplomates

A list of diplomates and bylaws of the American Board of Neurological Surgery appear in the *Directory of Medical Specialists* which can be obtained from Marquis Who's Who, Inc., 200 East Ohio Street, Chicago, IL 60611, as well as in the *ABMS Compendium of Certified Medical Specialists* which can be obtained from the American Board of Medical Specialties, 1007 Church Street, Suite 404, Evanston, IL 61201. In addition, a list of new diplomates is published in the *Journal of Neurosurgery* shortly after each examination.

Information regarding training programs acceptable for certification can be found in the *Directory of Graduate Medical Education Programs* which is issued annually under the supervision of the Accreditation Council for Graduate Medical Education. This directory can be secured from the American Medical Association, 515 North State Street, Chicago, IL 60610.

### Qualifications

The American Board of Neurological Surgery evaluates all qualified applicants for their proficiency in neurological surgery.

The minimum educational requirements of the Board should not be interpreted as restricting programs to these standards. If necessary, neurosurgical program directors may retain residents in their programs beyond the required 5 years of residency training in order to insure satisfactory competence in neurological surgery.

It is the responsibility of the candidate to seek information concerning current requirements for certification by the American Board of Neurological Surgery. Even though directors of approved neurosurgical programs are well informed regarding requirements for certification, placement in an approved training program does not guarantee adequate training for certification. The candidate must make sure he/she receives such training.

## Training Prior to Neurosurgery Residency

1. Graduation from a medical school which is acceptable to the Board.
2. Currently valid license to practice medicine in the state, province, or country of residence.
3. Twelve months devoted to acquiring adequate knowledge of fundamental clinical skills. This is known as postgraduate year one (PGY 1), general surgery year one, or internship; recommended for completion prior to beginning neurosurgical training, but must be completed prior to beginning the third year of that training. This may be achieved by:
  - a. one year of training in an approved general surgery program in the United States or Canada, or
  - b. one year of training in an accredited neurosurgical residency program to include not less than 6 months in surgical disciplines other than neurosurgery; the remaining 6 months should include training in fundamental clinical skills considered appropriate by the program director, but this portion of the year may not include more than 6 weeks of neurosurgery and/or neurology, or
  - c. holding a certificate from the American Board of Surgery or a fellowship (in surgery, not neurosurgery) of the Royal College of Surgeons of England, Edinburgh, Canada, Ireland, Australasia, or Glasgow.

## Neurological Surgery Training Requirements

*For Residents Beginning the Neurological Surgery Portion of Their Training on or After July 1, 1979*

1. Completion of 5 years of training following postgraduate year one. Neurological surgery training must occur in residency programs recognized by the American Board of Neurological Surgery, and accredited by the RRC in Neurosurgery, or its Canadian equivalent.
2. The 60 months of training must include at least 36 months of clinical neurosurgery in accredited programs. Twelve months of this period must be served as a senior resident.
3. The training in clinical neurosurgery must be progressive and not obtained during repeated short intervals in a number of institutions. At least 24 months of training in clinical neurosurgery must be obtained in one institution.
4. At least 3 months must be devoted to training in clinical neurology. Six months is recommended.
5. The unobligated 21 months may be devoted to neuropathology, neuroradiology, basic neurosciences, research, or other disciplines related to neurological surgery.
6. Exchange of residents between approved neurosurgical training centers in the United States and Canada may be arranged by the respective training program directors with the resident's consent. In such instances, the Secretary of the Board must be notified of this rotation before the exchange begins. Such an exchange should in no way compromise any other training requirement. Training in any institution other than in the parent institution and its affiliated hospitals will not be considered as counting toward the requirements unless specified in advance by the program director and approved by the Board.
7. The program director must notify the Board of the appointment of each new neurosurgical resident and whether they are entering the program with intent to obtain certification and, if so, whether the director has informed the trainee of the requirements necessary to obtain such certification.
8. Residents in training after June 30, 1983 are required to record, in a fashion determined by the Board, their operative procedures.
9. Prior to acceptance for the certification process, the Board requires a statement from the candidate's program director to the effect that the candidate has met the minimum time requirements, has performed in training in a satisfactory manner and, in the judg-

ment of the program director, is well prepared to enter into the independent practice of neurosurgery.

## Exceptional Modifying Circumstances

Upon recommendation of the program director and ratification by the Board, credit may be given for previous training if a candidate:

1. Before entering an approved neurosurgical training program, has had substantially more than the prerequisite training in general surgery, medical neurology or the basic neurological sciences; such credit must be approved by the Board.
2. a) Transfers from one approved neurosurgical training program to another approved program with the consent of the directors of both programs, or
  - b) Transfers from one approved neurosurgical training program to another approved program without the consent of one of the program directors, but with the approval of the Board for the transfer.

In the above cases, the director of the program from which the candidate transfers must indicate in writing to the new program director the credit for training, both in time and category, which he/she is prepared to certify that the candidate has successfully completed. A copy of such statement must be submitted to the Secretary of the Board. The new program director may or may not honor such credit, depending upon appraisal of the resident's professional and educational progress in the new program. A statement of how much training credit will be accepted must also be submitted to the Secretary of the Board.

Requests for training away from a parent institution or for transfer from one program to another should be submitted in writing to the Board prospectively, not retroactively.

Training by preceptorship is not considered as fulfilling certification requirements. No credit is given for time spent in such training.

Credit for partial training in foreign or other nonapproved centers may be granted by the Board on an individual basis when this training is carried out as an integral part of the training program and with the advice and approval of the candidate's program director. The Board must be informed of such a rotation prior to its occurrence.

The above provisions in no way alter the basic minimum requirement of 60 months of residency training in neurosurgery, including a minimum of 3 months training in clinical neurology and 36 months of clinical neurosurgery in accredited institutions, 12 months of which must be as senior resident and 24 months in one institution.

## Primary Examination

Each applicant for the Board's oral examination must first successfully pass for credit the primary examination, which is a written examination prepared by the Board with the assistance of a professional testing organization. The examination includes information on neuroanatomy, neurochemistry, neurology, neuropathology, neuropharmacology, neurophysiology, neuroradiology, neurosurgery, fundamental clinical skills, and material from other relevant disciplines deemed suitable and important by the Board.

The primary examination is given in March each year at training programs throughout the United States and Canada.

Candidates and diplomates may take the examination as often as desired for either credit or self-assessment. Residents in accredited training programs may take it for credit at the discretion of their program directors. It is open for self-assessment to all neurosurgical residents. It is open for credit or self-assessment to all neurosurgeons who have successfully completed training at accredited programs.

An application must be filed to take the primary examination. The deadline for receipt of this application by the Board is the first of January. The form must be accompanied by the fee set by the Board. This fee will be refunded only if the candidate informs the Secretary's office that he/she is not going to sit for examination prior to the deadline date for receipt of applications.

Examinees are required to sign a pledge which states that they agree to be bound by the Board's ruling regarding credentials irrespective of scores on the examination. By signing the pledge, candidates also grant permission to the American Board of Neurological Surgery and its testing organization to release the results, either credit or self-assessment, to the examinee's program director.

Candidates should keep in mind that they must be scheduled for oral examination by the Board within 5 years of passing the primary examination for credit or within 5 years of completing a formal training program, whichever occurs later. Compliance with this regulation requires early submission of applications for oral examination and certification after training. If a candidate cannot be scheduled within the 5-year limit due to late submission of an application, he/she must once again pass the primary examination for credit before being scheduled for oral examination within the succeeding 3-year period. Candidates should also keep in mind that usually 18 months are required between submission of an application and oral examination.

### Practice Requirements

Following completion of a neurosurgical training program, an additional period of not less than 2 years of satisfactory practice of neurological surgery is required prior to oral examination. Medical officers in the military may meet this practice requirement by hospital assignments in which their duties are limited to the practice of neurological surgery. After 1 year of practice, the candidate shall furnish to the Board the names of three physicians (two neurosurgeons including one ABNS diplomate) who are knowledgeable about the quality of the candidate's practice. The Board will request reference letters from these physicians. It is the prerogative of the Board to inquire of other physicians in the community and to send representatives to review the candidate's practice.

In addition to these letters, the candidate will submit either the names and addresses or actual letters from either the medical director or chief of staff at each hospital where the candidate has privileges. These letters are intended to advise the Board of the candidate's status regarding admitting and operating privileges in each hospital where he/she practices.

Prior to oral examination candidates must forward to the Board a typewritten, chronological list of all inpatients for whom he/she has been the responsible physician or surgeon for 12 consecutive months. Information must include but not be limited to:

- Identifying hospital number and date of admission
- Clinical diagnosis
- Diagnostic procedures, if performed
- Operations, if performed
- Specific results, including all complications, and autopsy findings, if applicable, immediately and 3 months later.

No minimum volume of operative procedures is required. The total experience must be tabulated by the candidate in a format defined by the Board. This case material must be accompanied by a summary form signed by the chief of staff, chief of service, president of the medical staff or hospital administrator of the hospitals where the candidate practices indicating the essential accuracy of the data.

These data must be approved by the Board prior to scheduling for oral examination.

Candidates are responsible for retaining duplicate copies of these records.

### Certification of Those Training in Canadian Programs

Those satisfactorily completing approved Canadian training programs and holding a fellowship in neurosurgery from the Royal College of Surgeons (Canada) are eligible for certification through the same route as candidates training in the United States and outlined above.

### Applications

Applications for oral examination and certification are automatically sent to residents in June of their last year of training. Additional applications are available from the Board's office. The application and accompanying information should be filled out and returned to the Board as soon as possible after completion of training so that inquiries may be made from references, as well as from others in the community, the individual's training program faculty, and hospitals where the candidate practices.

A pledge is part of the application for oral examination. By signing the application, the applicant agrees to abide by all the terms and conditions of this pledge.

Upon receipt of an application, the Board takes such steps as deemed appropriate to verify the statements of facts made in the application. Inquiries are made from references and others familiar with the candidate to obtain information relevant to the requirements for examination.

Prior to oral examination, each candidate must be in possession of hospital staff privileges in all hospitals in which he/she cares for patients. Such privileges must be unrestricted in respect to the hospital's requirements for a neurosurgeon.

The Board makes the final decision regarding a candidate's eligibility for oral examination and potential certification after considering all available information pertaining to the entire process of certification.

Application fees, once received, will not be refunded.

### Oral Examination

The oral examination is given twice a year. This is a clinical problem solving and patient management test. Candidates are given case histories and, where appropriate, x-rays, scans, and other visual aids to augment the presentation and development of cases. The candidate must be able to explain verbally how he/she would proceed in evaluating and/or managing the case, and plan and perform the proposed operation or operations, if indicated. One hour is devoted to neurological surgery—intracranial disease; one hour to neurological surgery—spinal and peripheral nerve disease; and one hour to a mixture. Neurosurgical neurology is included in all sections. Each of the 3 hours is conducted in an interview setting with two examiners.

A candidate who passes the oral examination will be forwarded the Board's certificate, once it has been suitably engrossed and signed by the officers of the Board.

### Reexamination Rules

A candidate failing the oral examination once may request reexamination within a 3-year period. A reexamination fee must be paid. A minimum of 1 year must elapse before taking the examination for the second time.

A candidate who has failed the oral examination on two or more occasions must pass the primary examination for credit again before becoming eligible to retake the oral examination. Two letters of reference certifying the nature and quality of the candidate's practice must be submitted to the Board, as well as hospital privilege letters and a year of new practice data. In addition, the candidate must pay the oral examination fee. Under these circumstances, candidates must take the oral examination within 3 years of repassing the primary examination. Should the candidate not apply for or fail to appear for oral examination within the 3-year period, the candidate must retake and pass the primary examination before being eligible for oral examination once again.

### Payment of Fees

Fees for filing an application and for oral examination will be determined by the Board. They reflect costs which the Board incurs to pay for obligations associated with the certification process. The application fee will not be returned even though the application for examination is denied.

## Revocation of Certification

Pursuant to the rules and regulations established by the American Board of Neurological Surgery, the Board has the authority to revoke any certificate issued by it for various reasons including: the person to whom the certificate was issued is convicted of a felony, or his/her license to practice medicine has been lost or encumbered. Should revocation be disputed, there is a hearing mechanism for such an action.

## American Board of Nuclear Medicine

R. Edward Coleman, MD, Chairman, Durham, North Carolina  
 James W. Fletcher, MD, Vice Chairman, St. Louis, Missouri  
 Peter T. Kirchner, MD, Secretary, Iowa City, Iowa  
 Robert A. Kraft, MD, Treasurer, Burlingame, California  
 Philip O. Alderson, MD, New York, New York  
 James J. Conway, MD, Chicago, Illinois  
 Stanley J. Goldsmith, MD, New York, New York  
 Edward R. Powsner, MD, Detroit, Michigan  
 Heinrich R. Schelbert, MD, Los Angeles, California  
 H. William Strauss, MD, Boston, Massachusetts  
 Richard L. Wahl, MD, Ann Arbor, Michigan  
 James M. Woolfenden, MD, Tucson, Arizona  
 Joseph F. Ross, MD, President  
 William H. Bland, Vice President  
 900 Veteran Avenue  
 Los Angeles, CA 90024-1786

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Nuclear Medicine to ascertain whether the information below is current.)*

## Requirements for Certification

### A. General Requirements for Each Candidate

Assurance that the applicant represents himself/herself to be a specialist in nuclear medicine.

### B. General Professional Education

Graduation from a medical school approved by the Liaison Committee on Medical Education or from a school of osteopathy. If the applicant is a graduate of a medical school outside the United States or Canada, he/she must hold a currently valid ECFMG certificate issued by the ECFMG, 2000 Pennsylvania Avenue, NW, Suite 3600, Washington, DC 20037.

### C. Preparatory Postdoctoral Training

Training required for admission to the certifying examination in nuclear medicine shall be comprised of 1 or more years of preparatory postdoctoral training, and 2 or more years of residency training in nuclear medicine.

Preparatory postdoctoral training shall consist of 1 or more years of residency training in programs satisfactory to the American Board of Nuclear Medicine. Such programs shall provide broad experience in clinical medicine in which the primary emphasis is on the patient and his clinical problems. Preparatory training may be in any specialty in a residency program in the United States approved by the Accreditation Council for Graduate Medical Education (ACGME), or programs in Canada approved by the Royal College of Physicians and Surgeons of Canada, or the Professional Corporation of Physicians of Quebec. One year of preparatory postdoctoral training must precede training in nuclear medicine.

Each nuclear medicine residency training program director must ensure that for each resident entering his program the preparatory postdoctoral training has been in a United States program approved

by the ACGME, or in a Canadian program approved by the Royal College of Physicians and Surgeons of Canada (RCPSC), or the Professional Corporation of Physicians of Quebec (PCPQ).

### D. Special Postdoctoral Training in Nuclear Medicine

- After completion of the preparatory postdoctoral training programs, there shall be satisfactory completion of a 2-year formal residency training program in nuclear medicine in a nuclear medicine residency training program recognized and approved by the Residency Review Committee for Nuclear Medicine and the ACGME or a Canadian program approved by the RCPSC or the PCPQ as competent to provide a satisfactory training in nuclear medicine.
- The 2-year formal residency training program in nuclear medicine must include:
  - A minimum of 18 months of training in clinical nuclear medicine, which will include, but not be limited to, radiobioassay, *in vitro* and *in vivo* measurements, nuclear imaging, positron emission tomography, nuclear magnetic resonance imaging, therapy with unsealed radionuclides, medical management of individuals exposed to ionizing radiation, the safe management and disposal of radioactive substances, and the direction of radiation safety programs.
  - Training in allied sciences which must include: medical nuclear physics, radiation biology, radiation protection, instrumentation, radiopharmaceutical chemistry, statistics, and computer sciences; and may also include pathology, physiology, and other basic sciences associated with nuclear medicine. The time spent in training in allied science may be spaced throughout the period of training in nuclear medicine and in a manner that does not exceed 6 complete months of training.
  - For candidates who have completed 1 or more years of residency in clinical disciplines closely related to nuclear medicine, a maximum of 3 months credit may be given for prior training in allied sciences (described in the preceding paragraph) if obtained during a residency in an ACGME, RCPSC or PCPQ approved program. Likewise, a maximum credit of 3 months may be given for approved training in radioassay/radiobioassay, internal medicine, or for training in ultrasound imaging and/or emission and transmission computed tomography. Regardless of the amount of training in fields allied to nuclear medicine, however, each candidate must satisfactorily complete a minimum of 18 months of clinical training in an ACGME, RCPSC or PCPQ approved program in nuclear medicine. Credit may be given for prior clinical training in nuclear medicine, nuclear radiology, and radioisotopic pathology obtained in programs approved by the ACGME, RCPSC or PCPQ. Candidates desiring credit toward the nuclear medicine requirements should write to the Board requesting such credit.
- The Board considers demonstration of clinical competence in the management of the nuclear medicine patient of paramount importance in its qualification of the applicant to take the certifying examination. The Board designates the directors of nuclear medicine residency programs and their supporting evaluation committees as the authorities who most appropriately can provide to the Board the necessary documentation of competence in clinical nuclear medicine, and requires that all program directors certify to the Board that each applicant from their programs is competent in clinical nuclear medicine. These reports will be reviewed by the Board before accepting an applicant to take the certifying examination.
 

If a residency program director's evaluation indicates a candidate's competence in clinical nuclear medicine is unsatisfactory, the applicant will not be admitted to the examination unless the Board finds that the applicant's overall performance meets its standards. An applicant not admitted to an examination on the basis of these findings may appeal in writing to the Board for a special evaluation of competence in clinical nuclear medicine within

45 days of receipt of notification. The appeal should state that a request is made for review of the decision not to admit to the examination and why the candidate considers the decision to be in error. Applicants whose clinical competence is judged satisfactory in this evaluation will be admitted to the next examination for which they apply. Candidates judged not satisfactory in this evaluation are advised to spend an additional year training before applying again for special evaluation of competence.

Applicants submitting false credentials are subject to disqualification from examination or revocation of certification.

### **E. Patient Care Responsibility**

Candidates for certification in nuclear medicine will have the equivalent of at least 2 years training in which the primary emphasis is on the patient and his clinical problems. This minimum period may be spaced throughout the entire postdoctoral training but should be of sufficient duration for the trainee to become knowledgeable in the aspects of clinical medicine relevant to nuclear medicine, including patient care.

### **F. Canadian Training**

Physicians who satisfactorily complete training in Canadian nuclear medicine programs approved by the Royal College of Physicians and Surgeons of Canada or the Professional Corporation of Physicians of Quebec are eligible for admission to the ABNM certifying examinations.

### **G. Completion of Training**

All preliminary and nuclear medicine residency training *must be completed* prior to September 1 of the year the candidate takes the certifying examination.

## **Approved Residency Training Programs**

Residency training programs in nuclear medicine accredited by the ACGME may be found in the *Directory of Graduate Medical Education Programs*, published annually by the American Medical Association or may be obtained by contacting: Secretary, Residency Review Committee for Nuclear Medicine, ACGME, 515 North State Street, Chicago, IL 60610.

## **Examination**

An objective type examination is administered in a morning and an afternoon session. The examination evaluates the applicant's knowledge and competence in the management of patients in the area of clinical nuclear medicine, including, but not limited to, radioassay/radiobioassay, *in vitro* and *in vivo* measurements, nuclear imaging, the principals of nuclear magnetic resonance imaging, and therapy with unsealed radionuclides, the medical effects of exposure to ionizing radiation, the medical management of persons exposed to ionizing radiation, radiation safety, and the safe management and disposal of radioactive substances. Also included is an evaluation of the candidate's knowledge in the related sciences of medical nuclear physics, radiation biology, radiation protection, instrumentation, radiopharmaceutical chemistry, computer sciences, and statistics; it may also include pathology, physiology, and other basic sciences associated with nuclear medicine.

## **Applications**

Applicants who wish to be examined by the Board must complete, sign and file with the Board office an application on the official form together with the supporting data required by the application. The applicant must enclose a check to cover the examination fee and a self-addressed postcard which will be returned to the applicant when all application materials have been received by the ABNM. It is the responsibility of the applicant to make certain that the required evaluation forms have been completed by his/her program director, and sent to and received by the ABNM.

As soon as determination is made concerning admission or nonadmission to the examination, the candidate will be notified by mail, and if admitted, assignment of the candidate number and notification of the examination site will be given.

Before the final action on applications, officers, members, and employees of the Board are not authorized to estimate the eligibility of applicants. Applicants are requested not to discuss or write for opinions regarding the status of their application. The Board decides on eligibility to take the examination only by approving or disapproving individual applications, and accordingly has no "Board eligible" category.

Inquiries concerning the applicability of previous training and experience should be sent with complete documentation of all education and training to the Board office. A copy of the Board's response to these inquiries should be forwarded with any subsequent examination application.

## **Release of Information**

Candidates will receive the results of their examinations (pass/fail letter) approximately 4 months after the examination.

A list of diplomates of the ABNM will be found in *The Official ABMS Directory of Board Certified Medical Specialists* published by the American Board of Medical Specialties and in the *Directory of Medical Specialists*, published by Marquis Who's Who.

Upon request and with the approval of the Board chairman, the Board releases information on diplomates to federal and state licensing bodies and to educational and professional organizations for specific, limited, and appropriate professional use. An authorization for release of this information is a part of the examination application form.

## **Policy on Reexamination**

Applicants who fail the examination are eligible for reexamination. An examination fee must accompany each completed application for reexamination. If an applicant is disqualified from the examination by reason of dishonesty in the application or in taking the examination and his/her examination is invalidated by the Board, reexamination shall be at the Board's discretion.

## **Recertification**

The ABNM offers its diplomates voluntary recertification based upon fulfillment of certain requirements including passing an objective cognitive examination. The ABNM will not rescind initial certification granted prior to 1992. Beginning in 1992 certification will be valid for a period of 10 years and may be revalidated by recertification.

## **Journals Publishing Information on Application and Examination Schedules**

*Annals of Internal Medicine* (Medical News Section)  
*The Journal of the American Medical Association* (Examinations and Licensure Monthly Section)  
*The Journal of Nuclear Medicine*  
*Radiology*  
*Journal of Clinical Pathology*

## **Changes in Policies and Procedures**

The Board reserves the right to make changes in its fees, policies, and procedures at any time, and cannot assume responsibility for giving advance notice thereof. The provisions of this publication are not to be construed as a contract between any candidate and the American Board of Nuclear Medicine.

## **Fees**

The examination fee must accompany the application. If the applicant is rejected by the Board, or withdraws prior to August 1, the application processing fee will be retained by the Board. If the

applicant withdraws after August 1, the entire examination fee will be retained by the Board.

## American Board of Obstetrics and Gynecology

Albert B. Gerbie, MD, President, Chicago, Illinois  
 Mary J. O'Sullivan, MD, Vice President, Miami, Florida  
 William Droege Mueller, MD, Director of Evaluation, Chapel Hill, North Carolina  
 Clarence E. Ehrlich, MD, Assistant Director of Evaluation, Indianapolis, Indiana  
 Morton A. Stenchever, MD, Treasurer, Seattle, Washington  
 Daniel R. Mishell, Jr., MD, Chairman of the Board, Los Angeles, California

Robert C. Cefalo, MD, PhD, Chapel Hill, North Carolina  
 Sharon L. Dooley, MD, Chicago, Illinois  
 Wesley C. Fowler, Jr., MD, Chapel Hill, North Carolina  
 Norman F. Gant, Dallas, Texas  
 Arthur L. Herbst, MD, Chicago, Illinois  
 Luella Klein, MD, Atlanta, Georgia  
 Michael T. Mennuti, MD, Philadelphia, Pennsylvania  
 Donald K. Rahhal, MD, Oklahoma City, Oklahoma  
 Edward E. Wallach, MD, Baltimore, Maryland  
 James A. Merrill, MD, Executive Director  
 936 North 34th Street, Suite 200  
 Seattle, WA 98103  
 Deborah L. Burkett, EdD, Educational Associate, Troup, Texas  
 Joanne E. Smith, Assistant Executive Director, Seattle, Washington

### Division of Gynecologic Oncology

Wesley C. Fowler, Jr., MD, Director, Chapel Hill, North Carolina  
 Barrie Anderson, MD, Iowa City, Iowa  
 Philip J. DiSaia, MD, Orange, California  
 Clarence E. Ehrlich, MD, Representative, Indianapolis, Indiana  
 Karl C. Podratz, MD, PhD, Rochester, Minnesota

### Division of Maternal and Fetal Medicine

Michael T. Mennuti, MD, Director, Philadelphia, Pennsylvania  
 Sharon L. Dooley, MD, Chicago, Illinois  
 Steven G. Gabbe, MD, Columbus, Ohio  
 Larry C. Gilstrap III, MD, Dallas, Texas  
 Luella Klein, MD, Representative, Atlanta, Georgia

### Division of Reproductive Endocrinology

Edward E. Wallach, MD, Director and Representative, Baltimore, Maryland  
 Eli Y. Adashi, MD, Baltimore, Maryland  
 Alan H. DeCherney, MD, Boston, Massachusetts  
 Paul G. McDonough, MD, Augusta, Georgia  
 Robert Rebar, MD, Cincinnati, Ohio

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Obstetrics and Gynecology to ascertain whether the information below is current.)*

## Types of Board Status

### A. Residency Graduate

An individual for certification is registered with the Board when, upon application, the Board rules that he/she has fulfilled the requirements to take the written examination (see "Requirements" for the written examination).

### B. Active Candidate

1. An individual may achieve active candidate status by passing the written examination.

2. To maintain active candidate status, the candidate must not have exceeded the *limitations* to admissibility for the oral examination (see "Limitations").
3. Active candidate status which has expired may be regained by repeating and passing the Board's examination.

### C. Diplomate

1. An individual becomes a diplomate of the Board when he/she has fulfilled all requirements, has satisfactorily completed the written and the oral examinations and has been awarded the Board's certifying diploma.
2. Certificates have *limited* duration of validity. Certificates will bear a limiting date of 10 years, after which they are no longer valid. Each diplomate must be evaluated again to receive a new certificate.

## The Certification Process

Certification as a specialist in obstetrics and gynecology is the end of a process lasting many years. The required minimum duration of graduate education is 4 years.

During the final year of graduate training, it is necessary to initiate certain measures. Because most graduate training programs begin on July 1 and end on June 30, the following summary of the certification process is based on these dates. However, applicants who complete residency training at unusual times will have an extended time in the certification process.

Between September 1 and November 30 of the final year of residency, the candidate should request and complete the application for the written examination. If he/she is ruled admissible to take the examination, he/she will do so in June of the final year of residency.

If he/she passes the written examination, the candidate enters a 2-year period of practice in the specialty. The candidate is required to provide a list of patients under his/her care for a 12-month period beginning on July 1 of his/her second year of practice. Between January 1 and February 28 of his/her second year of practice, the candidate should request and complete the application for the oral examination.

The candidate may enter a 2-year Board-approved post-residency fellowship. Upon completion, this candidate will then enter a 1-year period of practice in the specialty. This candidate is required to provide a list of patients under his/her care during this year of practice. Between January 1 and February 28 of this year of practice, the candidate should request and complete the application for the oral examination.

The candidate's list of patients must be mailed to the Board office between July 1 and August 15 following the completion of the 12-month period of patient care. If ruled admissible the candidate thus takes the oral examination in November.

## Important Dates in the Certification Process

- A. Final year of residency
  - July 1—commence
  - September 1—November 30—Apply for written examination
  - June—Take written examination
- B. Practice
  1. First year of practice  
No Board activities necessary
  2. Second year of practice  
July 1 to June 30—Patient List  
January 1-February 28—Apply for oral examination
  3. Third year of practice  
August 15—Deadline for submission of patient list  
November—Take oral examination
- C. Fellowship in Subspecialty
  1. First year (fellowship)  
No Board activities
  2. Second year (fellowship)  
No *Basic* Board activities

(September 1–November 30—Apply for subspecialty written examination)

3. Third year—First year of practice  
July 1–June 30—Patient list  
January 1–February 28—Apply for the oral examination
4. Fourth year—Second year of practice  
August 15—Deadline for submission of patient list  
November—Take oral examination

### Responsibility of a Candidate

It is the responsibility of the candidate to seek information concerning the current requirements for certification as an obstetrician and gynecologist. The Board does not assume responsibility for notifying a candidate of changing requirements or the impending loss of his/her admissibility to an examination.

### The Written Examination

The written examination is a 3 and 1/3 hour examination consisting of questions of the objective (multiple choice) type. Questions will be chosen from each of the following areas of knowledge:

1. Anatomy, embryology and genetics
2. Physiology
3. Endocrinology, fertility and infertility
4. Gynecology
5. Obstetrics
6. Medicine, surgery and psychosomatic problems
7. Pathology
8. Oncology.

The candidate will be expected to demonstrate skills necessary to apply basic knowledge to the management of clinical problems.

These skills include:

1. Obtaining needed information
2. Interpretation and use of data obtained
3. Selection, instituting and implementing care
4. Management of complications
5. Following and continuing care.

The areas of information and skills examined for are further outlined in "Educational Objectives for Resident Education in Obstetrics and Gynecology" published by the Council on Resident Education in Obstetrics and Gynecology.

### Requirements

- A. Degree of doctor of medicine, or an equivalent degree, and unrestricted license (not educational or institutional) to practice medicine in one of the states or territories of the United States or a province of Canada.

The requirement of *unrestricted license* must have been met *prior* to the time that the application is submitted. An educational or institutional license if *not* satisfactory.

Candidates with a DO degree must have graduated from a school of osteopathy accredited by the American Osteopathic Association.

- B. The candidate will be required to have completed or be near completion (see "Application") of no less than 4 years in clinical programs accredited by the Accreditation Council for Graduate Medical Education or the Council of the Royal College of Physicians and Surgeons of Canada. This must include at least 36 months of obstetrics and gynecology, including the usual time as chief (senior) resident in the program. Completion of a year of "PG 1" plus a 3-year residency program, or a 4-year residency program will fulfill this requirement, but if the program consists of more than 4 years, the entire program must be completed.

Time spent in an osteopathic hospital or in any program not accredited by the Accreditation Council for Graduate Medical Education will not fulfill this requirement.

- C. A statement signed by the program director certifying that the candidate has:
  1. followed satisfactorily the course of instruction designed for this program;
  2. taken leaves of absence and vacation *not* exceeding 6 weeks in any year.
  3. completed and submitted to the program director a satisfactory resident experience log;
  4. achieved the appropriate knowledge, ability, and judgment in order to provide competent clinical care in obstetrics and gynecology, as documented by ongoing evaluation during the entire resident program;
  5. demonstrated the necessary technical skills to competently perform:
    - a. major abdominal and vaginal surgical procedures upon the female pelvis and related structures,
    - b. spontaneous and operative obstetric deliveries,
    - c. surgical exploration of the abdomen,
    - d. endoscopic procedures in the pelvis, of proven value,
    - e. diagnostic evaluation including electronic monitoring, ultrasound, colposcopy and amniocentesis,
    - f. diagnosis and treatment of complications of the above, and
  6. demonstrated good moral and ethical character.

### Application for Examination in 1993

A candidate who has completed an accredited residency program and a candidate scheduled to complete an accredited residency program on or before August 31, 1993 may apply on or before November 30, 1992 to write the examination on June 28, 1993.

The requirement of *unrestricted license* must have been met *prior* to the time that the application is submitted. An educational or institutional license is *not* satisfactory.

The form on which to apply to write the examination on June 28, 1993 may be obtained by *writing* to the Board office after September 1, 1992. Each applicant must meet the requirements effective in the year he/she requests admission to the examination. As a part of the application form, endorsement and verification of the resident's experience, competence, *satisfactory performance* and confirmation of the scheduled date for completion of the candidate's residency are requested of the director of the obstetric and gynecologic residency program.

The Board will make the final decision concerning the applicant's admission to the examination after considering all circumstances affecting his/her situation.

A candidate's application to write the examination on June 28, 1993, completed in all details, together with payment of the application fee of \$125, must be received in the Board office postmarked on or before November 30, 1992. A copy of the candidate's current license registration also is required.

The requirement of *unrestricted license* must have been met *prior* to the time that the application is submitted. An educational or institutional license is *not* satisfactory.

When the candidate is ruled admissible to the examination he/she will be notified in April (1) that the \$300 examination fee is payable and (2) the date the fee must be paid (see "Fees"), if the candidate is to be scheduled to write the examination in June.

If a candidate is found to be involved in litigation or investigation regarding ethical or moral issues, he/she will not be scheduled for examination and the application will be reexamined. Typically the Credentials Committee will defer such a decision for 1 year to gain further information.

Falsification of data (including case lists) or evidence of other egregious ethical, moral or professional misbehavior may result in a deferral of consideration of a candidate's application for at least 3 years and the candidate must meet all eligibility requirements in effect at the end of the deferred period.

When the Credentials Committee rules an applicant *not admissible* to the written examination, a *new application* and *fee* may be submitted at a later date, but the candidate must then have fulfilled the requirements effective in the year of the new application.

### Admission to the Written Examination

The candidate ruled admissible to the examination will be sent an authorization for admission form which must be presented to the proctor at the time and place of examination. When a candidate is scheduled to complete his/her residency program after submission of the application (but before September of that year), verification of the currently satisfactory manner in which the candidate is completing his/her residency must be reaffirmed by the signature of the director of the residency program on the authorization for admission form, dated within the month the candidate is scheduled to write the examination.

### Results of the Examination

The results of the examination written in late June will usually be reported to each candidate in approximately 9 weeks.

A passing grade on the written examination does not establish a candidate's admissibility to the oral examination for certification. (See "Requirements to Take the Oral Examination.")

### Requests for Reexamination

A candidate previously scheduled to write the examination who fails to do so, as well as the candidate who writes but fails to pass a previous examination must write the Board office after September 1, 1992 to request reapplication materials for the 1993 examination. It is necessary for each applicant to meet the requirements effective in the year he/she requests admission to the examination. The reapplicant must have submitted completed reapplication materials, a copy of current license registration and the reapplication fee of \$125, prior to the November 30, 1992 deadline.

The application fee and examination fee (see "Fees") must be paid each year a candidate is to be scheduled to write the examination.

### The Oral Examination

(All correspondence, applications and information directed to the Board must be in English.)

(All fees must be paid in US currency.)

The oral examination is designed to evaluate the candidate's knowledge and skills in solving clinical problems in obstetrics and gynecology, and to evaluate actual behavior in independent practice. It is emphasized that candidates will be examined in all areas of obstetrics and gynecology. More than half of the examination will consist of questions concerning patient management problems. The candidate's list of patients will be used freely by the examiners for this purpose but additional basic clinical problems will be included. The remainder of the examination will include recall of basic knowledge in obstetrics and gynecology and interpretation of gross and microscopic pathology, x-ray films, sonograms and related material from photographic slides.

Microscopes and slide projectors will be used. The knowledge and skills required for the oral examination are the same as those listed in regard to the written examination.

Recording devices will not be permitted during the oral examination.

Candidates will be expected to demonstrate that they have acquired the capability to perform, independently, major gynecologic operations, spontaneous and operative obstetric deliveries, to manage

the complications thereof and to perform the essential diagnostic procedures required of a consultant in obstetrics and gynecology.

Candidates will be expected to demonstrate a level of competence which allows them to serve as consultants to physicians who are not obstetrician-gynecologists in their community.

The report of the examining team will be reviewed by the Board of Directors and each candidate is passed or failed by vote of the Board.

You can expect the examination to be completed within a half day.

At the completion of the oral examination—if a candidate believes his/her examination has not been conducted in a fair and unprejudiced manner, the candidate may report within the hour to the Board office staff and ask for a second examination. The request must be made within 1 hour. If the appeal is granted:

1. A second examination will be provided at the next regularly scheduled annual oral examination at no additional charge.
2. The repeat examination will be conducted by an entirely different team of examiners, no one of whom shall have previously participated in an examination of the candidate.
3. Neither the questions nor the candidate's answers on the first examination will be known to or taken into account by the second group of examiners.
4. The decision of the examiners conducting the second examination shall determine the results of the candidate's oral examination.

### Requirements

1. Passing grade on the written examination.
2. Good moral and ethical character.
3. Unrestricted license to practice medicine in one of the states or territories of the United States or a province of Canada, since at least February 28, 1992.
4. Actively engaged in (private or nonprivate) unsupervised practice.
  - a. Independent unsupervised patient care *limited* to obstetrics and gynecology.
    - 1) for at least the time from February 18, 1992 through June 30, 1993 (time spent in a critical care fellowship does not meet this requirement) or
    - 2) for at least the time from July 1, 1992 through June 30, 1993, for candidates who have successfully completed a Board-approved fellowship (this includes critical care fellowship *only* if taken in continuity with a Board-approved specialty fellowship).
  - b. Unrestricted hospital privileges to practice as an obstetrician-gynecologist since at least July 1, 1992. Such privileges must be granted in each of the hospitals in which the candidates has been responsible for patient care during this time. If the candidate is under investigation or on probation, the examination will be deferred until the investigation is completed, the probation is lifted and full and unrestricted privileges are granted.
5. Submission of typewritten lists (two copies) on or before August 15 preceding the examination, of all patients dismissed from care in all hospitals during the 12 months ending June 30 prior to the scheduled examination and also a list of 40 patients from office practice.
 

The candidate is personally responsible for the proper preparation, accuracy and completeness of the case lists, which will reflect the unsupervised practice (private or nonprivate) activity *following* residency and fellowship.
6. On the day of the examination the candidate will be expected to sign the following statement: "There have been no restrictions in my hospital privileges since the date of my application." Candidates who are unable to sign this statement will not be admitted to the examination until and unless they present evidence that full and unrestricted privileges have been restored.
7. Practice which consists of ambulatory care exclusively will not be considered adequate to fulfill these requirements.

*Additional requirements for candidates practicing in a country other than the United States or Canada:*

- Submission with the application of a letter(s) from a senior responsible officer in the hospital(s) where the candidate practices, verifying the candidate's responsibility for independent, unsupervised care of obstetric and gynecologic patients.

### Limitations

Duration of active candidate status is limited. Candidates must pass the oral examination within 6 years following passing the written examination and may take the oral examination only three times. If they fail the oral examination three times, or fail to pass the oral examination within 6 years, they become ineligible to repeat the examination at that time. They must repeat and pass the written examination to become admissible to the oral examination again. The repeat written examination may be taken only three times.

Candidates who fail the repeat written examination three times are no longer admissible for the examinations of the American Board of Obstetrics and Gynecology unless they successfully repeat a full residency in an accredited program in obstetrics and gynecology.

Candidates who do pass the repeat examination may repeat the oral examination only three times. If they fail the oral examination three times they will no longer be admissible for the examinations of the American Board of Obstetrics and Gynecology. Admissibility may be re-established only by successfully repeating a full residency in an accredited program in obstetrics and gynecology—a minimum of 36 months including 12 months as chief resident.

### Determination of Qualifications

The Board will require, by confidential inquiry, documented evidence concerning a candidate's professional reputation, moral and ethical character and in-hospital practice privileges from administrative officers of organizations and institutions to whom the candidate and his/her conduct of practice is known.

Time as a "resident" or "house officer" in excess of that necessary to fulfill the requirements to take the written examination or time in a "student" or a teaching or research appointment which does not involve appointment to the staff of an approved hospital with unrestricted privileges to practice as an obstetrician and gynecologist, will not be acceptable evidence of a degree of responsibility for patient care that is acceptable fulfillment of the required "independent practice."

Each candidate will be required to furnish the Board with certain prescribed information concerning his/her performance in practice (maternal mortality rate—perinatal mortality rate—caesarean section rate—etc.).

If a candidate is found to be involved in litigation or investigation regarding ethical or moral issues, he/she will not be scheduled for examination and the application will be reexamined. Typically the Credentials Committee will defer such a decision for one year to gain further information.

Falsification of data (including case lists) or evidence of other egregious ethical, moral or professional misbehavior may result in deferral of consideration of a candidate's application for at least 3 years and the candidate must meet all requirements in effect at the end of the deferred period.

Patient lists (a) not providing the information requested, (b) not prepared in accordance with the format requested, or (c) which do not have sufficient numbers of patients or do not include sufficient breadth and depth of clinical problems may disqualify the candidate for admission to the oral examination.

### Application for Examination in 1993

Application to take the oral examination in November 1993 must be made on the "application for the 1993 examination" form. The application, complete in all details, with payment of the application fee of \$350 must be received in the Board office during January or February

1993. The deadline date for receipt of applications in the Board office is a postmark of February 28, 1993. Requests for the appropriate form must be made in writing.

The Board will make the final decision concerning the applicant's admission to the oral examination after considering all circumstances affecting his/her situation.

A candidate ruled admissible to the oral examination in November 1993 will be so notified on or before July 15, 1993. He/she must then submit, on or before August 15, 1993:

- Duplicate, typewritten and verified lists of all patients dismissed from his/her care in all hospitals during the 12 months preceding June 30, 1993 and a list of 40 patients from his/her office practice. The candidate's lists of patients will be used as a basis for questions during the oral examination and will not be returned to the candidate, and
- Payment of the examination fee by personal check or money order of \$450 (in US funds).

### Patient Lists for the Oral Examination

Each candidate for the oral examination must prepare the following patients lists for review by his/her examiners at the time of examination. The candidate's list of patients will be freely used as a basis for questions which will be patient-management oriented. Questions will be developed which test the ability of the candidate to:

- Develop a diagnosis. This includes the necessary clinical, laboratory and diagnostic procedures.
- Select and apply proper treatment under elective and emergency conditions.
- Manage complications. This includes prevention, recognition and treatment.
- Plan and direct follow-up and continuing care.

Carelessly prepared or incomplete case lists may contribute to failure to pass the oral examination.

The candidate should bring a duplicate patient list to the oral examination for personal reference. Do not include any information on this duplicate list which did not appear on the case lists sent to the Board office.

The case lists must have sufficient numbers and sufficient breadth and depth of clinical difficulty. They must include 40 office practice patients and a minimum of 50 patients with significant problems. The clinical problems will vary according to the nature of the candidates' practices. However, the problems must be of sufficient variety and severity to permit the evaluation of a candidate's ability to function as a consultant. Ordinarily these lists will include patients having obstetric management and a variety of major abdominal and vaginal surgical procedures. Candidates who have successfully completed a Board-approved fellowship and who are *active candidates* for certification of special qualification may submit cases in a single specialty within obstetrics and gynecology, if they represent the breadth and depth of that specialty.

The candidate's list must include 40 office practice patients and all hospitalized patients discharged or transferred from the candidate's care during the 12 months ending June 30 of the *current year* and must be mailed to the Board office on or before August 15 preceding the November examinations.

The patients listed must be only those for whom the candidate has had personal responsibility for professional management and care. Recording such professional responsibility implies that the candidate has personally controlled the medical and/or surgical management of each patient listed. In the case of partnership or group practice, the patients listed should be only those managed by the candidate.

A patient list should be accurately *typed* across *unbound* sheets of white paper 8½ × 11 inches in size. Separate lists are required for each hospital. The headings must conform in all details and provide the information indicated by the format of the forms enclosed with

the oral application. *Two copies* of the complete list must be submitted.

Standard nomenclature should be used. Abbreviations are not acceptable. Only English language will be acceptable.

The duplicate lists of patients will not be returned to the candidate after the examination. The candidate should bring a duplicate list to the examination.

#### 1. Office Practice Patients

A list of 40 patients from the candidate's office practice should be prepared in the format accompanying the application. List separately patients who have presented with any of the following problems. List no more than four patients from any one category. Do not include any patients who appear on the hospital lists.

Genetic problems  
Amenorrhea  
Infertility  
Abnormal uterine bleeding  
Developmental problems  
Sexual dysfunction  
Contraception complications  
Hirsutism  
Abnormal cervical-vaginal cytology  
Pelvic pain  
Vaginal discharge/pruritus  
Breast problems  
Medical complication of pregnancy  
Premenstrual tension  
Office surgery  
Sexually transmitted disease  
Asymptomatic pelvic mass  
Pelvic relaxation problems  
Urinary tract infection  
Psychosomatic problems  
Menopause

List separately each patient and include the problem (one of the listed categories), diagnostic procedures, treatment, results and number of office visits during the 12-month period. Group patients together under each separate category.

#### 2. Gynecology

A list of *all* gynecologic patients—(a) hospitalized (b) ambulatory or short-stay surgery—should be prepared in the format accompanying the application and listed in order as follows:

- a. major operative procedures
- b. minor operative procedures
- c. non-surgical admissions

The preoperative diagnosis should appear for all major and minor surgical procedures. The size of ovarian cysts must be recorded. For non-surgical conditions the admission diagnosis should be recorded. The treatment recorded should include all surgical procedures as well as primary nonsurgical therapy. Surgical diagnosis refers to the pathology diagnosis. For hysterectomy specimens the uterine weight in grams must be recorded. In cases without tissue for histologic diagnosis the final clinical diagnosis should be listed.

Days in hospital on this listing of patients, as well as on all other lists, is the arithmetic difference between date of discharge and date of admission.

The total number of uncomplicated induced abortions of 12 or less weeks duration should be reported simply as a total number.

Induced abortions of more than 12 weeks (menstrual age) duration should be listed separately indicating the duration of pregnancy and the technique employed.

Also list separately, as individual patients, all with complications following induced abortions either observed or reported to you regardless of the duration of the pregnancy when abortion was induced.

#### 3. Obstetrics

A list of obstetric patients should be prepared in the format accompanying the application. List separately each patient with a complication or abnormality, as well as medical and surgical intervention during pregnancy, labor, delivery and the puerperium. In addition, a total of the number of normal, uncomplicated obstetric patients, managed during the same 12-month period should appear at the end of the obstetric list.

Interpretation of "normal obstetric patients" for this listing implies that:

- a. Pregnancy, labor, delivery and the puerperium were uncomplicated, labor began spontaneously between the 37th and 42nd week of gestation;
- b. The membranes ruptured or were ruptured after labor began;
- c. Presentation was vertex, position was occiput anterior or transverse, labor was less than 24 hours in duration;
- d. Delivery was spontaneous or by outlet forceps with or without episiotomy, from an anterior position;
- e. The infant was not asphyxiated (Apgar 6 or more), of normal size and healthy;
- f. The placental stage was normal and blood loss was not excessive.

Deliveries not fulfilling these criteria must be listed individually. Include gestational age at admission.

#### 4. Cover Sheets

Each list of patients (1) gynecologic and (2) obstetric from each hospital should be verified as illustrated by the form accompanying the application. Note that the record librarian or other hospital official must attest that (a) the patients listed were cared for by the candidate, and (b) that all of the hospitalized patients dismissed from the candidate's care have been separately listed or reported in the totals reported for the period indicated.

#### 5. Summary Sheet

Using the form provided for this purpose, prepare a summary of all cases for all hospitals combined.

### Admission to the Oral Examination

If the examination fee has been paid *and* the two copies of patients have been submitted by August 15, 1993, the candidate will receive an authorization for admission form and a reservation card for the hotel at least 1 month prior to the examination, indicating the day, time and place to report for the examination. Please keep us informed of your current mailing address.

### Ruling Not Admissible

A candidate not admitted to an oral examination may subsequently reapply, but must then submit a new application, pay the application fee, and meet the requirements applicable at the time he/she reapplies.

If the candidate was disqualified because the case lists were judged insufficient for a fair examination, the new case lists will be added to those already submitted. Thus the requirement of sufficient numbers, breadth and depth in the case list makes *time* in practice the *variable* and *experience* the *constant*.

### Reexaminations

A candidate who is disqualified or who fails to pass the oral examination must reapply in order to take the examination another year by submission of a new application during January or February, with payment of the reapplication fee of \$350.

A candidate reapplying for examination will again be asked to provide verification of his/her responsibilities for patient care and will again be notified, early in July in regard to his/her admissibility to the next examination.

A candidate accepted for reexamination must submit, on or before August 15 prior to examination, *new* case lists of patients for the 12 months prior to June 30 prior to the oral examination.

The examination fee of \$450 is due each time a candidate receives notice that he/she can be scheduled to take the oral examination. Each reexamination will be conducted by examiners who have no knowledge of the fact or circumstances of a candidate's previous failure.

### Postponement of Oral Examination

A candidate failing to take an oral examination for which he/she had been scheduled must submit a new application during January or February of the following year when his/her admissibility to the next examination will be determined on the basis of the candidate's professional activities as reported during the current year. Payment of the \$350 reapplication fee must accompany each reapplication.

If notified of his/her admissibility to the next oral examination he/she must again submit before August 15 a listing of all patients dismissed from his/her care in all hospitals during the 12 months ending June 30 prior to the oral examination and a list of 40 patients from office practice.

### Fees

Since the fees have been computed to cover the costs of examination and administrative expense, they will not be refunded or credited. All fees must be paid in United States currency. The candidate's canceled check is to be considered the receipt.

#### A. The Written Examination

The application fee of \$125 must be enclosed with each application, reapplication or request to write the examination. The candidate will usually be notified early in April that his/her application or request has been approved, at which time the \$300 examination fee will be due. If payment of the examination fee has not been received in the Board office postmarked on or before *May 1*, the candidate will not be scheduled to write the examination in June.

No application fees will be either credited against a future application or refunded.

Examination fees may be refunded provided candidates inform the Board office *in writing* of their inability to write the examination prior to June 1.

#### B. The Oral Examination

The application fee of \$350 must be enclosed with each application to take the oral examination. A candidate notified in mid-July of his/her admissibility to the oral examination in November is required to pay the \$450 examination fee before he/she will be scheduled to take the oral examination. If the examination fee has not been received in the Board office postmarked on or before August 15, the candidate will not be scheduled to take the examination the following November.

No application fees will be either credited against a future application or refunded.

Examination fees may be refunded provided candidates inform the Board office *in writing* of their inability to write the examination prior to September 30.

### Listings of Certified Diplomates

Each year the Board office notifies the American College of Obstetricians and Gynecologists of the names and addresses of the diplomates certified in that year. A list of the names of the most recently certified diplomates is sent also to the American Medical Association and to the American Board of Medical Specialties with the request that they be included in the next issues of (1) the *American Medical Association Directory* and (2) in the *Directory of Certified Obstetrician-Gynecologists*.

A candidate's name will be included in the lists to be published only if the candidate has authorized inclusion of his/her name in the specific listings by signing accordingly on the Authorization for Admission Form at the time of his/her oral examination.

After this effort to assure initial listings of the newly certified diplomate, the Board assumes no responsibility for a diplomate's listing in subsequent issues of any directory.

### Revocation of Diploma or Certificate

Each candidate, when making application, signs an agreement regarding disqualification or revocation of his/her diploma, certificate, or other evidence of qualification for cause. Revocation may occur whenever:

1. The physician shall not in fact have been eligible to receive the diploma or certificate, irrespective of whether or not the facts constituting such ineligibility were known to or could have been ascertained by this Board, its members, directors, examiners, officers or agents at or before the time of issuance of such diploma or certificate.
2. Any rule governing examination for a diploma or certificate shall have been violated by the physician but the fact of such violation shall not have been ascertained until after the issuance of his diploma or certificate.
3. The physician shall have violated the moral or ethical standards of the practice of medicine then accepted by organized medicine in the locality in which he/she shall be practicing and, without limitation of the foregoing, the forfeiture, revocation or suspension of his/her license to practice medicine, or the expulsion from, or suspension from the rights and privileges of membership in a local, regional or national organization of his/her professional peers shall be evidence of a violation of such standards of the ethical practice of medicine.
4. The physician shall fail to comply with the rules and regulations of this Board.
5. The issuance of, or receipt by him/her of such diploma, certificate or other evidence of qualification shall have been contrary to or in violation of the Certificate of Incorporation or the Bylaws of this Board.
6. The Board adheres to "The Ethical Considerations in the Practice of Obstetrics and Gynecology" currently published by the American College of Obstetricians and Gynecologists.

Upon revocation of any diploma or certificate by this Board as aforesaid, the holder shall return his/her diploma or certificate and other evidence of qualification to the executive director of the Board and his/her name shall be removed from the list of certified specialists.

## American Board of Ophthalmology

J. Brooks Crawford, MD, Chairman, San Francisco, California  
 John T. Flynn, MD, Vice Chairman, Miami, Florida  
 Douglas R. Anderson, MD, Miami, Florida  
 W. Banks Anderson, MD, Durham, North Carolina  
 George R. Beauchamp, MD, Dallas, Texas  
 William E. Benson, MD, Philadelphia, Pennsylvania  
 B. Thomas Hutchinson, MD, Boston, Massachusetts  
 John L. Keltner, MD, Davis, California  
 Malcolm N. Luxenberg, MD, Augusta, Georgia  
 Denis M. O'Day, MD, Nashville, Tennessee  
 Dennis M. Robertson, MD, Rochester, Minnesota  
 Morton E. Smith, MD, St. Louis, Missouri  
 Ronald E. Smith, MD, Los Angeles, California  
 Robert L. Stamper, MD, San Francisco, California  
 H. Stanley Thompson, MD, Iowa City, Iowa  
 Fred M. Wilson II, MD, Indianapolis, Indiana  
 William H. Spencer, MD, Executive Director  
 Philadelphia, Office of the Board  
 111 Presidential Blvd., Suite 241  
 Bala Cynwyd, PA 19004

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Ophthalmology to ascertain whether the information below is current.)*

## Governing Rules and Regulations

The Board's rules and regulations, which are subject to change from time to time without notice, contain specific provisions concerning eligibility for the examinations administered by the Board; an admission appeals process, which is available under certain circumstances; the application process; the examination processes; a description of the circumstances under which an applicant will be required to reactivate an existing application, or submit a new application, or repeat part or all of an examination; a list of occurrences that could lead the Board to revoke a certificate previously issued by it to a diplomate or to place the diplomate on probation; and other matters relating to the Board's examination and certification processes. Many, but not all, of those provisions are summarized or described in this publication. In the event of any inconsistency between the Board's rules and regulations and this publication, or any omission from this publication of any provision of the rules and regulations, the rules and regulations shall govern. Copies of the rules and regulation are available upon request from the Board's executive office.

## Requirements

Many physicians write to the Board outlining their training and asking for an estimate of their qualifications and whether further training is required. The Board's requirements, as published herewith, provide this information and any potential applicant should be able to estimate his/her status after studying these requirements. Individual officers or Directors of the Board cannot and will not make such determinations. All evaluations of an applicant's status will be made by the committee on admissions in accordance with the rules and regulations of the Board, after submission of an application for examination and payment of the registration fee, which must accompany the application. Personal interviews with officers and directors of the Board should not be requested at any time.

It is the responsibility of the candidate to seek information concerning the current requirements for certification as an ophthalmologist. The Board does not assume responsibility for notifying a candidate of changing requirements or the impending loss of his/her eligibility to take an examination.

### A. Educational

All candidates must have graduated from a medical school or from a school of osteopathy.

All candidates entering ophthalmology training programs must have taken a postgraduate clinical year (PG-1) in a program accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada. The PG-1 year must be comprised of training in which the resident has primary responsibility for patient care in fields such as internal medicine, neurology, pediatrics, surgery, family practice, or emergency medicine. As a minimum, 6 months of this year must consist of a broad experience in direct patient care.

In addition to a PG-1 year, all applicants must have satisfactorily completed an entire formal graduated residency training program in ophthalmology of at least 36 months duration (PG-4 or better) in either the United States, accredited by the Accreditation Council for Graduate Medical Education, or in Canada approved by the Royal College of Physicians and Surgeons of Canada.

The applicant's chairman is required to verify satisfactory completion of an entire formal graduated ophthalmology residency training program of at least 36 months duration.

When a resident's graduate education and clinical experience has been gained in more than one residency program, each chairman will be required to complete a satisfactory completion form. Less than 6 month's service in an accredited program is not acceptable as a part of the required training in ophthalmology. The chairman's verifica-

tion form(s) cannot be submitted to the Board until the applicant has completed the entire residency training program.

If a program is disapproved or withdrawn during the course of a resident's training, he/she must complete the remaining required number of months of training in another accredited program.

Only those applicants who have completed their entire ophthalmology training program, PGY 4 or beyond, by August 1 are eligible to apply for the written qualifying examination given in April of the following year.

### B. Licensure

An applicant may have graduated from a medical school of a country other than the United States or Canada. Graduates of foreign medical schools must have a certificate from the Educational Commission for Foreign Medical Graduates (ECFMG).

A person shall be eligible to apply for and to take any examination administered by the Board only if, as of the date of application and at all time thereafter through and including the date of administration of each examination of the Board taken by the person, the person has a valid and unrestricted license to practice medicine in the place or places in which the person's practice of medicine is regularly conducted in the United States, or any of its territories, or Canada and in each other place in which the person practices or has practiced medicine and has an unexpired license. A person's license to practice medicine shall not be considered to be valid and unrestricted if:

1. The license has been either surrendered or not renewed upon its expiration by the person during the course of or in order to terminate, settle, or otherwise dispose of an investigation or proceeding by a court, department, board, or administrative agency with respect to the person or the person's practice of medicine, or
2. The person's practice of medicine or license to practice medicine has been or is, in any manner or to any extent whatsoever, revoked, restricted, conditioned, suspended, limited, qualified, or subject to the terms of probation by a court, department, board, or administrative agency.

At the time a person submits an application to be Board and at all times thereafter, the person shall have a continuing obligation to disclose promptly to the Board the existence or occurrence of any circumstances causing the person to fail to satisfy the foregoing condition of eligibility to apply for and take any examination administered by the Board. A person submitting an application to the Board shall inform the Board on, or in a written submission accompanying, the person's application or in a written submission to the Board before taking any examination administered by the Board, as the case may be, if the person's license to practice medicine in the United States, any of its territories, or Canada has previously been surrendered or not renewed upon its expiration or if the person's practice of medicine or license to practice medicine in the United States, any of its territories, or Canada has previously been revoked, restricted, conditioned, suspended, limited, qualified, or subject to the terms of probation.

### Applications

An applicant who wishes to be examined by the Board shall complete, sign and file with the executive director an application on the official form then in use by the Board. The application shall be considered complete only when all supporting data required by the application including the chairman's verification form are also filed with the executive director. Applications can be obtained from the chairmen of accredited residency programs or from the office of the Board. If an applicant wishes to be considered for a written qualifying examination to be conducted in a particular year, his/her application and all supporting data, including supporting data furnished directly by others with respect to the applicant, must be postmarked between January 1 and August 1 except for the chairman's verification form which must be postmarked on or before October 1 of the calendar year im-

mediately preceding the calendar year in which the written qualifying examination is to be conducted.

By paying a late fee the deadline for postmarking the completed application may be extended from August 1 to September 1. No other exceptions to, or extensions of, these requirements will be made for any reason. The dates of future examinations will be announced in *Ophthalmology* and the *Journal of the American Medical Association*.

An applicant who does not receive notification from the Board of office by January 15 of the acceptance or rejection of his or her application must contact the Board office in writing to inquire about the status of the application. Failure to contact the Board office in writing by February 15 will result in such applicant's removal from the examination roster.

If a completed application and all required supporting data are not timely postmarked the application will not be valid, and the application fee shall be returned. It is best not to mail application materials just before the postmark deadline because packets are sometimes postmarked a day or two after mailing. Caution: If there is a discrepancy between a metered postmark and an official United States Postal Service postmark, the later will be considered official.

The application shall be accompanied by a check payable to the Board for the application fee. No application will be considered to be complete until the fee and all required supporting data, including a copy of your current registration to practice medicine and two recent photographs for identification at the written qualifying examination and the oral examination, have been received by the executive director.

The application form contains a pledge that explains the prohibitions regarding improper conduct before, during and after examination. Candidates must certify that the information they provide in their applications is true and accurate. If (1) any misrepresentation is discovered in the application, in any other information submitted to the Board or in the identity of a person applying to take or taking the examinations, (2) any financial or other benefit is offered by a candidate to any director, officer, employee, proctor, or other agent or representative of the Board in order to obtain a right, privilege or benefit not usually granted by the Board to similarly situated candidates, or (3) any irregular behavior during the examination, such as copying answers, sharing information, using notes, or otherwise giving or receiving aid is discovered by observation, statistical analysis of answer sheets, or otherwise, the candidate in question shall be given written notice of the charges and an opportunity to respond in accordance with the procedures set forth in the rules and regulations of the Board. If the Board determines that a violation has occurred, the Board may permanently bar the person(s) involved in the violation from all future examinations, invalidate the results of prior examinations taken by the person(s), withhold or revoke the certificate of the person(s), or take other appropriate action. If sanctions are imposed pursuant to the rules and regulations of the Board, the Board may notify legitimately interested third parties of its action.

When the Board determines that irregular behavior has occurred during an examination, the Board will make every effort to withhold the scores of only those candidates directly implicated in the irregularity. Nevertheless, in some instances the evidence of irregularity, though sufficiently strong to cast doubt on the validity of scores, may not enable the Board to identify the specific candidates involved in the irregularity. In such circumstances, the Board may withhold the scores of candidates not directly implicated in the irregularity and, if necessary, may require those candidates to take an additional examination at a later date to ensure the validity of all scores.

The examination booklets used in the written qualifying examination and the illustrative materials and questions asked in the oral examinations are copyrighted as the sole property of the Board and must not be removed by the candidate from the test area or reproduced in any way. Any reproduction, in whole or in part, of the written test booklet or oral examination materials and questions is a federal offense and also may subject the applicant to the sanctions

listed above. No notes, textbooks, other reference materials, scratch paper or recording devices may be taken into either the written or the oral examination.

## Disabilities

The American Board of Ophthalmology is committed to complying fully with its responsibilities under Section 309 of the Americans with Disabilities Act to any qualified candidate for Board certification who establishes to the reasonable satisfaction of the Board the existence, the specific nature, and the extent of the candidate's disability within the meaning of the Act.

The Board intends to offer its certification examinations in places and in a manner which are accessible to such disabled candidates. The Board intends to select and administer its examinations so as best to ensure that, when one of its examinations is administered to a candidate with a disability that impairs sensory, manual, or speaking skills, the examinations results accurately reflect the candidate's aptitude or achievement level and other factors that the examination is designed and intended to measure, rather than reflecting the candidate's impaired sensory, manual, or speaking skills, except where those skills are among the factors that the examination is designed and intended to measure.

A candidate for Board certification who believes that he/she is disabled within the meaning of Section 309 of the Americans with Disabilities Act and who requests a modification in the form of the certification examination administered by the Board or in a manner of its administration to the candidate shall specify on, or in a supplement submitted with the candidate's timely filed application form to the Board the existence, the specific nature, and the extent of his/her disability and the specific modification requested. The candidate also shall submit with the application, in addition to all materials and information required to be submitted with the application, independent documentary evidence which establishes to the reasonable satisfaction of the Board the existence, the specific nature, and the extent of the candidate's disability and why the modification requested by the candidate is required by the candidate's disability.

## Fees

Review of application and registration for written qualifying examination, \$770, payable with application.

Late application fee after August 1, \$980.

Oral examination, \$620, payable on successful completion of the written qualifying examination.

To repeat the written qualifying examination, \$560.

To repeat the entire oral examination, \$620.

To repeat a single subject of the oral examination, \$280.

To repeat two or three subjects of the oral examination, \$425.

Fees for accepted candidates for the written qualifying examination and the oral examination are not refundable. The fees for examinations shall be established annually by the board of directors on the basis of the actual and anticipated costs of the Board in the examination of applicants and the administration of its business. The directors of the Board serve without compensation except for reimbursement of expenses.

## Cancellations

To cover the administrative expenses an additional charge equal to 50% of the original fee for the particular examination will be imposed on any applicant who cancels or fails to keep an examination assignment, written or oral, regardless of reason.

## Written Qualifying Examination

In order to qualify for an oral examination, each applicant must pass a written qualifying examination. This is a multiple choice test which may cover any topic in ophthalmology and is especially devoted to the following subjects:

1. Optics, refraction and contact lenses
2. Retina, vitreous, and uvea
3. Neuro-ophthalmology
4. Pediatric ophthalmology
5. External disease and cornea
6. Glaucoma, cataract and anterior segment
7. Plastic surgery and orbital diseases
8. General medicine
9. Ophthalmic pathology.

The examination has also been described in the Board's booklet entitled "Written Qualifying Examination."

The written qualifying examination is given simultaneously in designated cities in the United States in April of each year.

An applicant who, on three consecutive occasions, fails to take a written qualifying examination for which the applicant is scheduled will not be permitted to apply for a subsequent written qualifying examination until 24 months have elapsed following the date of the last examination for which the applicant was scheduled but which he/she failed to take.

In addition, an applicant who fails the written qualifying examination may apply for reexamination and will be permitted to repeat the test the following year upon payment of the current reexamination fee.

## Oral Examinations

Upon successful completion of the written qualifying examination, applicants will be sent specific instructions for registration for the oral examination. A check payable to the Board for the amount then in effect for the oral examination must accompany the completed registration form and be forwarded to the Board office within the appropriate time frame.

## Change in Oral Examination Schedule

It has been the custom of the Board to hold two oral examinations a year with candidates who have passed the April written qualifying examination assigned either to a group taking the oral examinations in the fall of that year, or to a group taking the oral examinations in the spring of the following year. In 1991 and 1992 there will be only one oral examination. Candidates taking the April 1991 and April 1992 written will be assigned to the one oral examination in the fall of that year. In 1993 the Board will return to two orals per year. Candidates who pass the April 1993 written will be assigned to either the fall 1993 oral or the spring 1994 oral. The Board reserves the right to limit the number of candidates admitted to any scheduled examination and to designate the candidates to be examined.

## Oral Examination Subjects

The oral examination will be divided into the subjects listed and described in the following paragraphs. All subjects are given by appointment within a half day period utilizing a panel system. Information about the examination procedures and scheduling is sent to all candidates after they have been registered for the oral examinations.

### Subjects

The oral examination is divided into the following subjects:

1. Optics, refraction and visual physiology
2. Pediatric ophthalmology and strabismus
3. Neuro-ophthalmology and orbit
4. External eye and adnexa
5. Anterior segment of the eye
6. Posterior segment of the eye

In each of the oral examinations emphasis is placed upon the following:

### I. Data Acquisition

Recognition by the candidate of depicted abnormalities and diseases that affect the eye, ocular adnexa, and the visual pathways.

### II. Diagnosis

The ability of the candidate to synthesize clinical, laboratory, and histopathologic data in order to arrive at a correct diagnosis and differential diagnosis.

### III. Treatment

Candidates will be expected to provide a reasonable and appropriate plan for medical and/or surgical management of patients with the conditions depicted or described.

These examinations include developmental, dystrophic, degenerative, inflammatory, infectious, toxic, traumatic, neoplastic, and vascular diseases affecting the eye and its surrounding structures.

#### 1. Optics, Refraction and Visual Physiology

Candidates should be familiar with the basic principles of physical and geometrical optics and the operation of standard optical instruments. They should understand the essentials of visual physiology including visual acuity, light and dark adaptation, accommodation, and color vision. They should know the various forms of ametropia, principles and techniques of refraction, principles of lens design, and methods of correction of ametropia including spectacles, contact lenses, intraocular lenses and keratorefractive surgery. Candidates should be familiar with the methods for prescribing protective lenses, absorptive lenses, and aids for low vision.

#### 2. Pediatric Ophthalmology and Strabismus

Candidates should be familiar with diseases affecting the eye of infants and children and associated systemic abnormalities.

Candidates should understand the anatomy, pathology, and physiology of the neuromuscular mechanisms subserving ocular motility and binocular vision. Candidates should be familiar with the methods of examination for detection and assessment of sensory and ocular motor disorders. They should also know the clinical features, differential diagnosis, natural course, and management of the various types of comitant and noncomitant deviations. They should be familiar with the principles and complications of surgery upon the extraocular muscles.

#### 3. Neuro-ophthalmology and Orbit

Candidates should know the anatomy of the orbit and the neuro-anatomy of the afferent and efferent visual systems. They should understand the principles and techniques of various diagnostic procedures, including visual field testing, visually evoked responses, ultrasonography, conventional X-ray imaging, CT scanning and magnetic resonance imaging. Candidates should be familiar with the clinical features, pathology, differential diagnosis, and management of disorders of the orbit, visual pathways, oculomotor system, and pupillomotor pathways, including the indications for, principles of and complications of orbital surgery.

#### 4. External Eye and Adnexa

Candidates should know the anatomy, embryology and physiology of the structures comprising the lacrimal system, lids, cornea, conjunctiva, and anterior sclera. They should demonstrate knowledge of the pathologic substrate, differential diagnosis, and medical therapy as well as indications for, principles of, and complications of surgical procedures utilized to alleviate abnormalities and diseases affecting these tissues.

#### 5. Anterior Segment of the Eye

This examination concerns the anatomy, embryology, physiology, and pathology of abnormalities and diseases of the cornea, anterior chamber angle, iris, ciliary body, and lens.

Candidates are expected to discuss conditions affecting these structures and those to be considered in their differential diagnosis. They should also be able to describe and provide indi-

cations for medical and surgical therapy directed toward alleviating or curing these conditions.

#### 6. Posterior Segment of the Eye

This examination concerns the anatomy, embryology, physiology, and pathology of abnormalities and diseases of the vitreous, retina, choroid, and posterior sclera.

Candidates are expected to discuss conditions affecting these structures and those to be considered in their differential diagnosis. They should also be able to describe and provide indications for medical and surgical therapy directed toward alleviating or curing these conditions.

## Reactivation

### A. Written Qualifying Examination

An applicant who fails to take the written qualifying examination within 24 months after notice has been sent to him/her that his/her application has been accepted will not thereafter be accepted for examination unless he/she reactivates the application for approval and submits an additional application fee.

In addition, any applicant who does not repeat the written qualifying examination within 24 months after failing will be required to reactivate the application for approval and submit an additional application fee. For every two consecutive failures the application must be reactivated and the current fee must be submitted.

### B. Oral Examination

An applicant who fails one or two subjects in an oral examination will be required to repeat these subjects. An applicant who fails three or more subjects will be required to repeat all subjects of the oral examination. An applicant who fails three or more subjects on the first repeat examination will be required to pass another written qualifying examination before being permitted to repeat the oral examination. Additional information on grading is specified in the "Rules for Grading" which are sent to all applicants at the time of their oral examination registration. (See "Governing Rules and Regulations.")

An applicant shall be required to reactivate his/her application for approval, submit an additional application fee, and pass another written qualifying examination before being admitted to the oral examination under the following circumstances: (a) If a candidate does not take the oral examination within 24 months after notice has been sent to the applicant that he/she has passed the written qualifying examination; (b) if a candidate who is eligible to do so fails to repeat the oral examination within 24 months after failing or conditioning part of such examination; (c) if the candidate does not pass all subjects covered therein in three or fewer partial or complete examinations; or (d) if the candidate does not pass the written qualifying examination and the entire oral examination within 72 months after notice has been sent to him/her that his/her original application is accepted.

## Reactivation Procedure

In order to reactivate an application, the request and accompanying fee must be postmarked on or before August 1 of the calendar year immediately preceding the calendar year in which the written qualifying examination is to be conducted. The applicant must indicate continuation of a valid and unrestricted license to practice medicine in one of the United States, its territories, or in a province of Canada. By paying a late fee the deadline for reactivation of the application may be extended from August 1 to September 1.

### Inactive Applications

When an application has not been reactivated it is considered by the Board to have lapsed. Inquiries to the Board by outside agencies about the certification status of a physician with an inactive application will be answered by stating that said physician is not certified, and is not scheduled for an examination.

## Results of Examinations

Within a reasonable time after completion of the written or oral examinations, the applicant shall be notified by the executive director as to the results thereof. The decision of the Board as to these results shall be final and conclusive. Grades are not subject to appeal. Because such is the case, individual Directors of the Board or associate examiners should not be contacted about specific examination results. To preserve confidentiality, results of an examination will not be given over the telephone.

## Certification

An applicant who successfully passes both the written qualifying and oral examinations within the required time limitations hereinabove set forth, as determined by the Board in its sole discretion, shall be entitled to receive a certificate without further consideration of his/her qualifications by the Board. Physicians who have received the certificate are diplomates of the Board.

### Duration of Certification

Certificates issued by the Board after July 1, 1992 will be valid for a period of 10 years. Thereafter, a diplomate will be required to satisfactorily complete a designated renewal program every 10 years in order to extend the validity of his/her certificate. Certificates issued prior to July 1, 1992 are valid during the diplomate's lifetime.

Candidates who have entered the examination process prior to 1991 and have not passed the written qualifying examination as well as all portions of the oral examination before, or at the November 1991 oral examinations, will receive time limited certificates upon passing the written and oral examinations of the Board.

## Disciplinary Sanctions

The Board shall have the authority to impose disciplinary sanctions upon a candidate or diplomate for any of the following reasons:

1. Violation of rules or regulations of the Board relating to the written qualifying and oral examinations and applications to take the examinations;
2. Issuance of a certificate contrary to or in violation of the rules and regulations of the Board;
3. Ineligibility of the person to whom the certificate was issued to receive the certificate;
4. Substantial misstatement or omission of a material fact to the Board in an application or in any other information submitted to the Board;
5. Revocation of the license to practice of a person to whom a certificate was issued.

## Statements of Eligibility

The Board does not issue statements of "eligibility" for its examinations. The only information the Board will divulge is whether a physician is or is not certified or is or is not scheduled for an examination.

## American Board of Medical Specialties

The American Board of Medical Specialties (ABMS), previously called the Advisory Board for Medical Specialties, was established in 1933 to serve in an advisory capacity to the American specialty boards and to cooperate with organizations that seek its advice concerning the certification of medical specialists. The American Board of Ophthalmology is officially recognized by the ABMS, and contributes an annual fee of \$2000 in addition to a per capita fee for each diplomate certified, to the American Board of Medical Specialties as do all other medical specialty boards, in support of the activities of ABMS.

The American Board of Ophthalmology provides an annual listing of new diplomates for inclusion in the *ABMS Compendium of Medical Specialists* and in the *ABMS Directory of Certified Ophthalmologists*.

*gists.* The ABMS will contact each diplomate directly for biographical information and to update information every 1 to 2 years.

### Associate Examiners

All associate examiners are informed by the Board that they shall not promote, or permit others to promote, his/her participation in commercial or educational activities under circumstances which exploit, or might be perceived to exploit, his or her familiarity with examinations administered by the American Board of Ophthalmology or otherwise compromise the integrity of those examinations.

## American Board of Orthopaedic Surgery

John A. Murray, MD, President, Houston, Texas  
 Dan M. Spengler, MD, President-Elect, Nashville, Tennessee  
 Gordon B. McFarland, Jr., MD, Secretary, New Orleans, Louisiana  
 Harold M. Dick, MD, Treasurer, New York, New York  
 Joseph A. Buckwalter, MD, Iowa City, Iowa  
 Richard I. Burton, MD, Rochester, New York  
 G. Paul DeRosa, MD, Indianapolis, Indiana  
 David Drez, Jr., MD, Lake Charles, Louisiana  
 Donald C. Ferlic, MD, Denver, Colorado  
 Neil E. Green, MD, Nashville, Tennessee  
 Michael Simon, MD, Chicago, Illinois  
 James H. Van Olst, MD, Corvallis, Oregon

### Senior Directors

Michael W. Chapman, MD, Sacramento, California  
 Harold K. Dunn, MD, Salt Lake City, Utah  
 Robert B. Greer III, MD, Hershey, Pennsylvania  
 James H. Herndon, MD, Pittsburgh, Pennsylvania  
 Robert E. Leach, MD, Boston, Massachusetts  
 James R. Urbaniak, MD, Durham, North Carolina  
 Donald B. Kettelkamp, MD, Executive Director  
 Office of the Board  
 400 Silver Cedar Court  
 Chapel Hill, NC 27514

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Orthopaedic Surgery to ascertain whether the information below is current.)*

### Introduction

#### A. Definition

Orthopaedic surgery is the medical specialty that includes the preservation, investigation, and restoration of the form and function of the extremities, spine and associated structures by medical, surgical and physical methods.

#### B. Purpose

The American Board of Orthopaedic Surgery, Inc., was founded in 1934 as a private, voluntary, nonprofit, autonomous organization. It functions to serve the best interests of the public and of the medical profession by establishing educational standards for orthopaedic residents and evaluating the initial and continuing qualifications and competence of orthopaedic surgeons. For this purpose, the Board reviews the credentials and practices of voluntary candidates, conducts examinations for these candidates, and issues certificates as appropriate. It defines minimum educational requirements in the specialty, stimulates graduate medical education and continuing medical education, and aids in the evaluation of educational facilities.

The Board does not confer any rights on its diplomates, nor does it purport to direct licensed physicians in any way in the conduct of their professional duties. It is neither the intent nor the purpose of

the Board to define requirements for membership in any organization or on the staff of any hospital.

#### C. Directors

The directors of the American Board of Orthopaedic Surgery are elected from the diplomates of the Board who are nominated by the American Orthopaedic Association, the American Medical Association, and the American Academy of Orthopaedic Surgeons. They serve without salary.

#### D. Organization

Directors of the Board elect a president, president-elect, secretary, and treasurer annually. An executive director, who is a diplomate, serves as an ex-officio director of the Board. The president appoints directors to serve on standing committees on credentials, examinations, finance, graduate education, and research. Other committees may be formed as deemed necessary. The Board holds regularly scheduled meetings yearly.

#### E. Directory

A current directory of certified orthopaedic surgeons is maintained and published by the Board. The names of diplomates also appear in the *Compendium of Certified Medical Specialists* published by the American Board of Medical Specialties.

### General Statement of Educational Goal for Orthopaedic Surgery

The goal of orthopaedic education is to prepare orthopaedic residents to be competent and ethical practitioners of orthopaedic surgery. In fulfillment of this goal, applicants for certification must have received through their orthopaedic residency:

- A. Education in the entire field of orthopaedic surgery, including inpatient and outpatient diagnosis and care as well as operative and nonoperative management and rehabilitation.
- B. The opportunity to develop, through experience, the necessary cognitive, technical, interpersonal, teaching, and research skills.
- C. The opportunity to create new knowledge and to become skilled in the critical evaluation of information.
- D. Education in the recognition and management of basic medical and surgical problems.
- E. An evaluation of their ethical performance.

### Minimum Educational Requirements for Board Certification

The Board has established the following minimum educational requirements for certification. These requirements should not be interpreted as restricting programs to minimum standards. Throughout these rules, the term "accredited" means accredited by the Accreditation Council for Graduate Medical Education.

These educational requirements shall apply to all residents who began their first year of accredited orthopaedic surgery residency on or after January 1, 1985 with the following exception. Residents in programs providing only 3 years of orthopaedic education may receive credit for 2 years of accredited non-orthopaedic clinical education if they enter the orthopaedic program before January 1, 1989. This exception is available only to residents enrolled in a 3-year orthopaedic program which has specifically requested the Board to make its residents eligible for this exception and has presented the Board with a plan for implementing the 4-year program. The deadline for receiving such a plan was December 31, 1985. Residents entering orthopaedic residency programs structured for 4 or 5 years may receive credit for 1 but not 2 years of accredited non-orthopaedic clinical education.

#### A. Time Requirements

1. Five years (60 months) of accredited postdoctoral residency are required.

2. Four of these years (48 months) must be served in a program whose curriculum is determined by the director of an accredited orthopaedic surgery residency. Three of these years (36 months) must be served in an accredited orthopaedic surgery residency program and 1 year (12 months) may be served in an accredited graduate medical educational program whose educational content is determined by the director of an accredited orthopaedic surgery residency program.
3. Each program may develop individual sick and vacation times for the resident in accordance with overall institutional policy. However, one year of credit must include at least 46 weeks in full-time orthopaedic education; furthermore, vacation or leave time may not be accumulated to reduce the 5-year requirement.
4. Program directors may retain a resident in the educational program for as long as necessary beyond the minimum time specified so that the resident can achieve the necessary degree of competence in orthopaedic surgery. Currently, according to the Special Requirements of the Residency Review Committee for Orthopaedic Surgery, the committee must be notified of such retention. This information must also be provided to the Board on the record of residency assignments form.
- 5) Research: Orthopaedic education must include exposure to clinical and/or laboratory research.
- 6) Basic science: Orthopaedic education must include instruction in anatomy, biochemistry, biomaterials, biomechanics, microbiology, pathology, pharmacology, physiology, and other basic sciences related to orthopaedic surgery. The resident must have the opportunity to apply these basic sciences to all phases of orthopaedic surgery.
- 7) Options: Twelve months of the 4 years required to be under the direction of the orthopaedic surgery residency program director may be spent on services consisting partially or entirely of:
  - a) Additional experience in general adult or children's orthopaedics or fractures/trauma;
  - b) An orthopaedic clinical specialty;
  - c) Orthopaedically related research;
  - d) Experience in an accredited graduate medical educational program whose educational content is reviewed and approved by the director of the orthopaedic surgery residency program.

**B. Content Requirements**

**1. General Requirements**

A minimum of 9 months during the first year of graduate medical education must be broadly based on clinical services other than orthopaedics. This requirement may be fulfilled by a year of accredited residency in any broadly based program involving patient care.

**2. Orthopaedic Requirements**

a. The orthopaedic education must be broadly representative of the entire field of orthopaedic surgery. The distribution of educational experience must include a minimum of:

Adult orthopaedics—12 months

Fractures/trauma—12 months

Children's orthopaedics—6 months

Basic science and/or clinical specialties—6 months

Experience may be received in two or more subject areas concurrently. Concurrent or integrated programs may allocate time by proportion of experience.

b. Orthopaedic education must provide experience with all patient age groups, pertinent anatomic areas, acute and chronic care, related clinical subjects and basic science, and exposure to research.

1) Children's orthopaedics: The educational experience in children's orthopaedics must be obtained in an accredited position in the specific residency program in which the resident is enrolled or in a children's hospital in an assigned accredited residency position.

2) Anatomic areas: Orthopaedic education must include all aspects of diagnosis and care of disorders affecting the bones, joints, and soft tissues of the upper and lower extremities, including the hand and foot; the entire spine, specifically including intervertebral discs; and the bony pelvis.

3) Acute and chronic care: Orthopaedic education must include the diagnosis and care, both operative and nonoperative, of acute trauma (including athletic injuries), infectious disease, neurovascular impairment, and chronic orthopaedic problems including reconstructive surgery, neuromuscular disease, metabolic bone disease, benign and malignant tumors, and rehabilitation.

4) Related clinical subjects: Orthopaedic education must include musculoskeletal imaging procedures, use and interpretation of clinical laboratory tests, prosthetics, orthotics, physical modalities and exercises, and neurological and rheumatological disorders.

**C. Accreditation Requirements**

1. The educational experience in orthopaedic surgery obtained in the United States must be in programs accredited by the Residency Review Committee for Orthopaedic Surgery and by the Accreditation Council for Graduate Medical Education. All other clinical education obtained in the United States must be in programs accredited by the Accreditation Council for Graduate Medical Education and the appropriate Residency Review Committee for the category of education for which credit is sought. (The *Directory of Graduate Medical Education Programs* accredited by the Accreditation Council for Graduate Medical Education, published annually and obtainable from the American Medical Association, 515 North State Street, Chicago, IL 60610, lists accredited rotations of 6 months or longer.)
2. Within the 5 years of accredited residency, a total period of no more than 6 months may be served in unaccredited institutions.
3. Credit for time spent in residency education will be granted only for the period during which the residency program is accredited, and only for time served in an approved position within an accredited program.
4. If an orthopaedic residency program has its accreditation withdrawn by the Residency Review Committee for Orthopaedic Surgery and the Accreditation Council for Graduate Medical Education, no educational credit will be granted past the effective date of withdrawal of accreditation.
5. Educational credit may be granted for clinical experience in the military and/or public health services of the United States if the experience is accepted by the director of the orthopaedic surgery residency program that the applicant enters. Up to one month of credit may be granted for 2 months of clinical experience, not to exceed 12 months of credit, subject to approval by the committee on credentials. This approval should be sought prior to entry into the program.
6. Educational experience obtained in Canada must be on services approved by the Royal College of Physicians and Surgeons of Canada and must extend over a minimum of 5 years. The content requirements outlined in "B. Content Requirements" must be met.
7. The Board does not grant credit for foreign educational experience, other than as permitted in C.2 and C.6.
8. The term "fellow" is not synonymous with the term "resident" for the purpose of obtaining Board credit for educational experience. A resident is an individual enrolled in an approved position in an accredited educational program.

### D. Achievement Requirements

1. The director of the program providing general graduate medical education must certify the satisfactory completion of that segment of education.
2. In orthopaedic surgery residency programs, the program director must certify the satisfactory completion of each rotation for which credit is awarded. (See "F. Documentation Requirements.")
3. The program director responsible for the final year of the resident's education must certify that the resident has achieved a satisfactory level of competence and is qualified for the certifying process.
4. The certification referred to in 2. and 3. above must be made on the appropriate record of residency assignments form and must be countersigned by the resident.
5. Medical practice activity outside the residency must not be allowed to interfere with deriving maximum benefit from the educational experience. Residents may not engage in such activities without the specific prior approval of the program director; such approval must be based on the judgment of the director that rotations are being completed without compromise and that the circumstances of the resident warrant such activity.

### E. Continuity Requirements

The resident should have progressively increasing patient care responsibility. A part-time or piecemeal approach to residency requirements is discouraged. The final 24 months of orthopaedic residency education must be obtained in a single orthopaedic residency program unless prior approval of the committee on credentials is obtained.

### F. Documentation Requirements

1. For orthopaedic education obtained in the United States, the program director must provide the Board with *yearly* documentation during the residency. Each June, directors will receive two computer diskettes on which the required information will be recorded. The appropriate forms will be printed after the data has been entered. The forms will be signed by the program director and the resident, and the forms and diskettes will be returned to the Board office within 30 days of the end of the academic year.
2. Form 1 of the record of residency assignments must be submitted the year the resident enters the program. Form 1-A must be provided for residents receiving educational credit in a non-orthopaedic ACGME accredited program and for non-orthopaedic education taken within the ACGME accredited orthopaedic residency. Form 2-A must be completed yearly for each resident in the orthopaedic program and must detail the content and time spent on rotations, information on any unaccredited rotations and whether or not credit was granted for a full year. Form 3 is the final evaluation. The computer diskettes and printed, signed forms are due in the Board office within 30 days of completion of the academic year. It should be noted that Part I examination results of candidates who take the examination the year in which they complete their residency will not be mailed to the candidate or the program director until the diskettes and forms have been received in the Board office.
3. When a resident leaves a program prematurely, the program director must notify the Board office in writing within 30 days. The letter must record the reasons for leaving and confirm the rotations during the academic year in which the resident left for which credit is granted. At the end of the academic year in which the resident left, Form 2-A and form 3 information must be provided on the computer diskettes. Before a resident enters a new program, it is the responsibility of the new program director to obtain a copy of the resident's record of residency assignments forms from the Board office, to review them thoroughly, and to develop an appropriate program for the resident that will result in progressively increasing responsibility and will otherwise meet the minimum educational requirements.

## Requirements for Taking the Certifying Examination

The certifying examination is divided into two parts. Part I is a written examination which may be taken any time after the completion of the educational requirements. Part II is an oral examination which may be taken upon passing Part I, completion of the practice requirement, evaluation of the applicant's practice and determination of admission to the examination. A candidate must pass both parts of the certifying examination to be certified.

After taking and passing the written examination, candidates have 5 years to take or retake the oral examination. Candidates who do not pass the oral examination within those 5 years must retake and re-pass the written examination before applying to take the oral examination. Time spent in fellowship education after passing Part I will not count as a part of the 5-year time requirement.

An applicant desiring certification by the American Board of Orthopaedic Surgery must satisfy the educational requirements of the rules and procedures in effect when the applicant first enrolls in an accredited orthopaedic residency. An applicant must satisfy all other requirements in effect at the time of application.

### A. Educational Requirements

1. An applicant must satisfactorily complete and document the minimum educational requirements in effect when he/she first enrolls in an accredited orthopaedic residency.
2. Upon successful completion of 54 months of the 60 months of required education and upon the recommendation of the program director, a candidate may apply to take Part I of the examination.
3. In order to be admitted to the examination, the candidate must complete the full 60 months of required education.
4. An applicant who has received orthopaedic surgery residency education in Canada must have fulfilled the requirements of the American Board of Orthopaedic Surgery and must have passed the qualifying examination in orthopaedic surgery of the Royal College of Physicians and Surgeons of Canada before applying for either part of the examination of the American Board of Orthopaedic Surgery.

### B. License Requirements

Applicants who are in practice at the time they apply for Part I and all applicants for Part II must possess a full and unrestricted license to practice medicine in the United States or Canada, or be engaged in full-time practice in the United States federal government for which licensure is not required. An applicant will be rendered ineligible for any part of the certification examination by limitation, suspension, or termination of any right associated with the practice of medicine in any state, province, or country by reason of violation of a medical practice act or other statute or governmental regulation, disciplinary action by any medical licensing authority, or voluntary surrender while under investigation.

### C. Practice Requirements

1. An applicant must be continuously and actively engaged in the practice of operative orthopaedic surgery, other than as a resident or fellow (or equivalent), for at least 22 full months immediately prior to the Part II of the examination. An applicant who interrupts the 22 months of practice with a fellowship can count the months of practice that preceded the fellowship as a part of the 22-month requirement. An applicant must be in one practice location for a minimum of 12 consecutive months. A change in location, type of hospital practice, or practice association may result in deferral. The practice must be located in the United States or its territories, Canada, or a United States service installation. It must include hospital admitting and surgical privileges in effect at the time of application for the examination and at the time of examination. The applicant must demonstrate professional competence and adherence to acceptable ethical and professional standards.

The practice must allow independent decision-making in matters of patient care. A reduction, restriction, suspension, termination, or resignation at the request of a hospital of all or any portion of an applicant's surgical staff privileges, or pending action to do so, will normally result in a deferral until such action is finally resolved and the applicant's practice has stabilized sufficiently for it to be evaluated.

2. An applicant in the United States uniformed services may satisfy the practice requirement if the applicant has been assigned as an orthopaedic surgeon for at least 22 full months prior to the date of examination. The applicant must submit a letter from his/her immediate supervisor evaluating his/her capability in the practice of orthopaedic surgery, as well as such other documentation as the credentials committee may require to demonstrate professional competence and adherence to acceptable ethical and professional standards.

#### D. Evaluation of Applicant

1. Individuals who do not engage in traditional orthopaedic surgery cannot currently be adequately evaluated for the Part II examination and will not be certified.
2. Qualifications for taking Part II of the examination will be determined by the credentials committee after review of the application, letters of recommendation, and other relevant information.
3. It is the responsibility of the applicant to provide the information on which the credentials committee bases its evaluation of the qualifications of the applicant. This responsibility extends to information that the credentials committee requests from other persons. If the credentials committee does not receive requested information that it believes to be relevant to the qualifications of an applicant from the applicant, a program director, a reference, a hospital representative, or another source, the Board will notify the applicant and defer making a decision as to the admission of the applicant to the examination until the information is received.
4. Representatives of the Board may visit the site of an applicant's practice if the credentials committee believes that this is necessary for adequate evaluation of the work of the applicant.

#### E. Practice-Based Oral

1. The Part II examination is composed of a standardized examination and a practice-based examination. The purpose of the practice-based portion of the Part II examination is to evaluate a candidate's particular unique practice as broadly as possible. The Board will select fifteen cases from the candidate's 6-month case list from which the candidate will then select ten cases to bring to the examination for detailed presentation.
2. The examination will be conducted as much as rounds or conference might have been during residency. The candidate will be expected to present his/her cases as he/she might for a conference and will be expected to respond to the examiners' questions and comments as he/she would during such an exercise.
3. The following steps must be followed exactly in order for this process to work successfully:
  - a. The applicant is to collect *all* operative cases (including same-day surgery) for which he/she was the responsible operating surgeon, from each hospital and/or surgery center where he/she has practiced, for 6 consecutive months beginning July 1 of the year prior to the year of the Part II examination for which the applicant is applying. A separate list must be prepared for each hospital and/or surgery center. If time is taken off during those six months, a 2-week vacation, for example, that same length of time, prior to July 1, must be added to the collection period. Case information must include the patient's name or initials, unit or hospital number, sex, age, diagnosis, treatment, or surgical procedure, length of follow-up and outcome, including complications.

If you did no cases at any hospitals and/or surgery center where you practiced during the case collection period, this fact must be verified by a letter from the hospital. The letter(s) should be sent to the Board office along with the case lists as described in E.3.d. If you did no cases in one or more of the 10 categories at any hospital and/or surgery center where you practiced during the case collection period, and for which you are providing a case list, this information must be noted on the category sheet(s) and verified by the hospital and/or surgery center.

- b. The cases are to be grouped into the general categories defined on the forms provided by the Board and are to be recorded chronologically within each category. Use only these forms. A separate complete list containing a minimum of ten pages, one for each category, must be prepared for each hospital or surgery center. The information requested on the list should be typed. Regardless of how specialized or general an individual's practice may be, it should be possible for all candidates to use these general categories to group their surgical cases. The surgical categories are:

- 1) Incision: includes such procedures as arthrotomy with exploration, soft tissue biopsy, superficial abscess drainage, removal of calcific deposits, etc.
- 2) Excision: includes such procedures as synovectomy, meniscectomy, sequestrectomy, excision of tumors of bone and soft tissue, etc.
- 3) Introduction or removal: foreign body removal, injections of steroids, antibiotics, chymopapain, etc.
- 4) Repair, revision or reconstruction: includes arthroplasty, osteotomy, tenodesis, capsulorrhaphy; repair of nonunion with or without bone graft, etc.
- 5) Fracture and/or dislocation: includes open reduction and/or internal fixation of fractures and dislocations, closed reductions or fractures and dislocations, etc.
- 6) Manipulation: under anesthesia such as manipulation of a knee or shoulder, etc.
- 7) Arthrodesis: all techniques.
- 8) Amputation: any level.
- 9) Miscellaneous: any surgical procedure which does not fit into any of the categories listed.
- 10) Complications: systemic, such as pulmonary embolus, cardiac abnormalities, abdominal problems such as ileus, stress ulcer, etc., cerebrovascular accident, urinary difficulties, occurring in peri-operative period up to 6 weeks post-op. Local complications, such as wound infection, failure of fracture fixation, dislocation of a total joint arthroplasty, skin slough, compartment syndrome, neurologic impairment, and the like, related to a surgical procedure.

- c. The first page of each category for each case list must be certified by the hospital record administrator or director of medical records. It is imperative that all cases be listed, each under the single-most appropriate category. If no cases are reported for a category, indicate this on the category sheet, complete the certifications, and include it with the case list. The final list from each hospital or surgery center must include at least ten pages, one for each of the ten categories.

If a case listed on one of the first nine categories incurs a complication that must be listed in the tenth category, indicate that the case also appears in the complications category by making a notation in the "length of followup and outcome" column. Then list the complication in the tenth category.

Arthroscopic procedures that do not fit into categories one through eight should be listed in category nine.

- d. The applicant must send two copies of his/her complete case lists to the Board office by registered mail on or before January

31 of the year of the examination. Directors of the Board will select fifteen cases from which the candidate will pick ten cases to present in detail at the examination. A list of the fifteen cases selected will be sent to the candidates so that he/she can compile the information requested below on the ten cases that will be brought to the examination.

e. The candidate must bring to the examination:

- 1) *Three copies* of his/her complete case lists for each hospital and/or surgery center, regardless of whether or not a case has been selected from any given list; remember that these must be on the forms provided by the Board and that each list must contain a minimum of ten pages, one for each category. The cases that are brought to the examination should be circled or highlighted on the case list.
- 2) The pertinent pre-operative, intra-operative or immediate post-operative, and the most recent post-operative x-rays for each case that has been chosen. These pertinent x-rays should be arranged *in advance* in the order they are to be presented and should be clearly marked in terms of dates pre- and post-operative.
- 3) Copies of admission and discharge notes, operative notes, office notes, and any other documentation from the patients' charts that will aid in the presentation of the selected cases.
- 4) For arthroscopy cases selected for the examination, you must bring to the examination video prints or photographic prints that show the initial lesion or lesions and video prints or photographic prints that show the lesion or lesions after treatment.
- 5) For any case that you have selected to bring to the examination that is a complication, copies of pertinent consultations and x-rays that bear on the complication and its treatment.
- 6) The candidate must bring one copy of the above-requested documentation on the selected cases and three copies of all of the complete case lists and three copies of the list of the fifteen cases selected by the Board to the Part II examination. Failure to do so may result in a failure of the examination.

f. Although the examiners will be primarily interested in discussing cases brought for presentation, they may ask any questions pertaining to a candidate's case lists or practice. In addition, candidates should not be concerned if all the material brought to the exam is not covered by the examiners; the candidate and examiners may focus on one area or become involved in a few cases in such detail that time will not allow all cases to be covered. This will not penalize the candidate during the grading caucus following the examination.

4. Candidates who have questions about this process should call or write to the Board office well in advance of the exam. Failure to comply with the steps outlined may invalidate an examination.

## Impaired Physicians

### A. Chemical Dependency

Applicants who have a history of chemical dependency will not be admitted to either Part I or Part II of the certifying examination unless they present evidence from the appropriate agencies, hospitals, physicians, etc., that is satisfactory to the Board that they both (1) have satisfactorily completed the program of treatment prescribed for their condition and (2) have been drug-free for a period sufficient to indicate recovery, which period the Board will normally expect to be at least 3 years. This documentation must accompany the completed application form. The maintenance of any such applicant's certification may be conditioned on periodic drug testing. In addition, any such applicants for Part II of the examination may have a site visit of their practices by representatives of the Board as described in "Requirements for Taking the Certifying Examination," D.4.

### B. Mental and Physical Impairment

Applicants who have a mental or physical impairment which could affect their ability to practice orthopaedic surgery will not be admitted to either Part I or Part II of the certifying examination unless they present medical evidence from the appropriate physicians, treatment centers, hospitals, etc., that is satisfactory to the Board that the impairment does not compromise their ability to render safe and effective care to their patients. This documentation must accompany the completed applications form. In addition, any such applicants for Part II of the examination may have a site visit of their practices by representatives of the Board as described in "Requirements for Taking the Certifying Examination," D.4.

## Procedure for Application for Part I and Part II of the Certifying Examination

The dates and places for Part I and Part II of the certifying examination and deadlines for submission of applications and fees are announced in the *Journal of the American Medical Association* and the *Journal of Bone and Joint Surgery*. Examination dates may be changed at the discretion of the Board. Because of the journals' publication deadlines, confirmation of published examination dates can be obtained from the Board's office.

### A. Application Deadlines

1. Part I. A completed application for Part I of the certifying examination must be postmarked by registered mail on or before March 1 of the year of the examination. The application must be accompanied by a nonrefundable examination fee of \$650 and must be sent by registered mail.
2. Part II. A completed application for Part II of the certifying examination must be postmarked by registered mail on or before October 31 of the year preceding the examination. The application must be accompanied by a nonrefundable fee of \$750 and must be sent by registered mail.
3. Late or incomplete applications. Applications postmarked after the deadlines for Part I and Part II of the certifying examination and applications received incomplete will be returned to the applicant together with the fee check. If a Part I applicant wishes to resubmit the Part I application *by registered mail* postmarked on or before March 31, the nonrefundable examination fee of \$650 and a late fee of \$250 must be enclosed. If a Part II applicant wishes to resubmit the Part II application *by registered mail* postmarked on or before November 30, the nonrefundable application and credentialing fee of \$750 and a late fee of \$250 must be enclosed. No applications will be accepted after the final deadlines. Late fees are nonrefundable.
4. All applications are to be requested in writing.

### B. Notifying the Board of Application Changes

It is the responsibility of the applicant to notify the Board office of *any* change of address, practice association, or hospital affiliation. If an applicant changes practice location or practice association, or acquires new hospital staff affiliations, new references will be solicited by the Board for Part II applicants. An applicant is also required to notify the Board of any denial of any request for hospital privileges, of any action to restrict, suspend, or terminate all or any portion of the applicant's surgical staff privileges; or any request by a hospital to resign all or any portion of the applicant's surgical staff privileges, and of any action by a government agency which would result in the restriction, suspension, or probation of the applicant's license or any right associated with the practice of medicine.

### C. Notifying the Applicant of Examination Admission

1. Part I. The applicant will receive examination information, an assigned examination number and an admission card not later than 30 days prior to the examination date.

- Part II. The decision of the credentials committee is mailed to the applicant not later than 60 days prior to the examination date.

**D. Fees**

- Part I. The nonrefundable examination fee is \$650 and must be submitted with the application form.
- Part II. The nonrefundable application and credentialing fee is \$750 and must be submitted with the application form.
- Part II. The candidate must submit a fee of \$650 on or before the date specified in the letter of notification of admission to Part II of the examination. This fee will be forfeited if the candidate fails to appear for the examination or cancels after being scheduled.
- There will be a \$50 charge levied for any application or examination fee check that is returned not paid by the Board's bank.

Fees:

Part I Examination Fee—\$650

Part II Application and Credentialing Fee—\$750

Part II Examination Fee—\$650

Late Fee—\$250

Returned Check Service Charge—\$50

Fees must be sent by registered mail.

**E. Falsified Information and Irregular Behavior**

- If it is determined that an applicant has falsified information on the application form or failed to provide material information, the applicant will not be considered for either part of the examination not already passed and must wait for 3 years before being allowed to file a new application. The applicant will not be considered for admission to either part of the examination during this 3-year period.
- Examination applicants should understand that: (1) the giving or receiving of aid in the examination as evidenced either by observation or by statistical analysis of incorrect answers of one or more participants in the examination; or (2) the unauthorized possession, reproduction, or disclosure of any materials, including, but not limited to, examination questions or answers, before, during, or after the examination; or (3) the offering of any benefit to any agent of the Board in return for any right, privilege, or benefit which is not usually granted by the Board to other similarly situated candidates or persons may be sufficient cause to bar applicants from future examinations, to terminate participation in the examination, to invalidate the results of a candidate's examination, to withhold or revoke a candidate's scores or certificate, or to take other appropriate action.

Applicants should also understand that the Board may or may not require a candidate to retake one or more portions of the examination if presented with sufficient evidence that the security of the examination has been compromised, notwithstanding the absence of any evidence of a candidate's personal involvement in such activities.

**Credentials Decisions**

**A. Determining Admission to Examinations**

- The credentials committee meets at least once each year to consider applications for the examinations. At this meeting a decision will be made approving admission to the next examination or denying admission or the decision may be deferred for further evaluation.
- A decision approving admission to an examination applies only until the next available examination and does not carry over from one examination until the next. A new application is required for each examination.

**B. Deferral of Admission Decision**

A decision on an applicant's admission to either Part I or Part II of the examination may be deferred if information is insufficient for the credentials committee to make a judgment. Typically, the committee

will defer such a decision for 1 year to gather further information. If it still has insufficient information to make a judgment, the decision will be deferred for a second year to enable representatives of the Board to conduct a site visit as described in "Requirements for Taking the Certifying Examination," D.4. A deferral of not more than 2 consecutive years is not viewed by the Board as an adverse action; thus, no appeal from a decision of the credentials committee is permitted unless an applicant has either been denied admission or has been deferred for more than 2 consecutive years.

**C. Appeal of Admission Decision**

An applicant denied admission to the examination will be informed of the basis for such action and may request a hearing by an appeals committee of the American Board of Orthopaedic Surgery.

**Certification and Recredentialing by the American Board of Orthopaedic Surgery**

**A. Awarding Certificates**

The American Board of Orthopaedic Surgery awards a certificate to a candidate who specializes in orthopaedic surgery, has met the educational requirements of the Board, has demonstrated competence in orthopaedic surgery and adherence to ethical and professional standards, and has passed both parts of the certifying examination. Certificates issued after 1985 are valid for 10 years. This portion of the Board's responsibility is discharged by issuance of a certificate to an individual found qualified as of the date of certification.

**B. Certificate Revocation**

A certificate may be revoked prior to its expiration because of intentional and substantive misrepresentation to the Board with respect to the applicant's education and other requirements for admission to either part of the examination, or because of limitation, suspension, or termination of the right to practice medicine in any state, province, or country by reason of a violation of a medical practice act or other statute or governmental regulation, or disciplinary action by any medical licensing authority, or voluntary surrender while under investigation. Before a certificate is revoked, the diplomate will be informed of the basis of such action and will be afforded a hearing according to procedures formulated by the American Board of Orthopaedic Surgery.

**C. Certificate Reinstatement**

Should the circumstances that were considered in justification for revocation or surrender of the diplomate's certificate be corrected, the Board may reinstate the certificate after appropriate review of the individual's qualifications and performance, using the same standards as applied to other applicants for certification.

**D. Recredentialing Process**

The Board offers a recredentialing process to its diplomates. Diplomates are encouraged to undertake periodic recredentialing. Information about recredentialing can be obtained from the Secretary of the Board.

**Unsuccessful Candidates**

Unsuccessful Part I candidates may repeat the examination by submitting a new application form for the examination and again being found admissible.

Unsuccessful Part II candidates may repeat the examination by submitting a new application form for the examination and again being found admissible. Candidates who do not pass the Part II examination within 5 years of passing Part I must retake and re-pass the Part I examination before applying to take Part II.

## Appeals Procedure

1. An individual who has received an unfavorable ruling from a committee of the Board may appeal such determination by mailing a notice of appeal to the office of the American Board of Orthopaedic Surgery within 60 days of the date such ruling was mailed to him/her; except that decisions of the examinations committee that a candidate has failed either part of the certifying examination may be appealed only in the manner and to the extent provided in paragraphs 8 and 9.
2. Upon receipt of a notice of appeal, the concerned Board committee shall consider any information submitted therewith by the candidate in support of his/her appeal and make such further investigation appropriate to the appealing individual as it deems appropriate. If the committee then decides in a manner favorable to the individual, it shall so notify the individual. If the committee does not so determine, it shall notify the individual and the president of the American Board of Orthopaedic Surgery.
3. The individual shall then have the right to an appeal hearing to decide whether the determination of the concerned Board committee shall be confirmed, modified, or overruled in accordance with the hearing process described in this appeals procedure.
  - a. The president of the American Board of Orthopaedic Surgery shall appoint an ad hoc appeals committee consisting of three directors of the Board who did not participate in making the determination being appealed, one of whom shall be designated by the president as chairperson of the appeals committee.
  - b. In the event that the subject matter of the appeal involved complex issues of fact or issues not solely dependent upon medical, surgical, or professional standards, the president of the American Board of Orthopaedic Surgery, in his/her sole discretion, may appoint a hearing officer to conduct the appeal hearing and to submit a full written report and a recommended decision to the ad hoc appeals committee. The hearing officer appointed at the discretion of the president shall either be an impartial physician, lawyer, or other professional.
  - c. The chairperson of the appeals committee shall convene a hearing before the appeals committee or the hearing officer, if one is appointed, within a reasonable time after their respective appointments but not less than 60 days after the appointment of the appeals committee and the hearing officer, whichever is later.
4. Prior to the hearing:
  - a. The concerned Board committee shall provide the executive director with such written information concerning its decision as it deems appropriate, a list of the witnesses, if any, which it expects to call to testify, and copies of any written materials which the committee considered in making the determination appealed but only if it intends to present such materials at the hearing, and a list of information and documents which the individual is required to produce at the hearing. This material, together with a written notice stating the time and place of the hearing, shall be sent to the individual by the executive director not less than 30 days prior to the hearing. Not less than 7 days prior to the hearing, the concerned Board committee shall provide the executive director and the individual with copies of any written reports, affidavits or statements of experts which the concerned Board committee intends to present at the hearing.
  - b. The individual, not less than 7 days prior to the hearing, shall provide the executive director and the concerned Board committee with such written information concerning the individual's position as the individual deems appropriate, a list of witnesses, if any, which the individual expects to call to testify, and copies of any written reports, affidavits or statements of experts which the individual intends to present at the hearing.
  - c. The executive director shall submit the written material referred to in this paragraph 4 to the members of the appeals committee or to the hearing officer, if one has been appointed, prior to the hearing, provided that a copy of such material is submitted to the individual and the concerned Board committee no later than the time it is submitted to the appeals committee or the hearing officer.
5. The hearing, whether conducted before the appeals committee or a hearing officer, shall be a hearing de novo. The concerned Board committee and the individual shall have the right to present all relevant information and evidence in support of their respective positions and neither the concerned Board committee nor the individual shall be limited to the information and evidence considered by the concerned Board committee in making its original determination or its reconsideration of the original decision.
  - a. The concerned Board committee shall have the burden of proving at the hearing that the determinations being appealed should be confirmed. The standard of proof to be applied by the appeals committee and the hearing officer in deciding whether the information and evidence presented at the hearing is sufficient to warrant confirmation of the determination being appealed is by the preponderance or greater weight of the evidence.
  - b. At the hearing, the concerned Board committee, and its legal or other representatives, shall present such relevant information and evidence as it deems appropriate to support its previously made determinations, provided, however, that it shall not have the right to present any information or evidence if not previously provided as required under paragraph 4a, and may call, examine, and cross-examine witnesses.
  - c. The individual shall have the right to be represented at the hearing by legal counsel or any person of his/her choice, may present such relevant information and evidence as he/she deems appropriate in support of his/her position, provided, however, that the individual shall not have the right to present any information or evidence if not previously provided as required under paragraph 4b, and may call, examine, and cross-examine witnesses. The failure of the individual to produce information or documents requested by the concerned Board committee pursuant to paragraph 4a of this Article XI shall be grounds for upholding and confirming the determinations of the concerned Board committee.
  - d. The individual and the concerned Board committee may submit a written statement at the close of the hearing. A written record of the hearing shall be made available to the individual at one-half the cost of its preparation.
6. After conclusion of the hearing:
  - a. If the hearing has been conducted before a hearing officer appointed by the president, the hearing officer shall prepare a written report based upon the information and evidence presented which shall include the findings of fact determined by the hearing officer and a recommended decision as to whether the determinations being appealed should be confirmed, modified, or overruled. The hearing officer shall submit the written report to the appeals committee and send copies to the individual and the concerned Board committee. The individual and/or the concerned Board committee may file objections to the report and recommendation of the hearing officer with the appeals committee within 10 days after receipt of such report. The opposing party shall then have 10 days to file its response to such objections with the appeals committee.
  - b. If the hearing has been conducted before the appeals committee or upon its receipt of the written report and recommendations of the hearing officer and the objections and responses thereto filed by the parties, the appeals committee shall then make its decision. If a majority of the members of the appeals committee

determine, on the basis of the information and evidence presented to them, including, when applicable, the report and recommendations to the hearing officer, that the determination of the concerned Board committee should be confirmed or modified, it shall so declare, but if a majority determines that the concerned Board committee's determination should be overruled, it shall so declare. The appeals committee shall inform the individual and the concerned Board committee of its decision and the basis on which it is made in writing within a reasonable time following the hearing. The decision of the appeals committee with respect to the matter being appealed shall be final and binding.

7. A candidate who believes that the Part II examination was administered in an unfair or inaccurate manner or that one or more of his/her oral examiners was acquainted with him/her or was not impartial, may immediately, upon completion of the examination, request that he/she be reexamined. The request shall be made to the chairperson of the Oral Examination Subcommittee and reviewed by the president and the secretary. If, after discussing the matter with the candidate and making such other investigation as they may deem appropriate, a majority of the president, the secretary, and the chairperson of the Oral Examination Committee determine that reasonable grounds exist for the candidate's request, he/she shall be immediately reexamined by another panel of oral examiners. In such event, the first oral examination will be disregarded and only the candidate's performance on the reexamination shall be considered in determining his/her score on the examination.
8. A candidate who fails the Part I examination may request in writing that his/her examination be rescored by hand to certify the accuracy of the results as reported to him/her. Such a request is to be made within 60 days of his/her being notified of the results of the examination. The request must be accompanied by a check for \$50 payable to the American Board of Orthopaedic Surgery to cover the cost of the hand scoring. There shall be no further appeal from a failure on the Part I examination.

## American Board of Otolaryngology

Byron J. Bailey, MD, President, Galveston, Texas  
 M. Eugene Tardy, Jr., MD, Vice President, Chicago, Illinois  
 D. Thane R. Cody, MD, Treasurer, Jacksonville, Florida  
 Frank N. Ritter, MD, Past President, Ann Arbor, Michigan  
 Warren Y. Adkins, MD, Charleston, South Carolina

 David E. Schuller, MD, Columbus, Ohio  
 Neil O. Ward, MD, Phoenix, Arizona  
 Paul H. Ward, MD, Los Angeles, California  
 Robert W. Cantrell, MD, Executive Vice President  
 5615 Kirby Drive, Suite 936  
 Houston, TX 77005

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Otolaryngology to ascertain whether the information below is current.)*

### Examination Process

The American Board of Otolaryngology (ABO) certification process consists of two phases: a written examination and oral examination.

All candidates take a written (qualifying) examination which is offered in the fall of each year. Candidates who do not achieve the qualifying score are considered to have failed the examination. These individuals do not become certified, and are not eligible to take the oral examination. They may retake the written examination in a subsequent year.

Candidates who meet or exceed the qualifying score must then complete an oral examination, which is offered in the spring of each year. Candidates will be given up to three consecutive opportunities to take the oral examination. If a passing score is not achieved after three examination cycles, the candidate must reapply to take the written examination, and must again achieve the qualifying score in order to be permitted to retake the oral examination.

The written and oral examination score are not combined (i.e., a passing score must be achieved on each portion of the examination). Failure to successfully complete both the written and the oral examination constitutes failure of the examination.

### Certification

A certificate is granted by the American Board of Otolaryngology to a candidate who has met all the requirements and has satisfactorily passed its examination.

### Requirements for Examination

There is no required time interval between completion of the residency program and making application for examination. However, all residency training must be successfully completed before the date of the examination in any given year. Applications for the written examination in any given year become available January 2, and must be completed and returned by May 1 of that year.

The following qualifications are minimal requirements for examination by the American Board of Otolaryngology:

1. The applicant shall possess high moral, ethical and professional qualifications as determined by, and in the sole discretion of, the Board.
2. The applicant must be a graduate of a college of medicine or osteopathy.
3. The applicant must submit verification of a valid, nonrestricted medical license.
4. The applicant whose post-MD/DO training (accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada) began July 1, 1981 or thereafter must have satisfactorily completed a minimum of 5 years of residency training accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada. This training must include:
  - a. at least 1 year of general surgical training in a residency program accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada. It is preferred that the year or years of general surgical residency be taken prior to the otolaryngologic training, but it/they may not be taken following otolaryngologic training.
  - b. at least 3 years of residency training in otolaryngology accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada. The training in otolaryngology must involve increasing responsibility each year and must include a final year of senior experience. This final year must be spent within the accredited program in which the previous year of training was spent, unless prior approval is obtained from the ABO. The residency training must be completed in a manner acceptable

to the head of that residency program. A resident wishing to transfer from one residency program to another must notify in writing the ABO of the circumstances of the proposed transfer, and provide letters from the current and prospective directors of training outlining the reasons for the transfer and the acceptance of the resident by the prospective director of training. The letter from the current program director must be submitted to verify exact dates of training *successfully* completed in the program. A letter from the prospective program director must verify that sufficient residency positions, accredited by the Residency Review Committee for Otolaryngology, exist in the residency program to provide the transferring resident with the training necessary to meet the requirements of this Board for certification. The residency training must be completed in a manner acceptable to the head of that residency program.

- c. an *additional year* of residency training which may be in otolaryngology, general surgery or other residencies accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada. If this year of training is in other than otolaryngology, it must be taken prior to the final year of otolaryngology residency.

### Foreign Training

1. The applicant who has completed otolaryngologic training in the United Kingdom or the Republic of Ireland in a program accredited by the Specialist Advisory Committee, and who has received a certificate of accreditation in otolaryngology from the Joint Committee on Higher Surgical Training in the United Kingdom and the Republic of Ireland may be considered for examination.
2. The applicant who has completed otolaryngologic training under the New Zealand program after January 1, 1984 and has passed the examination leading to fellowship of the Royal Australasian College of Surgeons or who has completed training under the Australian program after January 1, 1986 and has passed the examination leading to fellowship of the Royal Australasian College of Surgeons may be considered for examination.

### Application for Examination

The applicant must submit the following:

1. Application, signed by the program director and another diplomate of the American Board of Otolaryngology. A current photograph, signed on the front, must be attached to the application. A duplicate photograph, also signed on the front, must be attached to a 5" x 8" card provided with the application.
2. Verification of otolaryngology residency form, signed by the program director, attesting to satisfactory completion of the training program.
3. Verification of surgical residency form, signed by the chief of surgery, attesting to satisfactory completion of the training program.
4. Verification of additional residency form, signed by the appropriate program director, attesting to satisfactory completion of the training program or internship.
5. Credentials questionnaire regarding practice privileges, licensure actions, etc.
6. Report of operative procedures, which lists procedures assisted in and performed by the candidate during otolaryngology residency.
7. Verification of all licenses to practice medicine showing non-restricted status and date of expiration. Individuals who have completed residency training but who will enter a fellowship program utilizing an institutional license must submit a statement from the program director as evidence of this fact. Individuals who have completed residency training but who will go on to practice medicine in a foreign country not requiring licensure must make a written request to be accepted for the examination without medical license. Such requests should be addressed to the executive vice president and submitted with the application.
8. Verification of medical degree.

Additional information may be requested by the Board from the following: local medical society, board certified otolaryngologists from the geographical area in which the applicant practices, the director of the applicant's training program, hospital chiefs of staff, and/or other individuals and entities who may have knowledge of the applicant's moral and ethical standing, qualifications or abilities.

Applications are approved by the Credentials Committee in June, and applicants are then notified if they have been approved for examination. The Board reserves the right to reject any application.

### Reapplication

Applications are valid for one written examination and three oral examinations. At the conclusion of said period or upon failure of the written examination, the application expires, and candidates are required to submit new forms.

### Fees

1. The fee for the written examination is \$1,400, subject to change at the discretion of the Board. For first-time applicants, \$700 must accompany the application and is not refundable. This fee must be paid in full by May 1 and no application will be processed until this fee is received by the Board office. The additional \$700 is due and payable upon notification of acceptance for examination and no part of this fee is refundable.
2. Individuals who become oral candidates (by achieving the qualifying score on the written examination) take their first oral examination at no additional cost. Candidates will be given 3 consecutive opportunities to take the oral examination. A fee of \$900 will be charged for the second and/or third oral examination.
3. If a passing score is not achieved after three examination cycles, the individual must reapply to take the written examination and \$1,400 must accompany the reapplication form. This fee must be paid in full by May 1 and is not refundable. No reapplication will be processed until this fee is received in the Board office. Individuals who again become oral candidates will follow the same procedure and be required to pay the same fees as outlined in paragraph 2 above.
4. All fees must be paid in US funds. Applicants residing outside the United States must submit payment in the form of an international money order.
5. A fee of \$200 will be charged for any application postmarked between May 1 and May 15. *No application will be accepted after May 15.* A fee of \$25 will be charged for any check returned by the bank for insufficient funds.

### Board Eligibility and Status Inquiries

The American Board of Otolaryngology does not recognize or use the term "board eligible." When a request is received regarding the status of a physician, the Board will only state whether he/she is or is not certified. The Board feels it is inappropriate to provide any additional information.

### Leaves of Absence

Leaves of absence and vacation may be granted to residents at the discretion of the program director in accordance with local rules. Within the 5 years of graduate medical education, the total of such leaves and vacation time may not exceed 6 weeks in any one year. If a longer leave of absence is granted in any year, the required period of graduate medical education may be extended accordingly.

### Applicants With Special Disabilities

The ABO offers examinations in a place and manner accessible to persons with disabilities, or offers alternative accessible arrangements for such individuals. Persons who wish to make arrangements for such accommodations should contact the Board office prior to May 1 of any given year.

## Purpose of Examination

The purpose of the examination is to determine the candidate's knowledge, skill and understanding in the following categories:

1. Morphology, physiology, pharmacology, pathology, microbiology, biochemistry, genetics and immunology relevant to the head and neck; the respiratory and upper alimentary systems; the communication sciences, including knowledge of audiology and speech-language pathology; the chemical senses and allergy, endocrinology and neurology as they relate to the head and neck.
2. Diagnosis and diagnostic methods including audiologic and vestibular assessments, electrophysiologic techniques and other related laboratory procedures for diseases and disorders of the ears, the respiratory and upper alimentary systems and the head and neck.
3. Therapeutic and diagnostic radiology, including the interpretation of medical imaging techniques relevant to the head and neck and thorax including the temporal bone, skull, nose, paranasal sinuses, salivary and thyroid glands, larynx, neck, lungs, and esophagus.
4. Diagnostic evaluation and management of congenital anomalies, allergy, trauma, and other diseases in the regions and systems mentioned above.
5. The cognitive management including operative intervention with its preoperative and postoperative care of congenital, inflammatory, endocrine, neoplastic, degenerative, and traumatic states, including:
  - a. Temporal bone surgery;
  - b. Paranasal sinus and nasal surgery;
  - c. Skull-base surgery;
  - d. Maxillofacial surgery including the orbits, jaws and facial skeleton;
  - e. Esthetic, plastic and reconstructive surgery of the face, head and neck;
  - f. Surgery of the thyroid, parathyroid, pituitary and salivary glands;
  - g. Head and neck reconstructive surgery relating to the restoration of form and function in congenital anomalies and head and neck trauma and associated with ablative operations;
  - h. Endoscopy, both diagnostic and therapeutic, and;
  - i. Surgery of the lymphatic tissues of the head and neck.
6. The habilitation and rehabilitation techniques and procedures pertaining to respiration, deglutition, chemoreception, balance, speech, and hearing.
7. The current literature, especially pertaining to the areas listed above.
8. Research methodology.

In order to assist directors of residency training programs in otolaryngology in evaluating their programs, the Board will report each applicant's examination results to the director of the program in which the applicant completed his/her senior resident year.

## Examination Procedure

The Board intends to vigorously enforce the highest standards of honesty and integrity in the examination and the entire certification process. Accordingly, (a) the giving or receiving of aid in the examination, (b) the unauthorized possession, reproduction, or disclosure of any material, including, but not limited to, examination questions or answers before, during, or after the examination, or (c) the offer of any financial or other benefit to any director, officer, employee, proctor, or other agent or representative of the Board in return for any right, privilege or benefit which is not usually granted by the Board to other similarly situated candidates or persons, may be sufficient cause for the Board to terminate an applicant's participation in the examination, to invalidate the results of the examination, to withhold an applicant's scores or certificate, to bar an applicant permanently from all future examinations, to revoke a certificate or to take other appropriate action.

During the course of the written examination, proctors will be circulating among the candidates to observe any irregularities. If there is a suspicion of any irregularity, a candidate may be moved to a more isolated area, or his/her participation in the examination may be terminated. Additionally, in any case of suspected irregularity, the Board's educational consultants may undertake statistical studies of a candidate's answers compared with the answers of other participants in the examination to provide evidence that would support or fail to support the suspected irregularities. If, in the opinion of the Board, there exists a probability that an irregularity has occurred, the Board will afford the suspected individual(s) procedural due process in order to assure fairness in the determination as to whether an irregularity has occurred. The Board will not, however, report scores or grant certification on the basis of scores which it has determined to be invalid.

## Certification, Rejection and Revocation (From the Bylaws, Article VI)

The Board shall issue an appropriate certificate of qualification in otolaryngology (or in a subdivision thereof) to those who show themselves worthy of such certification according to the requirements of training, experience and demonstrated competence as stated in the current ABO booklet of information.

No certificate shall be issued, and any certificate issued by the Board shall be subject to revocation at any time by the Board, if it shall determine that the person involved:

1. Did not possess the required qualification and requirements for examination, whether or not such deficiency was known to the Board or any member thereof, or could have been ascertained by the Board prior to examination or at the time of the issuance of a certificate as the case may be.
2. Made a material misstatement or withheld information in his/her application or any other representation to the Board or any Committee thereof, whether intentional or unintentional.
3. Has been convicted by a court of competent jurisdiction of any felony or misdemeanor involving moral turpitude and in the opinion of the Board, having a material relationship to the practice of medicine.
4. Had a license to practice medicine revoked or shall have been disciplined or censured by any court or other body having proper jurisdiction and authority because of any act or omission arising from the practice of medicine.

If the Board determines to withhold or revoke any certificate for any reason, the person affected thereby shall be given written notice of the reasons therefor. Such action by the Board shall be regarded as final unless such person requests a review of such action within 30 days after notice thereof has been mailed to him/her by the Board.

## American Board of Pathology

Frank B. Walker, MD, President, Grosse Pointe Farms, Michigan  
 Merle W. Delmer, MD, Treasurer, San Antonio, Texas  
 Barbara F. Atkinson, MD, Philadelphia, Pennsylvania  
 Ramzi S. Cotran, MD, Boston, Massachusetts  
 Frederick R. Davey, MD, Syracuse, New York  
 John D. Milam, MD, Houston, Texas  
 Howard M. Rawnsley, MD, Hanover, New Hampshire  
 Peter A. Ward, MD, Ann Arbor, Michigan  
 John A. Washington, MD, Cleveland, Ohio  
 William H. Hartmann, MD, Executive Vice President  
 Office of the American Board of Pathology  
 PO Box 25915  
 Tampa, FL 33622-5915

*(These criteria and conditions are subject to change without notice. The new certification requirements of the American Board of Pathol-*

ogy were not available at the time of this publication, please contact the Board for current requirements.)

## Qualification Requirements for Examination

All applications for certification are evaluated by the Credentials Committee of the American Board of Pathology (ABP). The evaluation process requires the consideration of:

- I. Professional Education
- II. Medical Licensure
- III. Pathology Training Requirements
  - A. Primary Certification
  - B. Special Qualification Certification
  - C. Added Qualification Certification
  - D. Combined Primary and Subspecialty Certification
- IV. Additional Credential Training/Experience Requirement

An applicant who has satisfactorily fulfilled these four requirements is declared qualified for examination by the Credentials Committee for a period not to exceed 3 years.

### I. Professional Education

A candidate must have graduated from a medical school in the United States or Canada accredited by the Liaison Committee on Medical Education, graduated from an osteopathic college of medicine accredited by the Bureau of Professional Education of the American Osteopathic Association, or graduated from a medical school in another country acceptable to the ABP.

Graduates of foreign medical schools must submit with their application a notarized copy of their medical school diploma showing the medical degree and the date that it was awarded. A certificate showing that the applicant has passed a final examination is *not* acceptable.

### II. Medical Licensure

The candidate must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in either the United States or Canada.

### III. Pathology Training Requirements

To acknowledge the diverse activities in the practice of pathology and to accommodate the interests of individuals wishing to enter the field, the ABP offers primary certification through one of the following three routes: combined anatomic and clinical pathology, anatomic pathology only, and clinical pathology only. A variety of special and added qualification certificates are offered for certified pathologists who wish to demonstrate expertise in one facet of anatomic or clinical pathology. Under certain circumstances, primary certification in anatomic or clinical pathology can be combined with one of the special or added qualifications.

Only pathology training taken in the United States or Canada is acceptable toward meeting the ABP requirements. The training must be in programs that have been inspected and accredited by the ACGME or specifically approved by the ABP.

#### A. Primary Certification

In addition to accredited pathology training, *all applicants* for primary certification must meet the credential training/experience requirements of 1 full year of clinical training, clinical experience, or clinically related research (see "Additional Credential Training/Experience Requirement").

1. Training. The candidate must satisfactorily complete pathology training in a program accredited by the ACGME outlined as follows.
  - a. Combined Anatomic and Clinical Pathology (AP/CP) Certification

Four full years of full-time, approved training in an accredited APCP-4 program that includes at least 18 months of formal training in anatomic pathology and 18 months of formal training in clinical pathology, *and either* an additional 12 months of full-time, continued formal (structured) training in anatomic and/or clinical pathology *or* 12 months of full-time approved flexible training in a specialty facet of pathology as part of the defined accredited APCP training program.

#### b. Anatomic Pathology (AP) Certification

- 1) Three full years of full-time, approved training in anatomic pathology in an accredited APCP-4 or AP-3 program that includes at least 24 months of formal training in anatomic pathology, *and either* an additional 12 months of full-time, continued formal (structured) training in anatomic pathology *or* 12 months of full-time approved flexible training in a specialty facet of pathology as part of the defined accredited training program.
- 2) Primary certification in clinical pathology and 2 full years of full time, approved training in anatomic pathology in an accredited APCP-4 or AP-3 program, with at least 18 months being formal (structured) training in anatomic pathology. Six months may be full-time approved training in a specialty facet of pathology as part of the defined accredited training program.

#### c. Clinical Pathology (CP) Certification

- 1) Three full years of full-time, approved training in clinical pathology in an accredited APCP-4 or CP-3 program that includes at least 24 months of formal training in clinical pathology, *and either* an additional 12 months of full-time, continued formal (structured) training in clinical pathology *or* 12 months of full-time approved flexible training in a specialty facet of pathology as part of the defined accredited training program.
  - 2) Primary certificate in anatomic pathology and 2 full years of full-time, approved training in clinical pathology in an accredited APCP-4 or CP-3 program, with at least 18 months being formal (structured) training in clinical pathology. Six months may be full-time approved training in a specialty facet of pathology as part of the defined accredited training program.
2. Experience. Only under exceptional circumstances will experience credit be given toward the pathology training requirements for primary certification. Two months of full-time practice experience in pathology acceptable to the ABP is equivalent to 1 month of accredited pathology training. The substitution of experience credit for a portion of accredited pathology training requires the assessment and *approval* of the director of the pathology training program to ensure that such will permit the continuation of an adequate broad experience of good quality in anatomic and/or clinical pathology.

Under certain circumstances, credit for extensive full-time practice experience in a country other than the United States or Canada may be granted toward the requirements for a primary certificate, provided that the candidate has had a total of eight years of full-time practice experience in pathology acceptable to the ABP with at least 4 years having been in the United States or Canada. For AP qualification, experience must have been in the actual practice of AP; for CP, in the actual practice of CP; and for combined AP/CP, 4 years in AP and 4 years in CP.

3. Advanced Pathology Training Credit Mechanisms for Primary Certification. Under special circumstances advanced credit will be given by the mechanisms described. The acceptance of advanced credits as substitutes for accredited pathology training toward primary certification is not automatic and is evaluated on an individual basis. Credit is given only for activities that have occurred in either the United States or Canada. The total combined period of

advanced pathology training credit allowed for sections a, b, c, and d will not exceed one year (12 months) and will be applied to the flexible year of required pathology training necessary for certification in APCP, AP, or CP.

*To avoid any misunderstanding, potential applicants should communicate with the office of the ABP early in the training period to ascertain if credit may be acceptable.*

The training program director will be asked to assess the proposal and to provide a recommendation as to the amount of credit that the director believes the candidate should receive.

The Board will notify the director of the pathology training program of such potential credit. Prior to admission to the certifying examination, the director of the final year of training must certify that the candidate is fully qualified to sit for the examination.

- a. Student fellowship training during medical school. Credit toward the pathology training requirements for primary certification may be granted for medical student fellowship training or research taken after the sophomore year in a department of pathology that has an accredited training program, provided that the candidate did not receive credit for such toward graduation from medical school, that the training was full-time and is validated by the director of the student fellowship program, and that it is approved as an acceptable experience by the director of the accredited pathology training program in which the candidate is registered. No credit is given for electives or for courses that are part of the medical school curriculum.
- b. Candidates holding a PhD degree in a special discipline of pathology or a basic science related to pathology may under certain circumstances obtain pathology training credit regardless of whether it was received before or after the medical degree. The evaluation and approval of the amount of training credit will depend on an assessment by the ABP regarding relevance of the subjects to anatomic or clinical pathology.
- c. Research with a direct application to the practice of anatomic or clinical pathology and not leading to an advanced degree may be considered for credit not to exceed 1 year (12 months) in combination with other advanced credits. The research must be full-time. No credit is given for research employment as a technician or technologist. The ABP encourages research and believes that all candidates should carry on investigation, teaching, and the publication of scientific papers during primary training.
- d. Criteria for acceptance of a year of postsophomore pathology fellowship toward pathology training requirements for certification. Under certain circumstances, candidates may receive advanced pathology training credit toward the primary certification requirements for postsophomore fellowship training in pathology. Such credit is not given toward the requirements for special or added qualification certification. The credit is assessed on an individual basis. Granted credit will be assigned to the flexible year of required primary training. Credit will not be given toward the required 18 months of formal (structured) anatomic pathology training or the required 18 months of formal (structured) clinical pathology training necessary to qualify for combined anatomic and clinical pathology certification.

Advanced credit toward single certification in anatomic pathology or single certification in clinical pathology will be given toward the flexible year of required pathology training and not toward the 24 months of required formal (structured) training.

The guidelines for acceptable postsophomore fellowship training for credit are:

- 1) Fellow must have fully and satisfactorily completed the sophomore year of medical school.
- 2) Fellow must not receive credit for fellowship activities toward the requirements for graduation from medical school.

- 3) Training must be full-time for a period not to exceed 12 months in a department of pathology that has a fully accredited pathology training program.
  - 4) Training must be under the direction of the director of the pathology training program or the chairman of the department of pathology.
  - 5) A description of proposed activities, responsibilities, and assignments for anatomic pathology, clinical pathology, and research must be available and on file prior to beginning of fellowship. If a formal institutional program exists, a copy should be filed with the ABP.
  - 6) A validation and evaluation report must be submitted on completion of the fellowship by the program director or chairman of the department of pathology if the fellow wishes credit toward certification requirements.
4. Additional training or experience—A candidate for primary certification who has completed the required pathology training 5 years or more prior to the date of submission of an application for examination must have either 1 year of additional training in pathology in a program accredited for such training by the ACGME or 2 full years of additional practice experience in pathology in the United States or Canada in a situation acceptable to the Board. This additional requirement must be met during the 5-year period immediately preceding the date of submission of an application.

### B. Special Qualification Certification

All candidates applying for special qualification certification must hold a primary certificate from the ABP or, where permissible, from another primary medical specialty board of the American Board of Medical Specialties (ABMS).

Credit is not given for pathology training taken outside of the United States and Canada. Also, credit is not given for training in areas of special qualification that was part of the training program leading to the requirements necessary to qualify to sit for the primary examination in AP and/or CP.

No advanced credit will be given toward the requirements for special qualification certification by the mechanisms described under "Advanced Pathology Training Credit Mechanisms."

1. Blood Banking/Transfusion Medicine (BB/TM)
  - a. Applicants who *hold* a certificate in anatomic and clinical pathology, clinical pathology only, or a primary certificate plus a special qualification certificate in hematology from another primary medical specialty board of ABMS:
    - 1) One full year of additional supervised training in blood banking/transfusion medicine in a program accredited for such training by the ACGME or approved for such training by ABP or
    - 2) Two additional years of full-time experience or its equivalence in blood banking/transfusion medicine under circumstances acceptable to the ABP.
  - b. Applicants, other than those described in 1a, who hold a primary certificate from a primary medical board of ABMS: *2 full years* of full-time training in blood banking/transfusion medicine in a program accredited for such training by the ACGME.
  - c. Applicants seeking *combined certification* in clinical pathology and blood banking/transfusion medicine (CP/BB/TM) see "Combined Primary and Subspecialty Certification."
2. Chemical Pathology (Chem P)
  - a. Applicants who *hold* a certificate in anatomic and clinical pathology or clinical pathology only:
    - 1) One full year of additional training in chemical pathology in a program accredited for such training by the ACGME or approved for such training by the ABP or

- 2) two additional years of full-time experience or its equivalence in chemical pathology under circumstances acceptable to the ABP.
- b. Applicants, other than those described in 2a, who hold a primary certificate from a primary medical specialty board of ABMS: 2 full years of full-time training in chemical pathology in a program accredited for such training by the ACGME.
- c. Applicants seeking *combined certification* in clinical pathology and chemical pathology (CP/Chem P) see "Combined Primary and Subspecialty Certification."
3. Dermatopathology (DP)
- Certification in dermatopathology is a joint and equal function of the American Board of Pathology (ABP) and the American Board of Dermatology (ABD). Such function relates to qualifications of candidates, standards of examinations, and the form of the certificate.
- All candidates applying for examination must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in either the United States or Canada.
- a. Prerequisites
- The American Boards of Pathology and Dermatology will admit candidates to examination for certificates of special qualification in dermatopathology who are otherwise qualified and who have met one of the following requirements:
- 1) Applicants who are diplomates of both the ABP and the ABD.
  - 2) Applicants already holding a primary certificate from the ABP (anatomic pathology, or combined anatomic and clinical pathology) or the ABD and the addition of at least 1 year of training in dermatopathology in a program accredited for such training by the ACGME. This additional training must be taken after the candidate has met the *full* training requirements for certification in pathology or dermatology.
- b. Training
- Training programs in dermatopathology are a joint and equal function of the departments of pathology and dermatology. The pathologist applicant must spend one-half of the required training time in clinical dermatology.
- Committee for Dermatopathology:*  
 Ronald J. Barr, MD, Orange, California  
 Merle W. Delmer, MD, San Antonio, Texas  
 Mark Allen Everett, MD, Oklahoma City, Oklahoma  
 Thomas J. Gill III, MD, Pittsburgh, Pennsylvania  
 Loren E. Golitz, MD, Denver, Colorado
- Candidates may obtain an application as follows:
- Pathologists—*  
 William H. Hartmann, MD  
 Executive Vice President  
 American Board of Pathology  
 PO Box 25915  
 Tampa, FL 33622
- Dermatologists—*  
 Clarence S. Livingood, MD  
 Executive Director  
 The American Board of Dermatology, Inc.  
 Henry Ford Hospital  
 2799 West Grand Boulevard  
 Detroit, MI 48202
4. Forensic Pathology (FP)
- a. Applicants who *hold* a certificate in anatomic and clinical pathology, anatomic pathology only, or in special instances, clinical pathology only:
- 1) One full year of additional supervised training in forensic pathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
- 2) Two additional years of full-time experience in forensic pathology or its equivalence in a situation comparable to that of a program accredited for such training by the ACGME.
- b. Applicants seeking *combined certification* in anatomic pathology and forensic pathology (AP/FP) see "Combined Primary and Subspecialty Certification."
5. Hematology (HEM)
- a. Applicants who *hold* a certificate in anatomic and clinical pathology, clinical pathology only, or a primary certificate plus a special qualification certificate in hematology from another primary medical specialty medical board of ABMS:
- 1) One full year of additional supervised training in hematology (pathology) in a program accredited for such training by the ACGME or approved for such training by the ABP or
  - 2) Two additional years of full-time experience or its equivalence in clinical laboratory hematology under circumstances acceptable to the ABP.
- b. Applicants, other than those described in 5a, who hold a primary certificate from a primary medical specialty board of ABMS: 2 full years of full-time training in hematology (pathology) in a program accredited for such training by the ACGME.
- c. Applicants seeking *combined certification* in clinical or anatomic pathology and hematology (CP/HEM, AP/HEM) see "Combined Primary and Subspecialty Certification."
6. Immunopathology (IP)
- a. Applicants who *hold* a certificate in anatomic and clinical pathology:
- 1) One full year of additional supervised training in immunopathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
  - 2) two additional years of full-time experience in immunopathology or its equivalence under circumstances acceptable to the ABP.
- b. Applicants who *hold* a certificate in anatomic pathology only or clinical pathology only:
- 1) Two full years of additional supervised training in immunopathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
  - 2) Four additional years of full-time experience in immunopathology or its equivalence under circumstances acceptable to the ABP.
- c. Applicants who hold a certificate in anatomic pathology only or clinical pathology only *plus* a certificate of special qualification in blood banking/transfusion medicine, hematology, medical microbiology, or chemical pathology:
- 1) One full year of additional supervised training in immunopathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
  - 2) two additional years of full-time experience in immunopathology or its equivalence under circumstances acceptable to the ABP.
- d. Applicants seeking *combined certification* in anatomic pathology or clinical pathology and immunopathology (AP/IP, CP/IP), see "Combined Primary and Subspecialty Certification."
7. Medical Microbiology (MMB)
- a. Applicants who *hold* a certificate in anatomic and clinical pathology, clinical pathology only, or a primary certificate plus a special qualification certificate in infectious disease from another primary specialty medical board of ABMS:
- 1) One full year of additional training in medical microbiology in a program accredited for such training by the ACGME or approved for such training by the ABP or

- 2) Two additional years of full-time experience or its equivalence in clinical laboratory medical microbiology or its equivalence under circumstances acceptable to the ABP.
  - b. Applicants, other than those described in 7a, who hold a primary certificate from a primary specialty medical board of ABMS: 2 full years of full-time training in medical microbiology in a program accredited for such training by the ACGME.
  - c. Applicants seeking *combined certification* in clinical pathology and medical microbiology (CP/MMB) see "Combined Primary and Subspecialty Certification."
8. Neuropathology (NP)
- a. Applicants who *hold* a certificate in anatomic and clinical pathology or anatomic pathology only: 2 full years of additional supervised training in neuropathology in a program accredited for such training by the ACGME or approved for such training by the ABP.
  - b. Applicants who *hold* a certificate in clinical pathology or a primary certificate from another primary medical specialty board of ABMS:
    - 1) One full year of approved training in anatomic pathology in a program accredited for such training by the ACGME or approved for such training by the ABP plus
    - 2) two full years of additional supervised training in neuropathology in a program accredited for such training by the ACGME or approved for such training by the ABP.
  - c. Applicants seeking *combined certification* in anatomic pathology and neuropathology (AP/NP), see "Combined Primary and Subspecialty Certification."
9. Pediatric Pathology (PP)
- a. Applicants who *hold* a certificate in anatomic and clinical pathology or anatomic pathology only from the ABP or anatomic pathology or general pathology from the Royal College of Physicians and Surgeons of Canada:
    - 1) Two full years of additional supervised training in pediatric pathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
    - 2) four additional years of full-time practice experience in pediatric pathology or its equivalence in a situation offering experience opportunities comparable to those of an accredited or approved training program in pediatric pathology and acceptable to the ABP.
  - b. The pediatric pathology training or experience should occur after the completion of the full training requirements necessary to qualify for certification in APCP or AP.
10. Cytopathology (CYP)
- a. Applicants who *hold* a certificate in anatomic pathology or combined anatomic and clinical pathology:
    - 1) One full year of full-time supervised training in cytopathology in a program accredited for such training by the ACGME or approved for such training by the ABP or
    - 2) two years of full-time experience in cytopathology or its equivalence under circumstances acceptable to the ABP.
  - b. Applicants seeking *combined certification* in anatomic pathology and cytopathology (AP/CYP), see "Combined Primary and Subspecialty Certification."

**C. Added Qualification Certification**

All candidates applying for added qualification certification must hold a primary certificate from the ABP.

Credit is not given for training outside of the United States and Canada. Also, credit is not given for training in an area of added qualification that was part of the training program leading to the requirements necessary to qualify to sit for the primary examination in AP or AP/CP.

No advanced credit will be given toward the requirements for added qualification certification by the mechanisms described in "Advanced Pathology Training Credit Mechanisms."

**D. Combined Primary and Subspecialty Certification**

Under certain circumstances special qualification or added qualification training may be arranged in conjunction with the primary training requirements, permitting a candidate to qualify for a combined certificate. All applicants for combined certification in 1990 and thereafter must also meet the additional credential training/experience requirement of 1 full year of clinical training, clinical experience, or clinically related research. (See "Additional Credential Training/Experience Requirement.")

Advanced credit will not be given toward the requirements for combined certificates (involving primary training and special or added qualification training) by the mechanisms described in "Advanced Pathology Training Credit Mechanisms."

The *acceptable combinations* of certification and the required training are:

1. Anatomic pathology and forensic pathology (AP/FP)—two full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and 1 full year of approved training in forensic pathology in a program accredited for such training by the ACGME and 1 additional year of approved training in anatomic pathology or in one of the specialty areas of pathology such as neuropathology, toxicology, or chemical pathology.
2. Anatomic pathology and neuropathology (AP/NP)—two full years of approved training in anatomic pathology and 2 full years of approved training in neuropathology in a program accredited for such training by the ACGME with adequate experience in diagnostic neuropathology.
3. Anatomic pathology and hematology (AP/HEM)—two full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and 2 full years of approved training in hematology in a program accredited for such training by the ACGME with adequate training or experience in the clinical pathology aspects of hematology.
4. Anatomic pathology and immunopathology (AP/IP)—two full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and 2 full years of approved training in immunopathology in a program accredited for such training by the ACGME.
5. Clinical pathology (CP) plus special qualification—three full years of approved training in clinical pathology in a program accredited for such training by the ACGME plus 1 full year of approved special qualification training in blood banking/transfusion medicine, chemical pathology, hematology, or medical microbiology in a program accredited for such training by the ACGME as defined in "Special Qualification Certification"; or  
Two full years of approved training in clinical pathology plus 2 full years of approved special qualification training in blood banking/transfusion medicine, chemical pathology, hematology, immunopathology, or medical microbiology in a program accredited for such training by the ACGME as defined in "Special Qualification Certification."
6. Anatomic pathology and cytopathology (AP/CYP)—three full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and 1 full year of approved training in cytopathology in a program accredited for such training by the ACGME or approved for such training by the ABP.

**IV. Additional Credential Training/Experience Requirement**

The requirement of 1 full year of clinical training, experience, or clinically related research is in addition to the required pathology train-

ing in an accredited program. It must be taken after having obtained the medical degree.

The ABP considers the most appropriate and, for applicants, the most beneficial approach to meeting this requirement to be 1 full year of full-time, approved clinical training in the United States or Canada (Pathway A). The Board recognizes that such is not always possible and thus offers alternate pathways to meeting the requirement. The requirement can be met by:

- A. One full year of full-time, approved graduate medical education in a transitional year training program; or in a clinical area of medicine such as internal medicine, surgery, obstetrics and gynecology, pediatrics, emergency medicine, or family practice; *or*
- B. One year of full-time research in pathology or in another clinical discipline providing that the research was done in the United States or Canada and has clearly defined clinical implications. The guidelines for acceptance of research activity are:
  1. Research activity must have taken place after the candidate has obtained a recognized medical degree.
  2. The research must involve patients directly, or materials obtained from patients, or techniques that can be applied directly to the diagnosis of human disease or to the understanding of the basic mechanisms of disease.
  3. Prospective approval of a research program for credentialing credit must be given by the director of the pathology training program.
  4. Credit for research activity prior to entering a pathology training program must be approved by the director of the pathology training program *and* the ABP. Such research must have occurred in an institution in the United States or Canada; *or*
- C. One year of training in one of the recognized specialty fields of pathology that includes clinical correlation and patient contact. (This year cannot be used to meet the requirements both for clinical training and for special or added qualification certification.); *or*
- D. The satisfactory completion of 1 full year of a combination of clinical training, clinical experience, clinical research, or subspecialty pathology training in addition to the required pathology training necessary to qualify for certification in anatomic and clinical pathology, anatomic pathology, or clinical pathology. The training director is responsible for defining and justifying this year of clinical activity to the ABP. In meeting the credential clinical requirement by combinations of pathways A, B, C, the ABP recommends that the periods of activity be at least 4 months in duration wherever possible.
 

Under certain circumstances, credit toward the clinical credential year may be given if the applicant holds a primary certificate in pathology issued by the independent national certifying body in a country other than the United States or Canada and providing that the certification was by national examination following 4 full years of approved training in pathology.

### Clinical Training Outside the United States and Canada

Under certain circumstances, clinical training taken in countries other than the United States and Canada may be acceptable toward meeting the ABP credential requirement of clinical training providing that the following criteria are fully met and validated:

1. The clinical training was taken after obtaining the medical degree acceptable to the ABP.
2. Satisfactory completion of 1 full year of full-time training in clinical medicine in a multidisciplinary training program (internship) or in a training program in internal medicine, pediatric medicine, general surgery, or obstetrics and gynecology.
3. Proof from the training institution that the program in question has been inspected and approved for graduate medical education.

4. Indication from the director of the training program that the candidate was registered in the program, completed the training satisfactorily, and was the physician of record in the diagnosis and treatment of patients throughout the full 12 months.
5. Recommendation from the pathology program director in regard to the person's request.

The acceptability of clinical training toward meeting the ABP requirements is assessed on an individual basis, and it is imperative that an opinion be obtained from the ABP well in advance of the submission of an application for certification. The amount of advanced credit for clinical training outside of the United States and Canada toward the ABP requirements for certification cannot exceed a total of 12 months.

It is the responsibility of the person seeking credit to ensure that all validating items for these criteria are submitted to the ABP for consideration. No assessment of possible credit will be given until all validating and reference information has been received.

### Application for Examination

Requests for application forms must be made in writing to the office of the ABP. Completed forms should be returned with the required credentials and the application-examination fee. An application cannot be given consideration unless it is accompanied by the application-examination fee.

### Fees

The application-examination fee schedule for 1992 is as follows:

- Anatomic pathology only—\$900
- Clinical pathology only—\$900
- Anatomic pathology portion of combined AP/CP—\$900
- Clinical pathology portion of combined AP/CP—\$900
- Combined anatomic and clinical pathology—\$1000
- Special qualification—\$1000
- Added qualification—\$1000

Anatomic or clinical pathology combined with special qualification or added qualification (both parts taken at one sitting)—\$1200

The application-examination fee includes a nonrefundable processing fee of \$100. If the different divisions of the AP/CP and the combined primary and special or added qualification examinations are taken at separate sittings, there is a separate examination fee for each sitting. If the candidate fails in the examination, admission to a repeat examination is permitted, but any reexamination must occur within the 3-year period of qualification described under "Qualification Period for Examination." The applicant must pay the examination fee according to the current fee schedule before another examination will be given. If, after having applied for a specific examination, the candidate requests a transfer to a future examination prior to the final filing date, there is a transfer fee of \$100.

In the event of the candidate's illness at the time of the examination, validated by the candidate's attending physician, a major portion of the application-examination fee will be either transferred to the next examination or refunded.

### Vacation, Maternity, and Other Leave

Each program may develop individual sick, vacation, and other leave policies for the resident. However, 1 year of approved training credit toward ABP certification requirements must be 52 weeks in duration and must include at least 48 weeks of full-time pathology training. Furthermore, unused vacation and other leave time may not be accumulated to reduce the overall duration of training.

### Irregular Behavior

In the interest of protecting the integrity of the ABP and its certification examinations, the following irregular behaviors may be sufficient to bar a person from future examinations, to terminate one's participation in the examination, to invalidate the results of one's examina-

tion, to cause the withholding or revocation of one's scores or certificate, or to merit other appropriate action by the Board:

1. The giving or receiving of aid in the examination as evidenced either by observation or by statistical analysis of candidates' answers;
2. The unauthorized possession, reproduction, or disclosure of any ABP examination-related materials, including, but not limited to, examination questions or answers, before, during, or after the examination; and/or
3. The offering of any benefit to any agent of the Board in return for any right, privilege, or benefit that is not usually granted by the Board to other similarly situated candidates or persons.

In addition, the Board may withhold a candidate's scores and require that the candidate retake one or more portions of the examination if presented with sufficient evidence that the security of the examination has been compromised, notwithstanding the absence of any evidence of the candidate's personal involvement in such activities.

### Chemical Dependency

Applications for certification from persons who have had a history of chemical dependency as reported to the Board will *not* be accepted unless the applicant submits documented evidence acceptable to the Board that the disease is known to be under control for 5 years from the time of its most recent occurrence.

Candidates who have been declared qualified to sit for a certifying examination and who have a current problem of chemical dependency as reported to the Board will not be admitted to examination. Denial of admission to examination may result in the loss of opportunities for examination and, ultimately, in the decision to declare the candidate's application void for failure to complete the requirements for certification within the qualification time period allotted to every candidate.

### Qualification Period for Examination

The ABP does not recognize or use the term "Board eligible" and does not issue statements concerning "Board eligibility." An applicant is declared qualified for examination only after a formal application has been received and approved by the Credentials Committee.

The ABP will permit a candidate who has qualified for examination on the basis of approved training and/or experience to sit for examination during a period not to exceed 3 years after being declared qualified to take the examination. When this period has expired, additional periods of qualification for examination will be permitted upon submission of documented evidence that the candidate has obtained further training or experience subsequent to the termination of the period of qualification. This must be in the form of an additional year of approved training in an accredited program or 2 years of experience acceptable to the ABP. The additional training or experience must be in the area of pathology in which the candidate was unsuccessful.

At any time after declaring a candidate qualified for examination, the Credentials Committee, at its discretion, may withdraw such qualification or, as a condition, may require satisfaction by the candidate of specified conditions. In the exercise of its discretion under this regulation, the Credentials Committee shall be entitled to act without reason assigned.

If it is determined that an applicant has falsified information in the application form, the applicant will not be approved for the certifying examination and must wait a period of three years before being permitted to file a new application. The applicant will not be considered qualified to sit for the certifying examination during the 3-year interim.

### Examination Dates and Sites

Examinations are held at the discretion of the Board. The tentative schedules for forthcoming examinations are:

#### *Anatomic and Clinical Pathology Examinations*

June 1, 2, 3, 1993—Chicago, Illinois

November 1, 2, 3, 1993—Dallas, Texas

June 1, 2, 3, 1994—Columbus, Ohio

November 14, 15, 16, 1994—San Diego, California

#### *Examinations for Special and Added Qualification*

The examinations for special qualification in chemical pathology, medical microbiology, and immunopathology will be given every 2 years beginning after the 1991 examination. Examinations in these areas will be given in 1993 and every other year thereafter.

May 31, 1993—Chicago, Illinois

BB/TM, CHEM P, FP, HEM, IP, MMB, NP, PP, CYP

May 31, 1994—Columbus, Ohio

BB/TM, FP, HEM, NP, PP, CYP

#### *Dermatopathology Examination*

The dermatopathology examination is scheduled separately at a time and place mutually agreed upon by the American Board of Pathology and the American Board of Dermatology.

The examination in dermatopathology will be given every two years beginning after the 1991 examination. An examination will be given in 1993 and every other year thereafter.

November 4, 1993—Dallas, Texas

### Final Filing and Cut-off Dates

The final filing dates for receipt of applications or registrations are as follows:

February 1 for spring examinations

August 1 for fall examinations

If the candidate cancels an appearance for the examination after these dates or does not appear for the examination, the entire application-examination fee is forfeited.

### Issuance of Certificate

Upon satisfactorily passing the appropriate examination(s), a candidate will be issued a certificate by the ABP in those fields of pathology for which the ABP accepted the credentials. Thus, a candidate who is qualified for the combined examination in anatomic and clinical pathology, having fulfilled the minimum pathology requirement of 48 months and the credential clinical requirement of 12 months will receive a certificate only after both parts (anatomic and clinical pathology) of the examination have been passed.

Candidates qualified for examination in anatomic or clinical pathology and a specialty area of pathology, and claiming qualification on the basis of the required training in each area will receive a certificate only after each of the examinations has been passed.

A candidate who has fulfilled all the prerequisites, including the minimal requirement of 36 months of approved training in anatomic pathology only or clinical pathology only, plus the 12 credential months of activity, will receive a certificate after passing the examination in anatomic pathology or in clinical pathology.

If a candidate's certificate is lost or destroyed, the ABP will issue a duplicate certificate upon written request and justification, together with the necessary engraving and handling charge of \$50.

### Revocation of Certificate

In its discretion, the ABP may revoke a certificate for due cause, including, but not limited to, the following causes:

- a. The diplomate did not possess the required qualifications and requirements for examination whether or not such deficiency was known to the ABP or any committee thereof prior to examination or at the time of the issuance of the certificate as the case may be;
- b. The diplomate made a material misstatement or withheld information in his application or in any other representation to the ABP or any committee thereof, whether intentional or unintentional;
- c. The diplomate engaged in irregular behavior in connection with an examination of the ABP (as described under "Irregular Behav-

- ior"), whether or not such practices had an effect on the performance of the candidate on an examination;
- d. The diplomate was convicted by a court of competent jurisdiction of any felony or misdemeanor involving moral turpitude and, in the opinion of the ABP, having a material relationship to the practice of medicine; or
  - e. There has been a limitation or termination of any right of the diplomate associated with the practice of medicine in any state, province, or country, including the imposition of any requirement of surveillance, supervision, or review by reason of violation of a medical practice act or other statute or governmental regulation, disciplinary action by any medical licensing authority, entry into a consent order, or voluntary surrender of license.

Revocation of certificates shall be governed by procedures set forth in the ABP bylaws as amended from time to time.

### Limitation of Number of Certificates of Special Qualification (Competence)

As a condition of admission to an examination for special qualification in pathology, an individual holding two or more certificates of special competence and/or special qualification shall surrender a sufficient number of certificates to reduce their number to one. In the event that the individual fails the examination, the surrendered certificate(s) shall be restored. This action does not include certificates of special competence (qualification) in radioisotopic pathology and in dermatopathology.

### Update of ABP Certificate

The ABP will permit diplomates of the Board to retake the examination in the area of pathology in which they are already certified for the purpose of updating their certificate(s). The application-examination fee and the passing requirements are the same as for initial candidates. Successful candidates will be issued new, currently dated certificates.

### Candidates With Disabilities

1. **Policy.** The American Board of Pathology supports the intent of the Americans with Disabilities Act. The Board will endeavor to provide qualified Board candidates who have documented disabilities the necessary auxiliary aids and services that do not fundamentally alter the measurement of the skills or knowledge the Board examination is intended to test or result in an undue burden.
2. **Documentation of Disability.** Board candidates requesting an accommodation due to a disability must provide documentation of the disability. Such documentation should include a specific diagnosis of the disability and include medical records or other documentation of the diagnosis of the disability by an appropriate medical professional. The American Board of Pathology reserves the right to verify the disability and to request additional documentation as necessary. All required documentation acceptable to the Board must be received in the Board office no later than the application deadline.
3. **Type of Accommodation.** Board candidates requesting an accommodation must identify the type of accommodation requested. The Board, however, will determine the type of accommodation to be made for a candidate with a verified disability. Accommodations which fundamentally alter the measurement of skills or knowledge which the examination is intended to test will not be offered.
4. **Application Deadline.** Candidates requesting accommodations are urged to contact the Board as far in advance of the examination as possible. Requests for accommodation and documentation of disability must be received no later than the application deadline.

### Appeals Procedure

An individual who has received an unfavorable ruling regarding qualification to take the examination may initiate an appeal of such deter-

mination by making a written request for reconsideration to the ABP office within 90 days of the date such ruling was mailed.

A candidate who fails a certifying examination may request that the examination be rescored to verify the accuracy of the results as reported. Such request must be made in writing within 90 days of the date of mailing of the results of the examination to the candidate and must be accompanied by the fee of \$50 per certifying examination or part thereof. There shall be no further appeal from failure of an examination.

## American Board of Pediatrics

Patrick L. Jasper, MD, Chairman, Somerset, Kentucky  
 Thomas F. Boat, MD, Chairman-Elect, Chapel Hill, North Carolina  
 Robert P. Kelch, MD, Secretary-Treasurer, Ann Arbor, Michigan  
 Herbert T. Abelson, MD, Seattle, Washington  
 William F. Balistreri, MD, Cincinnati, Ohio  
 Catherine DeAngelis, MD, Baltimore, Maryland  
 Avroy A. Fanaroff, MB, BCh, Cleveland, Ohio  
 Iris F. Litt, MD, Stanford, California  
 William L. London, MD, Durham, North Carolina  
 Warren W. Quillian II, MD, Coral Gables, Florida  
 Thomas L.W. Roe, MD, Eugene, Oregon  
 Sara Rosenbaum, JD, Washington, District of Columbia  
 Jimmy L. Simon, MD, Winston-Salem, North Carolina  
 Walter W. Tunnessen, Jr., MD, Philadelphia, Pennsylvania  
 Roberta G. Williams, MD, Los Angeles, California  
 James A. Stockman III, MD, President  
 111 Silver Cedar Court  
 Chapel Hill, NC 27514-1651

Thomas K. Oliver, Jr., MD, Senior Vice President, Chapel Hill, North Carolina  
 Diane W. Butzin, Vice President, Chapel Hill, North Carolina  
 Robert O. Guerin, PhD, Vice President, Chapel Hill, North Carolina  
 Fred G. Smith, Jr., MD, Vice President, Chapel Hill, North Carolina

*(These criteria are subject to change. All applicants are advised to consult the American Board of Pediatrics to ascertain any changes that may have been made, especially before undertaking any variations in the training program.)*

### Requirements for Admission to Examination

An applicant for examination for certification must meet the following general requirements:

- I. The applicant must be a graduate of an accredited medical school in the United States or Canada or of a foreign medical school which is listed by the World Health Organization (WHO).
- II. The applicant must have a valid unrestricted license to practice medicine in one of the states, districts, or territories of the United States or a province of Canada or unrestricted privileges to practice medicine in the United States armed forces.
- III. The applicant must complete 3 years of pediatric training in programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) on the advice of the Residency Review Committee for Pediatrics (RRC) or in programs in Canada accredited by the Royal College of Physicians and Surgeons of Canada (RCPSC).
- IV. The ABP will require program directors to verify satisfactory completion of training and to evaluate the acceptability of the applicant as a practitioner of pediatrics.
- V. **Other Considerations.** The ABP reserves the right to withhold certification and/or permission to take its examinations in the event of circumstances demonstrating that an applicant is not capable of performing the role of physician and advocate for infants, children, and adolescents. In such instances, the applicant will be no-

tified; the applicant may appeal the decision to the Credentials Committee of the ABP.

### I. Graduation from Medical School

The applicant must be a graduate of a medical school which has been accredited by the Liaison Committee on Medical Education (LCME) in the United States, by the RCPSC in Canada, or by the American Osteopathic Association (AOA) in the United States.

An applicant who is a graduate of a medical school which has not been accredited by the LCME, RCPSC, or AOA, but is listed by WHO, may apply for examination if he/she has a standard certificate either from the Educational Commission for Foreign Medical Graduates (ECFMG) or the Medical Council of Canada.

The graduate of a foreign medical school must submit a photocopy of the medical school diploma showing the medical degree and the date it was awarded. A certificate showing that the applicant has passed a final examination is not acceptable.

### II. License to Practice Medicine

For an applicant applying to take the certifying examination for the first time, a copy of a valid unrestricted license must be *received by August 25, 1993*. Exceptions to this policy are the following:

If an applicant is in subspecialty training or is serving as a chief resident (PL-4) in a state in which the medical licensing board does not require an unrestricted license, the license requirement will be waived if the applicant submits documentation of this fact to the ABP by August 25, 1993.

If an applicant provides written documentation from a licensing board that a temporary license has been issued pending final action by the licensing board, the license requirement will be met if the applicant submits documentation of this fact to the ABP by August 25, 1993. As soon as it is obtained, a copy of the license should be sent to the ABP office.

An applicant who does not meet the August 25, 1993, deadline will be disapproved and will be refunded the examination fee of \$775.

For an applicant who is *re-registering*, a copy of the license must be on file in the ABP office before re-registration material is sent.

If an applicant has any action pending regarding the right to have an unrestricted license to practice medicine, admission to the examination will be denied.

### III. Training Requirements

An applicant must complete three years of post-graduate pediatric training in programs accredited by the RRC or, in Canada, by the RCPSC. The training curriculum must be compatible with the *Special Requirements* for program accreditation, which are published annually in the *Directory of Graduate Medical Education Programs*. During this period of training, the applicant is expected to assume progressive responsibility for the care of patients. Credit will not be given for training completed before the medical degree is awarded.

The ABP recognizes five levels of pediatric training (PL-0 through PL-4) and defines these levels as follows:

PL-0: Internships or residencies that are accredited in fields other than pediatrics, e.g., rotating, flexible, family practice, internal medicine, general surgery, psychiatry. An applicant who is a graduate of a foreign medical school and who received the degree before July 1, 1975, may request PL-0 credit for training in another country, provided (1) it was at least 1 year in duration, (2) it was exclusively in the field of pediatrics, and (3) it is evaluated by the Credentials Committee of the ABP and deemed to be acceptable. An applicant requesting PL-0 level credit for pediatric training completed in another country must submit a letter from the physician in charge of the training program indicating the dates and specialty area of the training. Training at the PL-0 level is not acceptable toward fulfillment of the certification requirements for an applicant who received the medical degree on or after July 1, 1975.

PL-1: The first postgraduate year in general comprehensive pediatric training in an accredited program.

PL-2: The second postgraduate year in general comprehensive pediatric training in an accredited program following PL-1, but with increased responsibility for patient care and for the supervision of junior staff and medical students.

PL-3: The third postgraduate year in general comprehensive pediatric training in an accredited program. This year must be an integral part of the total 3 years of general pediatric training required of all medical school graduates who received their degrees after June 30, 1978. It may be a chief residency or a senior supervising residency.

PL-3: A residency in a pediatric subspecialty area of 1 year duration. Subspecialty training at the PL-3 level is *not acceptable* toward fulfillment of the certification requirements for those who received their medical degrees after June 30, 1978.

PL-4: A residency in a pediatric subspecialty in which the proportion of time in nonclinical or laboratory activities is so large that a minimum of 2 years must be spent to gain the equivalent of a year of clinical training. Subspecialty training at the PL-4 level is not acceptable toward fulfillment of the certification requirements for those who received their medical degrees after June 30, 1978. However, a PL-4 year will be recognized if the applicant is a chief resident following 3 years of core training.

### Training Requirements by Year of Graduation from Medical School

The requirements for admission to the certifying examination of the ABP vary depending upon the date an applicant received the medical school diploma. An applicant whose medical degree was received after June 30, 1978, must complete 3 years of hospital-based training in general comprehensive pediatrics in programs that are accredited by the RRC or by the RCPSC. A year of supervisory experience must be an integral part of the total 3-year program; this year must include at least 6 months of direct and senior supervisory responsibility in general pediatrics.

The ABP recognizes that occasionally there will be an exceptional candidate who should be given special consideration to substitute subspecialty training for the third year of general comprehensive pediatrics required of medical graduates who received their degrees after June 30, 1978. No later than the *start* of the PL-2 year, the petition to enter the special alternative pathway (SAP) must be received from the department chairman/program director indicating that the candidate has superior overall competence. There must also be a letter from the subspecialty program director outlining the clinical and research training. In addition, such candidates will be required to take a screening examination. The application material and the score on the screening examination will be reviewed by the Credentials Committee.

Training programs: The ABP approves applicants for admission to its certifying process. The ABP does not accredit training programs. Information regarding accreditation should be addressed to: Executive Secretary, Residency Review Committee for Pediatrics, 515 North State Street, Chicago, IL 60610.

Credit for training in accredited programs other than pediatrics: A physician transferring to pediatric residency training from another accredited residency, e.g., family practice, internal medicine, transitional year, is advised to correspond with the ABP to determine whether credit may be awarded for previous training. Requests for credit should be submitted either by the candidate or the pediatric residency program director *before* the candidate enters pediatric residency training.

Credit for pediatric training in non-accredited programs: The ABP has established requirements for a physician who has had at least 3 years of pediatric training in programs not accredited by the RRC or RCPSC, i.e., foreign training or training in accredited osteopathic programs in the United States. The interested physician or the department chairman/program director should write to the ABP before training begins to be sure that the physician meets the requirements.

**Special programs:**

**Medicine/pediatrics program:** A special agreement exists with the American Board of Internal Medicine (ABIM) whereby an applicant may fulfill the training requirements of both the ABP and ABIM by completing 2 years of accredited training in general comprehensive pediatrics and 2 years of accredited training in general comprehensive internal medicine. The 4 years should be completed in the same combined training program. Exceptions must be approved by both the ABP and ABIM. Continuity clinics in each specialty must be provided throughout the 4 years. Guidelines for combined training have been approved by both the ABP and ABIM and are available by writing either office. They were published in *Pediatrics*. 1989; 84:190-193. A list of institutions offering combined programs is published in the *Directory of Graduate Medical Education Programs*. An applicant may not appear for the certifying examination of the ABP until all training has been completed.

**Pediatrics/neurology program:** A special agreement exists with the American Board of Psychiatry and Neurology (ABPN) whereby an applicant who completes 2 years of accredited training in general comprehensive pediatrics and the neurology training necessary to meet the requirements for certification in neurology with special competence in child neurology fulfills the training requirements of both the ABP and the ABPN. An applicant may not appear for the certifying examination of the ABP until all training has been completed.

**Pediatrics/physical medicine and rehabilitation program:** A special agreement exists with the American Board of Physical Medicine and Rehabilitation (ABPMR) whereby a physician interested in pediatric rehabilitation can qualify for admission to the certifying examinations of both the ABP and ABPMR. The residency training can be completed in 5 years in programs approved by ABP and ABPMR. Interested applicants may obtain details from either Board office. Proposed programs must be submitted to the ABP and ABPMR for approval before a candidate can be accepted into the joint training program. All training should be completed at one academic institution; any deviation *must be approved prospectively* by both the ABP and ABPMR. An applicant may not appear for the certifying examination of the ABP until all training has been completed.

**Pediatrics/emergency medicine program:** A special agreement exists with the American Board of Emergency Medicine (ABEM) whereby an applicant may fulfill the training requirements of both the ABP and ABEM by completing joint training in 5 years. All 5 years should be completed in the same combined training program. Exceptions *must be approved* by both the ABP and ABEM. Training programs *must be approved prospectively* by both the ABP and ABEM. Guidelines for combined training have been approved by both the ABP and ABEM and are available by writing to either office. They were published in *Annals of Emergency Medicine*. 1991; 20:98-100. An applicant may not appear for the certifying examination of the ABP until all training has been completed.

**Pediatrics/psychiatry/child and adolescent psychiatry program:** The ABP, the ABPN, and the Committee on Certification in Child Psychiatry have formed a committee that is overseeing training in six pilot programs. Training includes 24 months of general comprehensive pediatrics, 18 months of child and adolescent psychiatry, and 18 months of adult psychiatry, which will satisfy the training requirements for certification in all three areas. Physicians pursuing training in these six pilot programs may not appear for the certifying examination of the ABP until all training has been completed. Credit for training via this route may be obtained *only* by training in one of these programs. Further information concerning these combined pilot training programs may be obtained by contacting the ABP office.

**Graduate school courses:** It is a fundamental concept of the ABP that a residency training program should provide for properly organized progressive responsibility for the care of children. The ABP believes that this can be accomplished through continuity of clinical experience under the supervision of attending physicians who are responsible for the care of these children. The substitution of a formal graduate or postgraduate school course that does not carry the essen-

tial ingredient of responsibility for patient care is inconsistent with this principle. Accordingly, the ABP will not accept such courses in fulfillment of its training requirements.

**Military service:** Military assignments will not be accepted in lieu of a year of required training unless served as a resident in a military hospital that is accredited by the RRC.

**Special situations:** The ABP recognizes that situations may arise that are not explained by the preceding information. A physician may have worked in a pediatric field for many years yet be deficient in the formal training requirements for examination, or a physician may have completed specialized training not explained in the above requirements. In such cases, the individual should present his/her credentials to the ABP, who may ask the Credentials Committee to review them and to decide whether permission should be given to enter the certification process. In general, credit will not be given for practice experience in pediatrics or training in another specialty.

**Statement of eligibility:** In keeping with the policy of the American Board of Medical Specialties (of which the ABP is a member), the ABP does not issue statements of eligibility for its examinations. The ABP will verify that a physician is certified, not certified, or has been approved to take the certifying examination. Approval is defined as having an applicant's credentials approved by the ABP after he/she has applied to take a certifying examination. The allegation by an applicant that he/she has completed the required training without review and approval by ABP is not acceptable.

#### **IV. Verification of Training and Evaluation by Directors of Pediatric Training Programs**

The ABP regards the evaluation of trainee competency as a continuum that begins during training and concludes with the certifying examination following formal training. The ABP depends upon the program director(s) and the faculty to provide assessments of an applicant's clinical competency as demonstrated in the training setting. The certifying examination gives an applicant the opportunity to demonstrate to the ABP the knowledge and clinical problem-solving abilities needed to diagnose and manage the health problems of children.

A. The ABP requires the program director to verify completion of training and to sign either statement A or statement B on the verification of clinical competence form. Statement A is as follows:

"I certify that the above-named applicant has demonstrated the necessary attitudes, knowledge, clinical judgment, technical skills, and interpersonal skills and is judged to be fully prepared for independent responsibility as a general pediatrician; to my knowledge he/she has moral and ethical integrity. The applicant is recommended for examination."

In recommending an applicant for the examination, a program director should keep in mind the definition of a qualified applicant as determined by the ABP:

An applicant shall demonstrate the following abilities as they pertain to infants, children, and adolescents:

1. Assessment of the clinical issues and formulation of a management plan for any medical or health maintenance problem;
2. Execution of the management plan with the patient and family, without further medical consultation, for all common problems of disease and health maintenance and for all medically life-threatening situations;
3. Consultation, when appropriate, with physicians and other professionals regarding common problems and life-threatening situations; and
4. Arrangement for help for the patient and knowledge of what to anticipate from the consultant, being prepared personally to guide further management with assistance, when appropriate, for unusual problems requiring subspecialty, surgical, or other specialized skills.

Each applicant must have verification of training and verification of clinical competence on file in the ABP office to be admitted

to the certifying examination. It is the applicants responsibility to be sure the program director submits all the required documents by the appropriate deadline.

When an applicant has not attained the appropriate knowledge and skills, the program director should sign statement B on the verification of clinical competence form. By signing this statement, the program director is recommending that the applicant not be admitted to the examination.

If an applicants training is not verified and/or he/she is not recommended for admission to the examination, the applicant will be required to complete an additional period of training in general comprehensive pediatrics in an accredited program in the United States or Canada before reapplying to the ABP. The director of the program where the additional training occurred must complete a separate verification of clinical competence form. Alternatively, the applicant may appeal to the Credentials Committee of the ABP. The Credentials Committee will gather additional information about the applicant and decide if permission to take the examination should be given. For an appeal, the applicant will be asked to submit copies of certificates of satisfactory completion of training. If the applicant has been denied such a certificate, then admission will be refused on the basis of incomplete training. However, possession of such a certificate will not automatically admit the person to the ABPs certification process. Most training certificates attest to the achievement of a minimal level of competence or the fulfillment of an employment contract. Therefore, the program directors statement on the verification of clinical competence form will take precedence over the certificate from the hospital. The ABP must have the program directors assurance that an applicant meets the standards expected of a certified pediatrician. Program directors are urged not to issue certificates of successful completion of training when the resident is deemed not to have met those standards.

The duration of training is 36 months. Absences in excess of three months, whether for vacation, sick leave, maternity leave, etc., should be made up. If the program director believes that an absence of more than three months is justified, a letter of explanation should be sent for review by the Credentials Committee. B. The program director is required to provide further information about the applicant. The program director is asked to evaluate the applicant on a nine-point scale in the following areas: gathering data by history, by physical examination, and by laboratory studies; assessing data and arriving at a diagnosis; managing problems and maintaining health; interpersonal relationships with patients and families; interpersonal relationships with other members of the health team; and work habits and personal qualities.

The program director is asked to rate the applicants overall clinical competency by indicating which of the following phrases best describes the applicants ability to care for children in the United States or Canada. In these phrases, the word manage is defined as identifying the nature of the problem, determining methods of resolving or alleviating the problem, and carrying out management plans, including the appropriate and timely use of consultants.

- 1: Unable to manage many pediatric problems including the most routine ones
- 2
- 3: Able to manage only the most routine problems of pediatrics
- 4
- 5: Able to manage the common problems of pediatrics adequately
- 6
- 7: Able to manage most pediatric problems in an effective way
- 8
- 9: Able to manage almost any pediatric problem in a highly effective manner

If the program director signs statement A but gives a rating of three or less in any single area or a rating of four or less for overall clinical competency, the Credentials Committee requires that the program director submit documentation with the completed verification of clinical competence form. If the Credentials Committee agrees with the program director, the applicant must complete an additional period of training in general comprehensive pediatrics in an accredited program either in the United States or Canada before reapplying to the ABP. The director of the program where the additional training occurred must complete a separate verification of clinical competence form. Alternatively, the applicant may appeal to the Credentials Committee as described in section IV. A.

- C. Program directors are encouraged to have all residents in their programs take the in-training examination (ITE). The results of the ITE can provide valuable information for both the resident and the program.
- D. To be compliant with the general requirements for accreditation established by ACGME, the program director and the faculty must explore and develop evaluation procedures for assessment of physician performance. Examples are medical record audits, rating scales for assessment of work habits, observational checklists for assessment of technical skills, oral examinations, and consumer questionnaires.

The ABP will continue to participate in and support research efforts to develop methods for evaluating the day-to-day performance of residents in caring for infants, children, and adolescents. A program to track residents in all accredited programs will begin in spring 1993.

### V. Policy Regarding Chemical Use and Dependency

An applicant who has a history of chemical dependency, as reported to the ABP, and who submits documentation acceptable to the ABP that the disease is known to be under control for at least two years may apply to take a certifying examination provided he/she meets the admission requirements. This policy also pertains to individuals who wish to participate in the program for renewal of certification in pediatrics (PRCP).

An applicant who has a history of chemical dependency, as reported to the ABP, who cannot submit documentation acceptable to the ABP that the disease is under control will not be allowed to take the certifying examination or to participate in PRCP.

### The Certifying Examination

The certifying examination is given once a year in the fall in a number of locations throughout the United States and Canada.

The examination is a 2-day examination. There are two sessions, each of 3 hours duration, each day with a luncheon break between sessions. The dates of the 1993 certifying examination are October 12-13.

The content of the examination for certification is appropriate for the practice of general comprehensive pediatrics. Emphasis is placed on practical aspects; however, good practice is founded on sound scientific knowledge, and the candidate should be prepared to demonstrate an understanding of basic science.

The examination consists of multiple-choice questions. Examples of the types of questions to be used are mailed to registered candidates before the administration of each examination. Some questions on the examination are included for experimental purposes only. These questions will not contribute to the score.

The validity of the performance of candidates on the certifying examination of the ABP is secured by every means available. Information concerning procedures to be taken in the event of irregular behavior such as giving or obtaining unauthorized information or aid before, during, or after the examination or offering financial or other benefit to a proctor, employee, or agent of the ABP is available by contacting the ABP office.

Each candidates examination score will be reported to his/her general pediatric program director. Periodically, the ABP conducts re-

search utilizing data it has compiled. A candidate's anonymity is guaranteed.

For failing candidates who are concerned that their answer sheets were not scored correctly, a process of hand scoring is available for a fee of \$60. Requests should be made in writing, accompanied by check or money order. Hand scoring is available for 18 months following the date of the examination.

The ABP does not sponsor or maintain records on any courses which claim to be review courses in preparation for its examination.

A physician with a disability who wishes to be given special consideration should notify the ABP office at the time the initial application is submitted. The applicant will be sent the ABP policy on disabilities.

## Application and Fees

Applicants for the certifying examination must satisfactorily complete their training by the date of the examination. Exceptions to this policy require that the program director write to the ABP office, explaining the reasons for requesting a waiver. The decision to grant a waiver will be made by the Credentials Committee.

Beginning in 1990, a new candidate must achieve certification within seven years of initial application. Candidates who were admitted to the certification process in 1986-1989 will have ten years to complete the certification process. A candidate who was admitted to the certification process before 1986 and is considered to have active status will have until December 31, 1995, to complete the certification process. A candidate who has not been certified within the time limit will be considered to be inactive. To regain active status, a candidate must re-apply and pass a screening assessment before being re-admitted to the certification process.

Application material for admission to the certifying examination of the ABP may be obtained by contacting the ABP office. The regular registration period for new applicants extends from December through February. Applications must be postmarked by February 27, 1993. *A candidate may apply until April 30, but an additional non-refundable late fee of \$225 will be required for all applications post-marked after February 27, 1993. The regular re-registration period is February 15-April 30, with a late re-registration period from May 1-31, 1993. A late fee of \$225 will be required for all late re-registration applications.* Notification of receipt of the application will be sent promptly. New applications which are postmarked after April 30, 1993, will not be accepted. Re-registration material which is post-marked after May 31, 1993, will not be accepted. Applications received by these deadlines will be processed and evaluated, and the ABP will request directors of general pediatric training programs to verify completion of training. Those applicants who meet the training requirements of the ABP and who are recommended by their program director(s) for examination will be accepted and registered for the certifying examination. An applicant who does not receive notification of the acceptance or rejection of his/her application by August 10 should write to the ABP office to inquire about the status of the application.

The cost of certification for new applicants includes the following fees, payable only in United States dollars:

Processing and evaluation fee—\$310

Examination fee—\$775

Total fee—\$1085

The fee for re-registration is \$985.

For individuals not using US banks, the fee must be paid in US dollars using one of the following vehicles: (1) money order; (2) cashiers check, or (3) certified check. To be accepted for payment, these vehicles must be payable through a New York bank.

The ABP also offers a program of partial payment of the examination fees for new applicants. The details are provided with the application material.

If an applicant is not approved to take the ABP certifying examination, the \$775 examination fee will be refunded. The processing and evaluation fee is not refundable, nor is the late fee. If the applicant

wishes to pursue certification in the future, he/she will be required to complete a new application and submit the full fee again.

Applicants should retain their acknowledgment letters and canceled checks as proof of payment. No other receipts will be issued.

After the ABP has accepted an application, the applicant is expected to take the next certifying examination offered. However, an applicant may withdraw by submitting a written notice. An applicant whose withdrawal letter is postmarked by July 1 will receive a refund of \$775. An applicant whose withdrawal letter is postmarked after July 1, but by August 25, will receive a refund of \$388. An applicant whose withdrawal letter is postmarked after August 25 or who does not appear for the examination will forfeit all fees paid and will be required to submit a re-registration fee before being admitted to a future examination. Re-registration material will be sent to the applicant during the registration period for the next examination.

If there is a discrepancy between a metered postmark and an official US Postal Service postmark, the latter will be considered official.

## Certification by the ABP

The ABP awards certificates to those individuals who have met the requirements and have passed the examination.

The names of certified pediatricians, but not their scores, will be sent to the appropriate organizations, directories, and journals.

Original certificates issued after May 1, 1988, will expire after 7 years. Individuals who wish to be issued a new certificate after the 7-year period must successfully complete the program for renewal of certification in pediatrics (PRCP).

## Certification Renewal in Pediatrics

The ABP offers a program for the renewal of certification that is open to all diplomates of the ABP.

Anyone certified before May 2, 1988, will not be affected by the policy of time-limited certification; however, those who choose to do so may achieve certification renewal on a voluntary basis.

## Revocation of Certificates

All certificates issued by the ABP are subject to the provisions of the articles of incorporation and the bylaws of the ABP. If the ABP obtains probable cause to believe that a certificate should be revoked for any of the reasons set forth below, it may institute proceedings for revocation thereof by mailing written notice to the holder of such certificate that a hearing will be held to determine whether or not the certificate should be revoked. The steps to be taken are outlined in the rules of appellate procedure of the ABP, which may be obtained by writing to the ABP office. Each certificate is subject to possible revocation in the event that:

1. The issuance of such certificate or its receipt by the physician so certified shall have been contrary to or in violation of any of the provisions of the ABP's articles of incorporation or bylaws; or
2. The physician so certified shall not have been eligible to receive such certificate, irrespective of whether the facts constituting him/her ineligible were known to any or all of the members of the ABP at the time of the issuance of such certificate; or
3. The physician so certified shall have made any misstatement of fact in his/her application for such certificate or in any other statement or representation to the ABP, its members, representatives, or agents; or
4. The physician so certified shall have been convicted by a court of competent jurisdiction of a felony or of any misdemeanor involving, in the opinion of the Board of Directors, moral turpitude in connection with his/her practice of medicine; or
5. The physician so certified shall have had one or more of his/her licenses to practice medicine revoked or shall have been placed on probation by any court or other body having proper jurisdiction and authority; or

6. The physician so certified has repeatedly made statements contrary to sound medical science and practice, raising fundamental questions about his/her competency.

If the ABP obtains probable cause to believe that a certificate should be revoked for any of the reasons set forth above, it may institute proceedings for revocation thereof by mailing written notice to the holder of such certificate that a hearing will be held to determine whether or not the certificate should be revoked. The steps to be taken are outlined in the rules of appellate procedure of the ABP, which may be obtained by writing to the ABP office.

### Reinstatement of Certificates

When a certificate issued by the ABP has been revoked, the certificate may be restored once the physician has submitted a request for reinstatement and the Credentials Committee has recommended reinstatement to the Board of Directors. In all instances, the physician must take an examination of the ABP. The specific examination will be determined by the Credentials Committee.

### Other Certification

Certification in allergy and immunology is offered by the ABAI, a Conjoint Board of the ABP and the ABIM. For details, contact the ABAI, University City Science Center, 3624 Market Street, Philadelphia, PA 19104.

The ABP, in conjunction with the ABIM and their Conjoint Board, the American Board of Allergy and Immunology (ABAI), offers a certificate of added qualifications in diagnostic laboratory immunology. Further information may be obtained by contacting the office of the ABAI, University City Science Center, 3624 Market Street, Philadelphia, PA 19104.

A certificate of added qualifications in sports medicine is offered by the American Board of Family Practice (ABFP), the ABEM, the ABIM, and the ABP. Further information may be obtained by contacting the ABP.

### Certification in the Pediatric Subspecialties

The ABP issues a certificate of special qualifications in the following subspecialties: adolescent medicine, pediatric cardiology, pediatric critical care medicine, pediatric emergency medicine, pediatric endocrinology, pediatric gastroenterology, pediatric hematology-oncology, pediatric infectious diseases, neonatal-perinatal medicine, pediatric nephrology, pediatric pulmonology, and pediatric rheumatology.

#### *Sub-board of Adolescent Medicine*

Charles E. Irwin, Jr., MD, Chairman, San Francisco, California  
 Robert W. Blum, MD, PhD, Minneapolis, Minnesota  
 S. Jean Emans, MD, Boston, Massachusetts  
 Sherrel L. Hammar, MD, Honolulu, Hawaii  
 Albert C. Hegenroeder, MD, Houston, Texas  
 Iris F. Litt, MD, Palo Alto, California

#### *Sub-board of Pediatric Cardiology*

Grace S. Wolff, MD, Chairman, Miami, Florida  
 Hugh D. Allen, MD, Columbus, Ohio  
 D. Woodrow Benson, Jr., MD, Chicago, Illinois  
 David J. Driscoll, MD, Rochester, Minnesota  
 Charles S. Kleinman, MD, New Haven, Connecticut  
 Richard M. Schieken, MD, Richmond, Virginia  
 Arleen R. Snider, MD, Durham, North Carolina

#### *Sub-board of Pediatric Critical Care Medicine*

Ann E. Thompson, MD, Chairman, Pittsburgh, Pennsylvania  
 Robert K. Crone, MD, Seattle, Washington  
 Thomas P. Green, MD, Minneapolis, Minnesota  
 Robert W. Katz, MD, Albuquerque, New Mexico  
 Daniel L. Levin, MD, Dallas, Texas  
 Murray M. Pollack, MD, Washington, DC  
 Jerry J. Zimmerman, MD, Madison, Wisconsin

#### *Sub-board of Pediatric Emergency Medicine*

Stephen Ludwig, MD, Chairman, Philadelphia, Pennsylvania  
 Susan Asch, MD, PhD, St. Paul, Minnesota  
 Roger M. Barkin, MD, MPH, Denver, Colorado  
 Ronald A. Dieckmann, MD, San Francisco, California  
 Gary R. Fleisher, MD, Boston, Massachusetts  
 Robert Luten, MD, Jacksonville, Florida  
 Robert W. Schafermeyer, MD, Charlotte, North Carolina  
 Joseph A. Zeccardi, MD, Philadelphia, Pennsylvania

#### *Sub-board of Pediatric Endocrinology*

Raymond L. Hintz, MD, Chairman, Stanford, California  
 Inese Z. Beitins, MD, Ann Arbor, Michigan  
 S. Douglas Frasier, MD, Sylmar, California  
 Joseph M. Gertner, MB, BCh, New York, New York  
 Morey W. Haymond, MD, Jacksonville, Florida  
 Stephen LaFranchi, MD, Portland, Oregon  
 Lenore S. Levine, MD, New York, New York

#### *Sub-board of Pediatric Gastroenterology*

William F. Balistreri, MD, Chairman, Cincinnati, Ohio  
 John T. Boyle, MD, Cleveland, Ohio  
 Richard J. Grand, MD, Boston, Massachusetts  
 William J. Klish, MD, Houston, Texas  
 Judith M. Sondheimer, MD, Denver, Colorado  
 James L. Sutphen, MD, Charlottesville, Virginia  
 Jon A. Vanderhoof, MD, Omaha, Nebraska

#### *Sub-board of Pediatric Hematology-Oncology*

John N. Lukens, MD, Chairman, Nashville, Tennessee  
 Herbert T. Abelson, MD, Seattle, Washington  
 George R. Buchanan, MD, Dallas, Texas  
 Bertil E. Glader, MD, Palo Alto, California  
 C. Thomas Kisker, MD, Iowa City, Iowa  
 Norma K. Ramsay, MD, Minneapolis, Minnesota  
 Ruth A. Seeler, MD, Chicago, Illinois

#### *Sub-board of Pediatric Infectious Diseases*

Sarah S. Long, MD, Chairman, Philadelphia, Pennsylvania  
 Caroline B. Hall, MD, Rochester, New York  
 Richard B. Johnston, Jr., MD, Philadelphia, Pennsylvania  
 James C. Overall, Jr., MD, Salt Lake City, Utah  
 Georges Peter, MD, Providence, Rhode Island  
 Larry K. Pickering, MD, Houston, Texas  
 Richard J. Whitley, MD, Birmingham, Alabama

#### *Sub-board of Neonatal-Perinatal Medicine*

Roberta A. Ballard, MD, Chairman, Philadelphia, Pennsylvania  
 Robert D. Christensen, MD, Salt Lake City, Utah  
 Thomas N. Hansen, MD, Houston, Texas  
 M. Douglas Jones, Jr., MD, Denver, Colorado  
 James A. Lemons, MD, Indianapolis, IN  
 Frank H. Morriss, Jr., MD, Iowa City, Iowa  
 Lucille A. Papile, MD, Albuquerque, New Mexico

#### *Sub-board of Pediatric Nephrology*

F. Bruder Stapleton, MD, Chairman, Buffalo, New York  
 Raymond D. Adelman, MD, Norfolk, Virginia  
 Michel G. Baum, MD, Dallas, Texas  
 Craig B. Langman, MD, Chicago, Illinois  
 Michael A. Linshaw, MD, Farmington, Connecticut  
 Robert H. McLean, MD, Baltimore, Maryland  
 Thomas E. Nevins, MD, Minneapolis, Minnesota

#### *Sub-board of Pediatric Pulmonology*

Hugh M. O'Brodovich, Chairman, Toronto, Ontario  
 Gerald M. Loughlin, MD, Baltimore, Maryland  
 John T. McBride, MD, Rochester, New York  
 Shirley Murphy, MD, Albuquerque, New Mexico  
 Gregory J. Redding, MD, Seattle, Washington  
 Michael A. Wall, MD, Portland, Oregon

*Sub-board of Pediatric Rheumatology*

Deborah W. Kredich, MD, Chairman, Durham, North Carolina  
 Balu H. Athreya, MD, Philadelphia, Pennsylvania  
 Helen M. Emery, MD, San Francisco, California  
 J. Roger Hollister, MD, Denver, Colorado  
 Carol B. Lindsley, MD, Kansas City, Kansas  
 Lauren M. Pachman, MD, Chicago, Illinois

## General Criteria for Certification in Pediatric Subspecialties

In addition to the training requirements, which are specific to each of the pediatric subspecialties, the following are required of candidates seeking certification in the pediatric subspecialties of adolescent medicine, cardiology, critical care medicine, emergency medicine, endocrinology, gastroenterology, hematology-oncology, infectious diseases, neonatal-perinatal medicine, nephrology, pulmonology, and rheumatology. Each candidate must be familiar with specific subspecialty training requirements as well as the policies stated in the current booklet of information, including 3 years of general pediatric training at the PL-1, 2 and 3 levels.

### I. General Eligibility Criteria

#### A. Certification by the American Board of Pediatrics (ABP)

An applicant must take and pass the certifying examination in general pediatrics *before* being permitted to take a pediatric subspecialty certifying examination. However, the application for the subspecialty certifying examination may be submitted before taking the subspecialty certifying examination in general pediatrics.

#### B. Licensure

Beginning in 1992, an applicant must have a valid, unrestricted license to practice medicine in any of the states, districts or territories of the United States or provinces of Canada or have unrestricted privileges to practice medicine in the US Armed Forces. A copy of the unrestricted license must accompany the application materials.

#### C. Verification of Training

An applicant will be asked to list the program(s) where subspecialty residency training occurred as well as the name(s) of the program director(s). The ABP will send a verification of competence form to the program director(s) for completion. For new pediatric subspecialties where programs have not been accredited yet, this process varies slightly. For those utilizing the practice route, evaluation form(s) will be required from the program director, if there is a subspecialty training program, or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing. For more details, see training requirements. The role of the program director in the certification process is to verify completion of training and to sign the following statement on the verification of competence form: "I certify that the above named applicant has demonstrated the necessary attitudes, knowledge, clinical judgment, research abilities, technical skills and interpersonal skills and is judged to be fully prepared for independent responsibility as a pediatric subspecialist; to my knowledge, he/she has moral and ethical integrity. The applicant is recommended for examination."

An applicant must have verification and/or evaluation form(s) on file at the ABP in order to be admitted to the pediatric subspecialty examination. If an applicant's training is not verified and/or he/she is not recommended for admission, the applicant will be required to satisfactorily complete an additional period of subspecialty residency training before reapplying. Alternatively, the applicant may appeal to the Credentials Committee of the Sub-board. The Credentials Committee will gather additional information about the applicant and decide if permission should be given to take the examination. For an appeal, the applicant will be asked to submit copies of certificates of satisfactory completion of training. If the applicant has been denied such a certificate, then admission will be refused on the basis of in-

complete training. However, possession of such a certificate will not automatically admit the person to the certification process. Most training certificates attest to the achievement of a minimal level of competence or the fulfillment of an employment contract. Therefore, the program director's statement on the verification of competence form will take precedence over the certificate from the institution. Program directors are urged not to issue certificates of successful completion of training when a subspecialty resident is deemed not to have met those standards. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (PL-1, 2, 3).

An applicant seeking certification in more than one subspecialty on the basis of practice and/or training may not apply the same period toward fulfillment of the requirements of another pediatric subspecialty.

#### D. Principles Regarding the Assessment of Research Competence

Each candidate must meet these principles:

1. Research experience is an essential part of the training of subspecialists.
2. The Residency Review Committee for Pediatrics (RRC) and Royal College of Physicians and Surgeons of Canada (RCPCSC) accreditation process must include the evaluation of opportunities for research experience. The Sub-boards should avoid duplicating RRC functions.
3. A requirement for admission to the certifying subspecialty examination must be evidence of productive research participation.
4. Necessary, but not sufficient verification of productive research participation, is a statement by the program director that the applicant has actively participated in research and that in the program director's opinion the applicant has knowledge of and is able to apply the scientific method. When the program director is asked to sign or make this statement, instructions should be precise about what the Sub-board will consider sufficient evidence of participation.
5. Evidence of productive research participation must be submitted.
  - a. A list of acceptable evidence should allow the majority of applicants to be approved without putting the Sub-board in the position of judging the quality of research efforts.
  - b. Acceptable evidence should be defined by the Sub-boards. Evidence considered in the evaluation of productive research participation could include one of the following:
    - 1) First author of a research paper accepted for publication in a peer-reviewed journal deemed acceptable by the Sub-board.
    - 2) Submission of a research grant proposal which has been approved by an extramural organization with a critical review process.
    - 3) A post-graduate degree in a field of science relevant to the subspecialty.
    - 4) A thesis accepted as partial fulfillment of the requirements for a post-graduate degree in a field of science relevant to the subspecialty.
    - 5) A research progress report (signed by both the applicant and preceptor) no more than five pages in length to include (a) a statement of hypothesis, (b) delineation of methodology, (c) results and analysis, (d) significance of research, (e) applicant's plans for future research. This report could be acceptable in the following situations: where the data were lost; where the research could not be completed because of the nature of the work; or where a research paper had been submitted, but notice of acceptance for publication had not been received. This report will be reviewed by the Credentials Committee.

- c. Any other evidence acceptable to the Sub-board must be approved by the ABP before it can be included as evidence of productive research and participation.
6. The program director is responsible for notifying all residents of the research requirements necessary for certification upon entry to the subspecialty training program.
7. Subspecialty certifying examinations will include questions on research design, analysis, and interpretation.

## II. Special Requirements for Training Programs

Special requirements for training programs in pediatric cardiology, pediatric critical care medicine, pediatric endocrinology, pediatric hematology-oncology, neonatal-perinatal medicine, pediatric nephrology, and pediatric pulmonology have been approved by the RRC and the Accreditation Council for Graduate Medical Education (ACGME) or by the RCPSC. Special requirements for training programs in adolescent medicine, pediatric emergency medicine, pediatric gastroenterology, pediatric infectious disease, and pediatric rheumatology have not yet been approved by the RRC. Copies of the special requirements and lists of accredited programs are available from the office of the Residency Review Committee for Pediatrics, 515 North State Street, Chicago, IL 60610 or the Office of Training and Evaluation, the Royal College of Physicians and Surgeons of Canada, 74 Stanley, Ottawa, Ontario, K1M 1P4. The Special requirements are published in the *Directory of Graduate Medical Education Programs* or in the RCPSC booklets of general information.

## III. Subspecialty "Fast Tracking"

A subspecialty resident who is believed to have demonstrated research competence either before or during residency, such as one who has received a PhD degree, may have a part of the training waived. The subspecialty program director may ask the Sub-board to waive the research competency requirements and to reduce the time of subspecialty training by as much as 1 year. This petition *must* be made either before the beginning of training or during the first year of training. Candidates for this pathway must have completed 3 core years of pediatrics in an accredited program in the United States or Canada and would not have the option of the special alternative pathway. Furthermore, a subspecialty resident who receives a waiver by the Sub-board must complete at least 2 years of training in the subspecialty with at least 1 year of broad-based clinical training.

## IV. The Certifying Examination

The examination consists of multiple-choice questions. Examples of the types of questions to be used are mailed to registered candidates before the administration of each examination. Some questions on the examination are included for experimental purposes only. These questions will not contribute to the score. The examination result will be reported by name and score to the pediatric department chairman and subspecialty program director where training occurred.

The validity of the performance of candidates on the subspecialty certifying examination is secured by every means available. Information is available by contacting the ABP concerning procedures to be taken by the ABP in the event of irregular behavior such as giving or obtaining unauthorized information or aid before, during, or after the examination or offering financial or other benefit to a proctor, employee, or agent of the ABP.

The ABP does not sponsor or maintain records on any courses which claim to be review courses in preparation for the subspecialty certifying examination.

A physician who has a proven handicapping condition and who wishes to be given special consideration will be required to submit documentation of the condition before appearing for the certifying examination. At the time the initial application is submitted, an applicant must notify the ABP that special consideration will be desired.

An applicant for a subspecialty certifying examination must satisfactorily complete training by the date of the examination. Exemptions to this policy can be obtained by contacting the ABP.

Information concerning the dates of the subspecialty examinations is widely distributed in journals, sent to program directors and is contained in the booklet of information which is available on request from the ABP.

Application material for admission to a subspecialty certifying examination of the ABP may be obtained by contacting the ABP at (919) 929-0461, or by writing to the American Board of Pediatrics, 111 Silver Cedar Court, Chapel Hill, NC 27514-1651. Application forms are available only during the registration period for a particular examination.

As part of the application, the applicant must sign a statement attesting to the fact that he/she:

1. Has never been convicted of a felony nor is under indictment for a felony at the present time;
2. Has never had a license to practice medicine denied, revoked, suspended, or restricted in the United States or any other country;
3. Has no action pending against him/her before any state Licensing Board at this time;
4. Has never been chemically dependent;
5. Has not been the subject of any disciplinary action, proceeding or investigation by any medical society within the last 5 years;
6. Has not been the subject of any investigation or disciplinary proceeding in any hospital, practice group or medical institution with which he/she has been associated nor has he/she resigned from any such organization while the subject of a complaint or proceeding within the last five years.

Each applicant is considered individually and must be acceptable to the Sub-board. Each Sub-board recognizes that situations may arise that are not explained by the preceding information. Questions concerning eligibility will be considered by the Credentials Committee of the Sub-board.

After the Sub-board has approved an application, the candidate is expected to take the next examination offered. A candidate who withdraws from the examination after the approval letters/site assignment cards are prepared will forfeit a portion of the fees paid. A candidate who withdraws after the date set for postponement will forfeit all fees paid. To register for a future examination, payment of the re-registration fee will be required.

A candidate who fails an examination will be admitted to the next examination pending application and payment of the re-registration fee.

## V. Certification

A certificate of special qualifications, valid for 7 years, is awarded by the ABP to a candidate who has met the requirements and has passed the certifying subspecialty examination. A program for renewal of certification is being developed by the ABP.

The names of those certified are sent to the American Board of Medical Specialties (ABMS) for publication in the *Directory of Certified Pediatricians* and to various pediatric journals. Scores are not sent to ABMS or to the journals.

Beginning in 1990, new applicants must achieve certification within seven years. Candidates who had an active status as of December 31, 1985, will have until December 31, 1995, to complete the certification process. Candidates who were admitted to the certification process in 1986-1989 will have 10 years to complete the certification process. Candidates who have not been certified within the time limit must re-apply and pass a screening assessment before being re-admitted to the certification process. When re-applying for the certification process, an applicant is subject to the policies of the ABP in effect at that time.

## VI. Policy Regarding Chemical Use and Dependency (Including Drugs and Alcohol)

An applicant who has a history of chemical dependency as reported to the ABP and who submits documentation acceptable to the ABP that the disease is known to be under control for 2 years may apply for and take a certifying examination provided he/she meets the admission requirements. This policy also pertains to individuals who wish to participate in the program for renewal of certification in pediatrics (PRCP).

An applicant who has a history of chemical dependency, as reported to the ABP, who *cannot* submit documentation acceptable to the ABP that the disease is under control *will not* be allowed to take a certifying examination or to participate in PRCP.

## VII. Revocation of Certificates

All certificates issued by the ABP are issued subject to the provisions of the certificate of incorporation and the bylaws of the ABP. Each such certificate is subject to revocation in the event that:

1. The issuance of such certificate or its receipt by the physician so certified shall have been contrary to or in violation of any of the provisions of the ABP's certificate of incorporation or bylaws; or
2. The physician so certified shall not have been eligible to receive such certificate, irrespective of whether or not the fact constituting him/her so ineligible were known to any or all of the members of the ABP at the time of the issuance of such certificate; or
3. The physician so certified shall have made any misstatement of fact in his/her application for such certificate or in any other statement or representation to the ABP, its members, representatives, or agents; or
4. The physician so certified shall have been convicted by a court of competent jurisdiction of a felony or of any misdemeanor involving, in the opinion of the ABP, moral turpitude in connection with his/her practice of medicine; or
5. The physician so certified shall have had one or more of his/her licenses to practice medicine revoked or shall have been placed on probation by any court or other body having proper jurisdiction and authority; or
6. The physician so certified has repeatedly made statements contrary to sound medical science and practice, raising such fundamental questions about his/her competency.

If the ABP obtains probable cause to believe that a certificate should be revoked for any of the reasons set forth above, it may institute proceedings for revocation thereof by mailing written notice to the holder of such certificate that a hearing will be held to determine whether or not the certificate should be revoked. The steps to be taken are outlined in the rules of appellate procedure of the ABP, which may be obtained by writing to the ABP.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

## Eligibility Criteria for Certification in Adolescent Medicine

These requirements are not finalized as of this printing.

## Eligibility Criteria for Certification in Pediatric Cardiology

The American Board of Pediatrics (ABP) has established a procedure for certification in pediatric cardiology. In addition to the specific training requirements listed below, there are general requirements which must be fulfilled to be eligible for certification. Those general requirements are printed above.

## I. Training Requirements

A resident who entered pediatric cardiology training before January 1, 1988, may apply for admission on the basis of completion of 2 years of subspecialty residency in a pediatric cardiology program accredited by the Residency Review Committee for Pediatrics (RRC). The Sub-board requires that the period of training be at least 22 months for those subspecialty residents entering training before January 1, 1988.

Three years of full-time broad-based subspecialty residency training in an accredited pediatric cardiology program is required of a resident entering training on or after January 1, 1988. The Sub-board requires that the period of training be at least 33 months for those entering training on or after January 1, 1988. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

A resident beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

For a resident who entered training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a verification of competence form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Research Competence," and he/she must pass the subspecialty certifying examination.

All subspecialty training must be completed in the United States or Canada, unless the Credentials Committee of the Sub-board has given approval for foreign subspecialty training to a resident *before* he/she enrolls in such a program. Residents wishing to obtain such approval should contact the ABP. A resident completing pediatric cardiology training in Canada in programs approved for general pediatrics by the Royal College of Physicians and Surgeons of Canada (RCPSC) will be considered on an individual basis by the Credentials Committee of the Sub-board.

## II. Dual Subcertification in Cardiology (Internal Medicine and Pediatrics)

There is no change in the usual training requirements in pediatric cardiology for graduates of combined medicine/pediatric programs.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to consult the ABP to ascertain whether the information they have is current.

## Eligibility Criteria for Certification in Pediatric Critical Care Medicine

The American Board of Pediatrics (ABP) has established a procedure for certification in pediatric critical care medicine. In addition to the specific training requirements listed below, there are general requirements which must be fulfilled to be eligible for certification. Those general requirements are printed above.

### I. Training Requirements

For admission to the examination, a subspecialty resident must have completed one of the following to qualify:

- A. A resident who entered pediatric critical care medicine training before January 1, 1988, may apply for admission on the basis of completion of 2 years of subspecialty residency training in pediatric critical care medicine in a program under the supervision of a director who is certified in pediatric critical care medicine or, lacking such certification, possesses equivalent credentials. Only those pediatric critical care medicine training programs which are operated in association with general comprehensive pediatric residency programs accredited by the Residency Review Committee

for Pediatrics (RRC) will be considered. Clinical training must be comprehensive and intensive. The Sub-board requires that the period of training be at least 22 months for those subspecialty residents.

Three years of full-time broad-based subspecialty residency training in pediatric critical care medicine is required of a resident entering training on or after January 1, 1988. The Sub-board requires that the period of training be at least 33 months for those entering training on or after January 1, 1988. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a resident who began training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a verification of competence form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Research Competence;" and he/she must pass the subspecialty certifying examination.

A resident beginning training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

A resident entering a program after January 1, 1992, must have his/her training in a program accredited by the RRC or RCPCSC in order to be eligible to take the certifying examination in pediatric critical care medicine.

All subspecialty training must be completed in the United States or Canada, unless the Credentials Committee of the Sub-board has given approval for foreign subspecialty training to a resident *before* he/she enrolls in such a program. Residents wishing to obtain such approval should contact the ABP.

For an individual using the subspecialty residency training route (A), verification of competence form(s) will be required from the director(s) of the applicant's pediatric critical care medicine training program(s).

- B. A resident who is certified by the ABP in pediatric cardiology, neonatal-perinatal medicine, pediatric pulmonology, or anesthesiology (by the American Board of Anesthesiology) may be admitted to the examination with 2 years of subspecialty residency training in pediatric critical care medicine in a program under the supervision of a director who is certified in pediatric critical care medicine or, lacking such certification, possesses equivalent credentials. A resident who entered training in pediatric critical care medicine before January 1, 1988, will need only 1 year of training. At least 1 year must be in broad-based clinical training.

- C. Five years in the practice of comprehensive pediatric critical care medicine. A minimum of 50% of full-time professional activity must be spent in the practice of pediatric critical care medicine to receive credit. It is assumed that night and weekend practice time would be distributed in the same manner as regular practice time. These 5 years of practice should be of such type and quality that they substitute for the clinical exposure one might have encountered during pediatric critical care medicine residency training. *All practice time must be accrued before December 31, 1991.* No foreign experience will be accepted by the Credentials Committee in fulfillment of the requirements.

For an individual using the practice experience route (C), an evaluation form will be required from the program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing pediatric critical care medicine.

- D. Pediatric critical care medicine subspecialty residency training/experience equal to 5 years as outlined in either of the methods below:

1. A resident completing less than 12 months of subspecialty residency training in pediatric critical care medicine may receive credit on a month-for-month basis. For example, a 9-month subspecialty residency would be credited for 9 months of experience; this, added to 4 years and 3 months of pediatric critical care medicine experience would total 60 months or 5 years. These 5 years must be accrued before December 31, 1991.
2. A resident completing 12 to 23 months of subspecialty residency training in pediatric critical care medicine may receive credit on a two-for-one basis. For example, an 18-month subspecialty residency would be credited for 36 months of experience; this, added to 24 months of pediatric critical care medicine experience would total 60 months or 5 years. These 5 years must be accrued before December 31, 1991. No credit for partial training will be given for a subspecialty resident who began training after January 1, 1988.

For an individual using the combination pediatric critical care medicine subspecialty residency/training route (D), verification form(s) will be required from the director(s) of the resident's training program(s) and evaluation form(s) will be required from the program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing pediatric critical care medicine.

The completed verification and evaluation forms should be sent directly to the ABP.

A resident entering the examination via routes (C) or (D) must make application, be approved for and take the examination given in or before 1992. The Credentials Committee will evaluate an applicant based upon the pediatric critical care medicine experience accrued during the 5 years before the date of the examination.

The 1995 examination will be the last examination for which an applicant may apply unaccredited training toward fulfillment of the certification requirements.

## II. Dual Subcertification in Critical Care Medicine (Internal Medicine and Pediatrics)

The Sub-board of Pediatric Critical Care Medicine has established the following requirements for individuals who are graduates of combined training programs in general internal medicine and general pediatrics. On or after January 1, 1992, pediatric critical care medicine training must be in an RRC accredited program.

1. The candidate must have at least 1 year of broad-based clinical pediatric critical care medicine training.
2. The candidate must have a minimum of 1 year of research training related to pediatric critical care medicine. The setting for the research training should be one which is most suitable for the candidate's interest.
3. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a verification of competence form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Research Competence;" and he/she must pass the subspecialty certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (PL 1,2,3).
4. A candidate interested in certification in "adult" critical care medicine should contact the American Board of Internal Medicine.
5. The total length of training leading to dual subcertification must be at least 4 years in duration.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

## Eligibility Criteria for Certification in Pediatric Emergency Medicine

The American Board of Pediatrics (ABP), and the American Board of Emergency Medicine (ABEM) have established through the Credentials Committee of the joint Sub-board of Pediatric Emergency Medicine a procedure for certification in pediatric emergency medicine. To be eligible for this subspecialty examination, a physician must be certified in either general pediatrics by the ABP, or in emergency medicine by the ABEM. In addition to the specific training requirements outlined below, there are general requirements by each of the primary boards, one set of which must be fulfilled by the physician candidate in order to be eligible for certification. Those general requirements for certification are available through the respective primary boards, either the ABP or the ABEM.

### I. Training or Practice Requirements

For admission to the certification examination in pediatric emergency medicine, the candidate must have completed one of four pathways for eligibility. The pathways are: a) subspecialty training; b) dual certification or dual residency training; c) pediatric emergency medicine practice; d) subspecialty training plus practice.

#### A. Subspecialty Residency (Fellowship) Training

1. Completion of at least 2 years of subspecialty residency (fellowship) training in pediatric emergency medicine.
2. The training program must be under the direction of a physician either certified (1994 or after) in pediatric emergency medicine, or (before 1994) possessing equivalent credentials as outlined in this document. Alternatively, the directorship can be shared by physicians certified in both of the primary boards, ABP and ABEM. The pediatric emergency medicine training program must be a division of a general pediatric residency program or an emergency medicine residency program which is accredited by the respective Residency Review Committee (RRC) in the US or by the Royal College of Physicians and Surgeons in Canada.
3. All training must have been completed in the United States or Canada.

#### B. Dual Certification

1. A candidate who is certified by ABP and ABEM, before July 1, 1996, may apply via this pathway.

#### C. Pediatric Emergency Medicine Practice

A candidate who has had broad based experience in pediatric emergency medicine may apply via the practice pathway. The applicant must fulfill *all* of the following:

1. Professional activities spent in the practice of pediatric emergency medicine for a period of 60 months, and totaling a minimum of 6,000 hours. Of the 6,000 hours, 2,800 hours must have been accrued in a 24-month (maximum) consecutive period of time.
2. A minimum of 4,000 of the 6,000 hours must have been spent in the clinical practice of pediatric emergency medicine. If the candidate practices in a general emergency department (ED), only time spent exclusively in pediatric care (patient ages <18 years), can be used for credit.
3. The remaining 2,000 hours may be spent in either clinical care, or a mixture of related non-clinical activities in pediatric emergency medicine including administration, teaching, pre-hospital care, quality assurance or quality improvement, research, or other academic activities.
4. Practice time shall have occurred in a hospital-based ED, with the following characteristics:

- a. The ED must provide a patient mix of minor-major medical and traumatic conditions.
  - b. The ED must be a formal component of the emergency medical services system for pediatric patients.
  - c. The ED must provide triage and initial stabilization of all presenting conditions.
  - d. The ED must provide 24 hour a day full-time physician coverage.
  - e. The ED should have a minimum of 15,000 non-scheduled pediatric patient visits per year.
5. The physician must be physically present in the ED, and available and responsible for clinical patient care. Hours spent in an "on-call" arrangement are not acceptable.
  6. Practice time must have occurred in the United States or its territories or in Canada. Military practice time must have occurred in accredited US military hospitals. Practices occurring outside of these locations will not be accepted. Specifically, practice time at a free-standing emergency facility will not be accepted for fulfillment of the eligibility requirements.
  7. For non-clinical practice pathway credit, the candidate may count non-clinical time devoted to pediatric emergency medicine. Specific documentation of the actual nature of the non-clinical time will be required.
  8. Applicants seeking certification in more than one subspecialty, on the basis of practice alone, may not apply the same practice period toward fulfillment of the requirements of two different certifying sub-boards.
  9. Practice time need not be continuous. However, all practice time shall have occurred in the 7-year interval before application for certification and before *July 1, 1996*.

#### D. Subspecialty Residency Training Plus Practice

A combination of training and practice experience may be utilized to fulfill eligibility requirements. The combination must equal 60 months and 6,000 hours. Credit for partial training will be given as follows:

1. An applicant who has completed 1-11 months of subspecialty residency training in pediatric emergency medicine will receive practice credit on a month-to-month basis. Each month of subspecialty training in pediatric emergency medicine credited toward practice will be counted as 100 hours toward the 6,000 hours minimal requirement.
2. An applicant who has completed 12-23 months of subspecialty residency training in pediatric emergency medicine will receive practice credit on a 2-for-1 basis. Each month of subspecialty training in pediatric emergency medicine credited toward practice will be counted as 200 hours toward the 6,000 hours minimal requirement.
3. The 60 months of combination training and practice credit must be accrued during a 7-year interval before application for certification and before *July 1, 1996*.
4. An applicant may not apply for the same training period toward fulfillment of requirements of two different certifying sub-boards.

### II. Verification of Training and Practice

- A. For a candidate utilizing the subspecialty residency training route, a verification of competency form(s) from the director(s) of the applicant's pediatric emergency medicine training program(s) is required.
- B. For a candidate utilizing the dual certification pathway, the certificate number and year of certification for each board must be provided.
- C. For a candidate utilizing the practice pathway, an evaluation form will be required from either the pediatric emergency medicine program director, the pediatric department chairman or the chief of pediatrics, or the emergency department chairman or chief of

emergency medicine in the hospital where the practice experience occurred.

- D. For a candidate utilizing the subspecialty training plus practice pathway, both a verification of competency form(s) from the pediatric emergency medicine program and an evaluation form(s) will be required.

Certification shall be valid for the length of years that the primary board currently requires certification.

### III. Description of the Institution/Emergency Department, and Procedures Experience

- A. The individual(s) responsible for completion of the verification of competency form(s) or the evaluation form(s) must provide a description of the institution and emergency department.
- B. The applicant must complete a "Procedures for Pediatric Emergency Medicine" form with the application.

### IV. Expiration of Eligible Pathways

On July 1, 1996, eligibility pathways C (practice) and D (subspecialty training plus practice) will expire. To apply under either of these pathways, a candidate must have fulfilled the requirements before July 1, 1996 and submitted an application for subspecialty examination in pediatric emergency medicine by the 1997 application cycle.

### Eligibility Criteria for Certification in Pediatric Endocrinology

The American Board of Pediatrics (ABP) has established a procedure for certification in pediatric endocrinology. In addition to the specific training requirements listed below, there are general requirements which must be fulfilled to be eligible for certification. Those general requirements are printed above.

#### I. Training Requirements

A resident who entered subspecialty training in pediatric endocrinology before January 1, 1987, is not required to complete training in an accredited program. He/she is required, however, to complete training only in those pediatric endocrinology training programs which are operated in association with general comprehensive pediatric programs accredited by the Residency Review Committee for Pediatrics (RRC) or by the Royal College of Physicians and Surgeons of Canada (RCPSC). A resident who entered pediatric endocrinology training before January 1, 1988, may apply for admission on the basis of completion of 2 years of subspecialty residency in pediatric endocrinology. The Sub-board requires that the period of training be at least 22 months for those subspecialty residents.

A resident who entered training in pediatric endocrinology on or after January 1, 1987, will be required to complete subspecialty residency in a program accredited for training in pediatric endocrinology by the RRC or by the RCPSC.

Three years of full-time broad-based subspecialty residency training in pediatric endocrinology is required of a resident entering training on or after January 1, 1988. The Sub-board requires that the period of training be at least 33 months for those entering training on or after January 1, 1988. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a resident who began training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a verification of competence form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Research Competence;" and he/she must pass the subspecialty certifying examination.

A resident beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

All subspecialty training must be completed in the United States or Canada, unless the Credentials Committee of the Sub-board has given approval for foreign subspecialty training to a resident *before* he/she enrolls in such a program. A resident wishing to obtain such approval should contact the ABP.

The 1992 examination was the last examination for which a resident may apply unaccredited training toward fulfillment of the certification requirements.

### II. Dual Subcertification in Endocrinology (Internal Medicine and Pediatrics)

The Sub-board of Pediatric Endocrinology has established the following requirements for individuals who are graduates of combined training programs in general internal medicine and general pediatrics. Pediatric endocrinology training must be in a program accredited by the RRC or RCPSC.

1. The candidate must have at least 1 year of broad-based clinical pediatric endocrinology training.
2. The candidate must have a minimum of 1 year of research training related to pediatric endocrinology. The setting for the research training should be one which is most suitable for the candidate's interest.
3. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a verification of competence form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Research Competence;" and he/she must pass the subspecialty certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (PL 1,2,3).
4. A candidate interested in certification in "adult" endocrinology should contact the American Board of Internal Medicine.
5. The total length of training leading to dual subcertification must be at least 4 years in duration.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

### Eligibility Criteria for Certification in Pediatric Gastroenterology

The American Board of Pediatrics (ABP) has established a procedure for certification in pediatric gastroenterology. In addition to the specific training requirements listed below, there are general requirements which must be fulfilled to be eligible for certification. Those general requirements are printed above.

#### I. Training Requirements

For admission to the examination, a subspecialty resident must have completed one of the following to qualify:

- A. A resident who entered pediatric gastroenterology training before January 1, 1990, may apply for admission on the basis of completion of 2 years of subspecialty residency training in pediatric gastroenterology in a program under the supervision of a director who is certified in pediatric gastroenterology, or, lacking such certification, possesses equivalent credentials. Only those pediatric gastroenterology training programs which are operated in association with general comprehensive pediatric residency programs accredited by the Residency Review Committee for Pediatrics (RRC) or the Royal College of Physicians and Surgeons of Canada (RCPSC) will be considered. The Sub-board requires that the period of training be at least 22 months for those subspecialty residents.

Three years of full-time broad-based subspecialty residency training in pediatric gastroenterology is required of a resident entering training on or after January 1, 1990. The Sub-board requires that the period of training be at least 33 months for those entering training on or after January 1, 1990. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a resident who began training on or after January 1, 1990, the following must be accomplished in order to become certified in the subspecialty: a verification of competence form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Research Competence;" and he/she must pass the subspecialty certifying examination.

A resident beginning part-time training after January 1, 1990, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Sub-board has given approval for foreign subspecialty training to a resident *before* he/she enrolls in such a program. A resident wishing to obtain such approval should contact the ABP. A resident completing pediatric gastroenterology training in Canada in programs approved for general pediatrics by the RCPSC will be considered on an individual basis by the Credentials Committee of the Sub-board.

For an individual using the subspecialty residency training route (A), verification of competence form(s) will be required from the director(s) of the resident's pediatric gastroenterology training program(s).

- B. Five years of broad-based practice experience in pediatric gastroenterology. Broad-based pediatric gastroenterology is defined as encompassing the majority of the clinical components which are a modification of the guidelines for subspecialty training in gastroenterology published in 1980 by the Committee on Training and Education of the American Gastroenterological Association (Winship DH, Grand RJ, Gray G, et al: Guidelines for subspecialty training in gastroenterology. *Gastroenterology* 79:955-957, 1980). This modification was published in *Gastroenterology* 1987; 93:432-3 (Motil, KJ, et al). A minimum of 50% of full-time professional activity must be spent in the practice of pediatric gastroenterology to receive credit. It is assumed that night and weekend time would be distributed in the same manner as regular time. These 5 years should be of such type and quality that they substitute for the clinical exposure one might have encountered during subspecialty residency training. *All pediatric gastroenterology* experience must be accrued before December 31, 1994. No foreign experience will be accepted by the Credentials Committee in fulfillment of the requirements.

For an individual using the practice experience route (B), evaluation form(s) will be required from the program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the resident is now or has been practicing pediatric gastroenterology.

- C. Pediatric gastroenterology subspecialty residency training/experience equal to 5 years as outlined in either of the methods below:
1. A resident completing less than 12 months of subspecialty residency training in pediatric gastroenterology may receive credit on a month-for-month basis. For example, a 9-month subspecialty residency would be credited for 9 months of experience; this, added to 4 years and 3 months of pediatric gastroenterology experience would total 60 months or 5 years. These 5 years must be accrued before December 31, 1994.

2. A resident completing 12 to 23 months of subspecialty residency training in pediatric gastroenterology may receive credit on a two-for-one basis. For example, an 18-month subspecialty residency would be credited for 36 months of experience; this, added to 24 months of pediatric gastroenterology experience would total 60 months or 5 years. These 5 years must be accrued before December 31, 1994. No credit for partial training will be given for a subspecialty resident who began training on or after January 1, 1990.

For an individual using the combination pediatric gastroenterology subspecialty residency training/experience route (C), verification form(s) will be required from the director(s) of the resident's training program(s) and evaluation form(s) will be required from the program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the resident is now or has been practicing pediatric gastroenterology.

The completed verification and evaluation form(s) should be sent directly to the ABP.

A resident entering the examination via routes (B) or (C) must make application, be approved for, and take the examination given in or before 1995. The Credentials Committee will evaluate a resident based upon the pediatric gastroenterology experience accrued during the 5 years before the date of the examination.

At the present time, the RRC has not begun the process of accrediting training programs in pediatric gastroenterology. A resident entering subspecialty training in this field before completion of the accreditation process by the RRC is advised to enter those programs in which the director or senior faculty of the program is/are certified in pediatric gastroenterology or possesses equivalent credentials. Only those pediatric gastroenterology training programs which are operated in association with general comprehensive pediatric programs accredited by the RRC or RCPSC will be considered. The Sub-board will not address the issue of accepting programs in pediatric gastroenterology accredited by the RCPSC until the RRC takes action.

## II. Dual Subcertification in Gastroenterology (Internal Medicine and Pediatrics)

The Sub-board of Pediatric Gastroenterology has established the following requirements for individuals who are graduates of combined training programs in general internal medicine and general pediatrics. Pediatric gastroenterology training must be in a program in the US or Canada. Once the RRC accredits programs, training must be in an accredited program.

1. The candidate must have at least 1 year of broad-based clinical pediatric gastroenterology training.
2. The candidate must have a minimum of 1 year of research training related to pediatric gastroenterology. The setting for the research training should be one which is most suitable for the candidate's interest.
3. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a verification of competence form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Research Competence;" and he/she must pass the subspecialty certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (PL 1,2,3).
4. A candidate interested in certification in "adult" gastroenterology should contact the American Board of Internal Medicine.
5. The total length of training leading to dual subcertification must be at least 4 years in duration.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

### Eligibility Criteria for Certification in Pediatric Hematology-Oncology

The American Board of Pediatrics (ABP) has established a procedure for certification in pediatric hematology-oncology. In addition to the specific training requirements listed below, there are general requirements which must be fulfilled to be eligible for certification. Those general requirements are printed above.

#### I. Training Requirements

A resident who entered subspecialty training in pediatric hematology-oncology before January 1, 1986, is not required to complete training in an accredited program. He/she is required, however, to complete pediatric hematology-oncology training in programs which are operated in association with general comprehensive pediatric programs accredited by the Residency Review Committee for Pediatrics (RRC) or Royal College of Physicians and Surgeons of Canada (RCPS). A resident who entered pediatric hematology-oncology training before January 1, 1986, may apply for admission on the basis of completion of 2 years of subspecialty residency in pediatric hematology-oncology. The Sub-board requires that the period of training be at least 22 months for those subspecialty residents.

Three years of full-time broad-based subspecialty residency training in pediatric hematology-oncology is required of a resident entering training on or after January 1, 1986, in a program under the supervision of a director who is certified in pediatric hematology-oncology, or lacking such certification, possesses equivalent credentials. The Sub-board requires that the period of training be at least 33 months for those entering training on or after January 1, 1986. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

A resident who entered training in pediatric hematology-oncology on or after January 1, 1987, will be required to complete 3 years of subspecialty residency in a program accredited for training in pediatric hematology-oncology by the RRC or RCPS.

For a resident who began training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a verification of competence form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Research Competence;" and he/she must pass the subspecialty certifying examination.

A resident beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

All subspecialty training must be completed in the United States or Canada, unless the Credentials Committee of the Sub-board has given approval for foreign subspecialty training to a resident *before* he/she enrolls in such a program. A resident wishing to obtain such approval should contact the ABP.

The 1992 examination was the last examination for which a resident may apply unaccredited training toward fulfillment of the certification requirements.

### II. Dual Subcertification in Hematology-Oncology (Internal Medicine and Pediatrics)

There is no change in the usual training requirements in pediatric hematology-oncology for graduates of combined medicine/pediatric programs.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

### Eligibility Criteria for Certification in Pediatric Infectious Diseases

These requirements are not finalized as of this printing.

### Eligibility Criteria for Certification in Neonatal-Perinatal Medicine

The American Board of Pediatrics (ABP) has established a procedure for certification in neonatal-perinatal medicine. In addition to the specific training requirements listed below, there are general requirements which must be fulfilled to be eligible for certification. Those general requirements are printed above.

#### I. Training Requirements

A resident who entered subspecialty training in neonatal-perinatal medicine before January 1, 1986, is not required to complete training in an accredited program. He/she is required, however, to complete training in programs which are operated in association with general comprehensive pediatric programs accredited by the Residency Review Committee for Pediatrics (RRC) or the Royal College of Physicians and Surgeons of Canada (RCPS). Also, only those programs which are a part of an institution which offers residency or fellowship training in obstetrics and gynecology and include experience in fetal-maternal-perinatal medicine will be considered.

A resident who entered training in neonatal-perinatal medicine on or after January 1, 1986, is required to complete training in a neonatal-perinatal medicine program accredited by the RRC or RCPS. Two years of full-time subspecialty residency training including vacation, leave, etc., in neonatal-perinatal medicine is required of a resident in a program under the supervision of a director who is certified in neonatal-perinatal medicine or, lacking such certification, possesses equivalent credentials. The Sub-board requires that the period of training be at least 22 months for a subspecialty resident entering training before January 1, 1989.

Three years of full-time broad-based subspecialty residency training in neonatal-perinatal medicine is required of a resident entering training on or after January 1, 1989. The Sub-board requires that the period of training be at least 33 months for those entering training on or after January 1, 1989. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

A resident beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

For a resident who began training on or after January 1, 1989, the following must be accomplished in order to become certified in the subspecialty: a verification of competence form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Research Competence;" and he/she must pass the subspecialty certifying examination.

All subspecialty training must be completed in the United States or Canada, unless the Credentials Committee of the Sub-board has given approval for foreign subspecialty training to a resident *before* he/she enrolls in such a program. A resident wishing to obtain such approval should contact the American Board of Pediatrics.

The 1991 examination was the last examination for which a resident may apply unaccredited training toward fulfillment of the certification requirements.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

### Eligibility Criteria for Certification in Pediatric Nephrology

The American Board of Pediatrics (ABP) has established a procedure for certification in pediatric nephrology. In addition to the specific training requirements listed below, there are general requirements which must be fulfilled to be eligible for certification. Those general requirements are printed above.

#### I. Training Requirements

A resident who entered subspecialty training in pediatric nephrology before January 1, 1987, is not required to complete training in an accredited program. He/she is required, however, to complete pediatric nephrology training in programs which are operated in association with general comprehensive pediatric programs accredited by the Residency Review Committee for Pediatrics (RRC) or Royal College of Physicians and Surgeons of Canada (RCPSC). A resident who entered pediatric nephrology training before January 1, 1987, may apply for admission on the basis of completion of 2 years of subspecialty residency in pediatric nephrology. The Sub-board requires that the period of training be at least 22 months for those subspecialty residents.

Three years of full-time broad-based subspecialty residency training in pediatric nephrology is required of a resident entering training on or after January 1, 1987, in a program under the supervision of a director who is certified in pediatric nephrology, or lacking such certification, possesses equivalent credentials. The Sub-board requires that the period of training be at least 33 months for those entering training on or after January 1, 1987. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

A resident who entered training in pediatric nephrology on or after January 1, 1987, will be required to complete 3 years of subspecialty residency in a program accredited for training in pediatric nephrology by the RRC or RCPSC.

For a subspecialty resident who began training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a verification of competence form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Research Competence;" and he/she must pass the subspecialty certifying examination.

A resident beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

All subspecialty training must be completed in the United States or Canada, unless the Credentials Committee of the Sub-board has given approval for foreign subspecialty training to a resident *before* he/she enrolls in such a program. A resident wishing to obtain such approval should contact the ABP.

The 1993 examination will be the last examination for which a resident may apply unaccredited training toward fulfillment of the certification requirements.

#### II. Dual Subcertification in Nephrology (Internal Medicine and Pediatrics)

The Sub-board of Pediatric Nephrology has established the following requirements for individuals who are graduates of combined training programs in general internal medicine and general pediatrics. Pediatric nephrology training must be in programs accredited by the RRC or RCPSC.

1. The candidate must have at least 1 year of broad-based clinical pediatric nephrology training.
2. The candidate must have a minimum of 1 year of research training related to pediatric nephrology. The setting for the research training should be one which is most suitable for the candidate's interest.
3. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a verification of competence form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Research Competence;" and he/she must pass the subspecialty certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (PL 1,2,3).
4. A candidate interested in certification in "adult" nephrology should contact the American Board of Internal Medicine.
5. The total length of training leading to dual subcertification must be at least 4 years in duration.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

### Eligibility Criteria for Certification in Pediatric Pulmonology

The American Board of Pediatrics (ABP) has established a procedure for certification in pediatric pulmonology. In addition to the specific training requirements listed below, there are general requirements which must be fulfilled to be eligible for certification. Those general requirements are printed above.

#### I. Training Requirements

For admission to the examination, a subspecialty resident must have completed one of the following to qualify:

- A. A resident who entered pediatric pulmonology training before January 1, 1986, may apply for admission on the basis of completion of 2 years of subspecialty residency training in pediatric pulmonology in a program under the supervision of a director who is certified in pediatric pulmonology or, lacking such certification, possesses equivalent credentials. Clinical training must be comprehensive and intensive. Only those pediatric pulmonology training programs which are operated in association with general comprehensive pediatric residency programs accredited by the Residency Review Committee for Pediatrics (RRC) or Royal College of Physicians and Surgeons of Canada (RCPSC) will be considered. The Sub-board requires that the period of training be at least 22 months for those subspecialty residents.

Three years of full-time broad-based subspecialty residency training in pediatric pulmonology is required of a resident entering training on or after January 1, 1986. The Sub-board requires that the period of training be at least 33 months for those entering training on or after January 1, 1986. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a resident who began training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: a verification of competence form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Research Competence;" and he/she must pass the subspecialty certifying examination.

A resident beginning training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

A resident entering a program after January 1, 1992, must have his/her training in a program accredited by the RRC or RCPSC in order to be eligible to take the certifying examination in pediatric pulmonology.

All subspecialty training must be completed in the United States or Canada, unless the Credentials Committee of the Sub-board has given approval for foreign subspecialty training to a resident *before* he/she enrolls in such a program. Residents wishing to obtain such approval should contact the ABP.

For an individual using the subspecialty residency training route (A), verification of competence form(s) will be required from the director(s) of the resident's pediatric pulmonology training program(s).

- B. Five years of broad-based practice experience in pediatric pulmonology. Broad-based pediatric pulmonology is defined as encompassing the majority of the clinical components which are included in the "1978 Guidelines for Pediatric Pulmonary Training" (Mellins RB, Chernick V, Doershuk CF, et al: Report of the task force to establish guidelines for pediatric pulmonary training. *Pediatrics* 62:256-257, 1978). A minimum of 50% of full-time professional activity must be spent in pediatric pulmonology to receive credit. It is assumed that night and weekend time would be distributed in the same manner as regular time. These 5 years should be of such type and quality that they substitute for the clinical exposure one might have encountered during subspecialty residency training. *All pediatric pulmonology experience must be accrued before December 31, 1990.* No foreign experience will be accepted by the Credentials Committee in fulfillment of the requirements.

For an individual using the practice experience route (B), evaluation form(s) will be required from the program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing pediatric pulmonology.

- C. Pediatric pulmonology subspecialty residency training/experience equal to 5 years as outlined in either of the methods below:
1. A resident completing less than 12 months of subspecialty residency training in pediatric pulmonology may receive credit on a month-for-month basis. For example, a 9-month subspecialty residency would be credited for 9 months of experience; this, added to 4 years and 3 months of pediatric pulmonology experience would total 60 months or 5 years. These 5 years must be accrued before December 31, 1990.
  2. A resident completing 12 to 23 months of subspecialty residency training in pediatric pulmonology may receive credit on a two-for-one basis. For example, an 18-month subspecialty residency would be credited for 36 months of experience; this, added to 24 months of pediatric pulmonology experience would total 60 months or 5 years. These 5 years must be accrued before December 31, 1990. No credit for partial training will be given for a resident who began training after January 1, 1986.

For an individual using the combination pediatric pulmonology subspecialty residency training/experience route (C), verification form(s) will be required from the director(s) of the applicant's training program(s) and evaluation form(s) will be required from the program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing pediatric pulmonology.

The completed verification and evaluation forms should be sent directly to the ABP.

An applicant entering the examination via routes (B) or (C) must make application, be approved for and take the examination given in or before 1992. The Credentials Committee will evaluate an applicant

based upon the pediatric pulmonology experience accrued during the 5 years before the date of the examination.

The 1995 examination will be the last examination for which an applicant may apply unaccredited training toward fulfillment of the certification requirements.

## II. Dual Subcertification in Pulmonology (Internal Medicine and Pediatrics)

The Sub-board of Pediatric Pulmonology has established the following requirements for individuals who are graduates of combined training programs in general internal medicine and general pediatrics. On or after January 1, 1992, pediatric pulmonology training must be in an RRC accredited program.

1. The candidate must have at least 1 year of broad-based clinical pediatric pulmonology training.
2. The candidate must have a minimum of 1 year of research training related to pediatric pulmonology. The setting for the research training should be one which is most suitable for the candidate's interest.
3. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a verification of competence form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Research Competence;" and he/she must pass the subspecialty certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (PL 1,2,3).
4. A candidate interested in certification in "adult" pulmonology should contact the American Board of Internal Medicine.
5. The total length of training leading to dual subcertification must be at least 4 years in duration.

## II. Subcertification in Pediatric Pulmonology and Allergy/Immunology

The intent of this route is to outline a mechanism whereby residents already certified in pediatrics may qualify for subcertification in both pediatric pulmonology and allergy/immunology in a shorter total period of time than that presently required (3 years pediatric pulmonology plus 2 years allergy/immunology). This can be accomplished by successfully completing research training relating to the requirements of both the Sub-board of Pediatric Pulmonology and the Conjoint Board of Allergy/Immunology.

The total training program would require no less than 4 years (48 months) with at least 1 year spent in clinical pulmonology training and 1 year in clinical training for allergy/immunology. The minimal research requirement is 12 months in an environment and project relevant to both pulmonology and allergy/immunology. The fourth year would be spent in training acceptable to the Sub-board of Pediatric Pulmonology and may be in clinical training or relevant additional research training.

1. Training in pediatric pulmonology may precede or follow training in allergy/immunology.
2. The candidate must train in pediatric pulmonology and allergy/immunology programs accredited by the RRC; the two programs do not necessarily have to be at the same institution. The research project selected by the trainee must be discussed with and approved by both training program directors.
3. The trainee must supply written details of any research project for which he/she plan, to seek joint approval of both the Sub-board of Pediatric Pulmonology and the Conjoint Board of Allergy/Immunology before or early in the course of their first subspecialty training program. The Sub-board and Conjoint Board, in turn, will provide a preliminary written opinion to the trainee concerning the accept-

ability of the research project. This prior approval is no guarantee of acceptance of final research product.

4. The trainee is required to satisfy the general and special requirements for the Sub-board and Conjoint Board as listed in the *Directory of Graduate Medical Education Programs*. Final admission to either certification examination is granted by the Credentials Committees after completion of training, fulfillment of the research competence requirements and review of all application materials submitted by the candidate.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

## Eligibility Criteria for Certification in Pediatric Rheumatology

The American Board of Pediatrics (ABP) has established a procedure for certification in pediatric rheumatology. In addition to the specific training requirements listed below, there are general requirements which must be fulfilled to be eligible for certification. Those general requirements are printed above.

### I. Training Requirements

For admission to the examination, a subspecialty resident must have completed one of the following to qualify:

- A. A resident who entered pediatric rheumatology training before January 1, 1992, may apply for admission on the basis of completion of 2 years of subspecialty residency training in pediatric rheumatology in a program under the supervision of a director who is certified in pediatric rheumatology, or, lacking such certification, possesses equivalent credentials. Only those pediatric rheumatology training programs which are operated in association with general comprehensive pediatric residency programs accredited by the Residency Review Committee for Pediatrics (RRC) or the Royal College of Physicians and Surgeons of Canada (RCPSC) will be considered. The Sub-board requires that the period of training be at least 22 months for those subspecialty residents.

Three years of full-time broad-based subspecialty residency training in pediatric rheumatology is required of a resident entering training on or after January 1, 1992. The Sub-board requires that the period of training be at least 33 months for those entering training on or after January 1, 1992. Extended absences, whether for vacation, maternity leave, illness, etc., must be made up. If the program director believes that an extended absence of more than 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a pediatric rheumatology resident who began training on or after January 1, 1992, the following must be accomplished in order to become certified in the subspecialty: a verification of competence form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Research Competence;" and he/she must pass the subspecialty certifying examination.

A resident beginning part-time training after January 1, 1992, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Sub-board has given approval for foreign subspecialty training to a resident before he/she enrolls in such a program. A resident wishing to obtain such approval should contact the ABP. A resident completing pediatric rheumatology training in Canada in programs approved for general pediatrics by the RCPSC will be considered on an individual basis by the Credentials Committee of the Sub-board.

For an individual using the subspecialty residency training route (A), verification of competence form(s) will be required from the director(s) of the resident's pediatric rheumatology training program(s).

- B. Five years of broad-based practice experience in pediatric rheumatology. A minimum of 50% of full-time professional activity must be spent in the practice of pediatric rheumatology to receive credit. It is assumed that night and weekend time would be distributed in the same manner as regular time. These 5 years should be of such type and quality that they substitute for the clinical exposure one might have encountered during subspecialty residency training. *All pediatric rheumatology experience must be accrued before December 31, 1996.* No foreign experience will be accepted by the Credentials Committee in fulfillment of the requirements.

For an individual using the practice experience route (B), evaluation form(s) will be required from the program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the resident is now or has been practicing pediatric rheumatology.

- C. Pediatric rheumatology subspecialty residency training/experience to equal 5 years as outlined in either of the methods below:
  1. A resident completing less than 12 months of subspecialty residency training in pediatric rheumatology may receive credit on a month-for-month basis. For example, a 9-month subspecialty residency would be credited for 9 months of experience; this, added to 4 years and 3 months of pediatric rheumatology experience would total 60 months or 5 years. These 5 years must be accrued before December 31, 1996.
  2. A resident completing 12 to 23 months of subspecialty residency training in pediatric rheumatology may receive credit on a two-for-one basis. For example, an 18-month subspecialty residency would be credited for 36 months of experience; this, added to 24 months of pediatric rheumatology experience would total 60 months or 5 years. These 5 years must be accrued before December 31, 1996. No credit for partial training will be given for a subspecialty resident who began training on or after January 1, 1992.

For an individual using the combination pediatric rheumatology subspecialty residency training/experience route (C), verification form(s) will be required from the director of the resident's training program(s) and evaluation form(s) will be required from the program director (if there is a subspecialty training program) or the pediatric department chairman or the chief of pediatrics in the hospital(s) where the resident is now or has been practicing pediatric rheumatology.

The completed verification and evaluation form(s) should be sent directly to the ABP.

A resident entering the examination via routes (B) or (C) must make application, be approved for, and take the examination given in or before 1997. The Credentials Committee will evaluate a resident based upon the pediatric rheumatology experience accrued during the 5 years before the date of the examination.

At the present time, the RRC has not begun the process of accrediting training programs in pediatric rheumatology. A resident entering subspecialty training in this field before completion of the accreditation process by the RRC is advised to enter those programs in which the director or senior faculty of the program is/are certified in pediatric rheumatology or possesses equivalent credentials. Only those pediatric rheumatology training programs which are operated in association with general comprehensive pediatric programs accredited by the RRC or RCPSC will be considered. The Sub-board will not address the issue of accepting programs in pediatric rheumatology accredited by the RCPSC until the RRC takes action.

## II. Dual Subcertification in Rheumatology (Internal Medicine and Pediatrics)

The Sub-board of Pediatric Rheumatology has established the following requirements for individuals who are graduates of combined training programs in general internal medicine and general pediatrics. Pediatric rheumatology training must be in a program in the US or Canada. Once the RRC accredits programs, training must be in an accredited program.

1. The candidate must have at least 1 year of broad-based clinical pediatric rheumatology training.
2. The candidate must have a minimum of 1 year of research training related to pediatric rheumatology. The setting for the research training should be one which is most suitable for the candidate's interest.
3. In order to become certified in the subspecialty, the following must be accomplished by a subspecialty resident: a verification of competence form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical and research competence; the resident must meet the criteria as stated in the "Principles Regarding the Assessment of Research Competence;" and he/she must pass the subspecialty certifying examination. No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the usual general pediatric residency years (PL 1,2,3).
4. A candidate interested in certification in "adult" rheumatology should contact the American Board of Internal Medicine.
5. The total length of training leading to dual subcertification must be at least 4 years in duration.

It should be noted that these criteria and conditions are subject to change without notice. All applicants are advised to contact the ABP to ascertain whether the information they have is current.

## American Board of Physical Medicine and Rehabilitation

John L. Melvin, MD, Chairman, Milwaukee, Wisconsin  
Phala A. Helm, MD, Vice Chairwoman, Dallas, Texas  
Murray E. Brandstater, MD, Loma Linda, California  
Robert P. Christopher, MD, Memphis, Tennessee  
Joel A. DeLisa, MD, West Orange, New Jersey  
Bruce M. Gans, MD, Detroit, Michigan  
Joseph C. Honet, MD, Detroit, Michigan  
F. Patrick Maloney, MD, North Little Rock, Arkansas  
Malcolm C. McPhee, MD, Scottsdale, Arizona  
James W. Swenson, MD, Salt Lake City, Utah  
Joachim L. Optiz, MD, Executive Director  
Norwest Center, Suite 674  
21 First Street, SW  
Rochester, MN 55902

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Physical Medicine and Rehabilitation to ascertain whether the information below is current.)*

### General Requirements for Certification

- A. Graduates of Educational Institutions in the United States and Canada.
  1. Graduation from a medical school approved by the Liaison Committee on Medical Education, or graduation from a Canadian medical school approved by the Canadian Medical Association, or graduation from an osteopathic medical school approved by the American Osteopathic Association.

2. Satisfactory completion of the requirements of the Board for graduate education and experience in physical medicine and rehabilitation as set forth below.
3. Satisfactory compliance with rules and regulations of the Board pertaining to the completion and filing of the application for examination and the payment of required fees.

- B. Graduates of Educational Institutions not in the United States and Canada.
  1. Graduation from a school which, in the opinion of the Board, offers medical education equivalent to a medical school approved by the Liaison Committee on Medical Education.
  2. Possession of a valid certificate from the Educational Commission for Foreign Medical Graduates (ECFMG) and, optionally, a certificate from the Federation Licensing Examination (FLEX), or the Fifth Pathway. International medical graduates (both alien and US citizens) will be expected to complete the ECFMG examination format, FMGEMS (Foreign Medical Graduate Examination in Medical Science), including basic and clinical examinations, and, when indicated, English proficiency, or NBME Parts I and II. This is required by the Accreditation Council on Graduate Medical Education (ACGME) before a resident can enter accredited graduate medical education programs in the United States.
  3. Satisfactory completion of the Board's requirements for graduate education and experience in physical medicine and rehabilitation as set forth below.
  4. Satisfactory compliance with rules and regulations of the Board pertaining to the completion and filing of the application for examination and the payment of required fees.
- C. Having a valid and unrestricted license to practice in one or more of the 50 United States, Puerto Rico, or Canada, or another appropriate credential to practice medicine acceptable to the Board is required for certification by the Board.

### Residency Training Requirements

Applicants for the certifying examinations must have satisfactorily completed 48 months (4 years) of training in a physical medicine and rehabilitation residency approved by the ACGME on recommendation of the Residency Review Committee for Physical Medicine and Rehabilitation. The program must include 36 months of training in physical medicine and rehabilitation. Twelve of the 48 months of training should consist of a coordinated program of experience in fundamental clinical skills which includes 6 months in family practice, internal medicine, pediatrics, or general surgery, or a combination of these. The other 6 months of the year of experience may include no less than one month in any of the following more specific categories: cardiology, radiology, neurology, urology, rheumatology, nephrology, vascular medicine, pediatrics, pulmonary medicine, neurosurgery, orthopedic surgery, family practice, general surgery, general internal medicine, emergency medicine, psychiatry, oncology, critical care medicine, and anesthesiology.

The program director and the Credentials Committee of the Board, at the beginning of the residency, will make the decision regarding the acceptability for credit for the year of non-physical medicine and rehabilitation coordinated program of experience in fundamental clinical skills (see above) in an ACGME-approved year of residency, or an accredited "transitional" year as defined by the ACGME.

This format is mandatory for all residents who enter training in 1985 or subsequently. In some instances, 3 years of physical medicine and rehabilitation residency may be acceptable on recommendation of the program director, with 1 year of credit being granted on the basis of training criteria described above, such as other residency training or a nonintegrated transitional year.

## Credit for Other Specialty Training

Candidates who have had 1 year or more of residency training (up to and including certification) in a residency approved by the ACGME or by the Royal College of Physicians and Surgeons of Canada or an osteopathic internship approved by the American Osteopathic Association may receive up to 12 months of non-physical medicine and rehabilitation training credit on recommendation of the program director and at the discretion of the Board. However, completion of 36 months of the physical medicine and rehabilitation training requirement is mandatory. The maximum of 12 months of training credit will be considered for approval by the Board only upon recommendation of the residency training program director.

No credit will be given towards shortening the basic required 4-year program for internships; for non-ACGME approved residencies or fellowships; for Fifth Pathway in a United States AMA-designated training institution; or for hospital house physician experience.

A resident entering or beginning the required 4-year program in physical medicine and rehabilitation with previous approved graduate training or educational experience may qualify for an institutional appointment at the second year level. However, such an appointment may not be interpreted to mean that the resident is in the second year of a physical medicine and rehabilitation residency. Such a resident will be considered by the Board to be in the first year of the required 4-year residency training program as stated above, unless other arrangements are made by the program director and the specialty Board.

Essentially all of the required training and experience as stated above must have been taken in the United States or Canada. However, a candidate who received graduate medical education beyond an internship in a foreign country may, at the discretion of the Board, and recommended by the program director, be granted limited credit for such training but not more than 6 months.

## Requirements for Admissibility to Part I of the Board Examination

To be admissible to Part I of the Board examination, candidates are required to complete satisfactorily at least 48 months of postgraduate residency training of which at least 36 months are spent in supervised education and clinical practice in physical medicine and rehabilitation and 12 months in internal medicine or an acceptable alternative in an ACGME accredited training program.

Satisfactory completion of educational and training requirements in force at the beginning of the resident's training in an accredited program will be considered acceptable for application for admissibility to the certifying examination. Residents in approved physical medicine and rehabilitation training programs in Canada, on satisfactory completion of *all* the requirements for certification in that country, may apply for admissibility to Part I of the American Board.

Final admissibility is contingent upon receipt of the final-year evaluation by the program director by May 1 in the examination year.

If a resident is placed on probationary status during the final year of his or her residency program, this status must be rescinded by the program director before May 1 for the resident to be admissible.

## Requirements for Admissibility to Part II of the Board Examination

At least a full year of broadly based clinical practice of physical medicine and rehabilitation following completion of residency training is required. The clinical practice should provide evidence of professional, ethical, and humanistic standards attested to by two fellows of the American Academy of Physical Medicine and Rehabilitation. In rare instances in which a physiatrist is not geographically available, two licensed physicians may support the candidate's application for Part II.

Alternately, a candidate may take Part I and II together if all residency training and the practice time requirement are completed.

However, if the candidate fails Part I, Part II will not count or be recognized in any way.

*An optional fifth year in a physical medicine and rehabilitation residency* which includes at least 6 months of advanced clinical practice of physical medicine and rehabilitation with essentially full patient responsibility, and also includes teaching experience, plus opportunities for time in research or relevant clinical or basic science electives may qualify such resident for admissibility to Part II of the certifying examinations upon the recommendation of the training program director. An optional fifth year may be valuable for those anticipating a full or part-time academic career. *An integrated pathway specifically for clinical research training* within a 5-year residency training program is specified and recognized by the Board.

Possession of a valid and unrestricted license to practice in one or more of the 50 United States, Puerto Rico, or Canada, or another appropriate credential to practice medicine acceptable to the Board is required for certification by the Board.

## Dual Specialty Certification

For those desiring to pursue double specialty certification the Board will participate with the Boards of Internal Medicine, Pediatrics, and Psychiatry and Neurology, provided there is completion of 36 months of accredited training in general comprehensive physical medicine and rehabilitation. The proposed program agreed to by the respective training program directors should be submitted to both Boards for approval before or during the first quarter of training, or by the end of the third year of training in the case of dual residency in physical medicine and rehabilitation and psychiatry and neurology.

### **A. Special Agreement Between the American Board of Pediatrics and the American Board of Physical Medicine and Rehabilitation**

There exists a special agreement between the American Board of Pediatrics (ABP) and the American Board of Physical Medicine and Rehabilitation (ABPM&R) whereby a physician interested in pediatric rehabilitation can qualify for admission to the certifying examinations of both Boards. The residency programs may be designed to be completed in approximately 60 months. The non-physical medicine and rehabilitation 12-month segment of the 4-year physical medicine and rehabilitation residency will be credited on the basis of satisfactory completion of the regular first year of pediatric residency.

The American Board of Pediatrics requires a minimum of 36 months of general comprehensive pediatric training with 6 months' credit for pediatric rehabilitation within the physical medicine and rehabilitation training. The American Board of Physical Medicine and Rehabilitation requires a minimum of 36 months accredited physical medicine and rehabilitation residency with 6 months' credit for related rotations during the pediatric training. Six months of full-time equivalent (FTE) of pediatric rehabilitation is required.

It is recommended that all training be completed at one academic institution but any deviation will require prospective approval by both Boards. At the beginning of the residency, both proposed individual programs must be submitted in detail to the Credentials Committee of each specialty Board for approval. When two separate institutions are involved, there should be evidence of adequate coordination to provide an appropriate educational experience. Vacation is shared pro rata between the training time spent in pediatrics and physical medicine and rehabilitation.

### **B. Special Agreement Between the American Board of Internal Medicine and the American Board of Physical Medicine and Rehabilitation**

There exists a special agreement between the American Board of Internal Medicine (ABIM) and the American Board of Physical Medicine and Rehabilitation (ABPM&R) whereby a prospective resident interested in dual specialty certification in internal medicine and in physical medicine and rehabilitation can qualify to apply to admission to the certifying examinations of each Board by satisfactory com-

pletion of a preplanned coordinated program which could be designed to be completed in a minimum of 60 months.

The non physical medicine and rehabilitation 12-month segment of the 4-year physical medicine and rehabilitation residency concerned with basic fundamental clinical skills will be credited on the basis of satisfactory completion of the regular first year of internal medicine residency. In addition, the ABPM&R requires a minimum of 36 months of accredited physical medicine and rehabilitation residency. It would be agreed that up to 6 months of pertinent and related internal medicine rotations of 1 to 3 months in such areas as rheumatology, endocrinology, cardiovascular, or pulmonary could be accepted for elective credit in the 36-month physical medicine and rehabilitation segment. The ABPM&R requirements for 12 months of clinical practice, for admissibility to Part II of the Board examination, can be met by documented evidence that at least 50% of this practice is devoted to physical medicine and rehabilitation.

The 3-year internal medicine residency requirement could be in part met by ABIM recognizing 6 months credit to physical medicine and rehabilitation residency training involving physical medicine and rehabilitation management of patients with internal medicine related problems such as occur in those with various rheumatologic, cardiovascular, pulmonary, stroke and oncologic conditions.

It is recommended that all training be completed at one academic institution, however, any deviation will require prospective approval by both boards. At least before the end of the R-1 level of training in either specialty, each Board would prospectively approve detailed curricular plans for a given trainee submitted by the two program directors. When two separate institutions are involved, there should be evidence of adequate coordination to provide an appropriate educational experience. Vacation is shared pro rata between the training time spent in internal medicine and in physical medicine and rehabilitation.

### **C. Special Agreement Between the American Board of Psychiatry and Neurology and the American Board of Physical Medicine and Rehabilitation**

The American Board of Psychiatry and Neurology (ABPN) and the American Board of Physical Medicine and Rehabilitation (ABPM&R) propose that residents interested in dual certification in neurology and in physical medicine and rehabilitation can qualify to apply for admission to the certifying examinations of each Board by satisfactory completion of a coordinated program planned prior to the end of the PGY-3 year, which could be designed to be completed in a minimum of 72 months.

For purposes of this double-boarding, both specialty Boards will require a 12-month basic clinical skills segment in internal medicine.

The ABPM&R requires a minimum of 36 months of accredited physical medicine and rehabilitation residency and ABPN requires 36 months of accredited neurology residency. In order to decrease the total training time by 1 year, to a total of 72 months, 12 months of training would be in areas that would satisfy the special requirements in neurology and physical medicine and rehabilitation and would also be agreed to by each program director. It would be agreed that a year in common to physical medicine and rehabilitation and neurology would include 6 months of training in physical medicine and rehabilitation acceptable to the program director in Neurology and 6 months of training in neurology that would be acceptable to the program director in physical medicine and rehabilitation. Physical medicine and rehabilitation and neurology would each require an additional 2 years of training in the respective specialty residencies.

It is recommended that all training be completed at one academic institution, or if two institutions are involved, there should be evidence of adequate coordination to provide an appropriate educational experience which would meet the requirements of each Board. Before the end of the PGY-3 year of training in either specialty, *each Board* must approved the training plan for a given trainee submitted by the two program directors. Where there is overlap, vacation is shared pro rata between the two training programs.

## **Application**

The application form which must be submitted by a candidate applying for the examination leading to certification can be obtained *only* by writing to the executive director of the Board. The completed application shall contain a record of the candidate's undergraduate and postgraduate training and a copy of the medical degree diploma or certificate, a copy of the current medical license to practice in the 50 United States, Puerto Rico, or Canada, or another current credential to practice medicine acceptable to the Board, the program director's statement that the candidate has or will have satisfactorily completed an approved graduate program, other graduate study, hospital staff appointments, teaching positions, length of time in a practice which has been limited to physical medicine and rehabilitation, medical papers published, and any other information the candidate deems relevant to the determination of the admissibility for examination.

In addition, there must be submitted with the application the names of three psychiatrists or other physicians to whom the Board may write for professional and character references. At the option of the applicant, he or she may include the names of any additional physicians. The candidate will submit to the program director a form requesting him/her to rate the professional ability of the applicant which they will promptly return to the Board office. No decision regarding admissibility to the examination will be made until the physicians from whom references are requested have replied.

All information submitted to the Board by the physician from whom a reference has been requested shall remain confidential and will not be disclosed to the candidate without the permission of the said physician. Strict confidentiality of references submitted is required to assure that the Board receives complete and accurate evaluations of all candidates.

A candidate who plans to take Part I only must submit a fee of \$650, \$200 of which is a processing fee and not refundable nor reassessed. The fees must accompany the application. The candidate who is applying for Part II must write a letter of application which includes a brief description of his/her year of broadly based clinical practice and send an examination fee of \$600, and must also submit a two statements from physicians, preferably Board certified psychiatrists, verifying that the candidate has practiced physical medicine and rehabilitation full-time for 1 year. A candidate who plans to take both Parts I and II, initially the same year, must send with the application, the fee of \$1250. Two hundred dollars (\$200), as heretofore mentioned, is a processing fee and not refundable. Fees for reexamination are \$450 for Part I or \$600 for Part II, or if both Parts I and II are retaken the same year, the fee is \$1050.

The completed application form or letter of application, as applicable, and appropriate fee must be submitted by November 15 of the year before the scheduled examination. A penalty fee of \$100 will be required before consideration of applications postmarked after November 15 and before December 15, the absolute deadline for receiving applications. Once a candidate is declared admissible, fees are forfeited if the candidates withdraws for any reason or does not appear for the examination.

The candidate must have completed his/her graduate education or clinical practice requirements on or before August 31 following the scheduled examination date for which he/she has applied in order to have the application considered for the examination of that year. Except as hereafter provided, no fees paid hereunder will be refunded. Only in the event that a candidate withdraws his/her application prior to the meeting of the Board to act thereon or in the event that a candidate is declared not admissible to the examination, will the Board return to the candidate the refundable portion of the fee.

The Board is a non-profit organization and the fees of the candidates are used solely for defraying the actual expenses of the Board. The members of the Board serve without remuneration. The Board reserves the right to change the fees when necessary.

## Designation of Admissibility

"Board admissible" is a term used by the Board to define the status of the candidate who has been accepted by the Board to take the examination for which the candidate has applied; designation of "Board admissible" does not continue beyond the date such examination is given, regardless of results.

- A. For those candidates who have not previously applied or who have previously applied and withdrawn their application or who have previously applied and have been declared not admissible, the procedures required of candidates to be designated board admissible are as follows:
1. Timely filing of the application form and educational credentials with the executive director of the Board by the applicant.
  2. Payment of the fee for the examination by the applicant.
  3. Receipt of the program directors and other requested references.
  4. Transmission of a letter of confirmation from the executive director of the Board to the candidate verifying that the applicant has fulfilled all requirements, and by Board action has been declared admissible.
- B. For candidates who are reapplying for Part I, having failed Part I; or who are applying for Part II, having successfully completed Part I, or who are reapplying for Part II, having failed Part II but who have successfully passed Part I, the procedures required of candidates to be designated Board admissible are as follows:
1. Submitting a letter of reapplication for Part I of the examination by the applicant to the executive director of the Board or, as requested, the resubmission of an application form, or
  2. Submitting a letter of application for Part II of the examination by the applicant to the executive director of the Board. The letter should contain a statement describing the one year of full-time broadly based clinical practice.
  3. Payment of the examination fee by the applicant.
  4. At least a full year of broadly based clinical physical medicine and rehabilitation following completion of residency training is required. The clinical practice should provide evidence of professional, ethical, and humanistic standards attested to by two fellows of the American Academy of Physical Medicine and Rehabilitation. In rare instances in which a physiatrist is not geographically available, two licensed physicians may support the candidate's application for Part II.
  5. Transmission of a letter of confirmation from the executive director of the Board to the candidate verifying that the applicant has fulfilled all requirements, and by Board action has been declared admissible.

Following the establishment of Board admissibility, the candidate will be notified of the time and place for the examination.

A candidate who fails Part I or Part II or both Parts of the examination may reapply for admissibility for reexamination, if done before November 15 of the year before the scheduled examination.

## Absence from Training

The Board stipulates that a resident should not be absent from the residency training for more than 6 weeks yearly. Any leave time or absence beyond 6 weeks would need to be made up by arrangement with the program director. "Leave time" includes sick leave, vacation, maternity leave, leave for locum tenens, clinical trips or work in another institution that is not an ACGME accredited residency. Leave time or vacation may not be accumulated to reduce the overall duration of training. Institutional policies regarding absences will be respected.

## Forfeiture of Fees

Once a candidate is declared admissible, the fees are forfeited if the candidate withdraws for any reason or does not appear for the examination.

## Examinations

As part of the requirements for certification by the American Board of Physical Medicine and Rehabilitation, candidates must demonstrate satisfactory performance in an examination conducted by the Board covering the field of physical medicine and rehabilitation.

The examination for certification is given in two parts. Part I is written, Part II is oral.

Part I (written) may be taken after the satisfactory completion of the specialized graduate education required by the Board outlined above.

Part II (oral) may be taken only after 1 year of full-time broadly based practice in physical medicine and rehabilitation, following residency training, or an acceptable variant.

In the event a candidate, taking both Part I and Part II in the same year, fails Part I of the examination, results of Part II shall not be considered or disclosed.

Both the written and oral examinations will cover certain aspects of the basic sciences as well as clinical physical medicine and rehabilitation. Those basic sciences will include:

1. Anatomy, including kinesiology and functional anatomy.
2. Physics, related to the field.
3. Physiology, including physiology of nerve, muscle, and bone and physiologic effects of the various physical agents used in physical medicine and rehabilitation.
4. Pathology, particularly of the nervous and musculoskeletal systems.
5. Other fundamental sciences: The applicant may be examined concerning his/her knowledge of other subjects related to physical medicine and rehabilitation.

The clinical aspects will include:

1. Those diseases and conditions that come within the field of physical medicine and rehabilitation including those of children. These include various rheumatic diseases; neuromuscular diseases; nervous system diseases (eg, cerebral vascular accidents, postoperative sequelae of surgery of the brain and spinal cord, peripheral nerve conditions, cerebral palsy, spinal cord and brain injuries), and musculoskeletal diseases, including the large group of traumatic conditions.
2. The clinical use of such physical agents as heat, water, electricity, ultraviolet radiation, massage, exercise, and rehabilitation techniques.
3. Diagnostic procedures including electromyography and electrodiagnosis.
4. A knowledge of the roles of allied personnel within or associated with the field of physical medicine and rehabilitation, such as the physical therapist, occupational therapist, clinical psychologist, speech pathologist and therapist, medical social worker, recreational therapist, and vocational counselors; and the ability to coordinate the services of such personnel.
5. An understanding of the basic principles of physical medicine and rehabilitation, and the ability to prescribe and supervise specific treatment to be executed by allied health personnel.

## Method of Examination

Part I and Part II of the Board examination are given once each year, usually in May or June, at such time and place as the Board shall designate.

Part I is a written examination. This examination is divided into morning and afternoon periods of approximately 3 hours each. The questions are designed to test the candidate's knowledge of basic sciences and clinical management as related to physical medicine and rehabilitation, and will be in the form of objective testing.

Part II is an oral examination. The oral examinations are given by the members of the Board with the assistance of selected guest examiners.

Candidates will be expected to present in a concise, orderly fashion evidence of their proficiency in the management of various clinical conditions which come within the field of physical medicine and rehabilitation. During the oral examination, questions will be asked about diagnostic procedures, therapeutic procedures and patient management. The candidate should be prepared to demonstrate his/her ability to interpret roentgenologic, electrodiagnostic and other material related to patient management. The candidate should demonstrate familiarity with the literature of basic and clinical research. Conciseness and clarity of statement is expected. Evidence of the maturity of the candidate in the use of factual knowledge and clinical procedures will be sought.

**Unethical Behavior**

The Board believes that the ethics of candidates for certification is a proper matter for its concern. Scores on the Part I examination may be invalidated for reasons of irregular behavior that indicates cheating. Reports of irregular behavior may be checked by statistical methods, and if they are confirmed, sanctions may be imposed. If the examination score is invalidated because of irregular behavior, the Board will not consider the candidate's application for a period of at least 3 years. A repeat application and Part I examination fee will be required.

**Certificate**

Upon approval of the candidate's application and successful completion of the examinations, the Board will grant a certificate to the effect that the candidate has met the qualifications required by the Board for the specialty of physical medicine and rehabilitation. The recipient of a certificate shall be known as a certificant or a diplomate of the American Board of Physical Medicine and Rehabilitation.

The Board will issue 10-year time-limited diplomate certificates in 1993 and subsequently. Recertification procedures and requirements are to be determined and will be published at least 4 years prior to the first anticipated recertification in 2002. Certification issued prior to 1993 will have no time-limited stipulations nor will there be requirements for recertification. Residents entering a training program in 1988 and subsequently are hereby informed and must be aware regarding time-limited certification beginning in 1993.

A certificate granted by this Board does not of itself confer or purport to confer any degree or legal qualifications, privileges, or license to practice physical medicine and rehabilitation. The Board does not limit or interfere with the professional activity of any duly licensed physician who is not certified by this Board. Privileges granted physicians in the practice of physical medicine and rehabilitation in any hospital or clinic are the prerogatives of that hospital or clinic, not of this Board.

The chief aim of the Board is to establish the training requirements, to standardize qualifications for specialists in physical medicine and rehabilitation and to certify as specialists those who voluntarily appear before the Board for such recognition and certification, according to its regulations and requirements; and thereby provide assurance to the public and to the medical profession that certificants possess particular competence in physical medicine and rehabilitation.

The names of consenting diplomates of the Board appear in the *ABMS Directory of Certified Psychiatrists* and in the *Compendium* published by the American Board of Medical Specialties, of Evanston, Illinois, and in the *Directory of Medical Specialists* by Marquis Who's Who, Inc. of Chicago, Illinois.

**American Board of Plastic Surgery**

- Philadelphia, PA 19103-2204

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Plastic Surgery to ascertain whether the information below is current.)*

**Introduction**

The American Board of Plastic Surgery, Inc., which was organized in June 1937 by representatives of various groups interested in this type of surgery, received recognition as a subsidiary of the American Board of Surgery in May 1938. The American Board of Plastic Surgery, Inc. was given the status of a major specialty board in May 1941 by action of the Advisory Board for Medical Specialties as approved by the Council on Medical Education of the American Medical Association, which has designated certain specialty fields as being suitable to be represented by specialty boards.

The Board is organized under the laws of the state of Illinois for charitable, scientific, and educational purposes. No part of its net earnings shall inure to the benefit of any private member, director, officer, or other individual, nor shall the board ever declare or make to any such persons any dividend or other distribution. Nothing herein, however, shall prevent the payment of reasonable compensation for services rendered or the reimbursement of reasonable expenses incurred in connection with the Board's affairs.

Plastic surgeons certified by the Board are listed in the *ABMS Compendium of Certified Medical Specialists*, published by the American Board of Medical Specialties, Evanston, Illinois. A list of diplomates of the Board also appears in the *Directory of Medical Specialists* published by Marquis Who's Who, Inc., of Wilmette, Illinois.

**Sponsoring Organizations**

The American Board of Plastic Surgery, Inc. consists of nineteen directors who manage the affairs of the organization. Eighteen directors are elected by the Board from names submitted by the following sponsoring organizations:

- Association of Academic Chairmen of Plastic Surgery
- The American Association for Hand Surgery
- The American Association of Plastic Surgeons
- The American College of Surgeons
- The American Society for Aesthetic Plastic Surgery, Inc.
- The American Society for Surgery of the Hand
- The American Society of Maxillofacial Surgeons
- The American Society of Plastic and Reconstructive Surgeons, Inc.

The American Surgical Association  
 The Canadian Society of Plastic Surgeons  
 The Council of Regional Societies of Plastic and Reconstructive Surgery  
 The Plastic Surgery Research Council  
 The Society of Head and Neck Surgeons

Once elected to the Board, that person's obligation will be primarily to the Board and not to the sponsoring organization.

In addition, one director is elected by the Board from names submitted by the American Board of Surgery.

These nineteen individuals are the directors of the Board. Surgeons who fulfill the requirements of the Board and who are granted certification by the Board are known as diplomates of the American Board of Plastic Surgery, Inc.

## Purposes

The essential purposes of the Board are:

1. To establish requirements for the qualifications of applicants who request a certificate of their ability in the field of plastic surgery in its broadest sense.
2. To conduct examinations of approved candidates who seek certification by the Board.
3. To issue certificates to those who meet the Board's requirements and pass the respective examinations.
4. To do and engage in any and all lawful activities that may be incidental or reasonably related to any of the foregoing purposes.

The Board is not an educational institution, and certificates issued by the Board are not to be considered degrees. The certificate does not confer on any person legal qualifications, privileges, or license to practice medicine or the specialty of plastic surgery. Standards of certification are clearly distinct from those of licensure; possession of a Board certificate does not indicate total qualification for practice privileges, nor does it imply exclusion of others not so certified. The Board does not purport in any way to interfere with or limit the professional activities of any licensed physician nor does it desire to interfere with any practitioner of medicine in any of his/her regular or legitimate activities.

The Board has never been concerned with measures that might gain special privileges or recognition for its diplomates in the practice of plastic surgery. It is not the intent nor has it been the function of the Board to define requirements for membership on the staff of hospitals, or to define who shall or shall not perform plastic surgical operations. The Board is not a primary source of censure or primary review of ethical problems.

## Policies

It is the Board's prerogative to determine the professional, ethical, moral, physical, and mental fitness of any candidate for its certificate.

It is the policy of the Board to maintain its autonomy and independence from political and economical considerations that might affect plastic surgery.

The Board recognizes the role of legitimate advertising in the changing medical scene; but it does not approve of advertising which arouses unrealistic expectations, which is false or misleading, which minimizes the magnitude and possible risks of surgery, or which solicits patients for operations that they might not otherwise consider. Such advertising is improper and inconsistent with the high standards of professional and ethical behavior implied by certification by the American Board of Plastic Surgery, Inc.

## General Requirements

The following requirements for admissibility are in agreement with those promulgated by the American Board of Medical Specialties.

1. The Board will accept only those persons whose major professional activity is limited to the field of plastic surgery.

2. Moral and ethical fitness must be satisfactory to the Board and in conformity with the code of ethics of the American Society of Plastic and Reconstructive Surgeons, Inc. Practices which do not conform therewith may result in rejection of application or in deferral of examination until such matters have been resolved satisfactorily.

The Board may deny a candidate the privilege of sitting for an examination, or may refuse issuance of a certificate, if it is found by additional disclosures or a recent change in status that the candidate no longer meets the general or professional requirements.

## Professional Requirements

The Board considers the requirements detailed in "Prerequisite Training and Requisite Training" to be minimal. Candidates are encouraged to take advantage of broadening experiences in other fields.

The Board reserves the right:

1. To request lists of operations performed solely by the candidate for 1 or more years.
2. To request special and extra examinations, written or oral, and practical.
3. To request any specific data concerning the candidate that may be deemed necessary before making a final decision for certification.
4. At the Board's discretion it may give consideration to exceptional individuals who did not conform to all of the stipulations concerning the prerequisite and requisite training requirements.

## Prerequisite Training

A minimum of 5 years of training is required in order to fulfill the prerequisite and requisite requirements.

### A. Undergraduate Medical or Osteopathic Education

Before beginning prerequisite training, candidates must have graduated from an accredited school of medicine in the United States, Puerto Rico, or Canada which grants a medical degree, or from an osteopathic school accredited by the American Osteopathic Association. Graduates of medical schools located outside the United States, Puerto Rico, and Canada must either:

1. Pass a medical science examination administered by the Educational Commission for Foreign Medical Graduates (ECFMG) and obtain ECFMG certification for admission to accredited postgraduate training programs in the United States; (FMGEMS and the United States Medical Licensing Examination (USMLE) are currently administered for this purpose.); or
2. Obtain a passing performance on either the 1-day ECFMG medical examination or the 2-day Visa Qualifying Examination (VQE) or;
3. Have completed a Fifth Pathway program in an accredited school of medicine in the United States or Canada.

### B. Official Evaluation of Prerequisite Training

As noted above, official evaluation of prerequisite training by the Board is required prior to the initiation of residency training in plastic surgery. This simple preliminary step will prevent later disappointment. It is the responsibility of all prospective trainees in plastic surgery to secure this evaluation. Each prospective trainee *must* obtain a request for evaluation of training form from the Board office prior to completion of his/her prerequisite training. Along with the completed request for evaluation of training form, prospective candidates are required to submit a copy of their medical school diploma.

Directors of accredited residency training programs in plastic surgery must require all prospective trainees to have an official evaluation and approval of their prerequisite training by the Board before they begin training.

Approval for residency training in plastic surgery will be provided to those individuals who clearly meet the Board's stated requirements. Further information for detailed credential review will be obtained on all other individuals where training was in other than accredited programs. Official evaluations will be made by the commit-

tee on credentials and requirements. Individual officers or members of the Board cannot and will not make such estimates or rulings. It should be emphasized that the answers to many questions require a decision by one or more of the committees of the Board. This applies particularly to evaluation of training and questions of admissibility. Decisions are referred to the entire Board at the next scheduled Board meeting. The process of reaching a final decision may require several months, since the full Board meets only twice annually.

The Board will issue neither a letter verifying prerequisite training nor an application for examination and certification form until the request for evaluation of training Form has been received and approved.

### C. Graduate Education in Surgery

The current prerequisite graduate education in surgery are as follows.

#### For United States or Canadian Doctors of Medicine or Osteopathy

A candidate with a medical degree or doctor of osteopathy from the United States or Canada must have completed one of the following:

1. A minimum of 3 years of clinical training with progressive responsibility in the same program in general surgery. Rotating internships will not be accepted in lieu of a clinical year in general surgery. This program must be approved by the Residency Review Committee for Surgery and accredited in the United States by the Accreditation Council for Graduate Medical Education (ACGME) or in Canada by the Royal College of Physicians and Surgeons for full training. The minimum of 3 years of clinical training with progressive responsibility in the same program in general surgery must be completed before the candidate enters a plastic surgery residency. The satisfactory completion of a minimum of 3 years of clinical training with progressive responsibility in the same program must be verified in writing by the general surgery program director; or
2. An accredited residency training program in neurological surgery, orthopaedic surgery or urology. From these specialties, a *minimum* of 12 months of general surgery training must be completed as part of the residency. Prospective candidates may initiate residency training in plastic surgery following satisfactory completion of the entire course of training in the United States or Canada, as prescribed for certification by the American Board of Neurological Surgery, the American Board of Orthopaedic Surgery, or the American Board of Urology. They must meet and comply with the most current requirements in these specialties. Satisfactory completion of training must be verified in writing by the training program director and evidence of admissibility to the respective specialty board's examination process in the United States is required; or
3. Certification by the American Board of Otolaryngology. Prospective candidates may initiate residency training in plastic surgery following satisfactory completion of the entire course of training as prescribed for certification by the American Board of Otolaryngology, but they may sit for the examination(s) of the American Board of Plastic Surgery, Inc. only after becoming certified by the American Board of Otolaryngology. The satisfactory completion of this training must be verified in writing by the otolaryngology program director.

#### For United States Candidates with a Combined DMD or DDS/MD Degree

Satisfactory completion of a residency program in oral and maxillofacial surgery approved by the American Dental Association (ADA) is an alternate pathway for prerequisite training prior to plastic surgery residency. The satisfactory completion of this training must be verified in writing by the oral and maxillofacial surgery program director. This program must include the integration of a medical school component resulting in a doctor of medicine (MD) degree. This combined training must also include a *minimum* of 24 months of progressive responsibility on surgical rotations under the direction of the general surgery program director *after* receipt of the MD degree. The general surgery program director must verify in writing the completion of 24

months of general surgery training, year levels served, inclusive dates and specific content of rotations. Rotations in general surgery during medical school, prior to the MD degree, will not be considered as fulfilling the 24-month minimum requirement. If the general surgery component is completed at an institution other than the sponsoring institution of the oral and maxillofacial surgery residency, then this training must be completed consecutively with all 24 months spent in the same general surgery program.

#### For Doctors of Medicine with Medical Degrees Outside of the United States or Canada

Effective July 1, 1986, candidates beginning general surgery training must satisfactorily complete an entire program in general surgery approved by the Residency Review Committee for Surgery and accredited in the United States by the Accreditation Council for Graduate Medical Education (ACGME) or in Canada by the Royal College of Physicians and Surgeons for full training, including the chief residency year. The final 2 years of this training *must* be spent in the same program. The entire general surgery residency program must be completed before the candidate enters a plastic surgery residency. The program director must verify in writing the successful completion of the entire program in general surgery. Written verification from the American Board of Surgery of admissibility to their examination process would suffice in lieu of a letter from the general surgery program director.

Each case will be evaluated by the Board on its own merits.

## Requisite Training

### A. Graduate Education in Plastic Surgery

Training in plastic surgery for not less than 2 years is required, and the final year must be at the senior level. Prospective candidates entering a plastic surgery residency accredited for 3 years of training must complete the entire 3 years, with 1 year of senior responsibility.

Training in plastic surgery must be obtained in either the United States or Canada. The Board recognizes training in those programs in the United States that have been reviewed by the Residency Review Committee for Plastic Surgery and accredited by the Accreditation Council for Graduate Medical Education (ACGME) or those programs in Canada approved by the Royal College of Physicians and Surgeons of Canada.

### B. Content of Training

Candidates must hold positions of increasing responsibility for the care of patients during these years of training. For this reason, major operative experience and senior responsibility are essential to surgical education and training. An important factor in the development of a surgeon is an opportunity to grow, under guidance and supervision, by progressive and succeeding stages to eventually assume complete responsibility for the surgical care of the patient.

It is imperative that a resident hold positions of increasing responsibility when they obtain training in more than one institution, and 1 full year of experience must be at the senior level. The normal training year for the program must be completed. No credit is granted for part of a year of training.

The Board considers a residency in plastic surgery to be a full-time endeavor and looks with disfavor upon any other arrangement. The minimum acceptable training year is 48 weeks. Should leave of absence exceed 4 weeks per annum and result in overlap or duplication of resident positions, specific documentation that this irregular training arrangement was approved by the residency Review Committee for Plastic Surgery must be provided to the Board by the program director.

Training in plastic surgery must cover the wide field of plastic surgery. It should include experience in both the functional and aesthetic (cosmetic) management of congenital and acquired defects of the head and neck, trunk, and extremities. Sufficient material of a diversified nature should be available to prepare the trainee to pass the

examination(s) of the Board after the prescribed period of training. If the available material on a service is inadequate, the program director may correct the deficiency by establishing an affiliation with one or more surgeons on other services within that hospital or by regular rotation of residents on other approved affiliated services in order that a broad experience might be obtained. The trainee should be provided an opportunity to operate independently on suitable cases under more remote supervision.

This period of specialized training should emphasize the relationship of basic science—*anatomy, pathology, physiology, biochemistry, and microbiology*—to surgical principles fundamental to all branches of surgery and especially to plastic surgery. In addition, the training program must provide in-depth exposure to the following subjects: the care of emergencies, shock, wound healing, blood replacement, fluid and electrolyte balance, pharmacology, anesthetics, and chemotherapy.

### C. Accredited Residency Programs

Information concerning accredited training programs may be found in the *Directory of Graduate Medical Education Programs* (the "Green Book") published by the American Medical Association (AMA) under the aegis of the Accreditation Council for Graduate Medical Education. Copies of this directory are available at many medical schools and libraries, or candidates may order the "Green Book" directly from the AMA by calling toll free 1-800-621-8335 or 1-312-464-2000 for Customer Service, or by writing to American Medical Association, Order Department, PO Box 109050, Chicago, IL 60610-9050.

The Board does not inspect or approve residencies. The Residency Review Committee for Plastic Surgery (RRC) inspects and makes recommendations for or against approval of a residency training program in plastic surgery only after the director of the residency has filed an application for approval with the Secretary of the Residency Review Committee for Plastic Surgery, 515 North State Street, Chicago, IL 60610; Phone: (312) 464-5404. The RRC consists of nine members, three representatives from each of the following: the American Board of Plastic Surgery, Inc., the American College of Surgeons, and the American Medical Association.

Neither the Board nor its individual members can be responsible for the placement of applicants for training. The Board does not maintain a list of available openings in programs. Prospective candidates seeking accredited training in plastic surgery should correspond directly with the directors of those training programs in which they are interested.

Most plastic surgery residencies participate in a special plastic surgery matching program. (For information, contact: Plastic Surgery Matching Program, PO Box 7999, San Francisco, CA 94120; phone: (415) 923-3907).

### D. Non Approved Residencies

No other residencies in either the United States or Canada or other countries are acceptable in lieu of these specified above. This in no way implies that quality training cannot be acquired elsewhere, but the Board has no method of evaluating the quality of such programs and must be consistent in its requirements.

The Board grants no credit for training, residency, and/or experience in disciplines other than those named above.

## Applying for Examination and Certification

The prime purpose of the Board is to pass judgment on the education, training, and knowledge of broadly competent and responsible plastic surgeons. Certification by the Board indicates qualification of a specialist at a superior level of excellence. The quality of training of a surgeon, as shown by his/her successful completion of the Board examinations, will be reflected in his/her ability to achieve good results in practice.

The Board will issue no letters attesting to admissibility for its examinations to any person, institution, or organization until this for-

mal application, along with the required supporting documents, has been received and approved.

### A. The Application Process

In order to be admitted to the examination process leading to Board certification, prospective candidates should write to the Board office requesting application materials during the last 2 months of their residency. An application for examination and certification form will be provided. This should be completed and submitted to the Board office immediately following the completion of a candidate's residency training in plastic surgery. Prospective candidates who do not contact the Board office within 2 years after completion of their residency in plastic surgery will not be considered for admission to the examinations leading to Board certification.

### B. Deadline for Submission of Application Material

Applications for admission to the upcoming qualifying (written) examination, to be given in the spring of the following year *must* be postmarked on or before December 15 to avoid a late penalty fee.

### C. Licensure

All candidates must have a currently valid registered full and unrestricted license to practice medicine in a state, territory, or possession of the United States or by a Canadian province, and must continue to be licensed throughout the certification process. A temporary limited license such as an educational, institutional, or house permit is not acceptable. A photocopy of an active registration certificate bearing a date which will be valid at the time of examination(s) must be submitted by the candidate.

Commissioned officers of the medical service of the armed forces of the United States or Canada on active duty need not present evidence of current registration of licensure, but must provide appropriate information regarding their status.

### D. Letters of Recommendation

If a candidate has completed training in more than one program in plastic surgery, the program director of the first year of training must verify to the Board in writing the satisfactory completion of that year of training. Additionally, the Board may require favorable evaluations and verification from other surgeons.

### E. Required Signatures

Plastic surgery residents who completed their training prior to June 30, 1991 will be sent an application that must be completed accurately and signed by them. It must also be signed twice by their program director, once acknowledging the completion of their residency in plastic surgery and once recommending them for examination. Accompanying forms must be completed properly, and the required photographs must be provided.

### F. Residency Graduation Form

For plastic surgery residents completing their residency on June 30, 1991 and thereafter, a residency graduation form will be provided by the Board to the program director for completion at the end of the candidate's residency training in plastic surgery. A single form will be sent for each candidate and will require signatures in two places. The first signature, by the program director, will attest that the individual has completed a residency training program in plastic surgery accredited by the Residency Review Committee for Plastic Surgery under their direction and that the accredited number of years included a year of senior responsibility. The second signature will signify that the program director recommends the individual for admission to the examination process of the Board.

If the program director elects not to sign either statement, they are required to provide a full explanation as to why the required signature(s) cannot be provided in writing. The individual's application cannot be processed nor will the individual be admissible to the examination process of the Board without both required signatures.

The Board has asked each program director to complete a residency graduation form within 30 days of completion, by the trainee, of the prescribed duration of the program.

Each program director should discuss any deficiencies that were the cause for the lack of signature(s) in writing with the individual and a copy of this communication *must* be forwarded to the Board of office. If further educational training or experience is completed, the program director should request, within 30 days, that another residency graduation form be sent for the required signature(s). If the individual is still felt to be deficient and not recommended for admission to the examination process of the Board, the program director again *must* communicate the cause for the lack of signature(s) to the Board office.

Failure on the part of the program director to complete the residency graduation form within the stipulated framework will be considered an abrogation of the responsibility of the program director and the Residency Review Committee for Plastic Surgery shall be so notified.

### G. Notification of Admissibility

If a candidate's application for examination and certification form is approved, they will be notified of the time and place of the spring qualifying (written) examination. If it appears that the stated requirements have not been met, further details will be requested, and the information will be reviewed by the Committee on Credentials and Requirements. This committee meets twice yearly and decisions are not rendered at other times.

Until the application has been received and approved, the Board will not inform any person, institution, or organization that a candidate is admissible to the examination process.

### H. Admissibility to the Examination Process

Each qualified candidate shall be entitled to take an examination(s) as required by the Board.

All candidates must comply with the current regulations in effect for the year in which the examination is taken regardless of the time when the original application was approved. It is the responsibility of candidates to seek information concerning the current requirements for certification by the Board. The Board does not assume responsibility for notifying candidates of changing requirements or the impending loss of admissibility to take an examination. A new booklet of information is published yearly in July.

All candidates taking an examination of the American Board of Plastic Surgery, Inc. must complete the entire examination.

Certification by any other specialty Board does not exempt candidates from any part of the examination process.

### I. Qualifying (Written) Examination

#### *Admissibility to the Qualifying (written) Examination*

Candidates admissible to the examination process may take the qualifying (written) examination in the spring of the year following successful completion of residency in plastic surgery provided the application for examination and certification form is approved.

Candidates approved for admission to the qualifying (written) examination *prior* to July 1, 1991 will be offered seven consecutive opportunities to appear for the qualifying (written) examination. Candidates may take the qualifying (written) examination five times during this 7-year period. Candidates who have not passed the qualifying (written) examination during this period, will no longer be a candidate for examination.

Candidates approved for admission to the qualifying (written) examination, July 1, 1991 and thereafter, will be offered five consecutive opportunities to appear for the qualifying (written) examination. Candidates may take the qualifying (written) examination three times during this 5-year period. Candidates who have not passed the qualifying (written) examination during this period, will no longer be a candidate for examination.

In either situation, the satisfactory completion of an additional year of training is required before a candidate can be considered for readmission to the qualifying (written) examination. This additional year of training can be taken in a formal residency, fellowship, or can be an apprenticeship in a practice of plastic surgery. This additional year of training must be approved in advance by the Committee on Credentials and Requirements of the Board. Evidence of satisfactory completion of this year of training is required before further consideration for examination will be made.

If the Board approves the candidate's request for readmission to the qualifying (written) examination, two more consecutive opportunities to appear for the qualifying (written) examination will be offered. Candidates who do not successfully pass the qualifying (written) examination within these two consecutive opportunities will be required to repeat an entire plastic surgery residency to again be admissible to the examination process.

*Note:* Please see "Practice Requirement," under the "Certifying (Oral) Examination" for admissibility to that examination.

### J. Certifying (Oral) Examination

#### *Practice Requirement*

The 2-year independent practice requirement does not apply to candidates approved for admission to the examination process *prior* to July 1, 1986.

Candidates approved for admission to the examination process, July 1, 1986 and thereafter, must have been in the independent practice of plastic surgery for at least a 2-year period.

Candidates beginning practice, July 1, 1989 and thereafter, must have been in the independent practice of plastic surgery for at least a 2-year period, in the *same* location.

The 2 years of independent practice in plastic surgery need not be consecutive, but the candidate must be in practice during the 12-month period required for compilation of the case list. Currently, that period ends on January 1st of the same year as the certifying (oral) examination.

A fellowship is not considered independent practice.

For candidates approved for admission to the examination process *prior* to July 1, 1991, the last admissibility date for the certifying (oral) examination shall be December 31 of the seventh year after completion of the 2-year independent practice period. Candidates approved for admission to the examination process July 1, 1991 and thereafter, the last admissibility date for the certifying (oral) examination shall be December 31 of the fifth year after completion of the 2-year independent practice period.

For admission to the certifying (oral) examination, candidates must be actively engaged primarily in the practice of plastic surgery and hold active operating privileges in a hospital approved by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO) or its Canadian equivalent.

#### *Admissibility to the Certifying (Oral) Examination*

Prior to becoming admissible to the certifying (oral) examination, candidates must have passed the qualifying (written) examination and have fulfilled the 2-year independent practice requirement as it applies to them.

Candidates approved for admission to the examination process *prior* to July 1, 1991 will be offered seven consecutive opportunities to appear for the certifying (oral) examination. Candidates may take the certifying (oral) examination five times during this 7-year period. Candidates who have not passed the certifying (oral) examination during this period, will no longer be a candidate for examination.

Candidates approved for admission to the examination process, July 1, 1991 and thereafter, will be offered five consecutive opportunities to appear for the certifying (oral) examination. Candidates may take the certifying (oral) examination three times during this 5-year period. Candidates who have not passed the certifying (oral) examination during this period, will no longer be a candidate for examination.

In either situation, the satisfactory completion of an additional year of training is required before candidates can be considered for readmission to the certifying (oral) examination. This additional year of training can be taken in a formal residency, fellowship, or can be an apprenticeship in a practice of plastic surgery. This additional year of training must be approved in advance by the Committee on Credentials and Requirements of the Board. Evidence of satisfactory completion of this year of training is required before further consideration for examination will be made.

If the Board approves the candidate's request for readmission to the certifying (oral) examination, two more consecutive opportunities to appear for the certifying (oral) examination will be offered. Candidates who do not successfully pass the certifying (oral) examination within these two consecutive opportunities will be required to repeat an entire plastic surgery residency to again be admissible to the examination process.

### **K. Fee Schedule**

**Registration**—US \$350

The registration fee (\$350) must be submitted with the application and is not refundable.

**Qualifying (written) examination**—US \$700

The fee for the qualifying (written) examination (\$700) must be submitted when the reply card (green) requesting examination is returned to the Board office. The fee for the qualifying (written) examination must accompany the card only if a candidate wishes to be scheduled for the examination.

**Certifying (oral) examination**—US \$1,200

The fee for the certifying (oral) examination (\$1,200) must be submitted when the reply card (green) requesting examination is returned to the Board office. The fee for the certifying (oral) examination must accompany the card only if a candidate wishes to be scheduled for the examination.

Fees must be submitted in United States currency only. Foreign currencies, including Canadian, are unacceptable.

A charge of \$50 will be made whenever a check in payment of a fee is returned for non-payment.

Fees are subject to change by the Board. The fee schedule applicable to current examinations will apply regardless of when a candidate is approved for admission to the examination process.

The Board is a nonprofit organization, and the fees of candidates are used solely for defraying the actual expenses of the Board. The directors of the Board serve without remuneration. Because of the limited number of plastic surgeons certified by this Board, it may be necessary for the Board to request a voluntary annual contribution from its diplomates.

### **Repeat Examination Fee**

Fees for repeat examinations are the same as for the current original examinations.

### **Refunds**

For the qualifying (written) examination, a refund of the examination fee (less a processing charge of \$200) will be granted provided the candidate submits a written request for withdrawal postmarked at least 30 calendar days prior to the date of the examination. For the certifying (oral) examination, a refund of the examination fee (less a processing charge of \$300) will be granted provided the candidate submits a written request for withdrawal postmarked at least 30 calendar days prior to the date of the examination.

Candidates who notify the Board office in writing postmarked less than 30 calendar days prior to the examination date of their intent to withdraw, or who fail to appear for examination, will forfeit the entire fee. The Board may waive this rule if the circumstances warrant.

## **The Qualifying (Written) Examination**

The qualifying (written) examination will be conducted in the spring each year or at any other time deemed suitable by the Board. The ex-

amination will be given on the date specified and at the time specified. No exceptions will be made, and special examinations will be given only under unusual circumstances (see "Examination of Candidates with Disabilities under Special Situations").

### **A. Announcement Information**

Candidates who are admissible to the qualifying (written) examination, will be sent annually, throughout the period of admissibility, an announcement letter, booklet of information, and reply card (green), approximately 3 months before the date of the examination to be given in the spring of that year. When the reply card (green) is received, candidates must signify their intent to take the examination by completing and returning the reply card (green) and examination fee immediately to the Board office.

Be sure both sides of the reply card (green) are completed since candidates will not be scheduled for examination if their hospital appointments are not recorded.

Candidates are responsible for their own travel, hotel accommodations, and expenses. A hotel reservation card will be included with the admission card (white). Candidates may use this if they wish to stay in the hotel at which the examination is to be given.

### **B. Admission to Examination**

If the returned reply card (green) and examination fee for the qualifying (written) examination are not postmarked on or before March 1, a late penalty fee of \$200 will apply.

Reply cards (green) and examination fees postmarked March 2 up to and including March 15 will be considered *only* on a space available basis and the late penalty fee of \$200 *must* accompany these items. Reply cards (green) and examination fees postmarked after March 15 will *not* be accepted for admission to the spring qualifying (written) examination.

(The names of candidates who are late returning the reply cards (green) and examination fees will be kept on file. If openings develop by the withdrawal of other candidates, the late candidates *may* be admitted in the order of the receipt of the reply cards (green). No candidate will be admitted less than 4 weeks preceding the examination.)

Once candidates have been scheduled for the qualifying (written) examination, they will be sent an admission card (white) and hotel reservation card 5 to 6 weeks before the date of the examination. Candidates must present the admission card (white) when they register for the examination at both the morning and afternoon sessions. On this card will be printed the candidate's name, candidate number, the date, time, and location of the test, the specific room in which candidates are to take the examination, and the "results mailing date." Candidates must use their candidate number throughout the examination. Late arrival may result in denial of admission to the examination.

Advise the Board office immediately by telephone (215) 587-9322 if the admission card (white) is lost prior to the examination.

### **C. Withdrawal from Examination**

Candidates wishing to withdraw from the examination must send written notification postmarked at least 30 calendar days before the date of the examination. The examination fee will be refunded less a processing charge of \$200. Candidates who withdraw from the examination after this date or who fail to appear for the examination will *forfeit* the entire fee. The Board *may* waive this rule if the circumstances warrant.

### **D. Registration and Administration of the Examination**

All candidates must take the entire examination on the same day and at the same time.

Candidates must register for the morning and afternoon sessions at the date, time, and location specified on their admission card (white). If for any reason candidates are delayed or cannot arrive on time, they must notify the proctor or the Board office. If a candidate is unable to attend the examination, they must notify the Board office

either by letter or by telephone prior to the time of registration for the morning session. Anyone who is more than 30 minutes late will not be admitted to the examination.

The Board office will provide each candidate with lead pencils for use during the examination. No other writing implements may be used.

Candidates are not permitted to bring any notes, textbooks, or other reference materials into the examination. Scratch paper is not permitted, but space for notes and calculations is provided in the examination booklet.

Examination booklets are copyrighted and are the sole property of the American Board of Plastic Surgery, Inc.. They must not be removed from the test area or reproduced. Reproduction of copyrighted material is a federal offense.

### **E. Change of Address**

If a candidate's address, as it appears on the admission card (white), is incorrect or will change before the "results mailing date," please enter the corrected or new address on the back of the admission card (white) in the space provided before turning it in to a proctor at the end of the afternoon session. Admission cards (white) will be collected from all candidates at the conclusion of the examination.

### **F. Examination Schedule**

The qualifying (written) examination will consist of a morning session and an afternoon session. The sessions are not separate examinations, but are graded together as one examination and will not be separately administered.

The morning session is 3 hours and 15 minutes in duration and the afternoon session is 3 hours in duration, and both sessions will consist of multiple choice questions of two types (one best answer or multiple true-false). In general, each test item consists of a question, a case history or a situation followed by a list of possible answers. Instructions for completion of each type are given in the examination booklet which candidates will receive at the examination. Included in each examination booklet is an answer sheet upon which candidates must record their answers by filling in the appropriate circle (in pencil).

### **G. Content of the Examination**

The subjects covered in the examination are listed below and both sessions will cover the entire field of plastic surgery, with no differentiation in content between the morning and afternoon sessions.

1. Basic techniques, wound healing, microsurgery, transplantation.
2. Burns, sepsis, metabolism, trauma, resuscitation, nutrition, endocrinology, shock, hematology.
3. Pre- and postoperative care, anesthesia, cardiorespiratory care, complications, clinical pharmacology.
4. Tumors of the head and neck, skin, and breast; including treatment by radiation therapy, immunotherapy, chemotherapy, and surgery.
5. Trunk, lower extremity, musculoskeletal system, pressure ulcers, rehabilitation.
6. Hand, peripheral nerves, rehabilitation.
7. Maxillofacial and craniofacial surgery and microsurgery.
8. Congenital anomalies, genetics, teratology, facial deformity, speech pathology, gynecology, and genitourinary problems.
9. Aesthetic (cosmetic) surgery, psychiatry, and legal medicine.
10. Basic knowledge of pathology, e.g., the biologic behavior of neoplasms, inflammation, and repair.
11. Gross and functional anatomy, and embryology.

The questions for the examination cover subjects considered to be of fundamental importance to competent performance in the field of plastic surgery. Every effort is made to avoid "trick" questions, ambiguity, and questions involving irrelevant facts. All questions are analyzed by psychometric techniques to assure their quality.

Candidates will pass or fail on the strength of their performance on the entire qualifying (written) examination.

### **H. Results**

Letters of notification of the results of the qualifying (written) examination will be mailed on the date indicated on the admission card (white). The time period between administration of the examination and notification is necessary to allow for extensive analysis and to assure that individual results are reliable and accurate.

Results of the examination will be divulged to *no one* until after the Board letter has had time to reach candidates. If a week has elapsed *after* the "results mailing date" and candidates still have not received the letter from the Board, they may then call for information. Information will be given to no one but a candidate personally. The Board staff will verify a candidate's identity prior to releasing results to them.

### **Pass**

If a candidate passes the qualifying (written) examination, they will be informed of this fact. Only those candidates who have submitted a 12-month case list compilation, acceptable to the Board, will be sent an announcement letter, booklet of information, reply card (green), and a hotel reservation card approximately 3 months in advance of the date and place of the next certifying (oral) examination. Note, however, that the Board requires that a candidate for certification be in the independent practice of plastic surgery for at least 2 years before he/she may take the certifying (oral) examination, only if their application was approved after July 1, 1986. Candidates beginning the independent practice of plastic surgery, July 1, 1989 and thereafter, must have completed at least 2 years of practice, in the same location, before he/she may take the certifying (oral) examination.

The 2 years of practice need not be consecutive but the candidate must be in practice during the 12-month period required for compilation of the case list. Currently, that period ends on January 1 of the same year as the certifying (oral) examination.

### **Fail**

If a candidate fails the qualifying (written) examination, they will be informed of this fact. In case of failure, the candidate must repeat the entire qualifying (written) examination.

Each candidate will receive a single final grade for the entire examination. To complete the qualifying (written) examination successfully, candidates must achieve a passing grade for the entire examination.

The score on the examination will be determined by the total number of alternatives answered correctly. Therefore, candidates are encouraged to answer all items. Candidates will receive an individual computer generated letter concerning their performance on the examination.

The Board will obtain from an appropriate contractor a report, which will be sent to candidates' plastic surgery residency training directors and to the Residency Review Committee for Plastic Surgery, concerning the performance of the candidates on the qualifying (written) and certifying (oral) examinations.

### **I. Hand Scoring**

Hand scoring of the qualifying (written) examination will be performed upon written request. To request hand scoring, candidates *must* write to the Board office within 30 days from notification of the results. Candidates will be responsible for an extra charge for hand scoring of the examination. This charge will be determined by the Secretary-Treasurer of the Board.

### **J. Review of Examination**

Candidates may review the qualifying (written) examination, administered within the past 12 months, by writing to the Board office for an appointment within 30 days from notification of the results and payment of the fee. Candidates will be responsible for an extra charge

for reviewing the examination. This charge will be determined by the Secretary-Treasurer of the Board.

## The Certifying (Oral) Examination

The certifying (oral) examination will be conducted each fall or at such other time as deemed suitable by the Board. The examination will be given on the dates and at the times specified. No exceptions will be made.

Candidates will be deemed admissible to the certifying (oral) examination only if they:

1. Have passed the qualifying (written) examination;
2. Have fulfilled the 2-year independent practice of plastic surgery as it applies to them;
3. Have submitted a 12-month case list compilation acceptable to the Board (see "Instructions for Data Compilation and Submission of Data"); and
4. Are actively engaged primarily in the practice of plastic surgery and hold active operating privileges in a hospital approved by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO), or its Canadian equivalent.

### A. Instructions for Compilation of Case List

Candidates for the 1993 certifying (oral) examination will be required to provide the Board with a compilation of operative cases and hospitalized patients for a 12-month period beginning with January 1, 1992 and ending January 1, 1993. The method of compilation of the case list will use a computerized program available on an IBM compatible floppy disk (3 1/2" or 5 1/4"). The computerized mechanism provides a standardized list that will facilitate review. Candidates with IBM compatible office equipment or those desiring to rent such services will find the menu driven program easy to complete. The printed list will be in chronological order for each institution (hospital, office-based surgery, etc.) and include: patient's name, hospital (or other identifying) number, age, sex, date of operation, diagnosis, procedure performed (if any), CPT codes plus modifiers (identical to those used for billing on that case), and outcome including complications. The floppy disk for compiling this list will be provided upon written request to the Board office. Disk requests for the 1993 certifying (oral) examination will only be honored through December 31, 1992. Absolutely no disk requests will be honored after this date.

Preparation of the case list using the IBM program can be selected from menu options and will follow simple instructions sent with each disk by the Board office upon written request. To print in the desired format requires a "landscape capable" laser printer. A vertically oriented printout (for review purposes) can be obtained from a simple dot-matrix printer. Because this system is menu driven, it should prove simple to use by offices with IBM compatible equipment. Offices not having IBM compatible equipment may choose to have their raw list transferred to this form by renting stenographic service. After generation of the case lists and preparation of the additional material the disk will be returned to the Board office with an original and a copy of the candidate case summary sheet (obtainable via computer disk), and completed case lists (affidavits for each institution are automatically printed out on the last page of each institution's case list).

### B. Instructions for Data Compilation

A helpful suggestion is to begin compiling the list on a weekly or monthly basis, and to not wait until January to start compilation on the IBM compatible disk.

1. It is essential that complete information is provided under diagnosis and procedure. Give an accurate description of the operative procedure as taken from the operative note. If the case was non-operative, include a diagnosis taken from the discharge summary. Include *all* CPT codes plus modifiers (identical to those used for billing on that case) applicable for each case.

2. Do *not* list assistant cases, namely cases billed by the candidate as an assistant surgeon. This exclusion does not cover cases performed by a resident and attended by the candidate, or cases billed as co-surgeon; such cases should be *included* on the case list.
3. It is essential that information be provided under "outcome". A short statement with respect to the outcome of each case will help guide the Board. Not all cases "heal without problems". Examples would include "necrosis of tip of flap" or "normal sensation returned, but index finger stiff after tendon repair". Outcome recording using the computer program will be provided by number selection—only numbers 3, 4, and 5 require written explanation.
4. The list must be keyed for multiple operative procedures on the same patient. This keying is automatic for the computer program but be certain that hospital (or other identifying) numbers and names are consistent for a patient with multiple procedures.
5. *All* operative procedures must be included whether inpatient, ambulatory outpatient, or office-based surgery. All patients hospitalized by the candidate as the admitting physician must also be included, even if the patient is managed non-operatively. Outpatient surgery performed in the office (moles) that does not require a dictated note does not need to be included, but the Board would suggest that the candidate err in the direction of inclusion rather than exclusion of cases from the list. Inpatient consultations on other services that did not culminate in an operation, performed by the candidate, need not be included.
6. All admitted emergency room patients and all outpatient emergency room cases which required an operative note must be included.
7. The completed list(s) must be signed by the medical record librarian of each institution (hospital, ambulatory surgery center, etc.) and be properly notarized as a complete list of the respective candidate's operative experience. Operations performed by the candidate in the office must also be listed and signed by the appropriate office personnel who can attest to completeness.
8. Two candidate case summary sheets (an original and a copy) must be submitted. This form will facilitate the review process of the Board. This form will be directly generated from the IBM program by menu selection.
9. Two copies (an original and a copy) of the complete compiled list of cases of the 12-month experience of January 1, 1992 to January 1, 1993, including the signed and notarized affidavits, and two candidate summary sheets, must be postmarked on or before *February 1, 1993* for the candidate to be considered for admission to the fall 1993 certifying (oral) examination.

### C. Submission of Data

1. Print the 12-month case list.
2. The affidavits must be signed by the medical record librarian of *each institution* and notarized (see 7 under "Instructions for Data Compilation").
3. Make a copy of the entire case list including the signed and notarized affidavits.
4. Place the original 12-month case list, including the signed and notarized affidavits for each institution in a separate compilation, also make a separate compilation for each of the copies. Staple each institution's case list together.  
Hold aside (original and copy) the first sheet printed which included the "candidate information"; name, address, and telephone numbers.
5. Take the stapled case list including the signed and notarized affidavits for the first institution (case list starts with page 1) and staple the "candidate information sheet" to the top of this section *only*. Follow the same process for the copy of the first institution.
6. Place all of the stapled original 12-month case lists including the signed and notarized affidavits together; place the computer gener-

ated candidate case summary sheet on top; attach all of this together using a binder clip or rubber band. Follow the same process for the stapled copies of the 12-month case lists including the signed and notarized affidavits using a copy of the computer generated candidate case summary sheet. Do not place this material in binders or notebooks.

7. Mail the completed case list information and the completed IBM disk to the Board office.

#### D. Reminder

Candidates who do not provide the required items in the manner outlined, will not be considered for admission to the fall 1993 certifying (oral) examination. The items submitted will be returned to the candidate. Absolutely no exceptions can be made regarding incomplete lists.

The absolute postmarked deadline for two sets of the computer generated 12-month case list including the signed and notarized affidavits, and candidate case summary sheets is February 1, 1993. The IBM compatible floppy disk must be included with the printed materials. No lists or other material will be accepted after this postmarked date.

It is the responsibility of each candidate to keep copies of *all* materials submitted to the Board. The Board *will not* make copies of missing information for candidates.

#### E. Photographic Documentation

Particular emphasis should be placed on the necessity of photographic documentation. Pre-operative and post-operative photographs are mandatory on all cases and intraoperative photographs may aid in further illustration of the clinical problem.

The Board advises candidates who have not acquired the habit of routine photographic documentation of patients to do so at their earliest convenience. *Any* cases from this 1-year period may be selected. Therefore *all* cases during this year must have photo documentation, including all hand cases (i.e. carpal tunnel cases, etc.).

#### F. Board Review/Selection Process

The Board will review the candidate case summary sheet and candidate's case List to determine if the candidate's operative list reflects a mature enough experience in the representative areas of the field of plastic surgery to permit examination of the candidate for certification as an expert in the specialty. In the event that the case list offered is not adequate to allow selection of cases, the candidate will be deemed ineligible for the fall certifying (oral) examination. The candidate will be allowed to submit another list of cases for the following year. The presentation of a list by a candidate for case list selection that is found inadequate will constitute one of the opportunities to appear for the certifying (oral) examination. It will not, however, count as an unsatisfactory performance. Written notification regarding case lists inadequate to allow for Board selection of case reports will be sent by July 15, 1993, or sooner, if possible. In the meantime, do not contact the Board office prior to that date with respect to the list.

The Board will select ten cases from the candidate's compiled 12-month case list and request each candidate to prepare case reports. The Board selected case reports will be prepared in the same format and with similar requirements as in past years—pre and postoperative photographs, operative reports, pathology reports, x-rays where pertinent, and postoperative office progress notes and a copy of the actual bill submitted for services to the patient. Your attention is called to the request for a copy of the actual bill which is a new requirement applicable to the 1993 certifying (oral) examination.

The list of Board selected cases for preparation as case reports will be sent to candidates by July 15, 1993 along with an announcement letter, booklet of information, and reply card (green) for the November 11-13, 1993 certifying (oral) examination. Do not contact the Board office prior to that date with respect to the list.

#### G. Future Case List Compilation

Please be advised that the format for the 1994 fall certifying (oral) examination will be similar in nature and will require a 12-month case list (January 1, 1993 to January 1, 1994).

#### H. Announcement Information

Candidates who are admissible to the certifying (oral) examination will be sent annually, throughout the period of admissibility, an announcement letter, booklet of information, reply card (green), and a hotel reservation card, approximately 3 months before the date of the examination to be given in the fall of that year. When the reply card (green) is received, candidates must signify their intent to take the examination by completing and returning the reply card (green) and examination fee *immediately* to the Board office.

Be sure both sides of the reply card are completed since candidates will not be scheduled for examination if their hospital appointments are not recorded.

Candidates are responsible for their own travel, hotel accommodations, and expenses. A hotel reservation card is included with the reply card (green). Candidates may use this card if they wish to stay in the hotel at which the examination is to be given.

#### I. Admission to Examination

If the returned reply card (green) and examination fee for the certifying (oral) examination are not postmarked on or before September 1, a late penalty fee of \$300 will apply.

Reply cards (green) and examination fees postmarked September 2 up to and including September 15 will be considered *only* on a space available basis and the late penalty fee of \$300 *must* accompany these items. Reply cards (green) and examination fees postmarked after September 15 will *not* be accepted for admission to the fall certifying (oral) examination.

(The names of candidates who are late returning the reply cards (green) and examination fees will be kept on file. If openings develop by the withdrawal of other candidates, the late candidates *May* be admitted in the order of the receipt of reply cards (green). No candidate will be admitted less than 4 weeks preceding the examination.)

Once candidates have been scheduled for the certifying (oral) examination, they will be sent an admission card (white) 5 to 6 weeks before the date of the examination. On this card will be printed the candidate's name and address, the *assigned* candidate number, the date and time to report, the location of the testing center, the specific room in which candidates are to assemble, and the "results mailing date."

At the same time, the Board office will also mail candidates ten folders for the binding of the Board selected case reports and labels in a separate large envelope. It is imperative that candidates place the assigned candidate number, which appears on the admission card (white) on the label affixed to the cover of each one of the case reports, along with the other required information. See "Case Reports."

Advise the Board office immediately by telephone (215) 587-9322 if the admission card (white) is lost prior to the examination.

#### J. Withdrawal from Examination

Candidates wishing to withdraw from the examination must send written notification postmarked at least 30 calendar days before the date of the examination. The examination fee will be refunded less a processing charge of \$300. Candidates who withdraw from the examination after this date or who fail to appear for the examination will *forfeit* the entire examination fee. The Board *may* waive this rule if the circumstances so warrant.

#### K. Requirements for Case Reports

The following materials, collated in this order, must be present in each of the case reports submitted:

1. A brief narrative summary of the preoperative, operative, and postoperative course of the patient. Include a final separate paragraph entitled "outcome" and indicate here the outcome of the treat-

ment and the final condition of the patient. This paragraph will appear at the bottom of the same page for the narrative summary.

2. Pre and postoperative photographs; approximately 3½" × 5" black-and-white or color prints glued on 8½" × 11" white bond paper. Intraoperative photographs are strongly recommended. Diagrams or simple drawings may be substituted for intraoperative photographs. Descriptive legends and dates of the photos must be placed adjacent to each photo. Transparencies will not be accepted.
3. Photocopies of the original operative reports.
4. Photocopies of the original anesthetic records.
5. Photocopies of *pertinent* laboratory data.
6. Photocopies of the pathologist's report.
7. Photographs of pertinent x-rays or scans. (Actual x-rays are unacceptable.) Each x-ray or scan should be dated in a manner that is easily visible.
8. Photocopies of the original progress notes including patient's history and physical examination, and all post-operative and post-discharge progress notes, both in the hospital and from the office records, including the initial consultation. If legibility is a problem, include a typewritten copy also.
9. Photocopies of the actual bill(s) submitted to the patient. *Note:* The requirement for submission of a copy of the bill is a *new* requirement for inclusion with the case report applicable to the 1993 certifying (oral) examination.

In the event that more than one procedure is performed on the patient during the 12-month case list period include all procedures and hospitalization that fall within the 12 months. The candidate is not *required* to document procedures that fall prior to or after the 12-month period. However, if these procedures increase understanding of the case they may be included at the candidate's discretion. Documentation for procedures falling outside the 12-month period does not have to be complete—the candidate may be selective here.

*Note:* If the records are not in English, an accurate and complete English translation must accompany them.

#### L. Presentation of Case Reports

Candidates will be asked to assemble ten Board-selected case reports in the folders provided by the Board and to bring these case reports to the fall certifying (oral) examination.

During examination candidates must be prepared to defend the choice of operation and to present alternate treatment plans considered. The Board, at its discretion, may request certification of case reports by the hospital(s) where candidates performed the operation(s).

Hospital and office records must clearly identify the candidate as the attending physician and surgeon. However, the candidate need not necessarily be the admitting physician, so long as they are clearly the attending plastic surgeon. Cases done by a resident, under the candidate's supervision may be chosen by the Board and will be considered in the same way as cases done personally.

Each report must be typed or reproduced on standard, letter-sized white paper (8½" × 11") with the candidate's full name and *assigned* candidate number, the number of the case, the hospital (or other identifying) number, the principal diagnosis, and the primary operation listed on the title page. Bind the cases singly in the folders supplied by the Board. Do not place any pages or photographs in acetate (sheet protectors). Photos *must* be glued to white bond paper.

Group all operative notes, anesthesia records, photographs, etc., together in chronologic order such that all operative notes will appear in one location in the book, all photographs in one location, etc.

In the circumstances of excessively long hospitalizations resulting in progress note sections of such thickness that they cannot be bound in one case folder, this section may be debrided of non-pertinent notes and then bound separately, brought to the examination, but retained by the candidate and not turned in with the case reports. A no-

tation of this necessity should appear at the beginning of the progress note section. Thus the candidate will produce this extra material only upon request of their examiners.

Candidates must also supply two copies of a list of all ten cases. Type the list on a single sheet of white bond paper. Identify the list, with the candidate's full name and *assigned* candidate number. For each case, include the following information:

1. Category
  - a. Congenital
  - b. Hand
  - c. Maxillofacial trauma
  - d. Breast
  - e. Aesthetic
  - f. Burns
  - g. Lower extremity, perineum, trunk
  - h. Head and neck
  - i. Microsurgery
  - j. Skin
  - k. Other
2. Patient's hospital (or other identifying) number
3. Primary diagnosis
4. Procedure(s) done by the candidate

Bind one copy of this list at the beginning of the first case in its folder. The other copy should be separate and unbound to be handed in with the case reports.

The Board regards the case reports submitted as important evidence of the candidate's basic ability to carry out plastic surgical procedures and to organize and present information in a succinct and complete fashion.

Improper or disorganized preparation of this material will be sufficient cause to disqualify a candidate for continued examination.

#### M. Disqualification on Case Reports

If a candidate is disqualified for continuation in the examination process because the case reports are judged unacceptable (for whatever reason) it will not be recorded as a failure, but *is* counted as one of the opportunities to appear. However, because the Board has incurred expenses to provide a candidate with an examination, the examination fee less the processing charge of \$300 will be refunded.

#### N. Examination Schedule

The oral examination for candidates will occupy 1 full day. Late arrival may result in denial of admission to the examination. The Board office will assign the day (second or third day) on which candidates will be examined. This assignment is by random computer selection. The Board regrets that half of the candidates (those selected for examination on the third day) will have an empty day (the second day). However, it is still necessary that *all* candidates turn in cases on the first day in order for examiners to have a full day for review of the cases.

##### First Day

- 8:00 am-9:00 am—All candidates register and hand deliver case reports to the room designated on the admission card.
- 11:30 am-12:30 pm—Orientation conference for candidates for discussion of oral examination format. *Attendance is mandatory.*
- 1:00 pm-7:00 pm—Candidates should be available in their hotel rooms (or reachable by telephone) during this time frame in case the Board wishes to contact them regarding the examination on their cases.

##### Second Day

- 7:00 am—Candidates assemble for instructions.
- 7:45 am-12:30 pm—Oral examinations—case reports.
- 1:45 pm-5:30 pm—Oral examinations—theory and practice.
- 6:15 pm-7:15 pm—Voluntary debriefing session.

**Third Day**

- 7:00 am—Candidates assemble for instructions.  
 7:45 am-12:30 pm—Oral examinations—case reports.  
 1:45 pm-5:30 pm—Oral examinations—theory and practice.  
 6:15 pm-7:15 pm—Voluntary debriefing session.

*Note:* The times of the above examination schedule are subject to change and will be finally announced on the morning of the examination.

**O. Instructions and Procedures**

Candidates will receive specific instructions concerning the examination at the assembly on the morning of the day of examination. Candidates will also be given a schedule showing the time and the location of each examination session. Failure to appear on time for any session of examination will lead to a grade of fail on that section. Candidates should be outside the examination room 5 minutes before the assigned time. It is not necessary for candidates to announce their presence. If, however, a candidate has not been invited into the examination room by the examiners by 10 minutes after the scheduled time, candidates should notify the temporary Board office immediately.

The Board has made every effort to assign candidates to examiners whose knowledge of the candidate's background would not bias their evaluation of performance. If a candidate finds that an examiner to whom they have been assigned played a role in their training, is a close friend or relative, is a close professional associate, or has examined them previously, they must inform the Board staff immediately. However, unless conflicts are identified in advance of the actual examination, the conduct and grades of that session can not be contested on the basis of prior contact or knowledge.

**P. Change of Address**

If a candidate's address, as it appears on the admission card (white), is incorrect or will change before the "results mailing date", please enter the corrected or new address on the back of the admission card (white) in the space provided. Candidates should deliver the admission card (white) to the temporary Board office at the examination center before 11:00 a.m. on the day scheduled to appear for the certifying (oral) examination indicating the corrected or new address.

**Q. Description of the Examination**

Each examination session is designed to evaluate the candidate's breadth and depth of knowledge, their ability to apply it in the solution of a wide range of clinical problems, and matters related to ethics. Each session is structured in that the examiners are given a schema to be followed. This approach assures uniformity and prevents duplication. Each of the examiners on each team is expected to pose problems and questions to candidates.

All examiners are diplomates of the American Board of Plastic Surgery, Inc., are active in the practice and/or teaching of plastic surgery, and have been certified by the Board for more than 5 years. They are respected members of the profession and known for their surgical knowledge, expertise, and scientific contributions. They have been instructed in the technique and purposes of the examination process. Each team includes a senior examiner and a guest examiner.

The certifying (oral) examination is given on 1 day and consists of two parts.

1. An approximately 1-hour oral examination on ten major cases (see "Case Reports") selected by the Board and indicative of the candidate's work in the field of plastic surgery.
2. An approximately 45-minute oral examination on the theory and practice of plastic surgery on material prepared by the Board.

Each candidate will be examined by two teams of examiners. Grades will be given by all four examiners and all four grades combined will determine the passing or failing status of each candidate.

The Board is determined that the examination shall be as comprehensive and objective as practical. Its intention is that every candi-

date be provided an equal opportunity to become Board certified. The same standard is applied to each candidate insofar as is possible.

**R. Debriefing Session**

On the evenings of the second and third days, there will be voluntary debriefing sessions for candidates taking the examination that day. The Board encourages candidates to attend for the purpose of evaluating the examination just completed.

**S. Results**

Every candidate will be evaluated by each member of their examining teams, and performance may be discussed in detail by the entire Board. The final decision regarding certification will be rendered by the entire Board at its meeting following the completion of the fall certifying (oral) examination. Do not call the Board office for information. Do not call the examiners.

Letters of notification of the results of the certifying (oral) examination will be mailed on the date indicated on the admission card (white). Regardless of the reason, results of the examination will be divulged to *no one* until after the Board has had time to reach candidates. If a week has elapsed after the "results mailing date" and candidates still have not received the letter from the Board, they may then call for information. Information will be given to no one but a candidate personally. The Board staff will verify a candidate's identity prior to releasing results to them.

**T. Examination Performance**

Candidates desiring information concerning performance after they have received the letter of notification, may correspond, within 30 days of notification, by writing to the chairman of the Certifying Examination Committee at the Board office.

**Special Situations****A. Appeals Policy**

The Board has established a policy relative to resolution of questions or disagreements regarding its decisions on admissibility to examination, the form, contents, administration or results of the qualifying (written) examination, the administration of the certifying (oral) examination, and the revocation of certificates. If an individual has a concern in any of these areas, it should be expressed in writing to the Board office, and a copy of the appeals policy will be sent to that individual.

**B. Examination of Candidates with Disabilities**

The American Board of Plastic Surgery, Inc. complies with the Americans with Disabilities Act by making a reasonable effort to provide candidates who have proven disabilities with modification of its examination process that are appropriate for such disabilities. No modification will be made that alters the measurement of the skills or knowledge which the examination process is intended to test. Any disability which a candidate believes requires such a modification in the Board's examination process must be identified and documented by the candidate within 60 days after the candidate is notified of admissibility to the examination process or within 60 days after the candidate learns of such disability, whichever is later.

**C. Examination Irregularities**

The validity of scores on the Board's examinations is protected by every means available. The Board will not report a score which it has determined to be invalid, i.e., which does not represent a reasonable assessment of the candidate's knowledge or competence sampled by the examination. The performance of all candidates is monitored and may be analyzed for the purposes of detecting invalid scores.

The qualifying (written) examination will be supervised by proctors to ensure that the examination is properly conducted. If evidence by observation or analysis suggests that a candidate's scores may be invalid because of irregular behavior, the Board will withhold

those scores pending further investigation and the affected candidate will be notified.

Examples of irregularities affecting the validity of scores would include (but not be limited to) the following: (1) using notes; (2) sharing information or discussing the examination in progress; (3) copying answers from another candidate; (4) permitting one's answers to be copied; (5) or unauthorized possession, reproduction, or disclosure of examination questions or other specific information regarding the content of the examination, before, during, or after the examination.

In such circumstances, upon analysis of all available information, the Board will make a determination as to the validity of the scores in question. If the Board determines that the scores are invalid, it will not release them, and notification of that determination may be made to legitimately interested third parties.

Candidates or other persons who are directly implicated in an irregularity are subject to additional sanctions. For example, the Board may bar the persons permanently from all future examinations, terminate a candidate's participation in an ongoing examination, invalidate the results of the candidate's examination, and withhold or revoke a certificate or take other appropriate action. Candidates or other persons subject to additional sanctions will be provided with a written notice of the charges and an opportunity to respond to such charges in accordance with the reconsideration and appeal procedure established by the Board.

#### **D. Substance Abuse or Chemical Dependency**

Applicants with a history of abuse of a controlled substance or chemical dependency will not be admitted to any examination unless they present evidence satisfactory to the Board that they have successfully completed the program of treatment prescribed for their condition, and the Board is satisfied that they are currently free of such substance abuse or chemical dependency.

### **Certification**

After a candidate has met the requirements for admissibility and passed the examinations of the Board, a certificate attesting to his/her qualifications in plastic surgery will be issued by the Board. A surgeon who is granted certification by the Board is known as a diplomate of the Board.

It shall be the prerogative of the Board to determine the fitness, professionally and ethically, of any candidate for a certificate; and the Board, for cause, may defer or deny certification to any candidate.

#### **A. Certificates**

Certificates issued by the Board shall be in such form as the directors may from time to time determine. They shall be signed by the chairman, the vice-chairman, and the secretary-treasurer of the Board and shall have placed upon them the official seal of the Board.

Certificates of the Board shall state that the holder has met the requirements of the Board and is certified by the Board as a medical specialist in plastic surgery and is entitled to be known as a "diplomate of the American Board of Plastic Surgery, Inc." The names of all diplomates will be submitted to the American Board of Medical Specialties and Marquis Who's Who, Inc. for publication in their directories unless they notify the Board in advance that they do not wish to be listed.

#### **B. Revocation**

Any certificate issued by the Board shall be subject to revocation at any time that the Board determines that an individual was not properly qualified to receive it.

Each certificate issued by the Board shall be subject to revocation if the physician so certified has made any misstatement of material fact, or has failed to make any statement of material fact, in his/her application for such certificate or in any other statement or representation to the Board or its representatives, or has otherwise ac-

quired the certificate by deception. Upon revocation the certificate shall be returned to the Board.

The Board shall have the jurisdiction and right to determine whether or not the information placed before it is sufficient to constitute grounds for the revocation of any certificate. The individual will be provided with a copy of the appeals policy of the Board, and this policy will be observed in pursuing resolution of the problem.

#### **C. Foreign Certificates**

Persons holding the foreign certificate issued prior to June 30, 1973 by the Board must relinquish their certificates to the Board in the event that they return to the United States for the purpose of practicing plastic surgery. Such individuals may apply for examination and certification in the manner described herein.

#### **D. Inquiries as to Status**

The Board considers a candidate's record not to be in the public domain. When an inquiry is received by the Board regarding an individual's status with the Board, a general—but factual—statement is provided which indicates that person's location within the process of certification. The Board provides this information only to individuals, organizations, and institutions with a reasonably valid "need to know" for professional reasons.

The Board does not use or recognize the terms Board "eligible" or Board "qualified" and does not condone the use of those terms by candidates or any other persons or organizations.

The directors may adopt such further rules and regulations governing requirements, examinations and issuance and revocation of certification as they may from time to time determine.

### **Examination Dates**

Certifying (oral) examination

November 5-6-7, 1992

Chicago, Illinois

Qualifying (written) examination

April 16, 1993

Philadelphia, Pennsylvania and San Francisco, California

### **Important Dates**

#### *The Application Process*

**January 15**—Absolute cut-off for receipt of all application material for admission to the spring qualifying (written) examination. A late penalty fee of \$200 must accompany these items postmarked December 16 up to and including January 15.

Any application material postmarked after January 15 will *not* be accepted for admission to the spring qualifying (written) examination.

**April 30**—Potential candidates for examination and certification (senior/chief residents) are advised to write to the Board office requesting an application for examination and certification form during the last 2 months of their residency, but *no* later than June 30. Application material will *not* be sent to prospective candidates after December 15.

**December 15**—Last date Board office will send out application material for admission to the spring qualifying (written) examination.

Last postmarked date for application material for admission to the spring qualifying (written) examination before a late penalty fee of \$200 will apply.

#### *The Qualifying (Written) Examination*

**March 1**—Last postmarked date for reply cards (green) and examination fees for the spring qualifying (written) examination, before a late penalty fee of \$200 will apply. Reply cards (green) and examination fees postmarked after this date (March 1) will be considered only on a space available basis and the late penalty fee will apply.

**March 2-15**—Reply cards (green) and examination fees postmarked March 2 up to and including March 15 will be considered

only on a space available basis and the late penalty fee of \$200 must accompany these items.

Any reply cards (green) and examination fees postmarked after March 15 will not be accepted for admission to the spring qualifying (written) examination.

*The Certifying (Oral) Examination*

**February 1**—The 12-month case list for prospective candidates for the upcoming certifying (oral) examination must be postmarked on or before this date to be considered for admission to the fall certifying (oral) examination.

**July 15**—The list of Board-selected cases for preparation as case reports will be mailed to candidates for the fall certifying (oral) examination.

**September 1**—Last postmarked date for reply cards (green) and examination fees for the certifying (oral) examination, before a late penalty fee of \$300 will apply. Reply cards (green) and examination fees postmarked after this date (September 1) will be considered only on a space available basis and the late penalty fee will apply.

**September 2-15**—Reply cards (green) and examination fees postmarked September 2 up to and including September 15 will be considered only on a space available basis and the late penalty fee of \$300 must accompany these items.

Any reply cards (green) and examination fees postmarked after September 15 will not be accepted for admission to the fall certifying (oral) examination.

**December 31**—Last date disk requests will be honored for compilation of the 12-month case list (January 1-January 1).

*Special Consideration*

**March 1**—Last postmarked date for submission of written special requests and documentation for consideration by the Committee on Credentials and Requirements at the spring meeting.

**September 1**—Last postmarked date for submission of written special requests and documentation for consideration by the Committee on Credentials and Requirements at the fall meeting.

*Note:* Fees must be submitted in United States currency only. Foreign currencies, including Canadian, are unacceptable.

If there is a discrepancy between a metered postmark and an official United States postal service postmark, the latter will be considered official.

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Preventive Medicine to ascertain whether the information below is current.)*

**Eligibility Requirements For Examination**

Each applicant for a certificate in aerospace medicine, occupational medicine, or public health and general preventive medicine is required to meet certain eligibility requirements and to pass an examination. Such eligibility requirements are set forth in the current bulletin of the Board. For the information of applicants such requirements are briefly outlined below.

**General Requirements**

1. Graduation from a medical school in the United States approved by the Liaison Committee on Graduate Medical Education, or from a school of osteopathic medicine which was at the time approved by the American Osteopathic Association, or from a foreign school satisfactory to the Board.
2. An unrestricted license to practice medicine in a state, territory, commonwealth or possession of the United States or in a province of Canada.
3. A year of postgraduate clinical training developed as part of an approved residency program in preventive medicine, or in a clinical program approved by one or more Residency Review Committees, and comprising experience involving direct patient care.
4. A period of academic training consisting of completion of a course of study with award of a master's degree in preventive medicine or public health or equivalent, the content of which shall include biostatistics, epidemiology, health services administration and environmental health; or successful completion of post-baccalaureate study of the extent, depth, content and rigor generally required in such master's degree program but not in an institution that awards the degree. In this latter case, the Board may make individual exceptions.
5. Residency of not less than 1 year which shall have provided supervised experience in the practice of the preventive medicine specialty in which certification is sought. The year shall include planned instruction, observation and active participation in a comprehensive organized program in the specialty approved by the Residency Review Committee for Preventive Medicine.

**Special Requirements in Aerospace Medicine**

1. In addition to the general requirements, a period of not less than 1 year of special training or research in, or teaching or practice of, aerospace medicine.
2. The applicant must have been engaged in training for, or the practice of, aerospace medicine for at least 2 of the 5 years preceding application for certification.

**Special Requirements in Occupational Medicine**

1. In addition to the general requirements, a period of not less than 1 year of special training or research in, or teaching or practice of, occupational medicine.
2. The applicant must have been engaged in training for, or the practice of, occupational medicine for at least 2 of the 5 years preceding application for certification.

**Special Requirements in Public Health and General Preventive Medicine**

1. In addition to the general requirements, a period of not less than 1 year of special training or research in, or teaching or practice of, public health/general preventive medicine.
2. The applicant must have been engaged in training for, or the practice of, public health/general preventive medicine for at least 2 of the 5 years preceding application for certification.

Appendices

## Equivalencies for Eligibility Determination

Individuals who have not formally completed all of the components previously described may be considered eligible if their training and experience is considered by the Board to provide suitable equivalency for that formal training, and if they graduated from medical school prior to January 1, 1984.

The Board will consider granting certain credit toward satisfying requirements for eligibility for such factors as:

1. Certification by one of the American specialty boards with significant preventive medicine components in their practice (e.g. internal medicine, pediatrics, family practice) plus a minimum of 6 years of full time practice of preventive medicine; or
2. Teaching or research experience in fields relevant to preventive medicine for a period of 8 years; and
3. Four graduate level courses, 3 credit hours each, as follows: biostatistics, epidemiology, health services administration, and environmental health.

Each applicant is considered individually by the Board in accordance with the existing guidelines.

## Applications for Examination and Reexamination

Each application for examination must be made on the prescribed form (which may be obtained from the secretary-treasurer of the American Board of Preventive Medicine).

No member of the board is authorized to give an opinion as to the eligibility of candidates. The determination of eligibility will be made only by the full Board, after receiving full application information. Each candidate must comply with Board regulations in effect at the time the examination is taken and also those in effect at the time the certificate (if any) is issued, regardless of when his original application was filed.

## Multiple Certification

An individual may establish eligibility for certification in multiple fields of preventive medicine by submitting separate applications and fees for each field. Eligibility determination will be carried out independently and candidates may be given credit for any period of appropriate training or experience, regardless of its having been used to establish eligibility in another field. However, a candidate may have only one application at a time before the Board.

## Fees

Application fee—\$150 (\$250 for equivalency). Must be submitted with application; is not refundable.

Examination fee—\$700. Fee is payable 45 days prior to the examination date.

## Examination

The examination is a 1-day examination. It is a multiple choice examination with the morning portion covering all of preventive medicine and the afternoon portion covering the applicants declared specialty.

## Certification

Upon satisfactory completion of the examination and proof to the satisfaction of the Board that the applicant is eligible for certification, a certificate will be issued to the effect that the applicant has been found to be possessed of special knowledge in the field specified. The certificate will be signed by officers of the Board and will have its seal affixed. Each certificate remains the property of the Board, but the person to whom it is issued is entitled to its possession unless and until it is revoked. Any certificate issued by the Board may be revoked if evidence, satisfactory to the Board, is presented that the applicant was not eligible to receive it at the time of application or issuance, or that any pertinent fact had been misstated, misrepresented, or concealed. The issuance of a certificate to any person does not constitute such person a member of the Board.

*(Please note that this is not an official document of the American Board of Psychiatry and Neurology, Inc. The Board cannot accept responsibility for errors made in the printing of this material. Please contact the Board's Executive Office for official policies and procedures of the Board.)*

Throughout this information, the American Board of Psychiatry and Neurology may be referred to as the "Board" or the "ABPN". References to "residency" refer to entry at the PGY-2 level unless stated otherwise. "Accredited or approved programs" refers to programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) for the Royal College of Physicians and Surgeons of Canada.

## I. General Information Pertaining to All Candidates

### History

The American Board of Psychiatry and Neurology, Inc., is a non-profit corporation which was founded in 1934 following conferences of committees appointed by the American Psychiatric Association, the American Neurological Association, and the then Section on Nervous and Mental Diseases of the American Medical Association. This action was taken as a method of identifying the qualified specialist in psychiatry and neurology.

### Composition of the Board

The Board consists of sixteen members. Membership on the Board is distributed among the Board's nominating organizations as follows: five psychiatrists from the American Psychiatric Association, three psychiatrists from the American Medical Association, four neurologists from the American Neurological Association, and four neurologists from the American Academy of Neurology. Each of these organizations proposes nominees to represent it on the Board, but the Board itself selects its members. The Board is independently incorporated.

Elections to fill the places of members whose terms have expired take place annually. Neurology and Psychiatry are always equally represented on the Board. The Board holds meeting several times each year for the purpose of examining candidates and transacting its business.

### **The Committee on Certification in Child and Adolescent Psychiatry**

In February, 1959, the American Board of Psychiatry and Neurology, Inc., with the concurrence of the Advisory Board for Medical Specialties, established a Committee on Certification in Child Psychiatry. This was done to establish officially the field of child psychiatry as a definite area of subspecialization in psychiatry and to provide a means of identifying the properly trained and experienced child psychiatrist as distinguished from those who claim proficiency in this field without adequate background and qualifications. In November, 1987, the name of the committee was changed to the Committee on Certification in Child and Adolescent Psychiatry.

The actual mechanics of certification of qualified candidates and the establishment of basic policies have been delegated by the Board to the committee, which operates under the supervision of and in accordance with the policies of the Board. The committee presently consists of six members certified in child psychiatry by the American Board of Psychiatry and Neurology and one member certified by the American Board of Pediatrics.

The Committee holds meeting each year for the purpose of examining candidates and transacting its business.

Each applicant for certification in child and adolescent psychiatry must be certified by the Board in the specialty of general psychiatry prior to applying for examination in child and adolescent psychiatry. Training must be completed by the application deadline. The general policies regarding training, application and examination in child and adolescent psychiatry are contained in the pamphlet "Information for Applicant for Certification in Child and Adolescent Psychiatry," which is available from the Board's executive office.

Please note that applicants may submit application for examination in psychiatry after successful completion of the PGY-1, 2 years of residency training in psychiatry, and 1 year of residency training in child and adolescent psychiatry.

### **The Committee on Certification for Added Qualifications in Geriatric Psychiatry**

In November, 1989, the American Board of Psychiatry and Neurology, Inc., with the concurrence of the American Board of Medical Specialties established a Committee on Certification for Added Qualifications in Geriatric Psychiatry. This was done to establish officially the field of geriatric psychiatry as a definite area of subspecialization in psychiatry and to provide a means of identifying the properly trained and experienced geriatric psychiatrist.

The actual mechanics of certification of qualified candidates have been delegated by the Board to the committee, which operates under the supervision of and in accordance with policies of the Board.

Each applicant for certification in geriatric psychiatry must be certified by the Board in the specialty of general psychiatry prior to applying for examination in added qualifications in geriatric psychiatry. The general policies regarding training, application and examination in geriatric psychiatry are contained in the pamphlet "Information for Applicants for Certification in Added Qualifications," which is available from the Board's executive office.

### **The Committee on Certification for Added Qualifications in Clinical Neurophysiology**

In October, 1990, the American Board of Psychiatry and Neurology, Inc., with the concurrence of the American Board of Medical Specialties, established a Committee on Certification for Added Qualifications in Clinical Neurophysiology. This was done to establish officially the field of clinical neurophysiology as a definite area of subspecialty in neurology and psychiatry.

The actual mechanics of certification of qualified candidates have been delegated by the Board to the committee, which operates under the supervision of and in accordance with the policies of the Board.

Each applicant for certification in added qualifications in clinical neurophysiology must be certified by the Board in the specialty of

neurology, neurology with special qualification in child neurology, or psychiatry, prior to applying for examination in added qualifications in clinical neurophysiology. The general policies regarding training, application and examination in added qualifications in clinical neurophysiology are contained in the pamphlet "Information for Applicants for Certification in Added Qualifications," which is available from the Board's executive office.

### **The Committee on Certification for Added Qualifications in Addiction Psychiatry**

In October, 1991, the American Board of Psychiatry and Neurology, Inc., with the concurrence of the American Board of Medical Specialties, established a Committee on Certification for Added Qualifications in Addiction Psychiatry. This was done to establish officially the field of addiction psychiatry as a definite area of subspecialty in psychiatry and to provide a means of identifying the properly trained and experienced addiction psychiatrist.

The actual mechanics of certification of qualified candidates have been delegated by the Board to the committee, which operates under the supervision of and in accordance with the policies of the Board.

Each applicant for certification in added qualifications in addiction psychiatry must be certified by the Board in the specialty of psychiatry prior to applying for examination in added qualifications in addiction psychiatry. The general policies regarding training, application and examination in added qualifications in addiction psychiatry are contained in the pamphlet "Information for Applicants for Certification in Added Qualifications," which is available from the Board's executive office.

### **The Committee on Certification for Added Qualifications in Forensic Psychiatry**

In October, 1992, the American Board of Psychiatry and Neurology, Inc., with the concurrence of the American Board of Medical Specialties, established a Committee on Certification for Added Qualifications in Forensic Psychiatry. This was done to establish officially the field of forensic psychiatry as a definite area of subspecialty in psychiatry and to provide a means of identifying the properly trained and experienced forensic psychiatrist.

The actual mechanics of certification of qualified candidates have been delegated by the Board to the committee, which operates under the supervision of and in accordance with the policies of the Board.

Each applicant for certification in added qualifications in forensic psychiatry must be certified by the Board in the specialty of psychiatry prior to applying for examination in added qualifications in forensic psychiatry. The general policies regarding training, application and examination in added qualifications in forensic psychiatry are contained in the pamphlet "Information for Applicants for Certification in Added Qualifications," which is available from the Board's executive office.

### **Triple-Board Requirements**

The American Board of Pediatrics, the American Board of Psychiatry and Neurology, and the Committee on Certification in Child and Adolescent Psychiatry of the American Board of Psychiatry and Neurology, have developed a committee that is overseeing training via a different format in six pilot programs. This is a 5-year curriculum with 24 months of pediatrics, 18 months of adult psychiatry and 18 months of child and adolescent psychiatry. Completion of the program will satisfy the training requirements for certification in all three areas. Physicians pursuing training in one of these six pilot programs may not apply for examination until all training has been completed. The six programs involved are located at Albert Einstein College of Medicine, Brown University, Mount Sinai School of Medicine, Tufts University School of Medicine, the University of Kentucky, and the University of Utah. For further information please contact the American Board of Pediatrics, 111 Silver Cedar Court, Chapel Hill, NC 27514-1651.

## Mission Statement

The goal of the American Board of Psychiatry and Neurology, Inc. is to enhance the quality of psychiatric and neurologic care through the voluntary certification process and thereby serve the public interest.

Methods for achieving that goal include (but are not limited to) efforts to:

1. Describe, in terms of knowledge and skills, a physician-specialist with expertise in evaluation, diagnosis and treatment of patients with psychiatric and/or neurologic disorders, or who require psychiatric and/or neurological assessment;
2. Set the standards for knowledge and skills required for certification;
3. Construct and administer examinations designed to evaluate those skills and knowledge;
4. Monitor, evaluate and improve the standards and procedures of the certification process;
5. Participate in the appropriate Residency Review Committees of the Accreditation Council for Graduate Medical Education to set standards for the quality and scope of residency training programs to ensure that their graduates will obtain necessary training credit toward certification;
6. Issue certificates and other forms of recognition to successful candidates;
7. Make available lists of diplomates who have fulfilled the requirements for certification;
8. Inform the public, other professions and other medical organizations of the purposes, activities and responsibilities of the corporation; and
9. Participate in the activities of the American Board of Medical Specialties and its member boards.

## Rules and Regulations

In carrying out its specified functions, the Board has formulated rules and regulations to guide its activities and to indicate to applicants and other interested persons its policies regarding training requirements, examinations, fees, etc. These rules and regulations are amended from time to time. The statements contained in this brochure are the most recent amendments and represent the current policy of the Board.

The Board shall have authority to issue from time to time, and thereafter, to amend, rules and regulations relating to the issuance and revocation of certificates as to qualification in the practice of psychiatry or neurology, or both, or their recognized subspecialties.

## Certificates

The Board currently issues eight types of certificates: (1) in psychiatry, (2) in neurology, (3) in neurology with special qualification in child neurology, (4) in child and adolescent psychiatry, (5) in added qualifications in geriatric psychiatry, (6) in added qualifications in clinical neurophysiology, (7) in added qualifications in addiction psychiatry, and (8) in added qualifications in forensic psychiatry. An applicant may be certified in more than one area. The applicant shall receive a separate certificate for each area in which he/she qualifies. Each certificate shall be in such form and for such period of time as may be specified by the Board.

## Recertification

Effective October 1, 1994 all individuals achieving Board certification by the American Board of Psychiatry and Neurology, Inc. in psychiatry, neurology, neurology with special qualification in child neurology, and child and adolescent psychiatry, will be issued 10-year time-limited certificates. All certificates for added qualifications are valid for 10 years from the date issued.

## Revocation of Certificates

The Board shall have authority to revoke any certificate issued by it or to place a certificate holder on probation for a fixed or indefinite time if:

1. The certificate was issued contrary to or in violation of the bylaws or any rule or regulation of the Board.
2. The person to whom the certificate was issued made any material misstatement or omission of fact to the Board in his/her application or otherwise.

Certification shall continue in force only so long as the holder has an unlimited license to practice medicine.

## Unethical Behavior of Candidates

Since the Board believes that the ethics of candidates for certification is a matter for its proper concern, it has adopted the following rules:

1. The falsification of credentials will be cause for the Board's refusal to admit a candidate to examination for at least 4 years.
2. The Board will consider legal action against anyone who forges an ABPN certificate, copies ABPN examinations or otherwise uses them in conflict with copyright laws, or in any other way violates the legal prerogatives of the Board. Such activities will also be cause for the Board's refusal to admit a candidate to examination for at least 4 years.
3. Scores on the Part I examination may be invalidated for reasons of irregular behavior that indicates cheating. Statistical analyses may be used to confirm such behavior. If the examination score is invalidated, the candidate may submit a written appeal within 30 days of notice on invalidation. An appeal fee of \$300 must accompany the written appeal. The Committee to Review Appeals will review the materials and recommend action to the Board. The Board will review the materials and make a decision which, in all cases, will be final and binding on the Board and on the candidate. All correspondence or other materials should be sent to the Board of office. If the examination score is invalidated because of irregular behavior, the Board will not consider the candidate for examination for a period of at least 4 years. A repeat application and Part I examination fee will be required.
4. Irregular behavior that indicates cheating on the Part II examination may be considered sufficient reason to invalidate the candidate's score. In that event, the Board will not consider the candidate's repeat application for Part II for a period of at least 4 years. Another Part II examination fee will be required.
5. Irregular behavior that indicates cheating shall include, but not be limited to, the following conduct (a) copying of answers from another candidate's examination; (b) knowingly permitting another candidate to copy one's answers on an examination; (c) unauthorized possession, reproduction, or disclosure of materials, including examination questions or answers, before, during, or after the examination; (d) use of audio equipment to record any part of the Part II examination; (e) offering any financial or other benefit to any director, officer, employee, proctor, diplomate, or other agent or representative of the Board in return for any right, privilege, or benefit which is not granted by the Board to other similarly situated candidates or persons.
6. Notification of the Board's action may be sent to legitimately interested third parties, including the American Medical Association, state medical societies, and appropriate specialty societies.
7. A proposal to impose upon a candidate one of the penalties identified in paragraphs 1, 2, 4, and 6 hereof shall constitute a negative determination subject to the "Appeal Procedure for Negative Determinations Regarding Applications" or the "Appeal Procedure for Negative Determinations Regarding Part II Examinations."
8. Upon the expiration of the 4-year period cited in paragraphs 1, 2, 3, and 4 hereof, the candidate may send to the Board a written re-

quest for lifting of the ban, together with a written explanation of the reasons for lifting of the ban which will then be reviewed by the Board for the a final decision. The decision will be final and binding on the Board and on the candidate. All correspondence or other materials should be sent to the Board office.

## Board Eligibility

The American Board of Psychiatry and Neurology Inc., in accord with the policy of the American Board of Medical Specialties, does not recognize or use the term "board eligible" and does not issue statements concerning "board eligibility." The Board informs an applicant of admissibility to examination only when the applicant has an active, approved application on file in the Board office.

## General Requirements

At the time of submission of the application, the applicant must establish that:

1. He/she has an *unlimited license* to practice medicine in a state, commonwealth, territory, or possession of the United States, or a province of Canada. All applicants are required to submit copies of licenses with current registrations and expiration date with their Part I applications.
2. He/she has satisfactorily completed the Board's specialized training requirements in psychiatry, neurology, neurology with special qualification in child neurology, or any of its subspecialties.

## Supplementary Certification

A candidate who has been certified in psychiatry, neurology, or neurology with special qualification in child neurology may apply for supplementary certification in another primary specialty upon submission of a new Part I application and Part I examination fee. The candidate will be scheduled for the next available Part I examination in the supplementary subject. The credentials for such other certificate must be acceptable to the Board.

More than one application may be on file simultaneously. It is the responsibility of the applicant to contact the Board office to avoid possible conflicts in examination scheduling.

### A. Dual Certification in Psychiatry and Neurology

References to "residency" refer to entry at the PGY-2 level unless stated otherwise.

1. For applicants seeking certification both in psychiatry and neurology who have begun residency training prior to January 1, 1988 a total of 5 years of ACGME-approved postgraduate training is required:
  - a. A PGY-1 which meets requirements for either psychiatry or neurology, 2 years of approved residency in psychiatry in a single training program; and
  - b. Two years of approved residency in neurology in a single training program.
2. Applicants seeking certification both in psychiatry and neurology who begin residency training as of January 1, 1988, must have completed a PGY-1 which meets the requirements for entry into a neurology program. Additionally, applicants must complete (a) 6 full years of postgraduate residency training in approved programs in the United States or Canada including 3 full years in psychiatry and 3 full years in neurology, or, (b) at the discretion and approval of both training directors and in accordance with Residency Review Committee requirements, the applicants may complete 5 full years of postgraduate training in approved programs in the United States or Canada, including 2 full years of residency training in psychiatry in a single program, 2 full years of residency training in neurology in a single program, and a full year that is jointly sponsored and coordinated by the psychiatry and neurology training directors to allow the resident to successfully complete all of the

essentials for an approved residency program in psychiatry and an approved residency program in neurology.

The 5 years of residency training are usually taken at one approved institution, but may be taken at no more than two approved institutions. An application for examination may be submitted after completion of an approved PGY-1, 2 full years of approved residency training in one specialty, and the full year of approved, jointly-sponsored residency training.

### B. Dual Certification in Neurology and Neurology with Special Qualification in Child Neurology

Candidates who have achieved certification in neurology and are desirous of being certified in neurology with special qualification in child neurology will need to obtain the following additional training:

1. A minimum of 1 year of general pediatric training completed in a program accredited by the ACGME or by the Royal College of Physicians and Surgeons of Canada.
2. Twelve months of training in clinical child neurology completed in a program accredited by the ACGME or by the Royal College of Physicians and Surgeons of Canada.

A maximum of 3 months of child neurology training obtained during a neurology residency may be applied towards the required 12 months of child neurology training only if the 3 months was accomplished in an ACGME-approved child neurology program or a child neurology program accredited by the Royal College of Physicians and Surgeons of Canada. The neurology program director must document that this training was accomplished in an ACGME-approved child neurology program or a child neurology program accredited by the Royal College of Physicians and Surgeons of Canada.

Candidates will be required to request and submit a new completed Part I application and a \$300 processing fee. Such candidates will not be required to retake the Part I examination in neurology. The Part II examination fee will be requested after the application has been approved. Two 1-hour examinations in child neurology will be taken during the Part II examinations.

### C. Dual Certification in Child and Adolescent Psychiatry and in Neurology with Special Qualification in Child Neurology

An applicant who wishes to obtain certificates both in child and adolescent psychiatry and in neurology with special qualification in child neurology must meet the following requirements. The applicant must be certified by the Board in the specialty of general psychiatry prior to applying for examination in child and adolescent psychiatry. The applicant must also meet the requirements for certification in neurology with special qualification in child neurology. A minimum of 2 years of approved residency training in general psychiatry is required.

## Application

Deadline for receipt of completed applications in the executive Board is the September 1 preceding the scheduled date of the Part I examination.

*All licensing and training requirements must be met prior to making application for examination.*

1. A physician who wishes to be examined by the Board shall complete, sign and file with the executive vice president an application on the current official form, together with the required application and Part I examination fees and supporting data. Supporting data consists of:
  - a. Documentation of all residency training by a copy of certificates of training including exact dates, or a letter of verification of training from the training director including exact dates.
  - b. Documentation of PGY-1 by a letter of verification from the training director describing the exact length and content of rotations during the PGY-1, if the PGY-1 was a categorical first year in internal medicine, pediatrics or family practice, a photocopy

of the certificate of completion including exact dates may be substituted in lieu of the letter from the training director.

- c. A photocopy of current unlimited license renewal registration showing expiration date.
- d. Four autographed photographs—heavy cardboard-backed photos will not be accepted. Photos should be passport-size and either black and white or color photos will be accepted.
2. Photocopies of applications will not be accepted.
3. Only current applications will be accepted.
4. The application and Part I examination fees must be submitted together. Applications received without fees will be returned. Fees received without applications will be returned.
5. Part I application and examination fees are not refundable.
6. A resident who completes training after September 1, but before October 1, may submit an application by the September 1 deadline only if he/she contacts the Board office *in writing before July 1*, to obtain information regarding special application procedures.
7. The Board recognizes that physicians with handicaps may wish to take the Board's examinations. Applicants or candidates must advise the Board in writing at least 90 days prior to their scheduled examination if they are requesting any accommodations from the Board due to a handicap.
8. Application forms may be obtained from the executive vice president at the Board office.
9. The "Information for Applicants" pamphlet and the application are revised each year.

An acknowledgment postcard accompanies each application. That card, when stamped, self-addressed, and enclosed with the application, will be returned to the candidate as acknowledgement that the application has been received by the Board office.

Once the card is returned to the candidate, it may take up to 16 weeks for the candidate to receive information regarding the status of the application. Applications are reviewed in order of receipt.

An applicant who does not receive notification from the Board of file by December 31 of the acceptance or rejection of his/her application should contact the Board office. More than one application may be on file simultaneously. It is the responsibility of the applicant to contact the Board office to avoid possible conflicts in examination scheduling.

### Appeal Procedure for Negative Determinations Regarding Applications

The rejection of credentials for admission to an examination is considered a negative determination. An applicant who has submitted a formal application and receives a negative determination regarding his/her application, may appeal by complying with following procedures:

Within 30 days after date of notice of a negative determination, the applicant may, by writing, indicate his/her request for a formal appeal of his/her application rejection. The following materials must accompany this request: appeal fee of \$300 and any additional written information tending to rebut the negative determination. All correspondence or other materials should be sent to the Board office.

For psychiatry applicants, the Committee on Credentials for psychiatry will review the materials and recommend action to the psychiatry council consisting of all current psychiatry directors. The psychiatry council will review the materials and make a decision which, in all events, will be final and binding on the council, on the Board and on the applicant.

For neurology or neurology with special qualification in child neurology applicants, the Committee on Credentials for Neurology will review the materials and recommend action to the neurology council consisting of all current neurology directors. The neurology council will review the materials and make a decision which, in all events,

will be final and binding on the council, on the Board and on the applicant.

### Examinations

The Board does not endorse or recommend any texts or other teaching aids identified as "Board preparation" material. Furthermore, the Board does not have any affiliation with or responsibility for programs identifying themselves as "Board review courses."

Though the purpose of the examination is to test the qualifications of the candidate in psychiatry or neurology, or both, it must not be forgotten that both these medical disciplines constitute part of the broad field of general medicine. The Board requires proficiency in neurology on the part of those it certifies in psychiatry and vice versa, but examines the candidate in accordance with the certificate he/she seeks.

The Board uses DSM-III-R as its primary authority in psychiatric diagnostic nomenclature.

Each candidate must pass both Part I and Part II of the examination given by the Board. Each examination shall cover such subjects as the Board may determine.

The Board may conduct examinations at such times and places as it deems appropriate. The Board reserves the right to limit the number of candidates admitted to any scheduled examination. The administration and grading of all examinations shall be the sole discretion of the Board. After completion of such examinations, the candidate will be notified in writing by the executive vice president as to the results.

The Board is not liable for candidate travel and/or other related expenses incurred as a result of an examination cancellation.

### Part I Examination Procedures

1. The Part I examination is given once a year, in the spring, on a regional basis throughout the United States and Canada, as well as in selected sites outside the continental limits of the United States. Applicants will be expected to indicate, in order of preference, their choice of four examination sites. Every effort is made to accommodate candidates in the locale of their choice.
2. Request for transfer to another site must be made in writing at least 3 months prior to the Part I examination. Changes will be made subject to space availability.
3. An applicant will be advised in writing by the Board of acceptance for examination.
4. One month prior to the examination candidates will receive an admission notice specifying their examination site and time to report for examination.
5. All applicants are required to sit for the Part I examination for which they have applied. Applicants who fail to do so will be required to request and submit a new application, supporting documentation and the application and Part I examination fees.
6. A candidate who passes Part I shall, upon request, submit to the executive vice president a check payable to the Board to cover the fee for Part II. The Part II examination is given three to four times a year at selected locations in the United States. Candidates who pass Part I will automatically be assigned to a Part II examination with specific date and location. The limited space available and the complicated logistics involved in administering the Part II examination make it extremely difficult for the Board to allow candidates to select either the site or the date for Part II examination. Candidates assigned to Part II examination are expected to be present as scheduled. All candidates will be scheduled for Part II within 1 year following notification of successful completion of Part I.
7. A candidate who fails the initial Part I examination may, upon payment of the Part I reexamination fee, repeat the examination the following year. Reexaminees who do not sit for re-examination as scheduled will be required to request and submit a new applica-

tion, all supporting documentation and the application and Part I examination fees. Two failures necessitate reapplication (request for a new application, all supporting documentation and the application and Part I examination fees).

8. Through April, 1986, a passing grade on the Part I examination will be valid for a period of 7 years from the date of passing. All individuals holding such a grade may apply or reapply for the Part II examination.

Effective March, 1987, a passing grade on the Part I examination dated March, 1987, or thereafter, will be valid for a period of 6 years, or three attempts to complete the Part II examination successfully, whichever comes first.

### **Appeal Procedure for Negative Determinations Regarding Part I Examinations**

A failing grade on the Part I examination is considered a negative determination. A candidate who receives a negative determination may appeal by complying with the following procedures:

Within 30 days after date of notice of a negative determination, the unsuccessful candidate may, by writing, indicate his/her request to have his/her examination handscored. The appeal fee of \$300 must accompany the request. The candidate will be informed of the results of the handscoreing in writing which, in all events, will be final and binding on the Board and on the candidate. All correspondence or other materials should be sent to the Board office.

### **Part II Examination Procedures**

All successful Part I candidates will receive a notice of assignment to a Part II examination, together with a request to submit the required examination fee. Scheduling for the Part II examination will be made on a regional basis as much as is possible. Candidates who fail to take Part II as scheduled by the Board will be required to reapply for the Part II examination.

The limited space available and the complicated logistics involved in administering the Part II examination make it extremely difficult for the Board to allow candidates to select either the site or the date for examination. It is the candidate's privilege to decline the assigned examination, but there is no guarantee that another date or location will be available within the year's examination cycle.

Candidates who do not pay the Part II examination fee for their scheduled examination by the deadline specified, will be removed from the roster of candidates for that examination. Such candidates will be required to request and submit a Part II application in order to be scheduled for a future Part II examination. Examination fees will be requested at the appropriate time.

Candidates who pay their Part II examination fee but fail to appear at their scheduled Part II examination will forfeit the fee. Such candidates will be required to request and submit a Part II application in order to be scheduled for a future Part II examination. Examination fees will be requested at the appropriate time.

For candidates who do not take the Part II exam as scheduled and are required to request and submit the Part II application, there is no guarantee that scheduling of the Part II examination can be accomplished prior to October 1, 1994 due to the limited space available in all Part II examinations. October 1, 1994 is the date by which candidates must be certified to receive a certificate which is not 10-year time limited.

One month prior to the date of the assigned Part II examination, a candidate will receive informational materials and an admission notice specifying the date, time and place to report for registration. Candidates are requested to report for registration only at the date and time indicated on the admission notice. Registration schedules are arranged to accommodate candidates in accordance with their examination schedules.

### **A. Policy for Retaking of Part II Examination**

Through April, 1986, a passing grade on the Part I examination will be valid for a period of 7 years from the date of passing. All individuals holding such a grade may apply or reapply for the Part II examination.

Effective March, 1987, a passing grade on the Part I examination dated March, 1987, or thereafter, will be valid for a period of 6 years, or three attempts to complete the Part II examination successfully, whichever comes first. Psychiatry candidates must pass both major sections to successfully complete the Part II examination. Neurology candidates must pass both major section and the minor section to successfully complete the Part II examination.

1. A candidate who passes both sections of the major subject of the Part II examination need not repeat this portion of the examination. To pass a major subject, the candidate must achieve final passing grades on both sections of the major subject at the same examination. A candidate who fails one or both sections of the major subject must take both hours of examination in the major subject at each subsequently scheduled examination until he or she passes both sections at the same examination.
2. Candidates who pass the Part II examination in the minor subject(s) need not repeat this portion of the examination.
3. Candidates who are unsuccessful in the Part II examination during the time period allotted to complete the Part II examination will be required to request and submit a new Part I application, documentation and the application and Part I examination fees.

### **B. Procedures for Retaking of Part II Examination**

Candidates who have failed the Part II examination are automatically assigned to another Part II examination and are required to be present as scheduled. Candidates who fail to take the reexamination at the time specified are required to request and submit a Part II application. When possible, candidates submitting the Part II application will be scheduled for examination within 1 year from the date the Part II application is received in the Board office. Due to space limitations in the Part II examinations a wait longer than one year may become necessary. Candidates will be scheduled for examination based on space availability and order or receipt of application. A request for the examination fee will be made at that time. The examination fee should not be sent with the application.

Candidates who have submitted a Part II application may choose to decline two invitations to Part II examinations. If the third invitation is declined, the candidate will be required to request and submit a new Part II application and will be placed at the end of the waiting list once the application is received in the Board office.

For candidates who do not take the Part II exam as scheduled and are required to request and submit the Part II application, there is no guarantee that scheduling of the Part II examination can be accomplished prior to October 1, 1994 due to the limited space available in all Part II examinations. October 1, 1994 is the date by which candidates must be certified to receive a certificate which is not 10-year time limited.

Candidates should be aware of the expiration date of their passing the Part I examination, and the number of times they have taken the Part II examination.

### **C. Rules of Forfeiture of Part II Examination Fee**

A candidate who is unable to attend the Part II examination to which he/she has been admitted and who fails to notify the executive vice president in writing at least 3 months before the start of such examination shall forfeit the examination fee.

### **Feedback to Unsuccessful Candidates on the Part II Examination**

A failing grade on a Part II examination is considered a negative determination. Within 30 days after date of notice of a negative determination, the unsuccessful candidate may, by writing, indicate his/her

request for feedback. The fee for providing feedback is \$100 and must accompany the written request. After such request, the candidate will be provided information concerning his/her performance in the form of a checklist of categories passed and not passed. All correspondence or other materials should be sent to the Board office.

### Appeal Procedure for Negative Determinations Regarding Part II Examinations

A failing grade on a Part II examination is considered a negative determination. A candidate who receives a negative determination may appeal by complying within the following procedure:

Within 55 days after date of notice of a negative determination, the unsuccessful candidate may, by writing, indicate his/her request for a formal appeal of the examination results. The following materials must accompany this request: appeal fee which is equal to the candidate's reexamination fee, written information (plus one copy) tending to rebut the negative determination. All correspondence or other materials should be sent to the Board office.

For psychiatry candidates the Committee to Review Appeals for Psychiatry will review the materials and recommend action to the psychiatry council consisting of all current psychiatry directors. The psychiatry council will review the material and make a decision which, in all events, will be final and binding on the council, on the Board and on the candidate.

For neurology or neurology with special qualification in child neurology candidates the Committee to Review Appeals for Neurology will review the materials and recommend action to the neurology council consisting of all current neurology directors. The neurology council will review the materials and make decision which, in all events, will be final and binding on the council, on the Board and on the candidate.

### Fee Schedule (Effective November 1, 1991)

Fees must be submitted in US Currency.

Part I application fee—\$300

Part I examination fee—\$300

Part I reexamination fee—\$300

Part II examination—\$600

Part II reexamination fee (failure of minor)—\$400

Part II reexamination fee (failure of major)—\$600

Part II reexamination fee (failure of major and minor)—\$600

There will be a \$50 charge for all checks returned by our bank. *The ABPN reserves the right to revise fee schedules.*

The application fee and the Part I examination fee totaling \$600 is required at the time of making application or reapplication for the Part I examination.

## II. Certificate in Psychiatry

### Training Requirements

References to "residency" refer to entry at the PGY-2 level unless stated otherwise.

An applicant who seeks admission to examination for certification in psychiatry must have satisfactorily completed an approved PGY-1 and 3 full years of postgraduate, specialized residency training in a program accredited by the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada. This residency training must be in the specialty in which the applicant seeks certification. No residency training credit can be given for time spent in a residency program in another specialty. Training programs approved by the Residency Review Committees and accredited by the Accreditation Council for Graduate Medical Education can be found in the current issue of the *Directory of Graduate Medical Education Programs* published by the American Medical Association. This directory includes the "Essentials of Accredited Residencies."

Training may be completed on a part-time basis, provided that it is no less than half-time, and credit will not be given for less than 1-year blocks of training except under special circumstances which must be approved by the ABPN Credentials Committee for Psychiatry.

Training programs may develop individual leave or vacation time for residents in accordance with the overall institutional policy. Leave or vacation time may not be utilized to reduce the total amount of required residency training or to make up deficiencies in training.

To ensure continuity of training, the Board requires that 2 years of the 3 years of residency training be spent in a single program. On occasion, the Board will consider alternate patterns of training that have not included the required 2 years spent in a single program, provided that the total residency permitted the applicant to assume progressive levels of responsibility and that a comprehensive curriculum was covered. In such cases, it is the responsibility of the applicant to provide detailed documentation from the respective training directors outlining training content, duties, and responsibilities. Each case will be considered on an individual basis.

### A. Training Requirements for Physicians Who Entered Residency Training Programs On or After July 1, 1977 and Before July 1, 1986

Two patterns of training are acceptable:

1. Three years training following a first postgraduate year:

Prior to entering an approved 3-year training program in psychiatry a physician must have completed 1 year of approved training after receiving the degree of doctor of medicine or doctor of osteopathy. This year of clinical experience should emphasize internal medicine, pediatrics, or family practice. The following programs would be acceptable:

The categorical first year, categorical\* first year, and the flexible first year are in accord with those defined by the Department of Graduate Medical Education, American Medical Association. These were in effect from 1977 through 1981. Effective July, 1982, ACGME-approved first postgraduate year training programs include only categorical first year, categorical\* first year, and transitional programs.

**Categorical first year**—These are first-year programs planned, sponsored, and conducted by a single, approved residency program as part of that residency. The content of such a first year will be limited to the specialty field of the sponsoring residency program.

The categorical first year (beginning after 1977 and before 1985 for psychiatry candidates) must be completed in internal medicine, family practice, pediatrics, surgery, or obstetrics and gynecology.

**Categorical\* first year**—the asterisk designates a first-year program that was planned, sponsored, and supervised by a single, approved residency program as part of that residency's program of graduate medical education, the content of which was not limited to the single specialty of the sponsoring residency program but may have included experience in two or more specialty fields.

The categorical\* first year in psychiatry must have included at least 4 months with direct patient care responsibility in internal medicine, family practice, or pediatrics.

**Flexible first year**—the first year will be sponsored by two or more approved residencies and will be jointly planned and supervised by the residencies that sponsor it. Such a first year is designed to give broad clinical experience for: (a) students who feel the need for this type of first year, (b) program directors who feel that such an experience will best serve the purpose of subsequent graduate education in their field, and (c) students who have not yet decided on their specialty but may wish to choose among several fields during their first graduate year. The content of a flexible first year must include 4 months of internal medicine, but the remainder of the year may be designed in accordance with the purposes of the two or more sponsoring residency programs, and the interests and needs of the student.

Transitional programs—transitional programs are provided for physicians who desire in their first or later graduate year an experience in several specialties prior to embarking on further training in a single specialty. The criteria for a transitional year are outlined in the *Directory of Graduate Medical Education Programs* published by the American Medical Association.

2. Four-year training programs: A 4-year program in psychiatry would be acceptable with the provision that no less than 4 months during one of the years (preferably the first year), be spent in an approved program providing supervised, direct responsibility for the general medical care of children and/or adults.

### **B. Training Requirements for Physicians Who Entered Residency Training Programs On or After July 1, 1986**

An applicant seeking admission to examination for certification in psychiatry who entered residency training on or after July 1, 1986 must have completed the following 4 years of training in approved programs.

Two patterns of training are acceptable:

1. A broad-based clinical year of accredited training in the United States or Canada in internal medicine, family practice, or pediatrics; or ACGME-approved transitional year program which included a minimum of 4 months of primary care; or an ACGME-approved residency in a clinical specialty requiring comprehensive and continuous patient care plus 3 full years of post-graduate, specialized residency training in a psychiatry program accredited by the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada.

Please note that for the transitional year program, a letter of verification from the training director describing the exact length and content of rotations must be submitted when making application.

2. Four-year training program: Four-years of training in an ACGME-approved program in psychiatry would be acceptable with the provision that no less than 4 months during one of the years of training be spent in an approved program providing supervised, direct responsibility for the general medical care of children and/or adults.

Beginning July 1, 1988, all osteopathic physicians entering a PGY-2 in Psychiatry must have successfully completed an approved PGY-1 as described above.

### **Training Credit From the United Kingdom**

The following criteria apply to all applicants for psychiatry who began their psychiatric residency training on or after July 1, 1976. Applicants who have completed residency training in the United Kingdom prior to July 1, 1976, must meet the criteria outlined in the section "Applicants with Non-US, Non-Canadian or Non-UK Training."

For each year of psychiatric residency training completed in an approved hospital program in the United Kingdom, 1 year of training credit will be given toward eligibility for examination by the Board in psychiatry.

The hospital program must be among those approved by the Visiting Inspecting Specialty Committee in Psychiatry of the Royal College of Psychiatrists.

In order to obtain credit for 2 or 3 years of approved training in the United Kingdom, at least 2 years of the training must be spent at the same training center in psychiatry.

The applicant will be responsible for sending the details of his/her training to the American Board of Psychiatry and Neurology's executive office, along with verification of this training from the approved hospital or hospitals in the United Kingdom. The applicant's program director must certify that the applicant was engaged in full-time residency training.

As of July 1, 1985, all applicants for admission to examination who are requesting credit for training done in the United Kingdom must have an approved year of primary care training in the United States or Canada. The exception is restricted to those applicants who hold

the MRCPsych (member of the Royal College of Psychiatrists) certificate and training completed in its entirety, (internship and residency training). If training in its entirety was not completed in the United Kingdom, the applicant must complete an additional year of approved primary care training in the United States or Canada.

### **Applicants With Non-US Non-Canadian or Non-UK Training**

The following criteria pertaining to all applicants whose residency training was undertaken at a center located outside the United States, Canada, or the United Kingdom (with the exception of applicants who complete residency training in the United Kingdom prior to July 1, 1976.) The candidate must possess an unlimited license to practice medicine in a state, commonwealth, territory, or possession of the United States or a province of Canada.

The candidate must successfully complete a comparable national certification examination in the country of training in the specialty in which the physician is seeking admission to examination. The candidate must have achieved such certification within the past 7 years. If certification was achieved earlier, then the candidate must have had 1 year of clinical practice in a setting in which his/her professional work has been observed by at least two ABPN diplomates in that specialty and documented by two letters of sponsorship from such diplomates.

The only certifications recognized by the Board for psychiatry are:

1. United Kingdom's MRCPsych (Member of the Royal College of Psychiatrists)
2. Australia and New Zealand's FRANZCP (Fellow of the Royal Australian and New Zealand College of Psychiatrists)
3. F.F. Psych (S.A.) of the South African Medical and Dental Council (Fellowship of the Faculty of Psychiatry of the College of Medicine of South Africa)
4. Israel's Specialty Certification of the Scientific Council of the Israel Medical Association

All applicants with Non-US, Non-Canadian or Non-UK training who do not meet the above criteria must complete training as listed under "II. Certificate in Psychiatry; Training Requirements."

As of July 1, 1985, all applicants for admission to examination must have an approved year of primary care training in the United States or Canada. The exception is restricted to those applicants who hold a certificate and training in its entirety (internship and residency training) in one of the above-mentioned countries. If training in its entirety was not completed in the country issuing the certificate, the applicant must complete an additional year of approved primary care training in the United States or Canada.

### **Part I Examination Content**

Successful completion of the Part I written examination in psychiatry and neurology is required of candidates seeking certification in psychiatry, neurology, or neurology with special qualification in child neurology.

The psychiatric portion of the examination will include questions on the following areas in psychiatry: normal and abnormal growth and development through the life cycle, biological dimensions of psychiatry, psychosocial dimensions, and clinical psychiatry (phenomenology, diagnosis, and treatment.)

The neurologic portion of the examination will include questions on the following areas in neurology: clinical neurology, neuroanatomy, neuropathology, neuropharmacology, and clinical diagnostic procedures (including questions on cerebrospinal fluid, neuro-ophthalmology, electroencephalography, and neuro-imaging) and therapy and management of patients with neurologic disorders.

### **Part II Examination Content**

Part II, an oral examination, will include the examination of patients under the supervision of one or more examiners. The manner of exam-

ining patients, and the reasoning and deductions therefrom will constitute an important part of the examination. Knowledge of basic science principles, special diagnostic procedures, and management recommendations and risks are also essential parts of the examination, which is focused upon evaluation of clinical skills.

Candidates are expected to discuss the patient and their findings with their examiners. Questions frequently cover such areas as diagnosis, differential diagnosis, treatment, prognosis, and management. Reference to the basic sciences of psychiatry and neurology may be made.

*Psychiatry candidates will take two examinations:*

One 1-hour examination in clinical psychiatry (patient)

One 1-hour examination in clinical psychiatry (audio-visual)

In the patient section, the psychiatry candidate will be given approximately 30 minutes to examine a patient under the supervision of one or more examiners. Following the examination of the patient, the candidate will be examined by one or more examiners. This section will stress physician-patient interaction or conduct of the clinical examination, capacity to elicit clinical data, formulation, differential diagnosis and prognosis, therapeutic management, and knowledge of therapies. Additional questions may be addressed to the basic science of psychiatry.

The psychiatry audio-visual section will consist of a video-taped psychiatric examination approximately 20 minutes in length which the candidate will observe. Candidates will then be individually examined by one or more examiners with particular reference to the content of the tape. This discussion may also include other clinical topics.

### III. Certificate in Neurology or Neurology With Special Qualification in Child Neurology

#### Training Requirements

References to "residency" refer to entry at the PGY-2 level unless stated otherwise.

#### A. Certificate in Neurology

An applicant who seeks admission to examination for certification in neurology must have satisfactorily completed an approved PGY-1 (see below for specifics) and 3 full years of postgraduate, specialized residency training in a neurology program accredited by the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada. This residency training must be in the specialty in which the applicant seeks certification. No residency training credit can be given for time spent in a residency program in another specialty. Training programs approved by the Residency Review Committees and accredited by the Accreditation Council for Graduate Medical Education can be found in the current issue of the *Directory of Graduate Medical Education Programs* published by the American Medical Association. This directory includes the "Essentials of Accredited Residencies."

Training may be completed on a part-time basis, provided that it is no less than half-time. Credit will not be given for less than 1-year blocks of training.

Training programs may develop individual leave or vacation time for residents in accordance with the overall institutional policy. Leave or vacation time may not be utilized to reduce the total amount of required residency training or to make up deficiencies in training.

To ensure continuity of training, the Board requires that 2 years of the 3 years of residency training be spent in a single program. On occasion, the Board will consider alternate patterns of training that have not included the required 2 years spent in a single program, provided that the total residency permitted the applicant to assume progressive levels of responsibility and that a comprehensive curriculum was covered. In such cases, it is the responsibility of the applicant to provide detailed documentation from the respective training directors outlining training content duties, and responsibilities. Each case will be considered on an individual basis.

1. Training requirements for physicians who entered residency training on or after July 1, 1987.

(For neurology training requirements pertinent to physicians who entered residency training prior to July 1, 1987 see "Appendix A.")

Two patterns of training are acceptable:

- a. Three-year training program following a first postgraduate year:
 

Prior to entering an approved 3-year residency training program in neurology a physician must have completed 1 year of approved graduate training after receiving the degree of doctor of medicine or doctor of osteopathy as follows:

Physicians entering neurology residency training as of July 1, 1987 and before July 1, 1991 may enter neurology residency training programs *only* after an initial first year of graduate training in accredited programs in the United States or Canada in internal medicine or an ACGME-approved transitional program which includes at least 6 months experience in internal medicine. In lieu of such PGY-1 training, the following certificates will be accepted:

  - 1) MRCP(UK)—United Kingdom's Member of the Royal College of Physicians
  - 2) MRACP—Australia and New Zealand's Member of the Royal Australasian College of Physicians
  - 3) FCP(SA)—South Africa's Fellow of the College of Physicians
  - 4) MRCP(I)—Ireland's Member of the Royal College of Physicians

Transitional programs—transitional programs are provided for physicians who desire in their first or later graduate year an experience in several specialties prior to embarking on further training in a single specialty. The criteria for a Transitional year are outlined in the *Directory of Graduate Medical Education Programs* published by the American Medical Association.

- b. Four-year training program:
 

Four years of training in a neurology program approved by the ACGME for 4 years of training is acceptable.

2. Training requirements for physicians entering residency training in neurology on or after July 1, 1991.

An applicant seeking admission to examination for certification in neurology entering residency training on or after July 1, 1991 must complete the following 4 years of training in ACGME-approved programs.

Two patterns of training are acceptable:

- a. A full year of training in internal medicine, or as an acceptable alternative, a full year in which a minimum of 8 months of training must be in internal medicine, the details of which must be documented by the internal medicine training director. The composition of these 8 months cannot include rotations in neurology or emergency medicine. To ensure that these 8 months constitute a high quality experience, they should be obtained with an emphasis on progressive responsibility for the resident.
 

In lieu of this year, the following certificates will be accepted:

  - 1) MRCP(UK)—United Kingdom's Member of the Royal College of Physicians
  - 2) MRACP—Australia and New Zealand's Member of the Royal Australasian College of Physicians
  - 3) FCP(SA)—South Africa's Fellow of the Royal College of Physicians
  - 4) MRCP(I)—Ireland's Member of the Royal College of Physicians

In addition, all physicians will be required to complete 3 full years of postgraduate, specialized residency training in a neurology program accredited by the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada.

The candidate must successfully complete a comparable national certification examination in the country of training in the specialty in which the physician is seeking admission to examination. The candidate must have achieved such certification within the past 7 years. If certification was achieved earlier, then the candidate must have had one year of clinical practice in a setting in which his/her professional work has been observed by at least two ABPN diplomates in that specialty and documented by two letters of sponsorship from such diplomates.

b. Four-year training program:

Four years of training in a neurology residency program approved by the ACGME for 4 years of training is acceptable.

3. Training requirements for physicians entering residency training as of July 1, 1994.

An applicant seeking admission to examination for certification in neurology entering residency training on or after July 1, 1994 must complete the following 4 years of training in ACGME-approved programs.

Two patterns of training are acceptable:

- a. A full year of training in internal medicine, or as an acceptable alternative, a full year in which a minimum of 6 months of training must be in internal medicine, the details of which must be documented by the internal medicine training director. The composition of these 6 months cannot include rotations in neurology or emergency medicine. To ensure that these 6 months constitute a high quality experience, they should be obtained with an emphasis on progressive responsibility for the resident.

At least 2 months of the additional 6 months must be spent in pediatrics and/or emergency medicine. No more than 2 months of the remaining 4 months may be spent in neurology.

In lieu of this year, the following certificates in internal medicine will be accepted:

- 1) MRCP(UK)—United Kingdom's Member of the Royal College of Physicians
- 2) MRACP—Australia and New Zealand's Member of the Royal Australasian College of Physicians
- 3) FCP(SA)—South Africa's Fellow of the Royal College of Physicians
- 4) MRCP(I)—Ireland's Member of the Royal College of Physicians

In addition, all physicians will be required to complete 3 full years of postgraduate, specialized residency training in a neurology program accredited by the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada.

The candidate must successfully complete a comparable national certification examination in the country of training in the specialty in which the physician is seeking admission to examination. The candidate must have achieved such certification within the past 7 years. If certification was achieved earlier, then the candidate must have had 1 year of clinical practice in a setting in which his/her professional work has been observed by at least two ABPN diplomates in that specialty and documented by two letters of sponsorship from such diplomates.

b. Four-year training program:

Four years of training in a neurology program approved by the ACGME for 4 years of training is acceptable.

*Beginning July 1, 1988, all osteopathic physicians entering a PGY-2 in neurology must have successfully completed an approved PGY-1 as described above.*

**B. Certificate in Neurology With Special Qualification in Child Neurology**

Proper preparation for the practice of child neurology requires that the practitioner be a qualified neurologist who has had additional

training in pediatrics and child neurology. To qualify for this certificate a different type of preparation and certifying examination are required. The same diploma will be used, the only difference being that instead of certifying qualification in neurology, it certifies qualification in neurology with special qualification in child neurology. Training may be completed on a part-time basis, provided that it is no less than half-time, and credit will not be given for less than 1-year blocks of training except under special circumstances which must be approved by the ABPN Credentials Committee for Neurology.

To ensure continuity of training, the Board requires that 2 years of the 3 years of neurology residency be spent in a single program.

An applicant seeking admission to examination for certification in neurology with special qualification in child neurology must have completed the following training in ACGME-approved programs, or programs approved by the Royal College of Physicians and Surgeons of Canada. All training must be completed after receiving the degree of doctor of medicine or doctor of osteopathy.

1. Three patterns of training are acceptable for 2 of the 5 years of training:

- a. Two years of training in general pediatrics; or
- b. Effective for individuals entering training as of July 1, 1992, 1 year of training in general pediatrics, and 1 year of research in the basic neuroscience. The basic neuroscience pathway was created as an alternative track for residents who are planning a research career in academic child neurology. The year of basic neuroscience would provide training in a research discipline related to child neurology, and is intended to increase the trainee's knowledge bases and competitiveness for federal and non-federal grant support. The trainee must make at least an 80% time commitment to basic neuroscience during this year of training. For the purpose of this training track, basic neuroscience is defined as laboratory research related to the cellular or molecular basis of neurological diseases. Examples of relevant basic disciplines include molecular neurogenetics, neurochemistry, neuropharmacology, neurophysiology, neuroanatomy, neuroimmunology, developmental neurobiology, biophysics, and cell biology. This track of training must be approved prior to completion of the 5 years of training; or

- c. Effective for individuals entering training as of July 1, 1991, 1 year of training in general pediatrics, and 1 year of training in internal medicine. An acceptable alternative to the 1 year of internal medicine is a full year in which a minimum of 8 months of training must be in internal medicine, the details of which must be documented by the internal medicine training director. The composition of these 8 months cannot include rotations in neurology or emergency medicine. In lieu of this year of internal medicine the following certificates will be accepted:

- 1) MRCP(UK)—United Kingdom's Member of the Royal College of Physicians;
- 2) MRACP—Australia and New Zealand's Member of the Royal Australasian College of Physicians;
- 3) FCP(SA)—South Africa's Fellow of the Royal College of Physicians;
- 4) MRCP(I)—Ireland's Member of the Royal College of Physicians.

2. Effective for individuals entering residency training as of July 1, 1991, 3 years of residency training in an ACGME-approved child neurology program, or a child neurology program approved by the Royal College of Physicians and Surgeons of Canada, must be completed.

Effective for individuals entering residency training prior to July 1, 1991, 3 years of residency training in an ACGME-approved neurology program or a neurology program approved by the Royal College of Physicians and Surgeons of Canada, must be completed. One of these 3 years must be devoted to clinical child neurology.

## Applicants With Non-US or Non-Canadian Training

The following criteria pertain to all applicants whose residency training was undertaken at a center located outside the United States or Canada. The candidate must possess an unlimited license to practice medicine in a state, commonwealth, or territory of the United States or province of Canada.

As of July 1, 1985 the only residency training which will be considered is training completed in programs approved by the Accreditation Council for Graduate Medical Education (ACGME) in the United States, or the Royal College of Physicians and Surgeons in Canada.

In lieu of a PGY-1 in an accredited program in the United States or Canada the following certificates will be accepted:

- a. MRCP(UK)—United Kingdom's Member of the Royal College of Physicians
- b. MRACP—Australia and New Zealand's Member of the Royal Australasian College of Physicians
- c. FCP(SA)—South Africa's Fellow of the College of Physicians
- d. MRCP(I)—Ireland's Member of the Royal College of Physicians

The candidate must have achieved certification within the past 7 years. If certification was achieved earlier, then the candidate must have had 1 year of clinical practice in a setting in which his/her professional work has been observed by at least two ABPN diplomates, in that specialty and documented by two letters of sponsorship from such diplomates.

For neurology training requirements pertinent to non-US or non-Canadian trained physicians who entered residency training prior to July 1, 1985, see "Appendix A."

## Part I Examination Content

Successful completion of the Part I written examination in psychiatry and neurology is required of candidates seeking certification in psychiatry, neurology, or neurology with special qualification in child neurology.

The neurologic portion of the examination will include questions on the following areas in adult and child neurology: neuroanatomy, neuropathology, neurochemistry, neurophysiology, basic and clinical neuropharmacology, neuroimmunology/neurovirology, genetics, neuroendocrinology, neuro-imaging, neuro-ophthalmology, neuro-otology, and non cerebrospinal fluid.

The psychiatric portion of the examination will include questions on the following areas in psychiatry: developmental and other disorders of childhood, psychopathology and diagnostic criteria, the doctor-patient relationship, behavioral and personality changes associated with structural alterations, alcoholism and substance abuse, altered states of consciousness, memory disorders and cortical dysfunction, psychiatric problems associated with medical disease, diagnostic procedures, psychopharmacology, and non pharmacologic therapeutic modalities.

## Part II Examination Content

Part II, an oral examination, will include the examination of patients under the supervision of one or more examiners. The manner of examining patients, and the reasoning and deductions therefrom will constitute an important part of the examination. Knowledge of basic science principles, special diagnostic procedures, and management recommendations and risks are also essential parts of the examination, which is focused upon evaluation of clinical skills.

Candidates are expected to discuss the patient and their findings with their examiners. Questions frequently cover such areas as diagnosis, differential diagnosis, treatment, prognosis and management. Reference to the basic sciences of psychiatry and Neurology may be made.

Neurology candidates will take three examinations:  
 One 1-hour examination in clinical neurology (patient)  
 One 1-hour examination in clinical neurology (without patient)  
 One 1-hour examination in clinical child neurology (without patient)

Child neurology candidates will take three examinations:  
 One 1-hour examination in clinical child neurology (patient)  
 One 1-hour examination in clinical child neurology (without patient)  
 One 1-hour examination in clinical neurology (without patient)

Since candidates in child neurology are to be certified in neurology with special qualification in child neurology, it is agreed that those candidates will be expected to pass a 1-hour oral examination in clinical neurology (without patient) which is set at the same level of difficulty established for neurology candidates. The pass/fail standards for that hour in clinical neurology (without patient) will be the same whether the candidate is seeking certification in neurology or in neurology with special qualification in child neurology.

In the neurology and child neurology patient sections, the candidate will be given approximately 30 minutes to examine the patient under the supervision of one or more examiners. During the conduct of the examination, the candidate's ability to obtain an adequate history and perform a neurological examination will be observed. Following the examination of the patient, the discussion with the examiner which will be approximately 30 minutes in length, will focus on the evaluation of the findings and discussion of the diagnosis, treatment, and management. This discussion may not be limited to the patient examined and may also include other clinical topics. The examiners may also ask additional questions concerning the basic science of the particular section.

Multiple written simulated patient encounters will be utilized as a basis for discussion of diagnosis and treatment in those sections in which there is no patient present.

## Appendix A

### A. Neurology Training Requirements Pertinent to Physicians Who Entered Residency Training Prior to July 1, 1987

Satisfaction of the following training requirements for residency is mandatory for physicians entering training programs on or after July 1, 1977 and before July 1, 1987 for neurology.

Two pattern of training are acceptable:

1. Three-year training following a first postgraduate year: Prior to entering an approved 3-year training program in neurology a physician must have completed 1 year of approved training after receiving the degree of doctor of medicine or doctor of osteopathy. This year of clinical experience should emphasize internal medicine, pediatrics, or family practice. The following programs would be acceptable.

The categorical first year, categorical\* first year, and the flexible first year are in accord with those defined by the Department of Graduate Medical Education, American Medical Association. These were in effect from 1977 through 1981. Effective July, 1982, ACGME-approved first postgraduate year training programs include only categorical first year, categorical\* first year, and transitional programs.

Categorical first year—these are first-year programs planned, sponsored, and conducted by a single, approved residency program as part of that residency. The content of such a first year will be limited to the specialty field of the sponsoring residency program.

The categorical first year (beginning after 1977 and before 1986 for neurology candidates) must be completed in internal medicine, family practice, pediatrics, surgery, or obstetrics and gynecology.

Categorical\* first year—the asterisk designates a first-year program that was planned, sponsored, and supervised by a single, approved residency program as part of that residency's program of graduate medical education, the content of which was not limited to the single specialty of the sponsoring residency program but may have included experience in two or more specialty fields.

The categorical\* first year in neurology must have included at least 4 months with direct patient care responsibility in internal medicine, family practice, or pediatrics.

Flexible first year—the first year will be sponsored by two or more approved residencies and will be jointly planned and supervised by the residencies that sponsor it. Such a first year is designed to give broad clinical experience for: (a) students who feel the need for this type of first year; (b) program directors who feel that such an experience will best serve the purpose of subsequent graduate education in their field, and (c) students who have not yet decided on their specialty but may wish to choose among several fields during their first graduate year. The content of a flexible first year must include 4 months of internal medicine, but the remainder of the year may be designed in accordance with the purposes of the two or more sponsoring residency programs, and the interests and needs of the students.

Transitional programs—transitional programs are provided for physicians who desire in their first or later graduate year an experience in several specialties prior to embarking on further training in a single specialty. The criteria for a transitional year are outlined in the *Directory of Graduate Medical Education Programs* published by the American Medical Association.

2. Four-year training programs: A neurology residency program approved by the ACGME for 4 years of training would be acceptable.

**B. Neurology Training Requirements Pertinent to Physicians Whose Residency Training Was Undertaken at a Center Located Outside the US or Canada Prior to July 1, 1985**

The following criteria pertain to all applicants whose residency training was undertaken at a center located outside the US or Canada prior to July 1, 1985. The applicant must possess an unlimited license to practice medicine in a state, commonwealth, or territory of the United States or province of Canada.

1. Applicants from the United Kingdom

For each year of residency training completed in an approved hospital program in neurology in the United Kingdom, 1 year of training credit will be given toward eligibility for examination by the Board in neurology.

The hospital program must be among those approved by the Visiting Inspecting Specialty Committee in Neurology of the Royal College of Physicians.

In order to obtain credit for 2 or 3 years of approved training in the United Kingdom, at least 2 years of the training must be spent at the same training center in neurology.

The applicant will be responsible for sending the details of his/her training to the American Board of Psychiatry and Neurology's executive office, along with verification of this training from the approved hospital or hospitals in the United Kingdom. The applicant's program director must certify that the applicant was engaged in full-time residency training. Credit for approved residency training in the United Kingdom will be given only for training begun *on or after July 1, 1976*. Applicants who have completed residency training in the United Kingdom *prior to July 1, 1976*, must meet the criteria outlined in the section "Applicants with Non-US, Non-Canadian, or Non-UK Training," listed below.

2. Applicants with Non-US, Non-Canadian, or Non-UK Training
 

The following criteria pertain to all applicants whose residency training was undertaken at a center located outside the United States, Canada, or the United Kingdom (with the exception of applicants who completed residency training in the UK prior to July 1, 1976.)

  - a. The candidate must have had full-time specialty training in a manner equivalent in length of time and content to that required for US training and;
  - b. The candidate must successfully complete a comparable national certification examination in the country of training in

the specialty in which the physician is seeking admission to examination and;

- c. The candidate must have achieved certification within the past 7 years. If certification was achieved earlier, then the candidate must have had 1 year of clinical practice in a setting in which his/her professional work has been observed by at least two ABPN diplomates in that specialty and documented by two letters of sponsorship from such diplomates.

The only certifications recognized by the Board as clearly equivalent are, the United Kingdom's MRCP (Member of the Royal College of Physicians), and Australia's MRACP (Member of the Royal Australian College of Physicians). Certification by the Royal College of Physicians and Surgeons of Canada has been previously approved.

**American Board of Radiology**

- Lee F. Rogers, MD, President, Chicago, Illinois
- C. Douglas Maynard, MD, Vice President, Winston-Salem, North Carolina
- Lester J. Peters, MD, Secretary-Treasurer, Houston, Texas
- David G. Bragg, MD, Salt Lake City, Utah
- Robert E. Campbell, MD, Philadelphia, Pennsylvania
- M. Paul Capp, MD, Tucson, Arizona
- William J. Casarella, MD, Atlanta, Georgia
- Lawrence W. Davis, MD, Atlanta, Georgia
- Gerald D. Dodd, MD, Houston, Texas
- Sarah S. Donaldson, MD, Stanford, California
- Jack Edeiken, MD, Houston, Texas
- Milton Elkin, MD, Bronx, New York
- Thomas S. Harle, MD, Houston, Texas
- John A. Kirkpatrick, Jr., MD, Boston, Massachusetts
- Jack S. Krohmer, MD, Georgetown, Texas
- George R. Leopold, MD, San Diego, California
- Thomas F. Meaney, MD, Englewood, Florida
- Rodney R. Million, MD, Gainesville, Florida
- Carlos A. Perez, MD, St. Louis, Missouri
- William E. Powers, MD, Detroit, Michigan
- Joseph F. Sackett, MD, Madison, Wisconsin
- Melvyn H. Schreiber, MD, Galveston, Texas
- Jerome F. Wiot, MD, Assistant Executive Director, Cincinnati, Ohio
- Kenneth L. Krabbenhoff, MD, Executive Director  
2301 West Big Beaver Road, Suite 625  
Troy, MI 48084

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Radiology to ascertain whether the information below is current.)*

**Certificates**

A certificate will be issued to each candidate who has finished a prescribed and approved period of training and study and has passed a written and oral examination demonstrating an adequate level of knowledge and ability in diagnostic radiology and/or diagnostic radiology with special competence in nuclear radiology, or radiation oncology in accordance with the definitions as stated in the Bylaws and Rules and Regulations of The American Board of Radiology.

A certificate granted by the Board does not of itself confer, or purport to confer, any degree, or legal qualifications, privileges, or license to practice radiology.

**Definitions**

1. Diagnostic radiology is that branch of radiology which deals with the utilization of all modalities of radiant energy in medical diagnosis and therapeutic procedures utilizing radiologic guidance. This includes, but is not restricted to imaging techniques and methodologies utilizing radiations emitted by x-ray tubes, radionuclides,

ultrasonographic devices, and radiofrequency electromagnetic radiation emitted by atoms.

2. Nuclear radiology is that branch of radiology which involves the analysis and imaging of radionuclides and radiolabeled substances for diagnostic imaging and related in vivo techniques.
3. Radiation oncology is that branch of radiology which deals with the therapeutic applications of radiant energy and its modifiers and the study and management of cancer and other diseases.

### Qualifications of Applicants for Certification by the American Board of Radiology

Each applicant for admission to an examination for a certificate to be issued by the American Board of Radiology in diagnostic radiology, diagnostic radiology with special competence in nuclear radiology, and/or radiation oncology shall be required to present evidence satisfactory to the Board that the applicant has met the following standards:

#### A. General Qualifications

That the applicant is a specialist in diagnostic radiology, diagnostic radiology with special competence in nuclear radiology, and/or radiation oncology as outlined in article II, section 2, of the rules and regulations, and is recognized by his/her peers to have high moral and ethical standards in his/her profession.

#### B. General Professional Education

Graduation from a medical school accredited at the date of graduation by the Liaison Committee on Medical Education of the American Medical Association; or the Royal College of Physicians and Surgeons of Canada; or from a College of Osteopathic Medicine approved by the American Osteopathic Association. If the applicant is a graduate of a medical school outside the United States or Canada, the applicant must be screened with approval by an agency approved by the Board of Trustees.

#### C. Special Training

This period of special training shall be as the Board of Trustees by resolution or motion shall determine from time to time.

Effective for candidates beginning their training July 1, 1981 and thereafter, the Board of Trustees shall require a written statement from the program director, attesting that the applicant will have satisfactorily completed the prescribed special training at the time of the written examination and is prepared to take that examination.

D. In special instances these requirements may be modified by majority vote of the entire Board of Trustees, or by the executive committee acting in its stead.

E. If the program director fails to indicate in writing that the applicant is adequately trained and prepared for the examination, documentation of the reason(s) must be submitted along with evidence that the candidate has been appropriately apprised of his deficiencies. The executive committee of the Board will notify the applicant in writing that an appeals mechanism exists as outlined in paragraphs (F) and (G) below.

F. In utilizing the appeals mechanism, the applicant must provide the executive committee of the Board with the written statement describing the reasons which he/she believes will support his/her appeal. The executive committee may ask the program director to submit a written response to the applicant's appeal.

G. The executive committee must reach a final decision with the least possible delay in order that the applicant who wins his/her appeal does not lose the opportunity to be accepted for the examination for which he/she has applied.

### Diagnostic Radiology

Candidates beginning their training in diagnostic radiology after June 30, 1984 will be required to have 4 years of approved postgradu-

ate training in a department approved to train in diagnostic radiology by the Residency Review Committee for Radiology representing the American Board of Radiology, the American College of Radiology, and the Council on Medical Education of the American Medical Association and accredited by the Accreditation Council for Graduate Medical Education, exclusive of an internship or clinical year (if the latter is required by the program director). A minimum of 6 months but no more than 12 months must be spent in nuclear radiology in the 4-year program. Candidates may spend no more than 8 months in rotations outside the parent institutions.

Residents must have basic cardiac life support certification; advanced cardiac life support certification is encouraged.

It is *not* the intent of the American Board of Radiology for programs to use any of the 4 years for traditional fellowship training.

Effective for residents beginning their training July 1, 1991:

In a 4-year approved residency program, not more than 12 months shall be spent in a single discipline (research is considered a discipline).

The designation of "fellowship" should be reserved for training beyond the 4-year residency.

In a 4-year program, the resident is expected to remain in that program for all 4 years. If a transfer to another program is necessary or desired, that transfer must have the agreement of both program directors and the prospective notification to and approval of the American Board of Radiology.

Candidates will be considered for the written examination when they have completed 36 of the required 48 months of approved training, or if they will complete this amount by September 30 of the year in which the examination is given.

A maximum of 3 months may be spent in radiation oncology (therapeutic radiology).

### Diagnostic Radiology with Special Competence in Nuclear Radiology

The American Board of Radiology will give a special examination leading to a certificate in diagnostic radiology with special competence in nuclear radiology to those diplomates in radiology, roentgenology, diagnostic radiology or diagnostic roentgenology who have fulfilled the requirement of 1 full year of formal training in nuclear radiology in an approved department of diagnostic radiology, nuclear medicine, or diagnostic radiology with special competence in nuclear radiology. This examination will consist of three examiners. The categories to be covered are: (1) bone, bone marrow, genitourinary tract, tumor and abscess localization; (2) central nervous system, endocrinology, gastrointestinal tract, hepatobiliary tract, and spleen, and (3) cardiopulmonary systems.

Candidates applying for certification in diagnostic radiology with special competence in nuclear radiology in 1991 must first be certified in diagnostic radiology. They must have a minimum of 12 months of approved training in nuclear radiology.

### Radiation Oncology

Candidates beginning their training in radiation oncology after June 30, 1975 and who have not had an approved internship will be required to have 4 years of approved postgraduate training. Three of these years must be spent in a department approved to train in radiation oncology by the Residency Review Committee for Radiology representing the American Board of Radiology, the American College of Radiology, and the Council on Medical Education of the American Medical Association and accredited by the Accreditation Council for Graduate Medical Education. The other (PG-1) year may be spent in one of the following programs: internal medicine, surgery, pediatrics, or family practice. No credit will be allowed for a foreign internship.

The 3-year residency training period must include training in pathology and training in the therapeutic aspects of nuclear medicine. Credit may not exceed 3 months for time spent in either subject. A

maximum of 3 months' training in diagnostic radiology will be allowed.

Candidates in this category will be eligible for the written examination when they have completed the required 48 months of approved training, or if they will complete this amount by September 30 of the year in which the examination is given.

### Application and Fee

Application for examination must be made in exact duplicate (two original copies on prescribed forms which may be obtained from the secretary). No xerox or any other kind of copy will be accepted. The data summary form enclosed with the application is an integral part that must be completed. These forms shall be forwarded with the required data, 3 unmounted photographs autographed on the front, and the current application fee (US currency) by the deadline established for filing. A certified check or money order is required to be made payable to the American Board of Radiology, Inc. Applications for the written examination to be given in any year will *not* be accepted prior to July 1 of the preceding year and *must* be filed no later than the deadline of September 30 of the preceding year. The application fee will cover both the written and the oral examinations provided the candidate is successful on his/her first attempt in both the written and oral examinations.

Incomplete applications will not be accepted. The postmark affixed to the last item received to complete the application must be on or before the deadline date.

All applications must be typed or neatly printed (in ink).

In the event of withdrawal of an application, only a portion of the fee can be refunded.

Beginning July 1, 1981:

A candidate will have three consecutive opportunities to pass the written examination beginning with the written examination for which he/she is first declared admissible. If a candidate fails to accomplish this, he/she must submit a new application and the fee in effect at that time. Failure to accept an appointment, cancellation of an appointment or failure to appear for a scheduled written examination will be regarded as one of the three opportunities.

A candidate who fails the written examination after three attempts must submit a new application together with the fee in effect at that time.

A candidate who has passed the written examination will have three consecutive opportunities to appear for and pass the oral examination beginning with the oral examination for which he/she is first declared admissible. If a candidate fails to accomplish this, he/she must submit a new application and the fee in effect at that time and reinitiate the examination process, including the written examination. Failure to accept an appointment, cancellation of an appointment or failure to appear for a scheduled oral examination will be regarded as one of the three opportunities.

A candidate who finds it necessary for any reason to cancel after acceptance of an appointment for either the written or oral examination shall be required to submit an additional fee. This amount represents administrative costs to the Board. A candidate who fails to appear for an examination without notifying the office of the ABR at least 20 days prior to the first date of the examination will be charged the full application fee in existence at the time of payment. (Under certain circumstances, the ABR, entirely at its discretion, may excuse such a candidate from this penalty, provided the reason for such absence is substantiated in writing.

### Objectives of the Written Examination

In 1965 it became apparent to the Board of Trustees of the American Board of Radiology that the then current oral examination could not cover the entire burgeoning field of Radiology without the addition of more segments, and in turn more examiners. This would not only impose a further burden on candidates but also on the Board itself. It was decided, therefore, to search for other methods of examination. At that time, it was agreed to adopt a written examination to be given

annually as a prerequisite for the oral examination. The content of the examination will include the basic sciences of anatomy, pathology, physiology and pharmacology as these subjects relate to clinical practice. Also to be included are radiological techniques, radiological physics, and radiation biology.

The content of the examination in radiation oncology will include the basic sciences of physics, radiation biology, and clinical oncology as well as anatomy, pathology, physiology, and chemotherapy as these subjects relate to the clinical practice of radiation oncology.

A pool of multiple-choice questions was developed and the first examination was given in 1969 to all candidates seeking certification in diagnostic radiology and in radiation oncology.

### Content of Written Examination in Each Field

Each examination consists of between 320 and 375 multiple-choice questions to be administered over a period of approximately 8 hours. About one-half of the questions are distributed on the afternoon of one day and the other half distributed on the morning of the following day.

New written examinations are formulated each year in all categories of radiology and the content of the examinations is carefully evaluated in order to keep pace with new information and developments. Even the number of questions in each category may be changed as necessity dictates from year to year.

Beginning in 1987, a candidate who passes the diagnostic portion but fails physics must repeat the physics portion and pass before admission to the oral examination.

Beginning in 1984, a candidate who takes the written examination in diagnostic radiology and fails the diagnostic portion but *passes* physics must repeat the diagnostic portion but will *not* be required to repeat physics.

Beginning in 1984, a candidate who takes the written examination in radiation oncology and passes the clinical portion but fails either physics or radiation biology must repeat *only* the portion which he/she failed. Those candidates who fail the physics *and* the radiation biology portions of the examination *or* the clinical oncology portion of the examination must repeat the entire examination.

Candidates in diagnostic radiology may expect to be asked questions on magnetic resonance imaging in the written and oral examinations.

### Oral Examination

Oral examinations are given at a time designated by the Board of Trustees. At the present time the oral examinations are conducted yearly in May and/or June.

Admissibility to the oral examination is determined by the executive committee. Experience has shown that to delay taking the oral examination does not benefit the candidate.

No recording device of any kind may be brought to the examination.

### Content of Oral Examination for Diagnostic Radiology

The categories to be covered are: bones and joints, chest, gastrointestinal tract, genitourinary tract, neuroradiology, cardiovascular radiology, nuclear radiology, ultrasonography, pediatric radiology, and breast radiology. Questions may be asked on interventional techniques and magnetic resonance imaging.

### Content of Oral Examination for Radiation Oncology

Effective in 1993, candidates applying for examination in radiation oncology will be examined for a period of 30 minutes each by eight examiners. The subject matter of this examination concerns the clinical management of malignant disease and is usually presented according to the anatomical site of the primary tumor. The anatomical sites are divided into the following eight categories: gastrointestinal malignancies; gynecologic malignancies; genitourinary malignancies; diseases

of the reticuloendothelial system; head, neck, and skin; breast; central nervous system and pediatric malignancies; and, lung and mediastinum, soft tissue and bone. Brachytherapy techniques and the effect of radiation on normal tissue may be included in all categories.

## Reexaminations

### Failures

A candidate who fails or conditions the oral examination in diagnostic radiology or in radiation oncology may be scheduled for reexamination. The reexamination fee in effect at that time must be submitted by certified check or money order.

Candidates in diagnostic radiology who have conditioned one, two, or three categories in the oral examination will be reexamined by two examiners in each conditioned category. Candidates in radiation oncology who have conditioned one or two categories in the oral examination will be reexamined by two examiners in each conditioned category. Candidates must pass the reexamination by both examiners in each category to remove the condition.

Effective July 1, 1981 a candidate who has failed the oral examination three times must start the examination procedure from the beginning with the submission of a new application, pay the fee in effect at that time and retake the entire written examination.

## Status of a Physician

The Board will reply to an inquiry concerning the status of a physician with one of the following statements:

1. The physician is Board certified.
2. The physician is in the examination process.
3. The physician is neither certified nor in the examination process.

Note: No official status of "Board qualified" or "Board eligible" is recognized by the Board.

## Final Action of the Board

The final action of the Board is based on the applicant's professional record, training, and attainment in the field of diagnostic radiology, diagnostic radiology with special competence in nuclear radiology, or in radiation oncology, as well as on the results of his examination. This Board has been organized to assist qualified radiologists to become recognized in their communities as men and women competent to practice diagnostic radiology, diagnostic radiology with special competence in nuclear radiology, or radiation oncology.

## Revocation of Certificates

Certificates issued by this Board are subject to the provisions of Articles of Incorporation and the Bylaws. According to Article IX, Section 4, of the Bylaws, any certificate issued by the Board of Trustees shall be subject to revocation in the event that:

- a. The issuance of such certificate or its receipt by the individual so certified shall have been contrary to or in violation of any provision of the Certificate of Incorporation of this, the American Board of Radiology, or of these Bylaws or rules and regulations adopted by the Board of Trustees; or
- b. The individual so certified shall not have been eligible in fact to receive such certificate; or
- c. The individual so certified shall have made any misstatement of fact in the application or in any other communication to the corporation or its representatives; or
- d. The individual so certified shall have been convicted by a court of competent jurisdiction of a felony or of any misdemeanor involving, in the opinion of the Board of Trustees, moral turpitude; or
- e. The license to practice medicine of the individual so certified shall be revoked.

Before any such certificate shall be revoked a notice shall be sent by registered or certified mail to the last known address of the holder of such certificate, as it appears on the records of this corporation,

setting forth the act, omission or conduct alleged or complained of, and giving the holder of such certificate a reasonable opportunity to answer in writing thereto. Such certificate holder shall have not less than 30 days in which to reply thereto. The Board of Trustees may at its discretion make such further investigation as it deems necessary and proper.

The Board of Trustees of this corporation shall have the sole power, jurisdiction and right to determine and decide whether or not the evidence or information before it is sufficient to constitute one of the grounds for revocation of any certificate issued by this corporation, and the decision of such Board of Trustees in the premise shall be final.

*(The material which follows is revised annually. All applicants are advised to contact the American Board of Surgery to obtain current information.)*

## Specialty of Surgery (General Surgery) Defined

The Board interprets the term "general surgery" in a comprehensive but specific manner, as a discipline having a central core of knowledge embracing anatomy, physiology, metabolism, immunology, nutrition, pathology, wound healing, shock and resuscitation, intensive care and neoplasia, which are common to all surgical specialties.

The general surgeon is one who has specialized knowledge and skill relating to the diagnosis, preoperative, operative, and postoperative management in the following areas of primary responsibility:

- Alimentary tract
- Abdomen and its contents
- Breast, skin and soft tissue
- Head and neck, including trauma; vascular, endocrine, congenital and oncologic disorders—particularly tumors of the skin, salivary glands, thyroid, parathyroid, and the oral cavity.
- Vascular system, excluding the intracranial vessels, the heart and those vessels intrinsic and immediately adjacent thereto.
- Endocrine system
- Surgical oncology, including coordinated multimodality management of the cancer patient by screening, surveillance, surgical adjunctive therapy, rehabilitation, and follow-up.
- Comprehensive management of trauma, including musculoskeletal, hand and head injuries. The responsibility for all phases of care of the injured patient is an essential component of general surgery.
- Complete care of critically ill patients with underlying surgical conditions, in the emergency room, intensive care unit and trauma/burn units.

Additionally, the general surgeon is expected to have significant preoperative, operative and postoperative experience in pediatric, plastic, general thoracic and transplant surgery. Also, the surgeon must have understanding of the management of the more common problems in cardiac, gynecologic, neurologic, orthopedic, and urologic surgery, and of the administration of anesthetic agents.

The general surgeon must be capable of employing endoscopic techniques, particularly proctosigmoidoscopy and operative cholecystoscopy, and must have experience with a variety of other endoscopic techniques such as laryngoscopy, bronchoscopy, esophagogastroduodenoscopy, colonoscopy and laparoscopy. The general surgeon should have opportunity to gain knowledge and experience of evolving technological methods, eg, laser applications, and endoscopic operations.

## The Meaning of Certification

The Board considers certification to be based upon a process which includes the educational and evaluation phases and an examination phase. It holds that undergraduate and graduate education are of the utmost importance and requires the program director's endorsement, attesting that the applicant has had an appropriate educational experience and has attained a sufficiently high level of knowledge, judgment and skills to be prepared for designation by the Board's certificate as a specialist in surgery, upon successful completion of the examinations, and to enter into independent practice of the specialty.

## Graduate Education in Surgery

### I. General Information

The purpose of graduate education in surgery is to provide the opportunity to acquire a broad understanding of human biology as it relates to disorders of a surgical nature and the technical knowledge and skills appropriate to be applied by a specialist in Surgery. This goal can best be attained by means of a progressively graded curriculum of study and clinical experience under guidance and supervision of senior surgeons and which provides progression through succeeding stages of responsibility for patient care up to the final one of complete management. Major operative experience and senior/chief responsibility at the final stage of the program are essential components of surgical education. The Board will not accept into the process of Certification anyone who has not had such an experience in the specialty of surgery, as previously defined, regardless of the number of years spent in educational programs.

The graduate educational requirements set forth on these pages are considered to be the minimal requirements of the Board and should not be interpreted to be restrictive in nature. The Board recog-

nizes that the time required for the total educational process should be sufficient to provide adequate clinical experience for the development of sound surgical judgment and adequate technical skill.

These requirements do not preclude additional desirable educational experience and program directors are encouraged to retain residents in a program as long as is required to achieve the necessary level of qualifications.

The integration of basic sciences with clinical training is considered to be superior to formal courses in such subjects. Accordingly, while recognizing the value of formal courses in the study of surgery and the basic sciences at approved graduate schools of medicine, the Board will not accept such courses in lieu of any part of the required clinical years of surgical education.

The Board may at its discretion require that a member of the Board or a designated diplomate observe and report upon the clinical performance of an applicant before establishing admissibility to examination or awarding certification.

While a program may develop its own vacation, illness and other leave policies for the resident, 1 year of approved training toward the Board's requirements must be 52 weeks in duration and must include at least 48 weeks of full-time surgical training. Furthermore, unused vacation and other leave time may not be accumulated to reduce the overall duration of training expected by the Board.

All phases of the graduate educational process must be completed in a manner satisfactory to the Board.

## II. Acceptable Programs

The residency programs in surgery in the United States which are reviewed and approved by the Residency Review Committee for Surgery and the Accreditation Council for Graduate Medical Education (ACGME) are acceptable to the Board as an adequate educational experience.

In Canada, those university residency programs in surgery which bear accreditation by the Royal College of Physicians and Surgeons offer an acceptable educational experience. Applicants from such programs must meet the Board's specific requirements and cannot receive credit for training in countries other than the United States or Canada.

Except as mentioned above, participation in surgical training programs in countries other than the United States is not creditable toward the Board's educational requirements unless under the specific conditions set forth in the section "Credit for Foreign Graduate Education."

Listings of accredited programs in the United States may be found in the *Directory of Graduate Medical Education Programs*, published annually under the aegis of the Accreditation Council for Graduate Medical Education.

## Requirements for Certification in Surgery

### I. General

- A. Must have demonstrated to the satisfaction of the authorities of the graduate educational program in surgery, to their peers and to the Board, that one has attained the level of qualifications in surgery required by the Board.
- B. Must have a moral and ethical standing satisfactory to the Board and in conformity with the statements on principles of the American College of Surgeons and its interpretations.
- C. Must be actively engaged in the practice of surgery as indicated by holding admitting privileges to a surgical service in an accredited hospital, or be currently engaged in pursuing additional graduate education in a component of surgery or one of the other recognized surgical specialties.
- D. Must have a currently registered full and unrestricted license to practice medicine granted by a state, or other United States jurisdiction, or by a Canadian province. The license must be valid at the time of application for admission to examination. A temporary

limited license such as an educational, institutional or house staff permit is not acceptable to the Board.

## II. Educational

### A. Undergraduate Medical Education

1. Must have graduated from an accredited school of allopathic or osteopathic medicine in the United States or Canada.
2. Graduates of schools of medicine from countries other than the United States and Canada must present evidence of final certification by the Educational Commission for Foreign Medical Graduates (ECFMG).

### B. Graduate Education in Surgery

1. Must have satisfactorily completed a minimum of 5 years of progressive education, following graduation from medical school, in a program in surgery accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada.
2. Must have completed all phases of graduate education in surgery in a program in surgery accredited by the ACGME. Training received in accredited programs in other recognized specialties, although containing some exposure to surgery, is not acceptable. A flexible or transitional first year is not creditable toward the Board's requirements as a PGY-1 unless it is accomplished in an institution having an accredited program in surgery and at least six months of the year is spent in surgical disciplines and under the jurisdiction of the surgery program director.
3. Must have, in a program accredited for a minimum of 5 years, at least 4 years of clinical surgical experience with progressively increasing levels of responsibility. There must be no less than 36 months devoted to the primary components of surgery (general surgery) as previously defined. The entire chief resident experience must be devoted to the primary components of the specialty of surgery. No more than 4 months of the chief residency may be devoted to any one of the primary components of surgery. During junior years a total of 6 months may be assigned to non-surgical disciplines such as medicine, gastroenterology, pediatrics, etc. No more than a total of 12 months during junior years may be allocated to training in any one surgical specialty other than general surgery. Training in surgical pathology and endoscopy is considered to be surgical, but obstetrics and ophthalmology are not. One year of the minimal five may be allocated to non-clinical activities such as laboratory research or basic sciences.
4. Must have 12 months in the capacity of chief resident in general surgery. The Board considers the terms chief resident and senior resident to be synonymous and to mean the 12 months in the program in which the resident assumes the ultimate clinical responsibilities for patient care under the supervision of the teaching staff. The majority of the 12 months of chief residency must be served in the final year. However, to take advantage of a unique training opportunity in a program during a resident's final year, a portion of the chief residency may be served in next to the last year, provided it is no earlier than the fourth clinical year and has been approved by the Residency Review Committee for Surgery. The chief residency must be spent only in the parent or an integrated institution unless rotation to an affiliated institution has been approved by the Residency Review Committee for Surgery.
5. The Board expects a training year to include no less than 48 weeks of full-time surgical training.
6. All phases of the graduate educational process must be in accordance with the Special Requirements for Residency Training in General Surgery as promulgated by the Accreditation Council for Graduate Medical Education and approved by the Residency Review Committee for Surgery.
7. The Board believes that for optimal surgical education the resident should spend at least the final 2 years of training in the same program.

## III. Operative Experience

Applicants for examination must have had an operative experience of such breadth and depth as may be deemed adequate by the Board, and this must include operative experience in each of the areas of primary responsibility included in the definition of surgery (general surgery) set forth previously.

Each applicant must submit a tabulation of the operative procedures performed as surgeon, and those performed as first assistant or teaching assistant. The Board provides an operative experience form for this purpose when application material is obtained by the applicant. The resident's record form, available to program directors for residents' use through the Residency Review Committee for Surgery, may be submitted in lieu of the Board's operative experience form.

In tabulating cases toward Board requirements, credit may be claimed "as surgeon" when the resident has actively participated in the patient's care; has made or confirmed the diagnosis; participated in selection of the appropriate operative procedure; has either performed or been responsibly involved in performing the critical portions of the operative procedure; and has been a responsible participant in both pre- and postoperative care.

Credit may be claimed as a "teaching assistant" only when the resident has actually been at the table, scrubbed, and has guided a more junior resident through at least the critical parts of an operation. All this must be accomplished under the supervision of the responsible member of the senior staff.

An individual cannot claim credit as both "surgeon" and as "teaching assistant".

Failure to submit a complete and properly authenticated list of operative procedures will constitute an incomplete application.

Applicants are advised to keep a copy of the lists of operative work they submit, for their records, as the Board cannot furnish copies.

## IV. Special Information for Program Directors

- A. Program directors are cautioned that appointment of residents at advanced levels without being certain that their previous training is in accordance with the Board's requirements may result in the affected residents not being accepted by the Board upon completion of the program. In any case in which there is question, program directors should make inquiry of the Board prior to taking action.
- B. According to the Special Requirements for Residency Training in General Surgery promulgated by the Accreditation Council for Graduate Medical Education, special approval of the Residency Review Committee for Surgery must be obtained (1) if a chief resident is assigned to an institution other than the parent one or an "integrated" one; (2) if rotations to any one approved "affiliate" exceed 6 months; (3) if more than 1 year of the total program is spent away from the parent and integrated institutions; or (4) if more than 6 months' total is spent in any assignment outside the parent, the integrated or approved affiliated institutions. The Board concurs in this and deviations from these stipulations will be considered unacceptable training.
- C. Since the Residency Review Committee does not act upon the adequacy of training outside the United States, program directors must request the Board's approval, in advance, if they wish periods of training abroad to be creditable toward the Board's requirements. The Board will rule on individual requests.

### Credit for Military Service

Credit will not be granted toward the minimum requirements of the Board for service in the armed forces, the Public Health Service, the National Institutes of Health or other governmental agencies unless the service was as a duly appointed resident in an accredited program in surgery.

## Credit for Foreign Graduate Education

Acceptance for examination and certification by the American Board of Surgery is based upon satisfactory completion of the stated requirements in accredited residency programs in surgery in the United States. Regardless of an individual's professional attainments here or abroad, no credit will be granted directly to an applicant for surgical education in a foreign country. The Board will consider granting partial credit only upon the request of the director of an accredited program who has observed the applicant as a junior resident for 9 to 12 months and wishes to advance the applicant to a higher level in that program. The credit granted will not be valid until the applicant has successfully completed that program. If the applicant moves to another program the credit is not transferable and must again be requested by the new program director.

Applicants from approved Canadian programs must have completed all of the requirements in the Canadian program or in combination with an accredited United States program. No credit for training outside the United States and Canada will be granted to those applicants seeking certification who completed a Canadian program. Applicants from Canadian programs must complete the Board's stipulated requirements.

## Requirements Governing Admissibility to Examinations for Certification in Surgery

1. An applicant is admissible to the examinations only when all of the preliminary and graduate educational requirements of the Board, currently in force at the time of receipt of the formal Application, have been satisfactorily fulfilled; the operative experience has been reviewed and deemed acceptable; the general credentials are in order; the program director has certified to the Board in writing that the applicant has attained the required clinical skills; and the formal application has been reviewed and approved. The applicant then must successfully complete the qualifying examination before becoming a "candidate for certification" and admissible to the certifying examination.
2. Applicants will be offered five opportunities for taking the qualifying examination within the 5-year period following approval of the formal application, at centers designated by the Board in accord with their last recorded address. Applicants who do not take the qualifying examination within 2 years following approval of the application will no longer have any status with the Board and will not be considered for readmission to examination.  
If applicants are not successful in completing the qualifying examination within the stated admissibility period, the satisfactory completion of an additional year of residency in general surgery will be required in order to be considered for readmission to the qualifying examination under the same conditions as listed in (2) above. This must be in a general surgery program accredited by the ACGME and at an advanced level (not necessarily the senior/chief year). The Board's approval of the proposed training must be secured in advance.
3. The certifying examination will be offered to those who have passed the qualifying examination and have thus become "candidates for certification", at the earliest practicable time consistent with the Board's geographical examination schedule.

Candidates will be offered three and only three opportunities to appear for examination during the five academic years after completion of the qualifying examination. The admissibility expiration date shall be established as June 30 of the fifth calendar year after passing the qualifying examination. An opportunity offered which is refused or not taken will be counted as one of the three available.

After three opportunities (i.e., failure at certifying examinations and/or opportunities refused—including failure to appear for a scheduled examination), a candidate will no longer be admissible to examination, regardless of the original expiration date for admissibility. Satisfactory completion of at least 1 year of resi-

dency in general surgery at an advanced level in an accredited program, with a favorable endorsement to the Board from the program director, will be required before further consideration by the Board. This year of training must be approved in advance by the Board.

If the Board approves the candidate's application for readmission to the certifying examination upon completion of the specified additional year of residency in general surgery, the candidate will then be offered three further opportunities within the ensuing 5 years. If not successful within that time, the candidate cannot again be considered until completion of a minimum of 3 years of residency in general surgery, including a chief year, in an accredited program, and favorable endorsement to the Board by the program director. The Candidate must then reapply as a "new applicant". This necessitates submission of a reapplication for admission to examination and all supporting documents, payment of the established fees, and successful completion again of the qualifying examination before advancing to the status of "candidate for certification".

4. Those who, 10 years after approval of their original application or reapplication, have not become certified and who are not actively pursuing completion of the appropriate above-stated requirements applicable in each case will have their files destroyed. If they wish to reapply later they will be considered "new applicants" and must fulfill the requirements then in place.
5. The Board, on the basis of its judgment, may deny or grant an "applicant" or "candidate for certification" the privilege of examination whenever the facts in the case are deemed by the Board to so warrant.

The Board does not use or sanction the terms "board eligible" or "board qualified". The standing of an individual with the Board varies according to the current status of credentials and will be so reported.

## Special Certification

The Board has been authorized by the American Board of Medical Specialties to award certification of special or added qualifications in certain disciplines related to the overall specialty of surgery, to those diplomates of this Board who meet the defined requirements. These disciplines include general vascular surgery, pediatric surgery, surgery of the hand, and surgical critical care.

The Board considers all of the above disciplines to be an integral part of the specialty of surgery and expects that all surgeons certified in surgery by this Board will be qualified to practice in these areas if they so desire and demonstrate the capability, even though they may not have obtained additional certification. The certificates of special or added qualifications are designed to recognize those diplomates who have acquired, through advanced education and training and other activities, qualifications in these disciplines beyond those expected of the well-trained general surgeon.

Those seeking the American Board of Surgery's certification of special or added qualifications must have a currently valid certificate in surgery issued by the Board; must have completed the required additional training in the discipline beyond that required for general certification; and operative experience and/or patient care data acceptable to the Board; must show evidence of dedication to the discipline by the means specified by the Board and receive favorable peer review by recognized diplomates in the particular discipline. Finally, successful completion of the prescribed examinations is required.

Those who are interested in obtaining information regarding certification in general vascular surgery, pediatric surgery, surgery of the hand, or surgical critical care may obtain it from the Board upon request.

## The Examinations Offered by the Board

The Board offers examinations leading to certification in surgery, general vascular surgery, pediatric surgery, surgery of the hand, and in

surgical critical care; also, in-training examinations in general surgery and in pediatric surgery.

The examinations for certification are offered to individuals, but the in-training examinations are offered to program directors for their use as an educational assessment of the individual resident's grasp of surgical fundamentals.

The Board notifies candidates for general and special certification of their performance on examinations. The Board also reports examinee performance to the director of the program in which the candidate completed the final year of residency. All reports pertaining to in-training examinations are provided only to program directors.

All examinations are developed by directors of the American Board of Surgery with contributions by invited examination consultants.

## I. Examinations for Certification in Surgery

### A. The Qualifying Examination

This examination is written and is offered once a year in the fall. It is given simultaneously in a number of locations in the United States.

Applicants whose applications have been approved by the Board are sent annually, throughout their period of admissibility, an announcement of the examination. With the announcement is a reply card which must be returned to the Board with other specified material if the applicant wishes to be scheduled for this examination. Shortly before the date of examination an admission card is sent to the applicant indicating the specific location of the examination center and reporting times, with a pamphlet describing the examination and the types of questions to be expected.

The 1-day qualifying examination consists of multiple-choice questions designed to evaluate knowledge of general surgical principles and the basic sciences applicable to surgery.

Successful completion of the qualifying examination is a requirement for all, to attain the status of "candidate for certification" and admission to the certifying examination.

Those unsuccessful on the qualifying examination may review the examination at the Board office if such a request is made within 90 days after examination results are mailed. The review requires an appointment and payment of a fee.

### B. The Certifying Examination

Examinations are ordinarily held six times a year within the continental United States. Candidates for certification will receive an announcement of the examination to which they may be assigned, based on their geographic location, approximately 2 months prior to the examination session, with a reply card which must be returned at once if a candidate wishes to be included in that examination. Failure to return or late return of a card will result in that examination being counted as one of the three opportunities to be offered. If the Board cannot accommodate a candidate at that particular examination it will not be counted as an opportunity. A candidate assigned to an examination will be sent an admission card indicating the specific time and place to report for examination.

The examinations are conducted by members of the American Board of Surgery and selected associate examiners who are diplomates of the Board and usually from the local geographic area.

The examinations consist of 3 oral sessions conducted by teams of two examiners each, directed toward determining the candidate's understanding of clinical entities, level of surgical judgment, and problem-solving ability. During all sessions the ability to apply knowledge of anatomy, physiology, pathology, biochemistry, and bacteriology to clinical problems is also evaluated.

## II. Examinations for Certification of Special or Added Qualifications

The Board offers examinations for certification of special or added qualifications in general vascular surgery, pediatric surgery, surgery of the hand, and in surgical critical care. These examinations are de-

scribed in separate pamphlets pertaining to the respective disciplines, which may be obtained from the Board office upon request.

## III. In-Training Examination

The Board offers annually to directors of accredited residency programs in surgery and in pediatric surgery written in-training examinations which are designed to measure the general level of knowledge attained by residents regarding the fundamentals of the basic sciences and management of clinical problems related to surgery and to pediatric surgery. The in-training examination in surgery is constructed to evaluate the knowledge of the resident who has completed 2 years of graduate education in surgery but, at the program director's discretion, may be administered to anyone. It is also designed to meet the first milestone required by the "Essentials" for residencies in general surgery. Directors of accredited programs in pediatric surgery should find the pediatric surgery in-training examination useful in the evaluation of all residents in their programs.

The Board will normally furnish pertinent information to the directors of all accredited programs in surgery and in pediatric surgery several months in advance of each year's examination, and ascertain the number of test booklets desired. The examinations, administered by the participating program directors, take place each winter.

Program directors should take note of the fact that the Board does not contact each institution in which residents are located, but depends upon the director of the program to order an adequate number of test booklets for all residents in the total program, which includes not only the parent institution but also all those included under the program designation in the *Directory of Graduate Medical Education Programs*.

It is important to note that the in-training examinations are not offered to individuals, but only to program directors.

The in-training examinations are not required by the Board as part of the certification process.

The in-training examinations are prepared by the Board as a convenience to program directors, to be used as an assessment of residents' progress and not as a pool of questions for study or other purposes. Duplication and improper use of the examination material defeats the purpose of the examinations and will not be tolerated by the Board. The examinations are protected under the copyright laws.

## Application for Examination for Certification in Surgery

In the early spring the Board will mail a booklet of information and a preliminary evaluation form to all residents who, according to the Board's records, will be expected to complete their training that summer in surgery programs accredited by the ACGME. This form must be completed precisely and be received in the Board office no later than *May 1*. Applicants should not submit documents, testimonials, letter of recommendation, case reports or other information unless requested to do so by the Board.

If, after review of the information submitted on the preliminary evaluation form, it is determined by the Board that applicants have met or will meet the educational requirements for admission to examination in the past or current year, a formal application for admission to examination will be sent to the applicant.

The application for admission to examination must be completed and returned to be received in the Board office by no later than *July 15*. An application is not considered to be complete unless the form is accompanied by all required documents including a copy of the applicant's current registration of a valid and unrestricted state medical license, an identification form with a photograph attached, a completed American Board of Surgery operative experience list or a copy of the resident's record, and a check for \$200.

If the completed application is received between *July 15* and *August 15*, a late fee will be charged. No applications will be accepted after *August 15*.

Applicants who complete the educational requirements after September 30 will *not* be considered for admission to the qualifying examination in that year, but must wait until the following year.

The acceptability of an applicant does not depend solely upon the completion of an approved program of education, but also upon information available to the Board regarding professional maturity, surgical judgment, technical capabilities, and ethical standing.

Applicants who have submitted an application for examination form will be notified regarding admissibility to examination.

## Fees

Registration (prior to July 15)—US \$200  
(payable with application form and nonreturnable)

Registration (late July 15 to August 15)—US \$450  
(payable with application form and nonrefundable)

Qualifying Examination—US \$400  
(payable with reply card)

Certifying Examination—US \$600  
(payable with reply card)

Fees for reexamination are the same as shown above for each examination.

Each fee for examination or reexamination includes a US \$200 processing charge which is not refunded if an individual withdraws after being scheduled for an examination.

To withdraw, one must notify the Board office at least 15 business days before a scheduled examination. Failure to appear for examination, or withdrawal without giving at least 15 days' notice, will result in forfeiture of the *entire fee* for examination.

Fees are subject to change as directed by the Board.

The Board is a non-profit organization. The directors of the Board, except those on the executive staff, serve without remuneration.

## Issuance of Certificates

A candidate who has met all requirements and has successfully completed the examinations of the American Board of Surgery in one or another of the areas of certification will then be issued a certificate by this Board, signed by its officers, attesting to qualifications in that area.

The Board issues certificates in surgery, general vascular surgery, pediatric surgery, surgery of the hand, and in surgical critical care.

Those certified in surgery prior to December 31, 1975 were issued a certificate with no indication of time limited validity. All certificates issued on or after January 1, 1976 bear a limiting date of 10 years, after which they are no longer valid.

Those whose certificates have expired and who have not achieved recertification will no longer be listed in directories as diplomates in the discipline concerned.

## Recertification

The American Board of Surgery offers recertification in surgery to its diplomates and in all the disciplines in which it offers certification of special or added qualifications. The Board considers recertification to be voluntary in the same connotation as is original certification.

The purpose of recertification is to demonstrate to the profession and the public, through periodic evaluations, that the surgical specialist has maintained continuing qualifications on a currently acceptable level in the diplomate's chosen area of practice. The American Board of Surgery believes that such periodic evaluation of its diplomates is in their own interest as well as in the public interest.

A diplomate can initiate the recertification process when certification has been held at least 7 years. Pamphlets outlining requirements for recertification in the various disciplines may be obtained from the Board upon request. To facilitate receiving the Board's mailings pertaining to the recertification process, it is important for all diplomates to notify the Board promptly whenever their addresses change.

## Recertification in Special Disciplines

Recertification in special disciplines is offered to diplomates holding certificates in general vascular surgery, pediatric surgery, surgery of the hand, and surgical critical care.

Details concerning requirements for recertification in the disciplines mentioned above are similar to those for recertification in surgery and pertinent pamphlets may be obtained from the Board upon request.

## Inquiry as to Status

The Board considers an individual's record not to be in the public domain. When an inquiry is received by the Board regarding an individual's status, a general but factual statement is provided which indicates the person's location within the examination process. The information will be provided only to individuals, organizations, and institutions with a "need to know" for professional reasons.

## Special Situations

### *Irregularities*

The furnishing of false information to the Board or examination irregularities may result in the rejection of an application, the barring of an applicant from examination, the denial or revocation of a certificate, or other appropriate sanctions, as set forth more fully in the application for admission to examination and the instructions to examinees.

### *Substance Abuse*

Applicants with a history of substance abuse will not be admitted to any examination unless they present evidence satisfactory to the Board that they have successfully completed the program of treatment prescribed for their condition. Further, the Board must be satisfied that they are currently free of substance abuse.

### *Dyslexia*

The American Board of Surgery has a policy regarding dyslexia. If an applicant has dyslexia, it must be made known to the Board immediately after the applicant has been notified of approval of the application. A copy of the dyslexia policy will be sent. There will be no special consideration on the basis of dyslexia unless it is requested prior to taking the qualifying examination for the first time.

## Disabilities

The American Board of Surgery complies with the Americans with Disabilities Act by making a reasonable effort to provide Board applicants who have documented disabilities with modifications in its examination process which are appropriate for such disabilities but which do not alter the measurement of the skills or knowledge which the examination process is intended to test. Any disability which an applicant believes requires such a modification in the Board's examination must be identified and documented by the applicant within 60 days after the applicant is notified of admissibility to examination or within 60 days after the applicant learns of such disability, whichever is later.

## Reconsideration and Appeals

The Board has adopted a policy with regard to reconsideration and appeals of decisions adverse to applicants regarding their individual credentials and admissibility to the examinations and questions regarding the form, administration and results of examinations. A copy of that policy is available from the Board office to anyone considering a request for reconsideration or an appeal. A request for reconsideration, which is the first step, must be made in writing to the Board office within 90 days of receipt of notice from the Board of the action in question.

## Revocation of Certificate

Any certificate issued by the American Board of Surgery, Inc. shall be subject to revocation at any time that the directors shall determine,

in their sole judgment, that a candidate who has received the certificate was in some respect not properly qualified to receive it.

## American Board of Thoracic Surgery

Benson R. Wilcox, MD, Chairman, Chapel Hill, North Carolina  
 John L. Ochsner, MD, Vice-Chairman, New Orleans, Louisiana  
 Richard J. Cleveland, MD, Secretary-Treasurer, Boston, Massachusetts  
 Richard P. Anderson, MD, Seattle, Washington  
 Mortimer J. Buckley, MD, Boston, Massachusetts  
 Fred A. Crawford, Jr., MD, Charleston, South Carolina  
 L. Penfield Faber, MD, Chicago, Illinois  
 William A. Gay, Jr., MD, Salt Lake City, Utah  
 Alden H. Harken, MD, Denver, Colorado  
 Nicholas T. Kouchoukos, MD, St. Louis, Missouri  
 Joseph I. Miller, Jr., MD, Atlanta, Georgia  
 Gordon F. Murray, MD, Morgantown, West Virginia  
 Mark B. Orringer, MD, Ann Arbor, Michigan  
 Marvin Pomerantz, MD, Denver, Colorado  
 John A. Waldhausen, MD, Hershey, Pennsylvania  
 Andrew S. Wechsler, MD, Richmond, Virginia  
 Glennis Lundberg, Administrative Director  
 One Rotary Center, Suite 803  
 Evanston, IL 60201

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Thoracic Surgery to ascertain whether the information below is current.)*

### General Requirements

Certification by the American Board of Thoracic Surgery may be achieved by fulfilling the following requirements:

1. Certification by the American Board of Surgery.
2. Adequate training in thoracic and cardiovascular surgery.
3. Must have an ethical standing in the profession and a moral status in the community acceptable to the Board.
4. Satisfactory performance on the American Board of Thoracic Surgery examinations.

### Training Requirements

Candidates must fulfill all the training requirements of the Board in force at the time their applications are received.

Candidates for certification must complete a minimum of 24 months of identifiable training in thoracic and cardiovascular surgery in a program approved by the Residency Review Committee for Thoracic Surgery. This must include 12 months of senior responsibility which should be continuous. The director of the thoracic training program is required to approve the application form by signature stating that the candidate has satisfactorily completed training in thoracic surgery of which the last 12 months were of senior responsibility.

Training in both general thoracic surgery and cardiovascular surgery is an essential part of any approved program no matter what area of thoracic surgery a candidate may choose for his/her practice.

Candidates who apply for examination more than 5 years after the satisfactory completion of their residency must have an additional year of training in an approved program before they will be eligible to apply for examination.

### Operative Experience Criteria

1. The application of candidates whose supervised operative experience falls below the minimal numerical acceptable standard based on one standard deviation below the mean value of the number of operations performed by each candidate for the previous year will be referred to the credentials committee for review. For

candidates applying in 1993, 180 major operative cases are required.

2. The applications of candidates whose supervised operative experience in a setting approved by the Residency Review Committee for Thoracic Surgery is below minimal acceptable standards for one or more areas within thoracic and cardiovascular surgery will be referred to the credentials committee for review. The number of procedures required to meet minimal acceptable standards in the various areas for 1993 are:

Lungs, pleura, chest wall		50
Pneumonectomy, lobectomy, segmentectomy	30	
Other	20	
Esophagus, mediastinum, diaphragm		15
Esophageal operations	8	
Other	7	
Congenital heart		25
Open operations	10	
Other	15	
Acquired valvular heart		20
Myocardial revascularization		35
Pacemaker implantations		10
Bronchoscopy and esophagoscopy		25

Endoscopic procedures may be counted for credit whether they are performed as independent procedures or immediately preceding a thoracic operation.

Major vascular operations outside the thorax should be listed.

The Board recognizes that supervised operative experience in a well-organized teaching setting approved by the Residency Review Committee for Thoracic Surgery protects the patient who, in most instances, is the personal and identifiable responsibility of a faculty surgeon. This supervised experience optimally prepares the candidate to begin the independent practice of cardiothoracic surgery after the completion of residency training.

The credentials committee has been authorized by the Board to reject a candidate if his/her training is considered to be inadequate. The candidate, the program director, and the Residency Review Committee for Thoracic Surgery will be notified if such actions are taken.

Even though emphasis on one or another facet of thoracic surgery (pulmonary, cardiovascular, esophageal, thoracic trauma, etc.) may have characterized the candidate's training experience, a candidate is nevertheless held accountable for knowledge concerning all phases of the field. This includes a knowledge of extracorporeal perfusion (physiologic concepts, techniques, and complications) and knowledge of thoracic oncology. In addition, a candidate should have had responsibility for the care of pediatric general thoracic surgical patients. The candidate should also be skilled in the management of acutely ill patients in the intensive care unit. This requires a knowledge of respirators, blood gases, metabolic alterations, cardiac output, hyperalimentation, and many other areas. By virtue of his/her training in cardiothoracic surgery, the candidate is expected to be fully qualified in the care of critically ill patients.

### Criteria for Credit

Credit will be allowed for supervised operative experience in a well-organized teaching setting only when the following criteria are met:

- a. The resident participated in the diagnosis, pre-operative planning and selection of appropriate operation and surgical indication;
- b. The resident performed under appropriate supervision in a well-organized teaching setting approved by the Residency Review Committee for Thoracic Surgery those technical manipulations that constituted essential parts of the procedure itself;
- c. The resident was substantially involved in post-operative care.

Supervision and active participation by the cardiothoracic faculty are required in preoperative, intraoperative, and postoperative care.

The Board wishes to emphasize, in addition, that first-assisting at operations is considered an important part of resident training, particularly in complex or relatively uncommon cases such as certain kinds of congenital heart surgery and certain operations to correct disorders of the esophagus.

## Applications

Prospective candidates desiring to apply for examination should consider whether they are able to meet the minimum requirements of the Board. They should then submit a letter to the office of the Secretary of the Board, outlining briefly their training and experience in thoracic surgery.

An application blank will be sent to those candidates who have completed residency training programs which have been approved by the Residency Review Committee for Thoracic Surgery. Each applicant should consult with his/her program director regarding the correct way to complete the operative case list forms.

The ABTS takes particular note of the problems facing the handicapped and stands ready to alter its examination procedures in such a way that handicapped individuals who are competent to practice thoracic surgery has the opportunity to take the Board's examination under circumstances which take appropriate recognition of the individual's incapacity.

Individuals requiring special consideration by reason of handicap should notify the Board 60 days in advance of the examination.

Candidates are notified of their eligibility for examination when their applications have been approved. After a candidate is declared eligible for the written examination (Part I), he/she must pass Part I within the succeeding 4 years. The candidate who successfully completes Part I of the examination then must pass Part II within the succeeding 4 years.

## Examinations

It is the policy of the American Board of Thoracic Surgery to consider a candidate for examination only upon completion of his/her thoracic surgery residency.

Separate written and oral examinations are held annually at times and places determined by the Board. Information regarding the dates and places of the examinations is published in the examination and licensure column of the *Journal of the American Medical Association*, the *Journal of Thoracic and Cardiovascular Surgery*, and the *Annals of Thoracic Surgery*.

### Part I—Written Examination

The examination consists of a written examination designed primarily to assess cognitive skills.

### Part II—Oral Examination

Successful completion of the Part I (written) examination is a requirement for admission to the Part II (oral) examination. The candidate who successfully completes Part I (written) of the examination process then must pass Part II (oral) within the succeeding 4 years. The oral examination is designed to test the candidate's knowledge, judgment, and ability to correlate information in the management of clinical problems in thoracic and cardiovascular surgery.

## Reexaminations

Candidates who fail an examination (Part I or Part II) are eligible to repeat the examination the following year.

Candidates who fail an examination (Part I or Part II) three times, or do not pass the examination within the allotted time period of 4 years, must complete an additional year of training, approved by the American Board of Thoracic Surgery, before they will be considered for readmission to the examination process again. If training in a program approved by the Residency Review Committee for Thoracic Surgery of the Accreditation Council for Graduate Medical Education cannot be obtained, training may take place in an unapproved pro-

gram if the training has been reviewed and approved in advance by the Board.

A candidate who completes the required year of additional training must file an addendum to their application, have their eligibility for examination reviewed by the credentials committee and pay a new registration fee. He/She will be given two more opportunities to take the examination (Part I or Part II) within the succeeding 2 years.

Candidates who fail either Part I or Part II a fifth time will be required to complete an approved residency program in thoracic surgery before they are eligible to reapply for examination by the Board.

## Fees

Registration fee—(not refundable) \$350

Part I examination fee—\$800

Part I re-examination fee—\$800

Part II examination fee—\$850

Part II re-examination fee—\$850

Candidates who do not appear for the examination (Part I or Part II) or who cancel less than 6 weeks before either examination may forfeit their examination fee.

The Board is a non-profit corporation, and the fees from candidates are used solely for defraying actual expenses incurred in conducting examinations and carrying out the business of the Board. The directors of the Board serve without compensation.

## Appeals

Individuals who receive an unfavorable ruling from a committee of the Board may appeal such determination by mailing a notice of appeal to the office of the American Board of Thoracic Surgery within 30 days of the date such ruling was mailed. Copies of the appeals procedures will be mailed to the candidate.

Under the procedure, the only appeal permitted from a failure of the written examination is a hand rescoring to verify the accuracy of the score as reported. The request for rescoring must be made within 30 days of the time the examination results are received by the candidate.

The only appeal with respect to the oral examination is the opportunity to request a reexamination immediately following the completion of the oral examination. A candidate who believes that any of his/her examiners has been unfair or biased during a portion of the oral examination may request a reexamination by another examiner. The grade on the reexamination will be the final grade of the candidate for that portion of the examination.

## Certification

After a candidate has met the requirements for eligibility and passed the examination, a certificate attesting to the candidate's qualifications in thoracic surgery will be issued by the Board.

## Recertification

Applicants who are certified in thoracic surgery after December 31, 1975, are issued certificates valid for 10 years from the date of certification, after which the certificates will no longer be valid. Certificates can be renewed prior to expiration by fulfilling the requirements for recertification specified by the American Board of Thoracic Surgery at that time. A recertification booklet is available upon request.

## Revocation of Certificate

No certificate shall be issued and any certificate may be revoked by the Board if it shall determine that:

1. the candidate for certification did not possess the required qualifications and requirements for examination whether or not such deficiency was known to the Board or any committee thereof prior to examination or at the time of the issuance of the certificate as the case may be,

2. the candidate for certification or certified physician withheld information in his/her application, made a material misstatement or any other misrepresentation to the Board or any committee thereof, whether intentional or unintentional,
3. the candidate for certification or certified physician was convicted by a court of competent jurisdiction of any felony or misdemeanor involving moral turpitude and, in the opinion of the Board, having a material relationship to the practice of medicine, or
4. the candidate for certification or certified physician had his license to practice medicine revoked or was disciplined or censured by any court or other body having proper jurisdiction and authority because of any act or omission arising from the practice of medicine.

## American Board of Urology

Stuart S. Howards, MD, President, Charlottesville, Virginia  
 Carl A. Olsson, MD, Vice President, New York, New York  
 David L. McCullough, MD, Secretary-Treasurer, Winston-Salem, North Carolina

Joseph N. Corriere, Jr., MD, Houston, Texas  
 Jean B. deKernion, MD, Los Angeles, California  
 George W. Kaplan, MD, San Diego, California  
 Jack W. McAninch, MD, San Francisco, California  
 W. Scott McDougal, MD, Chairman, Examinations Committee, Boston, Massachusetts

Drogo K. Montague, MD, Cleveland, Ohio  
 Jerome P. Richtie, MD, Boston, Massachusetts  
 Patrick C. Walsh, MD, Baltimore, Maryland  
 Alan J. Wein, MD, Philadelphia, Pennsylvania  
 Alan D. Perlmutter, MD, Executive Secretary  
 31700 Telegraph Road, Suite 150  
 Bingham Farms, MI 48025

*(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Urology to ascertain whether the information they have is current.)*

### Requirements

An applicant may initiate application for certification by the American Board of Urology during the final year of his/her residency training or at some point thereafter. For details of the certification process see "The Certification Process." Every applicant, however, must meet certain basic requirements as follows:

#### A. Prerequisites

1. Except as noted below the applicant must be a graduate of a medical school approved by the Liaison Committee on Medical Education or a school of osteopathy approved by the Bureau of Professional Education of the American Osteopathic Association, and have completed an ACGME-accredited urology residency program as designated in the *AMA Directory of Graduate Medical Education Programs*, Section II, "The Essentials of Accredited Residencies and Graduate Medical Education," Part I, Section III, "Eligibility and Selection of Residents." The applicant must satisfactorily complete a minimum of 5 years of ACGME approved post-graduate education of which 12 months must be spent in general surgery and 36 months must be spent in clinical urology. Of the remaining 12 months, a minimum of 6 months must be spent in general surgery, urology, or other clinical disciplines relevant to urology. Irrespective of the training format provided, the final 12 months of training must be spent as a senior/chief resident in urology with appropriate clinical responsibility under supervision in institutions which are an approved part of the program. To be admissible to the certification process of the Board, the applicant must complete the requirements for his/her specific program, in ef-

fect at the time he/she is accepted in the program, as established by the Residency Review Committee for Urology.

2. To meet the requirements for admissibility to the certification process of the Board, a Canada-trained urologist must have graduates from a US or Canadian medical school approved by the Liaison Committee on Medical Education (LCME) and have completed the pre-urology and urology requirements as described in A.1, in programs approved by the Accreditation Council for Graduate Medical Education (ACGME) or the Accreditation Committee of the Royal College of Physicians and Surgeons of Canada. Upon successful completion of this training, the candidate may sit for qualifying (Part I) examination of the American Board of Urology.

To be admissible to the certifying (Part II) examination, the Canadian-trained candidate must be certified by the Royal College of Physicians and Surgeons of Canada.

3. Foreign medical graduates from schools providing an equivalent medical background who have completed an approved urology residency in the United States, may also qualify for examination by the American Board of Urology, but pre-urology training taken outside the United States or Canada may be approved for no more than 1 year of the 2-year prerequisite non-urology training. All such applicants must have at least 1 year of surgical training in an approved general surgery training program in the United States or Canada.
4. In addition to the training requirements noted above, applicants seeking certification by the American Board of Urology must also have a valid medical license that is not subject to any restrictions, conditions, or limitations, and must demonstrate competence in clinical practice. The Board will obtain evidence of this through a review of logs of cases performed by the applicant and by direct communication with the applicant's peers.
5. Deviations from the requirements described above may be permitted at the discretion of the Board when the Board is satisfied that the deviation provides equivalent or superior education or training. Any such deviations must be approved by the Board *before* the applicant enters the urological portion of training.

#### B. Application

1. A special application form provided by the executive secretary shall be completed by applicant and returned to the Board office by registered, certified, or express mail with return receipt requested. Application must be in the Board office by November 1 in order to permit the applicant to be admitted to the qualifying examination (Part I, written), the following May or June. Applications and documentation material postmarked before, but not received in the Board office by November 1 will incur a late fee of \$225. No applications will be accepted after December 1. No application will be considered by the credentials committee of the Board unless it is submitted by the deadline set forth and is complete and includes all supporting documentation described in this part. The executive secretary will determine if an application is complete.
2. The application must be accompanied by a *notarized* copy of a graduation certificate from a medical school approved by the Liaison Committee on Medical Education or from a school of osteopathy approved by the Bureau of Professional Education of the American Osteopathic Association and by specific verification (such as a notarized certificate or an original letter from that program's director) of successful completion of the pre-urology post-graduate training program requirement in a program approved by ACGME. Pre-urology must be documented separately and may not be included in the description of the urology program.

Graduates of medical schools not approved by the Liaison Committee of Medical Education or the Bureau of Professional Education of the American Osteopathic Association must furnish a notarized copy of an ECFMG certificate (or Fifth Pathway certificate) together with evidence of successful completion of the Foreign Medical Graduate Examination in the Medical Sciences

(FMGEMS) or the Parts I and II examinations of the National Board of Medical Examiners.

3. A portion of the examination fee shall be paid at the time the application is submitted as specified in section C, Fees.
4. For each applicant, the director of the program where the applicant finished residency must complete an evaluation form supplied by the Board. This evaluation must be received in the Board office March 1st preceding the qualifying examination (Part I) given the following May or June. An application from a senior resident must also be accompanied by a letter from the program director confirming that the applicant is expected to have completed successfully one year of training in the capacity of senior or chief resident during the calendar year in which the qualifying examination (Part I, written) is to be taken. The applicant is responsible for ensuring that these supporting documents are received in the Board office at the indicated time.
5. Applications for certification must be approved by the credentials committee and the Board. Additional information may be requested by the executive secretary, but no duty or obligation to assist any applicant in completing, or assuring the completeness of, the application is inferred.

**C. Fees**

1. The current examination fee may be changed without notice. This fee reimburses the Board for expenses incurred in preparing and processing the applications and examinations of the candidate. *No fees are refundable.* Unused fees will be credited for the next available examination only, and if they are not utilized at the first available opportunity, credit will be disallowed.
2. Applications will be considered inactive if two successive examination appointments are canceled by the applicant. If the applicant does not already exceed the 5-year time limit for the exam, he may regain active status by paying a reinstatement fee of \$600 and an additional \$225, for an excused absence; \$350 for an unexcused absence; \$450 for a nonappearance.
3. Payment of \$800 must accompany the initial application, except in the case of senior residents who shall pay \$550 at the time of initial application for the qualifying examination (Part I). An additional payment of \$800 must accompany application for the certifying examination (Part II). An applicant secures no vested right to certification as a result of paying an examination fee.
4. A \$225 late fee will be assessed for any application and/or documentation and/or fees not received in the Board office by the prescribed deadlines. Express mail is recommended. A \$75 fee will be assessed for all returned checks.
5. The fee for the preliminary examination is \$350. The fee for credentials committee review of pre-urology training is \$75.
6. The application fee for recertification, as described below, is \$900.

**The Certification Process**

Applicants approved by the Board to enter the certification process must complete both a written "qualifying examination" (Part I) and, after passing this examination, a subsequent "certifying examination" (Part II). Assessment of clinical competence through review of practice logs and peer review will also be carried out prior to admission to the certifying examination (Part II). Applicants who have not taken the qualifying examination (Part I) within 5 years of the completion of their urological residency will be required to pass a preliminary written examination before being permitted to enter the certification process.

**A. The Qualifying Examination (Part I)**

The qualifying examination is a written examination given in May or June of each year, simultaneously at several different locations. Applicants who fail this examination must take it again the following year unless the absence is excused by the Board office. Failure to retake

the examination at the first available opportunity will result in administrative withdrawal of the application.

The qualifying examination is designed to assess knowledge of the entire field of urology and allied subjects. This includes: andrology (including infertility); calculous disease (including endourology and shock-wave lithotripsy), congenital anomalies, pediatric urology, female urology, infectious diseases, neurourology and urodynamics, obstructive diseases, psychological disorders, renovascular hypertension and renal transplantation, sexuality and impotence, adrenal diseases and endocrinology, trauma and urologic oncology.

**B. The Certifying Examination (Part II)**

Candidates for the certifying examination must have met all training requirements and have passed the qualifying examination (Part I). The certifying examination includes assessment of clinical competence through review of practice logs and peer review and three practical examinations (an oral examination, and written examinations in radiology and pathology). In addition, the candidate must have engaged in a minimum of 18 months of urological practice with a primary patient responsibility in a single community, an academic institution, or in the armed forces or public health service. Six months credit toward this 18-month practice period may be awarded an individual in a fellowship relevant to urology for 1 year or longer.

Application for admission to the certifying examination (Part II) is made by completing the supplemental application form available from the Board office. This application must be returned by registered, certified, or express mail with return receipt requested, and be received in the Board office by July 1 prior to the certifying examination of the following year. In addition, a minimum 1 year log of all major and minor cases performed as the primary surgeon prepared in accordance with the form provided by the American Board of Urology and verified in writing by the administrator of every facility where the candidate practices must be received in the Board office by December 1 prior to the certifying examination in the following year. Express mail is recommended. Applicants will be assessed \$225 for logs received between December 1-15. No surgical logs will be accepted after December 15.

A candidate not under review by the credentials committee must take and pass the certifying examination (Part II) within 5 years of the first scheduled qualifying (Part I) examination after entering the certification process. Failure to complete the certification process within 5 years of sitting for the first qualifying (Part I) examination will result in inadmissibility. Successful completion of a preliminary examination will be required prior to re-entry to the certification process at the qualifying (Part I) level.

The oral examination, urologic imaging examination and pathology examination are all regarded as separate examinations. A candidate failing all or any portion of the certifying examination (Part II) must repeat the failed portion the next year unless excused by the executive secretary or the Board for cause.

**C. Steps in the Certifying Examination**

**1. Assessment of Clinical Experience**

Candidates for the certifying examination (Part II) must be in the full-time practice of urology or performing research relevant to urology, and must be licensed to practice medicine in the area of current practice or research activity. As evidence of competency, the candidate must submit a log of cases performed as primary surgeon during the most recent 12-18 months in the area of current practice as described earlier in this section. In the case of military or public health physicians subject to unexpected changes of assignment, the Board may accept cases from the previous assignment. Photostatic copies from the patient care facility and/or office record of any one or more of the above cases may be requested by the Board. The candidate shall be responsible for obtaining patient consent for the disclosure of patient records to the Board, or for ensuring that the patient records disclosed to the Board do not contain any patient-identifying information. The can-

didate is expected to furnish such records within one month of the request.

To further ascertain and document the candidate's qualification for certification, the American Board of Urology will solicit information and comments from appropriate individuals, such as fellow practitioners, or from organizations, such as medical societies, licensing agencies, etc. The Board will be authorized by the candidate and will be held harmless to conduct investigations of professional ethics, reputation, and practice patterns. Under no circumstances, will the source of peer review letters be revealed to any person other than members of the American Board of Urology.

Upon receipt of the practice logs and peer review information, the credentials of the candidate will be reviewed by the credentials committee of the Board. Evidence of ethical, moral, and professional behavior, and an appropriate pattern of urologic practice including experience with an adequate volume and variety of clinical material will be sought. Areas of inadequacy may be cause for deferment or discontinuation of the certifying process until these areas are clarified or corrected. Actions of the Board to achieve clarification may include:

- a. Inquiry into practice irregularities by the credentials committee of the Board.
- b. Request for certified copies of candidate's health care facility and/or office records for review.
- c. A site visit to the candidate's community at the candidate's expense.
- d. Other appropriate measures that may be deemed necessary to assess apparent deviations from standard urologic practice.

The candidate will not be permitted to continue the certification process until the Board has satisfied itself of the appropriateness of the candidate's practice pattern and professional behavior. The Board may elect to defer continuation of the certification process until certain temporary inadequacies or deviations are corrected. It may deny certification when serious practice deviations or unethical conduct are involved, including, but not limited to, cheating on, or improper or disruptive conduct during, any examination conducted by the Board.

## 2. *The Oral, Pathology, and Urologic Imaging Examinations*

These examinations are given annually in February at a single site. The pathology and urologic imaging examinations are written and are based on projected photographic slide material. The oral examination is an interactive process between examiner and candidate during which an assessment is made of ability to diagnose and manage urologic problems. Since the candidate has passed the qualifying examination (Part I), the examiner presumes in the oral examination that the candidate has a satisfactory degree of cognitive knowledge of urology. Therefore, the oral examination will concentrate upon the following:

- a. **Problem Solving Ability.** Evaluation is made of the candidate's ability to collect pertinent information systematically, integrate it, assess the problem, and propose an appropriate solution.
- b. **Response to a Change in a Clinical Situation.** The candidate's ability to manage changing clinical conditions is evaluated through the flexible interaction between the examiner and the candidate. Changed clinical conditions may be posed arbitrarily by the examiner in order to assess various responses by the candidate, or may be developed by the examiner from the outcome of management recommendations offered by the candidate during the interview.
- c. **Professional Behavior in the Role of a Urologist.** The candidate's attitude, interaction with the examiner, and expression of patient management concerns contribute to the assessment of professional behavior.

## Final Action of the Board

Final action regarding each applicant is the sole prerogative of the Board and is based on the applicant's training, professional record, performance in clinical practice, and the results of the examinations given by the Board. Regardless of the sequence by which the various steps of certification may have been accomplished, the process itself is not considered complete until the Board's final action. At any point in the process, the Board may delay or even deny certification upon consideration of information which appears to the Board to justify such action. An appeals procedure is available to all applicants at any stage of the certification process. Details of this procedure are available upon request from the Board office. If an appeal is initiated, it must be filed within 45 days from the time the candidate was notified of a Board decision.

The activities described in articles of this guidebook proceed from the certificate of incorporation and bylaws which state the nature of the business, objects, and purposes proposed to be transacted and carried out by this corporation.

## Recertification

Certificates issued by the American Board of Urology on or after January 1, 1985, are valid for 10 years only, and a physician who fails to be recertified by the expiration date is no longer a diplomate of the Board. It is recommended, therefore, that diplomates possessing a time-limited certificate make plans to recertify at least 3 years before the expiration date of their current certificate. Recertification accomplished before the date of expiration of the existing certificate will be valid for a period of 10 years from the date of expiration of the old one. Recertification is based upon an assessment of the following evidence:

- A. An existing certificate issued by the American Board of Urology.
- B. A currently valid medical license that is not subject to any restrictions, conditions, or limitations issued by a state board of medical licensure.
- C. Active involvement in the practice, teaching, research or administration of urology.
- D. Currently valid privileges to practice urology in a hospital accredited by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO) or such other patient care facility as may be judged acceptable by the Board.
- E. Documentation of satisfactory performance by the hospital administrator, the medical director, chief of urology, chief of medical staff, or other such appropriate official in every patient care facility where the applicant exercises practice privileges.
- F. Documentation of good standing in the medical profession. The applicant must submit a list of two local physicians, preferably urologists, who are willing to provide a letter of reference on request; but the Board reserves the right to solicit information from other physicians or organizations, including the Federation of State Medical Boards Data Bank and the National Practitioner Data Bank.
- G. Evidence of a level of cognitive knowledge of urology acceptable to the Board as determined by direct examination by the Board. The examination consists of five modules of twenty items each, which cover different domains of urology. The diplomate can choose any three of the modules (a total of sixty items). The subjects of the modules are: (a) pediatric urology, (b) oncology and urinary diversion, (c) obstruction, calculous disease, and trauma, (d) impotence, infertility and infection, and (e) incontinence and voiding dysfunction. The diplomate will have up to three opportunities to take a recertification examination.
- H. Case lists of the most recent consecutive 100 cases or 1 year experience (whichever is less) including operative, ESWL, and endoscopic procedures including cystoscopy, performed in hospitals or ambulatory care centers.

- I. Computerized record review of nine cases, three cases each of three different operative procedures, selected by the Board on the basis of surgical log review.
- J. Oral examination or interview, if necessary.
- K. Site visit by a trustee, if necessary.

### Revocation of Certificate

Certificates issued by this Board are the property of the Board, and are issued pursuant to the rules and regulations of the Board. Each certificate is issued to an individual physician who, by signature, agrees to revocation in the event that:

- A. The issuance of such certificate or its receipt by the physician so certified shall have been contrary to, or in violation of, any provision of the certificate of incorporation, bylaws or rules and regulations of the Board in force at the time of issuance; or
- B. The physician or party certified shall not have been eligible to receive such certificate, irrespective of whether or not the facts constituting ineligibility were known to, or could have been ascertained by, the Directors of the Board at the time of issuance of such certificate; or
- C. The physician or party so certified shall have made a material misstatement of fact in application for such certificate or in any other statement or representation to the Board or its representatives; or
- D. The physician so certified shall at any time have neglected to maintain the degree of competency in the practice of the specialty of urology as set up by the Board, and shall refuse to submit to reexamination by the Board; or
- E. The physician so certified has been found to be guilty of unethical practices or immoral conduct or of conduct leading to revocation

of his license. These objective standards include conduct that violates state medical laws, rules and regulations of local and state urologic Boards and relevant AMA guidelines, and conduct leading to revocation of license.

The Board of Trustees of this corporation shall have the sole power, jurisdiction and right to determine and decide whether the evidence or information before it is sufficient to constitute one of the grounds for revocation of any certificate issued by this Board. When the Board is made aware of facts possibly constituting grounds for revocation, the Board will give the physician written notification identifying the specific facts that have come to its attention. The Board may require any physician so certified to appear before the Board of Trustees or before any one or more of them, or before any individual designated by the Board upon not less than 20 days written notice, and to show cause at the time and place specified in the notice why the certificate may not be revoked on any one of the grounds specified in such notice. The certificatee may bring to this hearing persons or documents in support of any actions. The failure of any physician so notified to appear as required in such notice, without due excuse deemed sufficient to the Board of Trustees, shall constitute, *ipso facto*, cause for revocation of the certificate. The decisions of the Board of Trustees relating to all matters under this section shall be final and binding.

The diplomate will be required to attest that he/she has read and understands the above provision regarding the grounds for revocation of certificates issued and the procedures to be followed in determining whether or not a certificate should be revoked and to agree to hold the Board, its officers and agents harmless from any damage, claim or complaint by reason of any action taken in good faith and consistent with such procedures.

# Appendix C

## Medical Licensure Requirements

*The following information has been provided by Catherine M. Bidese of the staff of the AMA Department of Physician Licensure and Career Resources in cooperation with Arthur Osteen, PhD, of the Office of Physician Credentials and Qualifications. The tables are taken from "US Medical Licensure Statistics and Current Licensure Requirements, 1992 Edition" published by the American Medical Association.*

### Policies for Initial Medical Licensure for Graduates of US Medical Schools

The initial medical license of most United States medical school graduates is granted by endorsement of their National Board Certificates. All licensing jurisdictions, except Texas and the Virgin Islands, will endorse certificates from the National Board under certain circumstances. The Texas licensing board will endorse National Board certificates, and state licenses based on the National Board certificate when Part III of the National Board examination was passed after January 1, 1978. In all other cases the reciprocal endorsement candidate must pass the Federation's Special Purpose Examination (SPEX) in Texas or be American Specialty Board certified or recertified. Those graduates who are not licensed by endorsement of a National Board certificate, must pass the FLEX, which is used by all states as the medical licensing examination. In many states the certificate of the National Board of Examiners for Osteopathic Physicians and Surgeons can be endorsed for licensure. Boards of medical examiners in Guam, Massachusetts, Nevada, South Carolina, and Vermont will endorse US specialty board certificates for licensing purposes in specific circumstances as delineated by the licensure regulations of those states.

### Policies for Licensure of Graduates of Non-US Medical Schools

Most of the state medical boards will accept graduate training in Canada as equivalent to training undertaken in the United States. Forty-one states will issue a medical license to a graduate of a Canadian medical school who holds a license in one of the provinces of Canada. Thirty-one licensing boards will, under certain specified conditions, endorse a licentiate of the Medical Council of Canada certificate held by an international medical graduate.

In the most recent survey conducted by the AMA Department of Physician Licensure and Career Resources, 340 states have indicated they will license international medical graduates who hold a Fifth Pathway certificate, but do not hold a standard ECFMG certificate.

Non-US educated candidates for licensure are permitted by ten state boards to take the FLEX before they have had graduate training in a US or Canadian hospital. With the exception of Pennsylvania, applicants must hold the ECFMG certificate. Candidates are not awarded a license until they have undertaken 1 or more years of training in the US and have met other specific requirements of the individual boards, e.g., an Educational Commission for Foreign Medical Graduates (ECFMG) certificate, personal interview, fees, etc. Five licensing boards, those in Alabama, Maryland, Ohio, Puerto Rico, and Virginia maintain lists of non-US medical schools; only graduates of these schools can be licensed.

Tables 1, 2, 3, 4, and 5 on the following pages summarize the licensure policies of state boards. It is strongly recommended that candidates contact the specific state board for the most current information on licensure requirements in that state. Names and ad-

resses of the corresponding officers are listed in Table 6 of this appendix.

### Restricted Licenses and Educational Permits

Fifty boards provide for the issuance of educational permits, limited and temporary licenses, or other certificates for the restricted practice of medicine. The terms for the issuance of such certificates vary. Such certificates may be issued (1) for hospital training of those eligible for licensure, (2) for supervised employment in state or private hospitals, and (3) for full-time practice until the next regular session of the licensing board. These permits must generally be renewed once a year with a stipulated maximum number of renewals allowed (usually 5 years).

Amendments to the Immigration and Nationality Act made through Public Law 94-484, the Health Professions Educational Assistance Act of 1976, establish requirements for the admission of alien physicians to the United States, whether for permanent residency or for participation in graduate medical education training programs. The amendments require that alien graduates of non-US medical schools pass an examination determined by the Secretary of Health and Human Services to be the equivalent to Parts I and II of the National Board of Medical Examiners examination. The amendments also require that alien medical graduates demonstrate competence in oral and written English.

The Secretary of Health and Human Services has determined that the Foreign Medical Graduate Examination in the Medical Sciences (FMGEMS), which is prepared by the National Board of Medical Examiners and administered by the Educational Commission for Foreign Medical Graduates, is the equivalent of Parts I and II of the National Board of Medical Examiners examination for purposes of the amendments to the Immigration and Nationality Act. This examination, which lasts for 2 days and is composed of equal proportions of clinical science and basic science questions in a multiple choice format, is given twice a year at examination centers abroad and in the United States. Applications for the examination and questions should be addressed to the Educational Commission for Foreign Medical Graduates, 3624 Market Street, Philadelphia, PA 19104, USA. Since 1989, graduates of foreign schools have also been able to take Parts I and II of the examination of the National Board of Medical Examiners. This is also given in the United States and abroad.

Graduates of non-US medical schools who are citizens of the United States and lawful permanent residents of the United States must pass the FMGEMS examination in order to be provided with the ECFMG certificate.

### The United States Medical Licensing Examination

In 1990, the Federation of State Medical Boards and the National Board of Medical Examiners approved the establishment of the United States Medical Licensing Examination (USMLE), a single examination for assessment of US and international medical school students or graduates seeking initial licensure by US licensing jurisdictions. The USMLE replaces the two examination sequences used in the medical licensing process: the Federation Licensing Examination (FLEX) and the certifying examination of the National Board, as well as the FMGEMS.

The USMLE is a single examination program with three steps. Each step is complementary to the others; no step can stand alone in the assessment of readiness for medical licensure. Each USMLE step is composed of multiple-choice questions, requires 2 days of testing, and is administered semiannually.

The USMLE Step 1 assesses whether an examinee understands and can apply key concepts of basic biomedical sciences, with an emphasis on principles and mechanisms of health, disease, and modes of therapy. Step 2 assesses whether an examinee possesses the medical knowledge and understanding of clinical science considered essential for the provision of patient care under supervision, including emphasis on health promotion and disease prevention. Step 3 will assess whether an examinee possesses the medical knowledge and under-

---

## Medical Licensure Requirements

standing of biomedical and clinical science considered essential for the unsupervised practice of medicine.

The phase-out of current examination programs is underway. Students who enrolled in US medical schools in the fall of 1990 and international medical graduates applying for ECFMG examinations beginning in 1993 will have access only to USMLE for purposes of li-

cence. The first Step 1 administration occurred in June 1992, and the first Step 2 occurred in September 1992. The first Step 3 occurs in June 1994. Reasonable opportunity will be provided for individuals who have passed at least one component of existing examination systems to complete the licensing examinations without undue convenience.

**Table 1. Policies of State Boards of Medical Examiners for Initial Licensure for Graduates of US Medical Schools**

State	Endorsement of National Boards (NB)	Length of Time NBs Are Endorsed	Number of Years of Accredited US or US or Canadian Graduate Medical Education Required	
			To Take Flex	For Licensure
Alabama	Yes	NL	1	1
Alaska	Yes	NL	1	1

\*All State Boards of Medical Examiners consider Canadian citizens who have graduated from an accredited Canadian medical school on the same basis for licensure as graduates of accredited US medical schools.

<sup>1</sup> Applicant must have received LMCC in or after May 1970. If examination was taken prior to May 1970, applicant must be board certified or must successfully complete Component II or the SPEX examination.

<sup>2</sup> Must be endorsed by provincial licensing board.

<sup>3</sup> LMCC will be considered only in conjunction with a valid Canadian provincial license.

<sup>4</sup> Two years formal postgraduate training required, or its equivalent.

<sup>5</sup> By vote of the Board.

<sup>6</sup> At discretion of Board.

<sup>7</sup> Applicant must have received LMCC in or after May 1970. (After December 31, 1969 (WA); January 1, 1978 (WI).)

<sup>8</sup> Must be endorsed by provincial licensing board. If Medical Council of Canada examination was taken after January 1, 1978, candidate must also pass SPEX.

\*Note: This summary should be verified by direct communication with the corresponding officer of the licensing board in the state in which the physician is interested. In all states licenses based on the endorsement/acceptance of a physician's credentials are granted to those physicians meeting all state requirements—at the discretion of the licensing board. Additional information provided by the state follows.

- <sup>1</sup> Oral examination is required.
- <sup>2</sup> If 1 year of postgraduate training has been completed.
- <sup>3</sup> Must sit for FLEX after completing 9 months of internship, residency, clinical fellowship, or Fifth Pathway or served as a full-time assistant professor or in a higher position as a clinical instructor in an approved School of Medicine in Arizona.
- <sup>4</sup> Must include 4 months of general medicine.
- <sup>5</sup> Before taking Component II.
- <sup>6</sup> Oral examination may be required.
- <sup>7</sup> ECFMG certificate is required if applicant is not a graduate of a certified foreign medical school. Graduate of certified foreign medical schools where the language of instruction is other than English must demonstrate competency in English.
- <sup>8</sup> Applicant must be "board-eligible" by an American Specialty Board.
- <sup>9</sup> Varies by specialty. Canadian training not accepted.
- <sup>10</sup> If all other requirements are met.
- <sup>11</sup> Four months of residency training must be completed in the US or Canada prior to being eligible to sit for the examination.
- <sup>12</sup> One year residency required for persons entering residency training prior to January 1, 1988. January 1, 1988 or after, 2 years is required.
- <sup>13</sup> Only in conjunction with a valid Canadian provincial license and provided all other licensure requirements are met.
- <sup>14</sup> 0-1 indicates that physician may sit for examination upon acceptance to or during the first year of accredited residency training.
- <sup>15</sup> Zero years required for Component I; 3 years required for Component II (1 year US). If from an approved school.
- <sup>16</sup> Three years required with 1 year US. If from an approved school.
- <sup>17</sup> May be counted as 1 year of required postgraduate training.
- <sup>18</sup> Postgraduate training taken outside the US or Canada may be found qualifying under certain circumstances.
- <sup>19</sup> FLEX not administered in North Dakota.
- <sup>20</sup> A standard ECFMG certificate is required of the graduates of foreign medical schools except graduates of foreign medical schools located in Canada, England, Scotland, Ireland, Australia, and New Zealand; an ECFMG certificate can be waived by unanimous vote of the entire Board if the physician holds an American Board Specialty certificate or if a Fifth Pathway holder.
- <sup>21</sup> If an applicant has not completed 3 years of postgraduate training but has met all other licensing requirements and has successfully completed 1 year of postgraduate training in the US or Canada in a program approved by the Board, and if the Board finds that the applicant has other professional experience and training that is substantially equivalent to the second and third years of postgraduate training, the applicant may be deemed eligible for licensure.
- <sup>22</sup> If passed in or after May 1970 (PA); January 1, 1978 (WI). If passed before January 1, 1978 (TN). If passed after December 31, 1969 (WA).
- <sup>23</sup> One year is required, if physician had US training prior to July 1, 1987.
- <sup>24</sup> Up to 3 years at Board discretion.
- <sup>25</sup> Only if resident of Utah prior to entering Fifth Pathway Program.
- <sup>26</sup> If the Medical Council of Canada was passed after January 1, 1978, candidate must also pass FLEX Component II.
- <sup>27</sup> One year if graduated before July 28, 1985.

\*In many cases there is an additional recording or registration fee. X—Indicates yes.

<sup>1</sup> Plus \$175 application fee. Oral examination fee is \$400 (AL); plus \$50 application fee (AK). Does not include licensure fee of \$90 (MI); plus \$200 application fee (MN); plus \$350 application fee (NM); plus \$125 recording fee (VA).

<sup>2</sup> If less than 10 years since passing a written examination for licensure in another state, \$550 for endorsement requiring SPEX examination.

<sup>3</sup> A late penalty fee of \$250 is charged if renewal is not submitted by February 1 of each year. License automatically expires May 1, if renewal and late penalty fee are not submitted.

<sup>4</sup> May vary.

<sup>5</sup> \$100 if partial retest or if previously taken in Connecticut.

<sup>6</sup> Plus cost of examination books.

<sup>7</sup> Includes \$400 application fee; \$100 (LA).

<sup>8</sup> Plus cost of FLEX and oral examination (ME); includes FLEX plus \$245 licensure by examination fee (ID).

<sup>9</sup> Nonresidents \$600. Penalty fee of \$100 is charged if renewal is not submitted by July 31, in the year of renewal.

<sup>10</sup> Plus \$150 for licensure.

<sup>11</sup> If graduate of foreign medical school, add \$100.

<sup>12</sup> Active, \$5 inactive (MT); \$150 inactive (NV); \$270 biennial inactive or out-of-state (OR); \$50 inactive (WV).

<sup>13</sup> Biennial.

<sup>14</sup> US/Canadian is \$20; IMG is \$80.

<sup>15</sup> 300 if partial retest.

<sup>16</sup> Plus \$25 if initial applicant.

<sup>17</sup> Reciprocity is \$50; endorsement is \$40.

Note: All boards require that each component must be passed with a score of 75 or better. In all states, licenses are granted to physicians meeting all state requirements—at the discretion of the board. This summary should be verified by direct communication with the corresponding officer of the licensing board in the state in which the physician is interested.

X—Indicates yes. .. —Indicates no answer or rules pending.

<sup>1</sup> Penalties vary from state to state. In some, once the maximum has been reached, the candidate is ineligible for licensure. In other states, the candidate will be required to show evidence of additional study or meet other board regulations.

<sup>2</sup> Or complete 3 years as a clinical instructor assistant professor or higher position in an approved US medical school.

<sup>3</sup> Not required of University of Arkansas students.

<sup>4</sup> 0-1 indicates that physician may sit for exam upon acceptance to or during the first year of accredited residency training.

<sup>5</sup> Before taking Component II.

<sup>6</sup> If graduated after January 1, 1990, 2 years of postgraduate training is required.

<sup>7</sup> After October 1, 1986 notwithstanding the number of times the examination has been previously failed.

<sup>8</sup> Three times total—both Components I and II (GA); 5 attempts total whether taken together or separately (IL).

<sup>9</sup> Four months.

<sup>10</sup> If graduated before January 1, 1970, only 1 year is required; July 7, 1985 (WA).

<sup>11</sup> Old split FLEX not acceptable; must be 75 FWA in one sitting.

<sup>12</sup> Candidate must pass both components within 5 years of first sitting for old FLEX, Component I of new FLEX or Component II of new FLEX.

<sup>13</sup> Candidate may take both components initially or may take and pass Component I first.

<sup>14</sup> FLEX is not longer administered in North Dakota after December 1985

<sup>15</sup> FLEX three times only whether taken together or separately.

<sup>16</sup> Three years for graduates from non-approved Caribbean schools.

<sup>17</sup> Failed component(s) must be passed within the next three times the FLEX is offered.

**Table 6. "Who to Write" — Corresponding Officers of Boards of Medical Examiners in the United States and Possessions**

<p><b>Alabama</b> Larry D. Dixon, Executive Director, Alabama State Board of Medical Examiners, PO Box 946, Montgomery 36101</p>	<p><b>Hawaii</b> Paul H. Lewis, Executive Secretary, Board of Medical Examiners, PO Box 3469, Honolulu 96801</p>	<p><b>Minnesota</b> Leonard Boche, Executive Director, Board of Medical Examiners, 2700 University Ave, W, #106, St. Paul 55114</p>
<p><b>Alaska</b> Pam Ventgen, Executive Secretary, Licensing Division of Occupational Licensing, Alaska Board of Medical Examiners, 3601 C St, #722, Anchorage 99503</p>	<p><b>Idaho</b> Donald L. Deleski, Executive Director, Idaho Board of Medicine, 280 N 8th St, #202, Statehouse, Boise 83720</p>	<p><b>Mississippi</b> Frank J. Morgan, Jr., MD, Executive Officer, Mississippi State Board of Medical Licensure, 2688-D Insurance Center Dr, Jackson 39216</p>

## List of Medical Schools in the United States by Medical School Number

### Alabama

- 00102 University of Alabama School of Medicine  
Birmingham, AL 35294
- 00106 University of South Alabama College of Medicine  
Mobile, AL 37788

### Arizona

- 00301 University of Arizona College of Medicine  
Tucson, AZ 85724

### Arkansas

- 00401 University of Arkansas College of Medicine  
Little Rock, AR 77205

### California

- 00502 University of California, San Francisco School of Medicine  
San Francisco, CA 94143
- 00506 University of Southern California School of Medicine  
Los Angeles, CA 90033
- 00511 Stanford University School of Medicine  
Palo Alto, CA 94305
- 00512 Loma Linda University School of Medicine  
Loma Linda, CA 92350
- 00514 University of California, Los Angeles School of Medicine  
Los Angeles, CA 90024
- 00515 University of California, California College of Medicine  
Irvine, CA 92717
- 00518 University of California, San Diego School of Medicine  
La Jolla, CA 92093
- 00519 University of California, Davis School of Medicine  
Davis, CA 95616

### Colorado

- 00702 University of Colorado School of Medicine  
Denver, CO 80262

### Connecticut

- 00801 Yale University School of Medicine  
New Haven, CT 06510

- 00802 University of Connecticut School of Medicine  
Farmington, CT 06032

### District of Columbia

- 01001 George Washington University School of Medicine  
Washington, DC 20037
- 01002 Georgetown University School of Medicine  
Washington, DC 20007
- 01003 Howard University College of Medicine  
Washington, DC 20059

### Florida

- 01102 University of Miami School of Medicine  
Miami, FL 33101
- 01103 University of Florida College of Medicine  
Gainesville, FL 32610
- 01104 University of South Florida College of Medicine  
Tampa, FL 33612

### Georgia

- 01201 Medical College of Georgia  
Augusta, GA 30912
- 01205 Emory University School of Medicine  
Atlanta, GA 30322
- 01221 Morehouse School of Medicine  
Atlanta, GA 30314
- 01222 Mercer University School of Medicine  
Macon, GA 31207

### Hawaii

- 01401 University of Hawaii John A Burns School of Medicine  
Honolulu, HI 96822

### Illinois

- 01601 Rush Medical College of Rush University  
Chicago, IL 60612
- 01602 University of Chicago, Pritzker School of Medicine  
Chicago, IL 60637
- 01606 Northwestern University Medical School  
Chicago, IL 60611
- 01611 University of Illinois College of Medicine  
Chicago, IL 60612
- 01642 University of Health Sciences/The Chicago Medical School  
North Chicago, IL 60064
- 01643 Loyola University of Chicago, Stritch School of Medicine  
Maywood, IL 60153
- 01645 Southern Illinois University School of Medicine  
Springfield, IL 62708

### Indiana

- 01720 Indiana University School of Medicine  
Indianapolis, IN 46223

### Iowa

- 01803 University of Iowa College of Medicine  
Iowa City, IA 52242

### Kansas

- 01902 University of Kansas School of Medicine  
Kansas City, KS 66103

### Kentucky

- 02002 University of Louisville School of Medicine  
Louisville, KY 40292
- 02012 University of Kentucky College of Medicine  
Lexington, KY 40536

### Louisiana

- 02101 Tulane University School of Medicine  
New Orleans, LA 70112
- 02105 Louisiana State University School of Medicine in New Orleans  
New Orleans, LA 70112
- 02106 Louisiana State University School of Medicine in Shreveport  
Shreveport, LA 71130

### Maryland

- 02301 University of Maryland School of Medicine  
Baltimore, MD 21201
- 02307 Johns Hopkins University School of Medicine  
Baltimore, MD 21205
- 02312 Uniformed Services University of the Health Sciences, F Edward Hebert School of Medicine  
Bethesda, MD 20014

### Massachusetts

- 02401 Harvard Medical School  
Boston, MA 02115
- 02405 Boston University School of Medicine  
Boston, MA 02118
- 02407 Tufts University School of Medicine  
Boston, MA 02111
- 02416 University of Massachusetts Medical School  
Worcester, MA 01605

### Michigan

- 02501 University of Michigan Medical School  
Ann Arbor, MI 48109
- 02507 Wayne State University School of Medicine  
Detroit, MI 48201
- 02512 Michigan State University College of Human Medicine  
East Lansing, MI 48824

### Minnesota

- 02604 University of Minnesota Medical School  
Minneapolis, MN 55455
- 02607 University of Minnesota, Duluth School of Medicine  
Duluth, MN 55812
- 02608 Mayo Medical School  
Rochester, MN 55905

New York, NY 10021  
03545 University of Rochester School of  
Medicine and Dentistry  
Rochester, NY 14642  
03546 Albert Einstein College of Medicine of  
Yeshiva University  
New York, NY 10461  
03547 Mount Sinai School of Medicine of City  
University of New York  
New York, NY 10029  
03548 State University of New York at Stony  
Brook, School of Medicine  
Stony Brook, NY 11794

**North Carolina**

03601 University of North Carolina at Chapel  
Hill School of Medicine  
Chapel Hill, NC 27514  
03605 Bowman Gray School of Medicine of  
Wake Forest University  
Winston-Salem, NC 27103  
03607 Duke University School of Medicine  
Durham, NC 27710  
03608 East Carolina University School of  
Medicine  
Greenville, NC 27834

**North Dakota**

03701 University of North Dakota School of  
Medicine  
Grand Forks, ND 58202

**Ohio**

03806 Case Western Reserve University  
School of Medicine  
Cleveland, OH 44206  
03840 Ohio State University College of  
Medicine  
Columbus, OH 43210  
03841 University of Cincinnati College of  
Medicine  
Cincinnati, OH 45267  
03843 Medical College of Ohio at Toledo  
Toledo, OH 43699  
03844 Northeastern Ohio Universities College  
of Medicine  
Rootstown, OH 44272  
03845 Wright State University School of  
Medicine  
Dayton, OH 45401

**Oklahoma**

03901 University of Oklahoma College of  
Medicine  
Oklahoma City, OK 73190

**Oregon**

04002 Oregon Health Sciences University  
School of Medicine  
Portland, OR 97201

**Pennsylvania**

04101 University of Pennsylvania School of  
Medicine  
Philadelphia, PA 19104

04102 Jefferson Medical College of Thomas  
Jefferson University  
Philadelphia, PA 19107  
04107 Medical College of Pennsylvania  
Philadelphia, PA 19129  
04109 Hahnemann University College of  
Medicine  
Philadelphia, PA 19102  
04112 University of Pittsburgh School of  
Medicine  
Pittsburgh, PA 15261  
04113 Temple University School of Medicine  
Philadelphia, PA 19140  
04114 Pennsylvania State University College  
of Medicine  
Hershey, PA 17033

**Puerto Rico**

04201 University of Puerto Rico School of  
Medicine  
San Juan, PR 00936  
04202 Ponce School of Medicine  
Ponce, PR 00732  
04203 Universidad Central del Caribe Escuela  
de Medicina  
Cayey, PR 00633

**Rhode Island**

04301 Brown University Program in Medicine  
Providence, RI 02912

**South Carolina**

04501 Medical University of South Carolina  
College of Medicine  
Charleston, SC 29425  
04504 University of South Carolina School of  
Medicine  
Columbia, SC 29208

**South Dakota**

04601 University of South Dakota School of  
Medicine  
Vermillion, SD 57069

**Tennessee**

04705 Vanderbilt University School of  
Medicine  
Nashville, TN 37232  
04706 University of Tennessee College of  
Medicine  
Memphis, TN 38163  
04707 Meharry Medical College School of  
Medicine  
Nashville, TN 37208  
04720 James H. Quillen College of Medicine  
Johnson City, TN 37614

**Texas**

04802 University of Texas Medical Branch at  
Galveston  
Galveston, TX 77550  
04804 Baylor College of Medicine  
Houston, TX 77030  
04812 University of Texas Southwestern  
Medical School at Dallas  
Dallas, TX 75235

- 04813 University of Texas Medical School at  
San Antonio  
San Antonio, TX 78284
- 04814 University of Texas Medical School at  
Houston  
Houston, TX 77225
- 04815 Texas Tech University Health Science  
Center School of Medicine  
Lubbock, TX 79430
- 04816 Texas A & M University College of  
Medicine  
College Station, TX 77843

---

**Utah**

- 04901 University of Utah School of Medicine  
Salt Lake City, UT 84132

---

**Vermont**

- 05002 University of Vermont College of  
Medicine  
Burlington, VT

---

**Virginia**

- 05101 University of Virginia School of  
Medicine  
Charlottesville, VA 22908
- 05104 Virginia Commonwealth University,  
Medical College of Virginia  
Richmond, VA 23298
- 05107 Eastern Virginia Medical School of the  
Medical College of Hampton Roads  
Norfolk, VA 23501

---

**Washington**

- 05404 University of Washington School of  
Medicine  
Seattle, WA 98195

---

**West Virginia**

- 05501 West Virginia University School of  
Medicine  
Morgantown, WV 26506
- 05502 Marshall University School of Medicine  
Huntington, WV 25701

---

**Wisconsin**

- 05605 University of Wisconsin Medical School  
Madison, WI 53706
- 05606 Medical College of Wisconsin  
Milwaukee, WI 53226

## Abbreviations Used in Directory Listing

### Type of Hospital Control

A	Army
AF	Air Force
CH	Church
CITY	City
CO	County
CORP	Corporation
CYCO	City/County
HDA	Hospital District Authority
IO	Individual Owned
MISC	Miscellaneous
N	Navy
NP	Other Not-for-Profit
OF	Other Federal
P	Partnership
PHS	Public Health Service
ST	State
VA	Department of Veterans Affairs

### Medical School Affiliation

M	Major
L	Limited
G	Graduate

### Specialties

AI	Allergy and Immunology
ALI	Diagnostic Laboratory Immunology (Allergy and Immunology)
AM	Aerospace Medicine
AN	Anesthesiology
BBK	Blood Banking (Pathology)
CCA	Critical Care (Anesthesiology)
CCM	Critical Care (Internal Medicine)
CCP	Critical Care (Pediatrics)
CCS	Critical Care (Surgery)
CD	Cardiology (Internal Medicine)
CHN	Child Neurology (Neurology)
CHP	Child and Adolescent Psychiatry (Psychiatry)
CPP	Pediatrics/Psychiatry/Child Psychiatry
CRS	Colon and Rectal Surgery
D	Dermatology
DMP	Dermatopathology
DR	Diagnostic Radiology
EM	Emergency Medicine
EMP	Pediatrics/Emergency Medicine
END	Endocrinology and Metabolism (Internal Medicine)
FOP	Forensic Pathology (Pathology)
FP	Family Practice
FPG	Geriatric Medicine (Family Practice)
GE	Gastroenterology (Internal Medicine)
GPM	Preventive Medicine-General
GS	Surgery-General

HEM	Hematology (Internal Medicine)
HMP	Hematology (Pathology)
HSO	Hand Surgery (Orthopaedic Surgery)
HSP	Hand Surgery (Plastic Surgery)
HSS	Hand Surgery (Surgery)
ID	Infectious Diseases (Internal Medicine)
IM	Internal Medicine
IMG	Geriatric Medicine (Internal Medicine)
MM	Medical Microbiology (Pathology)
MN	Internal Medicine/Neurology
MEM	Internal Medicine/Emergency Medicine
MP	Internal Medicine/Psychiatry
MPD	Internal Medicine/Pediatrics
MPH	Public Health and General Preventive Medicine
MPM	Internal Medicine/Physical Medicine and Rehabilitation
N	Neurology
NEP	Nephrology (Internal Medicine)
NM	Nuclear Medicine
NP	Neuropathology (Pathology)
NPM	Neonatal-Perinatal Medicine (Pediatrics)
NPR	Neurology/Physical Medicine and Rehabilitation
NR	Nuclear Radiology (Radiology)
NS	Neurological Surgery
OAR	Adult Reconstructive Orthopaedics (Orthopaedic Surgery)
OBG	Obstetrics and Gynecology
OM	Occupational Medicine
OMO	Musculoskeletal Oncology (Orthopaedic Surgery)
ON	Oncology (Internal Medicine)
OP	Pediatric Orthopaedics (Orthopaedic Surgery)
OPH	Ophthalmology
ORS	Orthopaedic Surgery
OSM	Sports Medicine (Orthopaedic Surgery)
OTO	Otolaryngology
OTR	Orthopaedic Trauma (Orthopaedic Surgery)
P	Psychiatry
PCH	Chemical Pathology (Pathology)
PD	Pediatrics
PDC	Pediatric Cardiology (Pediatrics)
PDE	Pediatric Endocrinology (Pediatrics)
PDP	Pediatric Pulmonology (Pediatrics)
PDR	Pediatric Radiology (Radiology)
PDS	Pediatric Surgery (Surgery)
PH	Public Health
PHO	Pediatric Hematology-Oncology (Pediatrics)
PIP	Immunopathology (Pathology)
PM	Physical Medicine and Rehabilitation
PMP	Pediatrics/Physical Medicine and Rehabilitation
PN	Pediatric Nephrology (Pediatrics)
PS	Plastic Surgery
PTH	Pathology
PUD	Pulmonary Diseases (Internal Medicine)
RHU	Rheumatology (Internal Medicine)
RNR	Neuroradiology (Radiology)
RO	Radiation Oncology
SP	Selective Pathology (Pathology)
TS	Thoracic Surgery
TY	Transitional Year
U	Urology
UP	Pediatric Urology (Urology)
VIR	Vascular and Interventional Radiology (Radiology)
VS	Vascular Surgery (Surgery)
