# Section V

## Institutions and Organizations Participating in Graduate Medical Education Training

This section contains a list of hospitals and other organizations participating in graduate medical education. There are 1,647 institutions listed in this section.

Approximately three-fifths of these institutions are identified as the "sponsoring organization" for at least one residency program. The definition of sponsoring organization indicates that this organization has administrative responsibilities for the programs under its purview; that is, the organization monitors the quality of the education, coordinates accreditation activity, and administers the funding of the program. The sponsoring organization can be either a hospital, a medical school, an educational consortium, or a corporation. The sponsor may or may not be the major site of training, may or may not be the geographic location of the program director, and may or may not be a clinical facility.

The list is intended as a reference for information about the institutions which are part of a residency program. Candidates seeking a residency should refer to the list of programs in Section III. Applications for a residency position *should be addressed to the program director* rather than to an institution.

There are several additional institutions to which residents rotate for a brief period during the training program. Space limitations preclude listing these institutions in this *Directory*.

### Relationship Between Hospitals and Medical Schools

It is *not* a requirement that hospitals have a formal relationship with a medical school to have an accredited program. The type of medical school relationship of an institution has been provided by the dean of the medical school, and is listed as an item of information. The type of medical school-hospital relationship is indicated as M (Major), G (Graduate Only), or L (Limited). The number code following identifies the medical school. (See Appendix D for a list of schools.)

*Major* affiliation signifies that an institution is an important part of the teaching program of the medical school and is a major unit in the clinical clerkship program.

In general, major teaching institutions provide clerkship experience in two or more of the major services, i.e., internal medicine, surgery, pediatrics, obstetrics-gynecology. An institution responsible for most of the teaching in a single specialty, such as psychiatry or pediatrics, may also be considered a major affiliation.

In a major teaching institution medical students serve clinical clerkships regularly, on inpatient services, under the direct supervision of medical school faculty.

A major teaching institution may or may not be used for medical school residencies.

*Graduate* affiliation indicates that the institution is used by the school *only* for its graduate training programs. The GRADUATE designation is used only for institutions in which one or more of the following arrangements is in effect:

a) The house staff of the training programs are selected by officials of a medical school department or by a joint committee of the institution teaching staff and medical school faculty.

- b) The medical school faculty (other than the institution's attending staff) is regularly scheduled to participate in the teaching programs of the institution. If the medical school faculty participation at the institution is limited to an occasional lecture or consultation visit, or if the institution's residents attend medical school teaching conferences only as visitors, the institution is not designated as having a graduate affiliation.
- c) A contractual arrangement (with or without financial commitment) specifies the medical school participation in the organization and supervision of the graduate training program in the institution.
- d) There is some degree of exchange of residents between this institution and the principal teaching institution of the medical school.

*Limited* affiliation signifies that the institution is used in the school's teaching program only for brief and/or unique rotations of students or residents.

### Glossary of Terms Used in This Section

*Medical School Affiliation (Med. Sch. Affil.)*—The type of affiliation the institution has with a medical school and the medical school code number.

*Staff Physicians*—The number of medical physicians (MDs) and osteopathic physicians (DOs) who have privileges to admit patients into the institution.

*Beds*—The number of overnight beds in the institution, including private beds and excluding bassinets.

*Average Daily Census (ADC)*—Average daily census rate of the teaching beds in the institution over the past 12 months or fiscal year. The average daily census rate is the average number of patients (excluding newborns) receiving care each day during a reported period.

*Specialty*—The alphabetic specialty code for accredited programs at the institution.
